Dear Miss Evans:

With reference to your letter of October 17th, the per capita grant for the quarter ended September 30th has gone forward as follows:

OLD SUN	Average: 98.7
September Earnings	\$ 4,071.38
Special Grant	370.12
Emergency Grant (\$30.)	<u>740.25</u>
	\$ 5,181.75
Less Advance	<u>1,600.00</u>
	\$ 3,581.75

Arrangements are being made to forward under separate cover an advance of \$1,600.00 on the December Quarter.

Yours truly,

Philip Phelan,
Chief, Training Division.

Miss E. Evans,
Accountant,

The Principal, Old Sun Indian Residential School,
Gleichen, Alberta.

With reference to the September Quarter Return of the Old Sun's Indian Residential School, it is noted that at least seven pupils are shown in residence for the full quarter but at the same time are shown as having been absent from the classroom for the entire period. There are numerous reasons why these children could be absent from the classroom but it makes the return more understandable if these reasons are shown in the "Remarks" column. If they are employed at a trade this should be shown in the column of "Number of hours at trade or industry". Please advise if this is the case of these seven pupils who were not in class during the September Quarter.

Bernard F. Neary,
Supt. of Welfare & Training.

Mr. W. P. B. Pugh,
Superintendent, Indian Agency,
Gleichen, Alberta.

Old Sun's Indian Residential School

We find it necessary to send back the September Quarterly Return, although you have evidently reviewed it as you have signed the Return.

It is noted that grant for the full quarter has been requested for Pupil 242 - Edward Wolfchild and Pupil 263 - George Turning Robe. We were under the impression that both these boys had been in the Crowfoot School during the September quarter. As a matter of fact, we are not allowing the Crowfoot School for their maintenance during the September quarter, but at the same time, it is felt that the Old Sun's School is not entitled to receive grant for them when they were not in the school.

The necessary changes should be made and the Return sent back to us.

PP/ST
Attach.

Miss E. Evans,
Accountant,
M.S.C.C.,
102 Bank St.,
Ottawa.

Dear Miss Evans:

The Auditor General's Office has recently audited the quarterly return for the Indian residential schools and has brought to our attention a discrepancy shown on the September 1951 Return for the Old Sun's Indian Residential School.

The Principal had claimed 62 days grant for pupil # 221 while it was noted that this pupil was not in residence during June, consequently grant for 62 days could not be allowed. As the grant for this pupil was already paid there is an overpayment of \$48.65 which is to be adjusted on the June 1952 Per Capita Grant payment.

In view of the above information the Per Capita Grant earnings for this school for the June Quarter will be as follows:

Aver: 128

June Earnings	\$ 10,625.92
Less Overpayment	48.65
	<u>\$ 10,577.27</u>
Less Advance	<u>6,000.00</u>
	\$ 4,577.27

Yours sincerely,

Philip Phelan

Dear Mr. Phelan: re: December Qr. grant
 for Old Sun's (Blackfoot) School

Referring to your letter to me of
January 28, 1953 re the above School, I find that we
received a cheque for the December quarter for
\$10,160.21 instead of the \$10,243.22 mentioned in
your letter.

I shall be glad to know why there
is a difference of \$83.01.

Thank you for your attention to this
matter.

Yours very truly,

E. Evans

RE: Vouchers # 307 & 308

Dear Sir:-

Re attached Voucher #307 & 308 - a small tornado on the evening of July 27th hit Old Sam's barn and did damage by ripping off a large door in the hay-loft and also damaging the roof. As the barn was full of hay it was necessary to have damage repaired.

The School authorities gave Robinson, the carpenter as much assistance as possible and this account is submitted for payment, please.

Your obedient servant,

EXTRACT FROM REPORT OF MR. AGENT GOODERHAM

for the month of July, 1927, on the
Old Sun's Indian Residential School.
Report dated August 3, 1927.

Original on File 104-1-7.

"The old discarded school now sitting beside
the Principal's house was inspected by the writer
and a responsible contract in company with the
Principal. To move this building and put in re-
pair with basement will cost a considerable amount -
in fact, more than it is worth, in our opinion. I
now recommend that it be pulled down and the material
used for other buildings."

Ottawa, August 16, 1927.

Sir:

I wish to refer to that portion of your July report on the Old Sun's Indian Residential School which has to do with the old schoolroom close to the Principal's residence. I have written to Mr. Commissioner Graham, informing him that it is your advice that this building be demolished and the material used to the best advantage.

Your obedient servant,

A. F. MacKenzie,
Acting Asst. Deputy and Secretary.

Sir:

I have to inform you that Mr. Indian Agent Gooderham reports that the old classroom situate close to the Principal's residence at the Old Sun's Indian Residential School is not worth putting into good repair and that it would be advisable to demolish it and use the materials elsewhere. When you have an opportunity to look into this recommendation, you may take whatever steps you and the Rev. Principal agree are necessary.

Your obedient servant,

A. F. Mackenzie

The Secretary,
The Department of Indian Affairs,
OTTAWA, Ontario.

Dear Sir:

I enclose herewith in triplicate an account from J.J. Robinson, Gleichen, Alta, amounting to \$25.65, for repairing the track in the barn at the Old Sun School.

In submitting this account which, as you will observe, has been certified by your Local Representative, I should state that in his covering letter in connection with this and other accounts, the principal informs me that the man who effected repairs declared that the track when installed had not been sufficiently braced. The Principal also adds in confirmation of this statement that the school management only attempted to lift what the sling was supposed to carry, not knowing that there was a weakness in the track.

As our Society is meeting the cost of the materials, amounting to over \$12.00, an expert laborer was required to do the work. I trust that your Department may agree to meet this expenditure and furnish Mr. Robinson with a Cheque at your earliest convenience.

Yours very truly,

TBRW/K

EXTRACT FROM REPORT OF MR. AGENT GOODERHAM,
for the month of August, 1927, on the
Old Sun's Indian Residential School. Re-
port dated September 9th, 1927.

Original on File

"This school was visited on a number of occasions during the holidays and since the children returned.

"A lot of repair work was necessary and the Principal had some inside and minor details looked after.

"After the visit of Dr. Duncan C. Scott on the 18th and of Commissioner Graham on the 19th, arrangements were made for the erection of a granary, root-house and certain work on the cellar for refrigeration, which were authorized.

"The old school-house has also been torn down and the material saved for use when required. The granary and root house are in the course of construction.

"There are 78 pupils on the roll and two more desks are required and authority to purchase is requested, please. One old sewing machine is beyond repair and should also be replaced. A number of mattresses have been repaired but will not last long."

Ottawa, September 15, 1927.

Gentlemen:

I have to request that you will arrange to supply one (1) Singer sewing machine for the use of the Old Sun's Indian Residential School at Gleichen, Alta. The machine required is that described in your catalogue as -

"No. 2 - 5 Drawer Machine, 127 - 3 G.O."

Please notify Mr. G. H. Gooderham, Indian Agent, Gleichen, Alta., from your nearest branch office concerning who will furnish this machine and when it will be available. Mr. Gooderham will then give your local representative directions for delivery.

The account for the machine should be made out in duplicate, and should show the retail price and discount of 40% allowed "on which terms purchase is made". Please forward your account to Mr. Gooderham, who, upon receipt of the machine, will certify the account and submit it to the Department for payment.

Yours very truly,

Sgd. F. H. Paget

RECD.

Ottawa, September 15, 1927.

Sir:

Referring to your report of the 9th instant on your inspection of the Old Sun's Indian Residential School during the month of August, last, in which you request that 2 more desks and a new sewing machine be supplied, I beg to inform you that we are today placing an order with the Singer Sewing Machine Company to supply, from their nearest branch office, 1 machine of the style described in their catalogue as -

" No. 2 - 5 Drawer Machine, 127 - 3 G.O. "

This machine will be supplied from the nearest branch office of the above Company, and you should furnish their local representative with the necessary directions for delivery.

The account for the machine will be sent you in duplicate, and should show the retail price and discount of 40% allowed. When the machine arrives, if in good condition, you should certify the account in the usual manner and send it to the Department for payment.

Regarding the two desks required, I beg to say that you may arrange for the purchase and delivery of same. They should be of the same type as those at present in use in the school, and you should place the order with the nearest agency supplying desks of a similar type.

Please obtain an account, in duplicate, covering the cost, which you should attach to proper voucher forms, certify in the usual manner and send to the Department for payment.

Your obedient servant,

IN YOUR REPLY REFER TO

No 401-11A C.E.

ALSO TO DATE OF THIS LETTER

COMMISSIONER'S OFFICE,

REGINA, SASK., September 23rd, 1927.

Sir:-

Mr. Gorderham has written pointing out that some field tile which was supplied to the Old Sun's School two years ago to put the septic tank in better working order, has not yet been made use of and has asked authority to lay this pipe at an approximate cost of \$200.00, pointing out that the school cannot supply all the man power, but could assist with horses and a plow. As the work should be proceeded with and completed before freeze-up, I have authorized the Agent to proceed with it, but have stated that the services of many of the elder boys could well be made use of and the school should provide all the assistance it can.

Your obedient servant,

W. M. Graham,
Indian Commissioner.

with Dr. Westgate
in relations
J.H.D.
20/8/27*

"OLD SUN" SCHOOL
GLEICHEN, ALTA.

May 28th, 26.

The Rev. T.B.R. Westgate, D.D.,
Indian & Eskimo Commission,
The Bible House,
Alexander Ave.,
Winnipeg, Man.

Dear Dr. Westgate:-

I am enclosing you the account which was under discussion when you were on your last visit to us. After going into the matter carefully with the contractor, Mr. W.T. Scott, it was found that in order to turn the present study into a suitable kitchen would have cost him around \$125.00, ~~and~~ this arrangement would have been a source of danger from fire. A new chimney for the kitchen fire would have had to be constructed, and entrance made with porchway into the study, etc. Furthermore as has already been pointed out no suitable entrance in to the basement could be located other than an outside one, which would have been useless or at least a great hardship especially during the winter months.

The present kitchen as you know is a mere kitchenette as it covers the stairway into the basement, as well as serving as a kitchen. The present arrangement on the whole cost the Department about the same as any other suggested arrangement, if any had been forthcoming at the time, and furthermore serves the purpose with greater convenience and safety.

Considering everything, I feel that the Indian Department will not be out of pocket in meeting the ~~the~~ enclosed account as a somewhat similar amount would have had to be spent in any case.

Regretting that this unnecessary trouble is being given you,

I remain,

Yours very faithfully,

Enclz.

OFFICE OF
INDIAN AGENT

Oleichen, Alta.

September 18th, 1937.

Dear Sir:-

I enclose herewith a voucher for \$183.70 in favour of Mr. W. T. Scott, Contractor, for work and material supplied by him in the erection of a kitchen at the residence of the Principal of Old Sun School. This is sent at your request when the matter was drawn to your attention on your visit to this Agency in August last.

Briefly, in 1935 authority to rebuild this house was confined to a definite figure by Commissioner Graham. The kitchen was an extra and the Principal assumed responsibility for its erection. Unfortunately, neither the Church authorities nor Mr. Gibney have paid Mr. W. T. Scott. The kitchen was needed and has been in constant use.

Supporting vouchers and Time Sheets as rendered by Mr. Scott are attached. They were checked at the time the work was done and are in order.

Your obedient servant,

[Signature]

OF THE

M. S. C. C.

PRINCIPAL AND MISSIONARY:
REV. F. M. ROSS GIBNEY, L.Th.

"OLD SUN" INDIAN RESIDENTIAL SCHOOL
GLEICHEN, ALTA.

Nov. 4th, 1927.

The Secretary,
Dept. of Indian Affairs,
Ottawa, Ont.

Dear Sir:- Re Fire Protection at the above School.

In reply to a recent circular from your Dept. re the above matter, I beg to state the our protection is adequate and the exits are satisfactory and accessible. I am having the fire hose lines tested and thoroughly overhauled at the present time.

The Matter of fire drill at regular times and regular inspection as recommended has been attended to in the past but will be more carefully made a matter of first importance from this on.

Believe me,

Yours very faithfully,

F. M. Ross Gibney
Principal.

IN YOUR REPLY REFER TO

NO. 401-11A C.E.

ALSO TO DATE OF THIS LETTER

COMMISSIONER'S OFFICE,

ED

REGINA, SASK., November 4th, 1927.

Sir:-

I beg to forward herewith and recommend for payment the undermentioned Blackfoot Agency vouchers for the labour and material required to make the root cellar at the Old Sun's Indian Residential School.

The work was done on a 10% basis over cost by the local contractor, W. T. Scott. An excellent cellar has been constructed. It has a large capacity and is divided into a number of bins. Material from an old dismantled building was used and only cement and hardware were purchased.

Vr. 335	W. T. Scott, Gleichen, Alta.	\$424.34
Vr. 334	McKay Hardware Co., Gleichen, Alta.	13.35
Vr. 332	Crown Lumber Co., " "	113.05
Vr. 333	R.S. McQueen, " "	24.50

Department authority is dated May 19th, 1927, File 104-1-5.

Your obedient servant,

W. M. Graham,
Indian Commissioner.

COMMISSIONER'S OFFICE,

ED

REGINA, SASK., November 17th, 1927.

Sir:-

I beg to forward herewith and recommend for payment Blackfoot Agency vouchers Nos. 328-330 and 331, amounting to \$274.34, \$16.00 and \$431.30, in favour of W. T. Scott, R.S. McQueen and the Crown Lumber Co., all of Gleichen, Alta. These are for material and labour in connection with the Old Sun School granary.

The work was done, as arranged, on a 10% commission basis over labour and material by W. T. Scott. Receipts and vouchers covering the above are attached, also, for reference only, copies of vouchers 313 and 329 which were sent direct for payment by the Indian Agent.

The authority for this expense was given by the Deputy Superintendent General when on his visit to the reserve and school last summer.

Your obedient servant,

W. M. Graham,
Indian Commissioner.

OFFICE OF
INDIAN AGENT

Gleichen, Alta.

November 16, 1927

Dear Sir:-

RE Attached requisition - I beg to draw your attention to the request for cabinets for the Class-rooms. These are needed particularly in the JUNIOR room. When the Frigidaire system was installed lately, considerable shelving was taken down and part of it is still unused and would, I believe, be sufficient to make cabinets. The cost would therefore be confined to labour. I would recommend that this item be authorized.

I presume that the balance of the requisition is in order and part at least, submitted on the advice of the School Inspector who visited the school last week.

Ottawa, November 26, 1927.

Sir:

I have your letter of the 16th instant, forwarding a requisition from the Principal of the Old Sun's Indian Residential School, and requesting, among other supplies, that cabinets be supplied for the classrooms, particularly in the junior room.

In this connection it is noted that there is a quantity of shelving on hand that was removed when the Frigidaire system was installed which would be satisfactory for the making of suitable cabinets. You may arrange for the labour in having the cabinets required by the Principal installed. If any further supply of material is required, you may also purchase same. No unnecessary expense should be incurred in having this work completed, and any material on hand should be utilized for the purpose as far as possible.

When the work is completed, please forward a properly certified voucher, in duplicate, covering the cost of the labour and for any extra material supplied.

Your obedient servant,

J. D. McLEAN

M. S. C. C. REQUESTS FOR ESTIMATES, 1928-29

FORWARDED UNDER COVER CANON GOULD'S LETTER

(ON FILE 160-2) OF NOVEMBER 21, 1927.

5. OLD SUN

(a) School to be made weatherproof.
Estimated cost \$10,000.

(b) New residence for the Principal, as an annex to the main building, if possible.
Estimated cost \$ 7,000.

(c) Additional land.
(a) The late Chief Yellowhorse's holding now worked by the School. Acreage, about $\frac{1}{2}$ section; about 50 acres fit for cultivation.
Estimated cost \$ 300.

(b) Extra pasture to the south of the school to be granted by the Indian Dept; the school at present owns about a section of land all told.

(d) Interior decoration of the main building.
Estimated cost \$ 500.

(e) Clothes cupboards or wardrobes in seven staff rooms.
Estimated cost \$ 200.

(f) Farmer's residence. " "\$ 4,000.

(g) New and larger piggery " \$ 500.

(h) New poultry house " 500.

(i) Stock shelter near barn " 300.

(j) Electric flat work ironer " 250.

(k) Dairy improvements " 100.

Total estimated cost \$23,650.

N.B. (1) As this school is lighted by the Bassano Hydro Electric System the installation of the flat work ironer will be of very great service.

N.B. (2) The above items were discussed with the Deputy Supt. General during his visit to this school in the late summer of 1927.

OFFICE OF
INDIAN AGENT

B.12.

Oleichen, Alta.

November 30, 1927

Dear Sir:-

The Principal has made a request for at least 12 small bracket lamps for emergency use at Old Sun School. These would be placed at necessary points and always in readiness in case of the failure of the electric light. I would recommend the purchase as once or twice in the past after severe storms the electric power has been cut off. The cost would not be more than \$15.00 or \$20.00.

Your obedient servant,

Indian Agent.

The Secretary,
Dept. of Indian Affairs,
OTTAWA - Ont.

Ottawa, December 6, 1927.

Sir:

I have your letter of the 30th ultimo, relative to the request of the Principal of the Old Sun Indian Residential School to be supplied with 12 small bracket lamps to be used in case of failure of the electric lights.

In reply I beg to say it is considered that if the school authorities require this equipment they should be responsible for the purchase of same from per capita grant or other receipts.

Your obedient servant,

T. R. L. MacInnes

Old Sun School,
Gleichen, Alta.
Nov. 25th, 1927.

G.H. Gooderham, Esq.,
Indian Agent,
Gleichen, Alta.

Dear Mr. Gooderham:-

One of our Pressure Tanks sprung a leak on Wednesday night last. I had Mr. Michael out to examine it, and we find that it is the old tank which has gone under neath. It is eaten right through and it is impossible, I believe, to fix it in its present narrow confines. We had it disconnected from the new tank, which was placed here five years ago, but this will only meet an emergency condition as we shall have to pump very constantly. It will be necessary to look into this matter as soon as possible. Mr. Michael and I have gone into the matter very closely and can give you a report as to what ~~what~~ would be best to do under the circumstances.

Also our pump has been inspected and as the head has not been out since it was placed here about five years ago, it will be absolutely necessary to have this seen to; as well and a new belt is required. This will cost roughly about \$50.00.

Yours faithfully,

J. Ross Gibson
Principal.

BLACKFOOT AGENCY.
NOV 26 1927
GLEICHEN, Alta.

*Re above - Inspection made on 29th Dec.
If tank cannot be repaired it would be very costly to
install another at same point. I believe, whereas a new
tank could be sunk at the west wall off the pump room where
is the rear of the kitchen. Present cap. of tank tank is
1100 gal. (one old & one new tank). May be better to discuss
both and install every first sized one at above mentioned place.*

104-1-5

Gleichen, Alta., Dec. 2, 1927.

Sir:

I beg to submit the following report for the month of November 1927.

x x x

SCHOOLS

At Crowfoot school threshing was completed on the 5th. An inspection of fire equipment was made by Mr. Duncan Clark, Farm Instructor for the writer and Pyrene Extinguishers have been refilled and placed in convenient places in the school. The Principal reports that the hose is in order and that drill carried out. All the pupils were well and three of the older girls were married this month.

At Old Sun's two inspections were made. Considerable improvement was noted in interior economy. One of the pressure tanks is pitted and leaking badly. It cannot be repaired, I understand and replacement will be matter for consideration by the Department. One tank is now serving all purposes and should do for the winter months if the pressure is kept up continually.

x x x
G. H. Gooderham.
Agent.

Under the heading of Schools, Mr. Gooderham makes a comment about one of the pressure tanks at the Crowfoot Institution being out of order and beyond repair. He has not made a special report on this and I have no particulars regarding it but am writing to the agency today for further information.

W. M. Graham.
Indian Commissioner.

COMMISSIONER'S OFFICE,

REGINA, SASK., Dec. 20th, 1927.

W.

Sir,

*Answered
MP*

In his report for the month of November Mr. G. H. Gooderham referred to the poor condition of one of the pressure tanks in the Old Sun School and, while, stating that this matter would need to be brought to the attention of the Department, I thought that the other remaining pressure tank would be sufficient to meet requirements until the spring.

I asked him for further information and I am now in receipt of a letter from Mr. Lewis, who is in charge during Mr. Gooderham's absence, stating that these tanks are in the ground with a solid concrete floor above, with access to them through a man-hole in the floor. He adds, presumably upon information given him by a local plumber, that the cost of taking up this floor and replacing the tank would be considerable and suggests that a cheaper method would be to install a new 2100 gal. tank in the basement of the school at a cost in the neighborhood of \$1,000.00. I have not verified these figures, but as a new 2100 gal. tank would cost in Winnipeg approximately \$800.00, the remaining \$200.00 seems a more than sufficient sum to transport it to Gleichen and install it. It is suggested that in case of fire the present water supply would be inadequate with the use of only one pressure tank and he also states that those now in use are of a capacity of 1110 gal. each. However, I think the Department will agree with me that the existing tank

The Secretary,

COMMISSIONER'S OFFICE,

REGINA, SASK., Feb. 15th, 1928

Dear Mr. Scott:-

I am enclosing herewith a short report on the Crowfoot and Old Sun's Indian Residential Schools in the Blackfoot Agency.

There is nothing in the report regarding the Crowfoot School which requires any attention. The matter of fire escapes leading from the front dormitories has been dealt with by supplying chain ladders.

You will note the Inspector states that the situation at Old Sun's was about as usual. We have had some correspondence with you regarding the replacing of one of the pressure tanks at this institution. The only thing that can be done is to put in a new tank in the Spring. I understand the cost of this will be about \$1000.00.

Yours very truly,

W. M. Graham
W. M. Graham,
Indian Commissioner.

At the Old Sun's School I found things in general about as usual. The children appeared well but the school was not a bit tidier than it usually is. I also checked up the fire fighting apparatus here and found everything in good order. Fire drill is carried on and everything in the way of equipment has been supplied and every precaution is taken to guard against fire. The only thing that is lacking is an adequate supply of water. This, of course, would have nothing to do with getting the children safely out of the building in case of fire, and while the building might burn down owing to a shortage of water it would not prevent the children being saved. You have had some correspondence with Mr. Lewis regarding the water supply and I beg to say that the water is pumped from a well into two pressure tanks. These tanks are in a cement basement under the basement proper and are covered all around with cement, the only access to them being through a manhole. One of the tanks was new when the school was remodeled, and the other one was old. The old tank has become worn out through rust and corrosion and it does not appear practicable to me to tear up the basement and break up the cement in order to hoist this tank up. The more satisfactory solution would be to get a 2500-gallon tank and there is a room in the basement only a few feet from the well where it could be placed. Some wall would have to be taken down in order to get it in but this would entail a much smaller cost than the other plan. This matter, however, can wait until Spring comes, as I see no urgent need for it.

I have the honour to b

Sir,—

Reference attached voucher No 525 which was received in this office to day, I beg to inform you that this fire hose was purchased by the Principal of Old Sun School, locally; he being under the impression that he had authority to purchase.

On enquiry at the wholesale rubber company I find that the price charged is very much lower than that quoted by the wholesale house and as this fire hose was absolutely necessary and the price charged fair and just, I would recommend that this account be paid.

Your obedient servant,

G.H. Gooderham.

EXTRACT FROM MONTHLY REPORT OF G. H. GOODERHAM,
INDIAN AGENT, GLEICHEN, ALTA., for March, 1928.

OLD SUN'S RESIDENTIAL SCHOOL

Original on 104-1-7.

Three "Globe" automatic desks are required - old tables are used and are untidy and unsightly. Dormitories require attention; beds in use are mostly hospital type and are too big; mattresses are in bad shape. At least 30 complete beds should be supplied. The hospital beds in use were supplied locally and can be returned for hospital use. Bedding was not as clean as should be expected; this is especially true in the boys' dormitories.

Sir:

Referring to that portion of your report for the month of March, last, on the Old Sun's Indian Residential School, relative to the 3 Globe automatic desks and the beds and mattresses required, I have to request that you will give further particulars. The size of the 3 desks required should be stated, also whether they are single or double. Please furnish a more extended report regarding the beds and mattresses required, giving particulars as to the size of the beds, and the condition of the ones at present in use. Please state where the beds in use were obtained, and, if a new supply is furnished, what disposition could be made of the old beds. When we have full information regarding the above, consideration will then be given to authorizing the purchase.

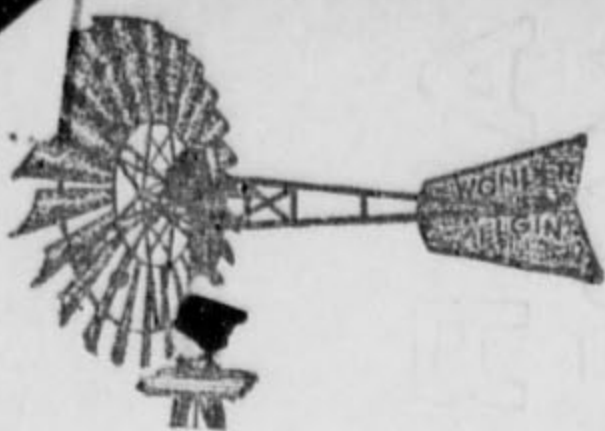

Your obedient servant,

A. F. Mackenzie

DEPARTMENT OF INDIAN AFFAIRS

MISSISSAUGA, ONT. L4V 1P1
MAY 8 1928
W. REGINA, SASK., 24th April, 1928.

Sir:-

Adverting to Department letter No. 104-1-5 of the 30th of December last, I beg to say it will now be in order to proceed with the matter of a pressure tank for the Old Sun's School.

Mr. Gooderham has forwarded the tender of Mr. W. T. Scott for digging a trench twenty-two feet long, seven feet wide, eleven feet deep, also, for putting in a concrete base to carry pressure tank, to cut away concrete wall in main wall to admit pressure tank, to cut floor in pump house 7 ft by 3 ft by 7 ft and run the concrete wall around same 6 inches thick. Labour and material for the complete job \$185.00.

He also encloses a tender from Mr. L. Michael of Gleichen, Alberta, to furnish and install one pneumatic tank, capacity 2500 gal. 5/16" shell with 7/16" dish head, with special tapping 1/2 inch for guage glass and 2" inlet and 2" outlet 4 inches apart connected to pump with 2" gate valve and safety valve and twin connected with the tank now in use (865 gal.) making a total of 3365 gal. and paint the tank with two coats black asphaltum paint and have it thoroughly dry before installing same for \$989.00.

The total of these two tenders is \$1174.00 and in this connection Mr. Gooderham points out that Mr. L. Michael is the only local plumber and his prices invariably compare favorably with those from plumbers in Calgary. Will the Department please grant authority to proceed with the work.

Your obedient servant

The Secretary,
Dept. of Indian Affairs,
Ottawa, Ont.

May 8, 1928.

Memorandum:

OK del
DR. SCOTT.

For some time there has been correspondence with Mr. Commissioner Graham, regarding the water supply at the Old Sun's Indian Residential School. When a decision was made concerning the best remedial measures, it was too late last fall to undertake the work. Mr. Graham now proposes to install a pressure tank and asks for authority to accept the offer of Mr. L. Michael, who is "the only local plumber and his prices invariably compare favourably with those from plumbers in Calgary." The cost of the work complete, which is recommended by both Mr. Orr and Mr. Ghene, is \$1174.

As funds can be found in the General Appropriation for Indian Education, I wish to recommend that the improvement be effected.

Russell H. Turner
Supt. of Indian Education.

Sir:

I have your 401-11A C.E. of the 24th ultimo, with reference to a new pressure tank that is required at the Old Sun's Indian Residential School. You may make arrangements for this activity, as outlined in your letter, at a total cost of \$1174. When the work has been satisfactorily completed, you should forward properly certified vouchers, in duplicate, enclosing the offers made by the firms that are given the work.

Your obedient servant,

A. F. MacKenzie

Old Sun School,
Gleichen, Alta.
May 22nd, 1928.

G.H. Gooderham, Esq.,
Indian Agent,
Gleichen, Alta.

Dear Sir:-

In reply to the enclosed letter re desks and beds, I
beg to give the following details:-

Desks:- Type: Globe Automatic. Firm: F.E. Osborne, Calgary.
Size: Number 2, for pupils 13 to 15 years, height 16 in.
Two (2) of this size required.

Same type. Size: No. 3, for pupils 10 to 12 years,
height 14 1/2 in.
One (1) of this size required.

These desks are complete single desks. Carriage prepaid
on all orders of 3 or more desks.

Beds:-

Number of beds on hands: 82.
The actual number of new beds on hands and in good condition: 16.
is 82 - 16 or 66. The new beds are of the juvenile size, size
6 ft. by 2 1/2 ft. These are the type required for all the senior
pupils. The size required for the juniors would be 5 ft. by 2 1/2.
I have noticed that these two sizes have been provided in some of
the new schools which I have visited from time to time.

Our requirements, therefore, would be as follows:-

24 Juvenile beds complete, with springs and mattresses. 6 x 2 1/2
40 Children's beds, " " " " 5 x 2 1/2

64

The condition of beds (old) on hands is as follows:-

All bedsteads in fair to good condition. 46 springs beyond repair.
52 mattresses in bad condition.

The old beds on hands were either here when the school
was reopened in the spring of 1923, and were enamelled by the school
staff, and a number were provided out of a supply on hands at the
local Agency. These we also enamelled.

I beg to submit that the smaller beds as provided in
some of the other schools would be more easily handled by the
children, the mattresses would consequently last longer, and the
dormitories would be less congested.

Yours faithfully,

F. M. Ross
Principal.

May 23rd. 1928

Dear Sir:-

In reply to yours of the 14th ult. re
beds at the Old Sun School, I attach hereto a report
from the Principal which answers most questions asked.

Re disposition of old beds, I may say
that Hospital beds were supplied from the carload of
S.C.R. equipment which was allocated to this Agency
some years ago when S.C.R. hospitals were disbanded.
Such beds are in reasonably good condition can be re-
turned to the Agency for use at the hospital and for
issue to Indians requiring beds. This type bed is not
suitable for the school and takes up considerable space.

Your obedient servant,

Indian Agent.

104-1-5.

Ottawa, May 29th, 1928.

Sir:

I have your letter of the 23rd instant, enclosing a communication from the Principal of the Old Sun's Indian Residential School relative to the extra school desks and beds required.

In reply I beg to say that you may place an order with F. E. Osborne, Calgary, to supply the following desks:

2 No. 2 Globe Automatic Single Desks,
1 No. 3 " " " " "

Please obtain an account, in duplicate, which you should certify after the desks have been received, if in good condition, and forward to the department for payment.

Relative to the beds required, the department is not clear from the Principal's letter as to the exact sizes required. I might add that the type of bed we usually supply is the institution bed, 6' x 2½' wide for the senior pupils and 5½' x 2½' for the younger pupils, complete with springs. We do not supply a made up mattress, but furnish mattress casings instead, and these can be filled at the school. When we have definite particulars as to the size of the beds required, consideration will then be given to placing an order here for the supplying of same.

Your obedient servant,

OLD SUN SCHOOL BURNED

Building on Indian Reserve— All Children Safe

Gleichen, Alta., June 27. — Fire breaking out in the basement of Old Sun school on Blackfoot Reserve, one mile south of Gleichen, last night, destroyed the main building.

During the late evening smoke was noticed coming out of a store room. Already over half of the children had gone to bed, but all were brought to safety, thanks to an orderly exit, according to rules of the fire drill which had been practised among the staff and children. It is believed that the fire was started by spontaneous combustion and it spread rapidly.

The building, being owned by the Indian Department of the Federal Government, no insurance was carried.

All the heavy clothing for the children for the coming winter, which was donated by the ladies of the Toronto diocese of the Anglican Church, was destroyed.

Dear Mr. Scott:-

You have been advised by Agent Gooderham that the Old Sun School was burned to the ground last night. It is stated that the fire started in a cellar room, and no doubt it was caused by spontaneous combustion.

In a phone message a few minutes ago, Agent Gooderham stated that the children were all safe and have been sent to their homes.

I would ask you not to take any definite steps in connection with the re-building of this school until I have had an opportunity of discussing the whole school situation with you.

Yours very truly,

W. M. Graham

Dear Sir:-

In confirmation of my wire of even date, Old Sun School is burned to charred ruins from a fire which seemed to originate in a combination dairy and storage cellar last evening. I am of the opinion that the fire was spontaneous combustion of raffia and other stuff which was stored in this room. Fire fighters with chemical engines were rushed from Gleichen but it was nearly impossible to get at this room as it was originally a root-cellar with only one entrance from the inside of the building. The smoke was intense and the water supply very limited and the fire got into the wood-work of the main structure and was soon out of control. An attempt was made to save the front of the building by setting off dynamite in the middle area. This was not successful.

All children and staff were out of the building and are safe & sound. The children were sent home with their parents during the night and will remain there for the present as holidays are practically at hand.

The Principal's house is intact but Mr. Gibney suffered loss by damage to furnishings which were moved out. The water supply & electric energy for the house and barn was cut off but the Power Company will no doubt remedy this shortly.

I have turned over the vacant house half a mile North of the school for the use of the Farm Instructor and others of the staff and their effects are being moved today.

Practically nothing of value was salvaged and machinery in the basement ~~is~~ junk now. Everything in our power was done to stop the fire the origin of which is conjecture. Fortunately, good fire drill prevented panic and no pupils or members of the staff suffered except ~~minor~~ from sleep and excitement. I have reported the fire as required under Provincial regulations.

Your obedient servant,

Original on 104-1-1.

Ottawa, September 1, 1928.

Sir:

I have your B/12 of the 15th ultimo, with further reference to temporary day schools on the Blackfoot Reserve. The Department has given favourable consideration to your proposal in connection with the pupils at the Old Sun's Residential School, and I have to authorize you to arrange for two temporary day schools - one in the church at Gleichen and the other in a church building at the west end of the reserve. Rev. Mr. Gibney and Miss Hauver may be engaged to do the teaching. I note that the cost of preparation and equipping will not be great. If desks and blackboards are required, please make immediate requisition. Would it be possible to get along without regular school desks for the time being?

You may also ascertain what arrangement you could make for transporting the children to and from school each day. When your report in this connection is to hand, the Department will give it consideration. The funds necessary for these temporary day schools will not be taken from Band Funds, as it is the Department's practice to pay all educational costs from Parliamentary Appropriation. A copy of this letter is being directed to Dr. Westgate, of Winnipeg.

Your obedient servant,

J. D. McLEAN

The Secretary,
The Department of Indian Affairs,
Ottawa, Ont.

Dear Sir:

The Principal of the Old Sun School has just directed my attention to the urgent need of a residence for the Farm Instructor at this School, and I am wondering if it would be possible for your Department to take steps to have this building provided immediately.

The Farm Instructor is occupying at present a house loaned by the Blackfoot Agency, and situated about half a mile away from the site of the old School. The Farm Instructor is finding this, at this busy season of the year, very inconvenient, and the Principal feels that it will not only be inconvenient to him during the winter months, but a hardship as well, if he is obliged to carry on his work at this distance. The building he is occupying has no kitchen range, and he and his wife are using an oil stove of their own. If they must live there during the coming winter it will take, I understand, a good deal of coal to keep the building heated.

I am under the impression that there was an appropriation for a Principal's residence at this School this year, and although the destruction of the main school building by fire has created unexpected problems in this connection, I am of the opinion that the Farm Instructor's residence should be provided forthwith if at all possible. I have not seen the plan of the one being constructed at St. Paul's School on the Blood Reserve, but it seems to me that the building that will suit in one place would do equally well in the other.

REC'D.

Ottawa, September 10, 1928.

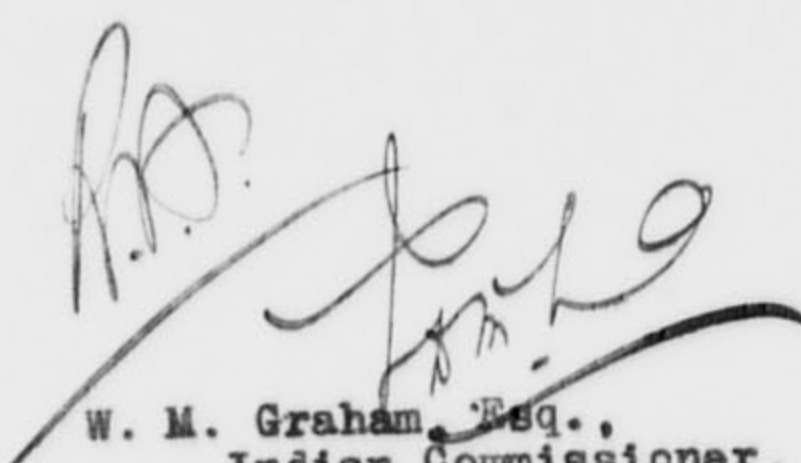

Sir:

I have to inform you that Dr. Westgate has written, urging the Department to provide, this year, a residence for the farm instructor at the Old Sun's Indian Residential School. It appears that this member of the staff is living, at present, in a house loaned by the Blackfoot agency. This temporary residence is one-half mile from the school and is, apparently, not entirely satisfactory. Would you please make enquiries, without delay, and let me have a recommendation concerning Dr. Westgate's request. If you believe a residence for the farm instructor should be erected this year, you had better telegraph your report.

Your obedient servant,

J. D. McLEAN

Sir:-

I have the honour to acknowledge receipt of your letter of the 24th instant, 104-1-15, in reference to the rebuilding of the Old Sun Indian Residential School.

The Commission when considering this question were strongly of the opinion that a School with a capacity of 100 should be erected, as although the capacity hitherto has only been 80, it was felt that with greater accommodation available there would be no difficulty in securing 100 pupils.

I have the honour to be, Sir,
Your obedient servant,

Gleichen, Alta.

October 1, 1928

Dear Sir:-

In reply to yours of the 24th ultimo, I beg to say that Old Sun School had an enrolment of 80 pupils in 1927 - 28 though the earnings never reached that average because there was always a percentage sick or out for other reasons. There were 43 boys enrolled and the excess number of boys appears to be fairly constant. It is reasonable to assume that there will be about 80 pupils and with the decreased infant mortality and better living conditions, the number of children of school age should increase over a period of years.

I would recommend accommodation for at least 80 pupils to which must be added the Staff accommodation

Your obedient servant,

Indian Agent.

RE: Vouchers #354 & 355

Dear Sir:-

Re Attached vouchers in favour of W.T. Scott:
The accounts are for repairs and alterations required at
St. John's Church, Gleichen, the Anglican Mission at the
West end of the Reserve and a 4 roomed Indian house to make
these buildings fit for Day-schools and for living quarters
for the Staff at the West end school. The Mission building
at the West end had never been made fit for use since the
Church authorities moved it from the North Camp. It was ne-
cessary to board it up outside, remove a partition inside,
repair walls roof and interior and make seats for the pupils.
The Church had some lumber on hand at the Mamaka lumber
yard and this was supplied to Mr. Scott. Small lots of
lumber were also purchased by Mr. Scott as you will note
on his account.

The accounts represent all charges in putting
these buildings into condition to operate the two Day-Schools.

Your obedient servant,

[Signature]
Indian Agent.

Principal's Residence — Annex.

Footage — 26' 6" X 30' Depth.

To be enlarged ^{at least} $\frac{1}{10}$ 30 footage X 30 depth.

N.B. Would like to have a Residence of similar dimensions to that of Middleton at St. Paul.

This will allow for Kitchen, Dining room, living room as per plan & also a necessary den or study in place of space indicated as 'Coat'.

This room is very necessary in connection with work of the Principal as Missionary on the Reserve.

This would also allow, furthermore, for four Bedrooms & Bathroom on upper floor. As the Principal's family comprises six (6) at the present time (including self & wife), this accommodation is absolutely essential.

The Principal would like to have a glassed-in verandah off living room on East front, with a French door leading therefrom. This verandah to be extended upwards as a sleeping porch, opening off front N.E. bedroom.

OFFICE OF
INDIAN AGENT

Gleichen, Alta.

January 3, 1929.

B.13.

Dear Sir:-

Herewith the rough sketch of Old Sun School and a list of suggestions for minor changes. Practically all the suggestions come from the Principal and on going over the plans with him, I have concurred with his suggestions.

As the building will face East, the space to the North of the Principal's residence and chapel should be kept in good condition - a flag pole, shrubs and flower beds will make this attractive and present a better appearance from the road running South from Gleichen, past the Agency to the school than it would if there were entrances to the building here. It is therefore hoped that all deliveries can be made from the South side. This necessitates the suggested changes in the basement plan.

You will note the suggestion that two bathrooms be removed from the first floor and that a bathroom be provided in the basement for the engineer and outside workers. The workmen are diffident about going to main floor bathrooms and I like the suggestion. In the dormitories, toilets are sufficient.

The Principal's residence is too small for the present incumbent. His requests do not seem extravagant and I hope you can meet all the suggested changes or improve on them. The lay-out, the accommodation and general plan is good I think.

With best Season's greetings,

Your obedient servant,

Indian Agent.

P.O. Box 54.
Cardston, Alta. Dec. 16th, 1928.

R. Guernsey Orr Esq.
Architect.
Department of Indian Affairs.
OTTAWA.

Re- Proposed New School to replace Old Sun's School
on Blackfoot Reserve at Gleichen, Alberta.

Dear Mr. Orr:

In further reply to your letter of the 6th instant with reference to the proposed school to take the place of the building destroyed by fire, I am now able to submit the following Report.

I proceeded to Gleichen by the early train on the 14th instant, and spent all of that day, and till noon of the following day, in gathering data and forming impressions, along the lines mentioned in your letter of instructions.

I was joined by the Indian Agent, Mr. Geo. H. Gooderham, who rendered me every possible assistance, and together we proceeded to the ruins of the old building where the Principal, the Rev. F.M. Ross Gibney came to us from the Indian church nearby where he was holding day classes. Your letter to me was read by both gentlemen, so that it would be clearly understood on what lines our co-operation was being invited.

The fire certainly made a clean sweep of the former building, every scrap of combustible material having been licked up, and the ruin and wreckage are complete. The scarred and cracked concrete walls enclose a mass of tangled and twisted iron and steel, warped I beams, ruined plumbing fixtures, laundry equipment, etc, in a seemingly inextricable mass. It is doubtful if anything remains that could safely be used again in the new building to be erected, although there might be some salvage of pipes, but even these will have lost their original temper, and it would be inadvisable to use any of them again except perhaps in unimportant outbuildings. The laundry boiler seemed to be the one solitary exception; having been placed in a concrete chamber of its own it seemed to have been more or less protected from the general fire, and an examination by a boiler inspector might result in this article being pronounced fit for further service.

With regard to the best means of filling in the old excavation, I should advise that this work be made part of the general contract for the new building, and that the contractor tendering be allowed possession of the existing wreckage. He will then carefully examine and appraise the ruins, and if he find anything there of value to him for use or sale elsewhere, he will reduce his tender accordingly, and in this way the Department will receive credit for whatever may be salvaged from the ruin before being filled in. The contractor would scarcely omit this opportunity of reducing his tender (if any salvage be possible) for he will know that his competitor might otherwise underbid him and thus capture the contract. I think, therefore, the Specifications should call for the filling in of the existing excavation as part of the general contract; and that the old concrete walls be broken off to a line at least two feet below the present grade; and that the contractor be allowed possession of the debris. The portions of the concrete walls broken off would, of course, be well buried in the filling of the old excavation. I fully agree with you that it would be unwise to rebuild on the site of the former building.

There is also an old foundation, and small excavation, from an old schoolhouse adjacent to the proposed site of the new building, which will be in the line of future driveway, and this should also be broken up and levelled. This is comparatively a very small matter, but might be included too in the general contract.

Indian Affairs. School Files.
(RC 10, Volume 6359, File 758-5, part 6)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Regarding the site of the proposed new building, we gave very careful consideration to this important matter. For obvious reasons we could not place the building on its former site; nor could we go in front of the old site without encroaching on the roadway, and also such position would be in a bad dust area. We could not place the school at the rear of the old site because of the barn, outbuildings, root-house, etc., now located there. After examining various alternative sites, we then gave attention to a site which had previously been favourably regarded and tentatively agreed upon by Mr. Gooderham and Mr. Gibney. This favoured site has an east exposure, and will face the main cross-country highway about half a mile distant, and will be clearly visible from trains approaching from the east. I could find no objection to this site, and my own opinion confirms the judgment of the local officials that this is the best site available in that vicinity. We felt there was no use going too far afield in quest of sites because of increasing distance from valuable outbuildings and farm operations.

This proposed site is quite close to the position of the former school, and equally convenient to the barn and other farm buildings. I took levels on the site itself, and found only 26½" difference between the high and low extremes. The surrounding land is practically level, but with a slight slope away to the east, which increases until a declivity is reached about 100 yards away from the proposed front of the building. Across the roadway to the north the land also falls away, and it is in that direction that the sewage disposal from the former building found its outlet. I enclose a rough sketch which may enable you better to understand the relative position of the proposed new site. Of course, in plotting the proposed new building, I could only do so with approximate correctness, as I have not exact knowledge of the size of the new building.

With regard to sewage disposal, I did not have time to run levels, but I am convinced from superficial observations that there will be sufficient fall for our purpose. The former building with its deep basement and deeper drains, had none too much fall, and the sewer was sluggish, but with the much shallower basement proposed for the new building, the conditions in the matter of fall will be much more favourable, and there is no doubt in my mind but that we can get by. The sewage disposal from the new school will be diverted into the existing sewage disposal system, provided that on examination the septic tank and disposal field are found to be suitable and in good condition. In all events the sewage will have to be taken in the same direction.

Another point to which we gave consideration was that of the school well. The drilled well in the old building was most satisfactory, giving excellent water which had never been pumped dry. Its situation now is in the midst of the general ruin, and it would be rather difficult to build a new well-house there and operate it separately. It was thought advisable to drill a new well, to come within what is shown on the Lytton plan as the "Lighting Room", so that the pumping plant might be placed in a corresponding place in the proposed new building. The purpose of retaining this "Lighting Room" is to use it as a Dairy Room, as I shall explain presently. In the unlikely event of the drilling failing to get a good water supply, then we would be compelled to utilize the well used before, in which event a "Pump House" would be necessary directly over the original well. The location of a well to serve the new building would be adjacent to the present well, perhaps about 50 feet distant, so it is altogether likely we would tap the same water reservoir below.

With regard to the best method of storing water for use throughout the building, and to obtain sufficient pressure and volume, I believe a tower and elevated tank would be the most satisfactory. In anticipation of this requirement I shall obtain data on this subject, and write again at an early date. In this connection I might say that there is now on hand at Gleichen a new pressure tank that

Indian Affairs. School Files.
(RG 10, Volume 6359, File 758-5, part 6)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

was procured by the Department for Old Sun's School, but Mr. Gooderham informs me that this tank is needed to augment the storage capacity of the water system which supplies their Indian Hospital and the Agency residences, and therefore this new tank need not be a factor in planning a water system for the new school building.

Now, with regard to the building itself, I had with me the floor plans of the Lytton school, and they were carefully examined by Mr. Gooderham, Rev. and Mrs. Gibney, and myself, with a view to determining in what respects the Lytton building seemed suitable and what alterations seemed desirable, and the suggestions which follow are respectfully offered for your kind consideration.

1. Principal's Residence exactly as shown, except to be changed to the other end of the school. It will then be next to the driveway, and will give observation of the approach to the school.
2. Boys and girls' quarters to be reversed so that the girls will occupy the side of the building next to the Principal's residence.
3. It is proposed to omit the "Second Floor" shown in the Lytton plan. The wings and centre building to remain the same size as shown. The lavatory, baths, toilets, etc, could be reduced to the needs of 90 children.
4. The rear extension from main building could be reduced in size to serve 90 children and Staff.
5. One toilet opposite laundry entrance will suffice.
6. Laundry can share in reduction of rear extension.
7. Lighting Room to be retained, but to be used as Dairy and Pump Room. An outside entrance is desired. In the proposed position of the new building this room will be the nearest point to the Barn. It might be reduced one third in size.
8. Coal Cellar to be retained, but to have reinforced concrete roof at grade level, with manhole opening and cover
9. Pantry to be equipped with Frigidaire.
10. Room shown as "Stores" adjoining Boiler Room to be changed to Engineer's Room, and to have wash-basin with H & C water.
11. Room shown as "Janitor's Room" in Basement to be used for "Stores".
12. Domestic Coal Chute and Bin serving Kitchen to be retained.
13. Boys' and Girls' quarters on the Ground and First Floors will be reversed as well as in the Basement.
14. It is requested that the Sewing Room and Class Room on Girls' Side be converted into one room instead of two as shown., the blackboard to be placed on the wall adjoining Stairway.
15. The Principal requests that the Corridor to the Residence be enclosed by accordion doors similar to St. Paul's School, so that the two class-rooms may be thrown into one large auditorium for concerts and other entertainments.
16. The arrangement of Boys' Class Rooms and Study to be retained.
17. The Class Room shown in centre main building to be converted into a Guests' Bed Room, ~~with a wash-basin and toilet~~ but may be reduced in size. The space thus saved might be utilized to form an inner Principal's Office next to the main office, some space being also taken from the main office for this purpose.
18. The Assembly Hall to share in reduction in size of main building. The Principal desires that the arrangement at St. Paul's School be similar to the arrangement at St. Paul's School.

Indian Affairs. School Files.
(RG 10, Volume 6359, File 758-5, part 6)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

19. It is desired that a "clothing room" be built in the centre of the Dormitories, - that is, one clothing room in each wing to serve both the Dormitories adjoining. These Clothing Rooms might be about 8' x 24' in size, with a doorway from each Dormitory to be kept under lock and key. Open lockers, with drawer below and hat-shelf above, might be built around the walls of this room. The Principal reports much trouble from lockers accessible to the children, whereas under the proposed arrangement the children will not have access to the lockers except when under direct supervision.
20. The Principal desires an observation window to be placed in the walls of the Staff Rooms adjoining large Dormitories, if feasible.
21. Night Lights are desired in Dormitories.
22. The room shown as "Drugs and Stores" to be included with the Staff Room to the right, and both rooms thrown into one large room to receive the bales of clothing, etc, which come annually in large quantities. Having an Indian Hospital near at hand it was not considered necessary to retain a room for Drugs.
23. In view of the suggestion that the "Second Floor" shown in the Lytton plans be omitted, it is considered advisable to retain the Infirmary as extra Dormitories should those shown in the Wings prove inadequate. The Principal thinks these rooms may not be needed as Infirmary because of the availability of the Indian Hospital, but he thinks they may be needed in case of the space in the Dormitories on the one floor being overcrowded, in which event he would assign the older pupils to these rooms.
24. If equally economical, and otherwise suitable, it is desired that the new building have a gable roof instead of a flat roof. If a gable roof be provided, it is desired that a Spire be omitted. Owing to excessive winds and driving storms, spires have given trouble, and are difficult to keep weather-proof. Instead of a Spire, the Principal requests that a small finial with Cross be placed over the central gable above the school entrance.
25. The Principal requests that a Farm Instructor's Residence be provided apart from the school building, and that this be erected in the near future. The present Farm Instructor is proving an invaluable employee, and is bringing the school farm into excellent productivity and efficiency.
26. The Residence now being occupied by the Reverend Principal and his family might well be demolished when the living quarters in the new building are ready. This building has already been moved twice, and is scarcely worth moving again. It is "ramshackle" in appearance, difficult to heat, extremely inconvenient in its interior arrangements, and would be altogether incongruous alongside a new, modern building. Its present situation is just off the proposed site of the new building. It is needed as a residence for the Principal and family until the new building is ready for occupation, and then I consider it will have served the past and present generations sufficiently, and might then be carefully taken down, and any materials of value could be used again in unimportant outbuildings, or otherwise disposed of.
27. The Principal requests that a stone name-plate, with inset lettering (or other suitable name-plate) be placed over the main entrance of the school.

I think the foregoing items include about all the suggestions that were thought of at our joint conference, and in respectfully submitting them for your kind consideration we recognize that there may be difficulties in the way of granting all the requests mentioned, or ~~other~~ reasons for modifying them. However, there was a constant effort to avoid extravagance, and to ask only those things which seem important for the efficient administration of the school, and for the health and comfort of the occupant.

Gurney Orr, Esq.,
Architect to the Indian Department,
The Department of Indian Affairs,
Ottawa, Ont.

Dear Mr. Orr:-

I shall be obliged if you can let me have a copy of the proposed plans for the new school which your Department contemplates building to replace the Old Sun School on the Blackfoot Reserve this year. Mr. Gibney the Principal of this School, states that he had heard you purpose adapting the plans used for the St. George's School at Lytton, but as I have not seen these plans, I should like to have a copy which I may submit to our Commission for their consideration.

With best wishes for the year on which we have just entered.

Believe me,

Very truly yours,

T. B. R. Westgate

TBRW/EMW

Field Secretary, M.S.C.C.

Jan. 14, 1929.

Dear Dr. Westgate,-

Replying to your letter of the 9th instant, with reference to the proposed new Old Sun's School, I would say that I am sending you herewith a copy of the sketch plan which I prepared for this building. I sent this plan to Indian Agent Gooderham some time ago, and asked him to show the sketches to the Reverend Principal and let me have their comments. I have just received the plan back from Mr. Gooderham with a few changes suggested by himself and the Principal, and we are now working on the finished plans and endeavouring to incorporate most of the suggestions made.

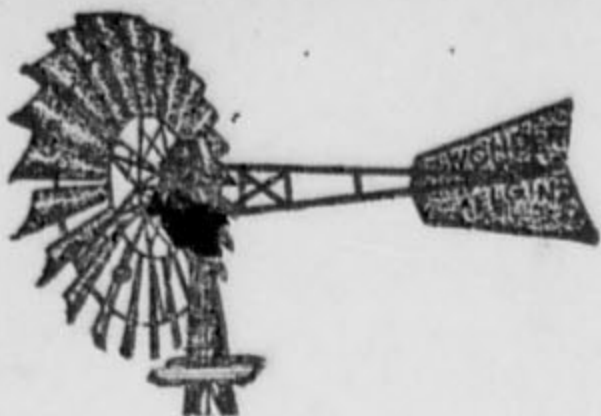

Yours very truly,

R. GURNEY ORR.
Architect for the Department.

IN YOUR REPLY REFER TO

No. B./12.

ALSO

TO DATE OF THIS LETTER

Sir,

I have a request from Rev, F.M.R. Gibney, Principal, Old Sun School, that the Department grant a small remuneration for two girls - Rita Peacemaker and Maggie Bad Boy - who assist Mrs Gibney in the preparation of the noonday meal supplied to the Indian pupils in the day school at Gleichen. Mr Gibney suggests that each girl be paid \$5.00 per month.

I think this is very fair and the smallest possible amount the Department might be expected to pay for help when it is known that 30-40 children are fed daily, school days.

I recommend this.

Your obedient servant,

G.H. Gooderham.

Indian Agent.

Asst: Deputy & Secretary,

Ottawa, January 28, 1929.

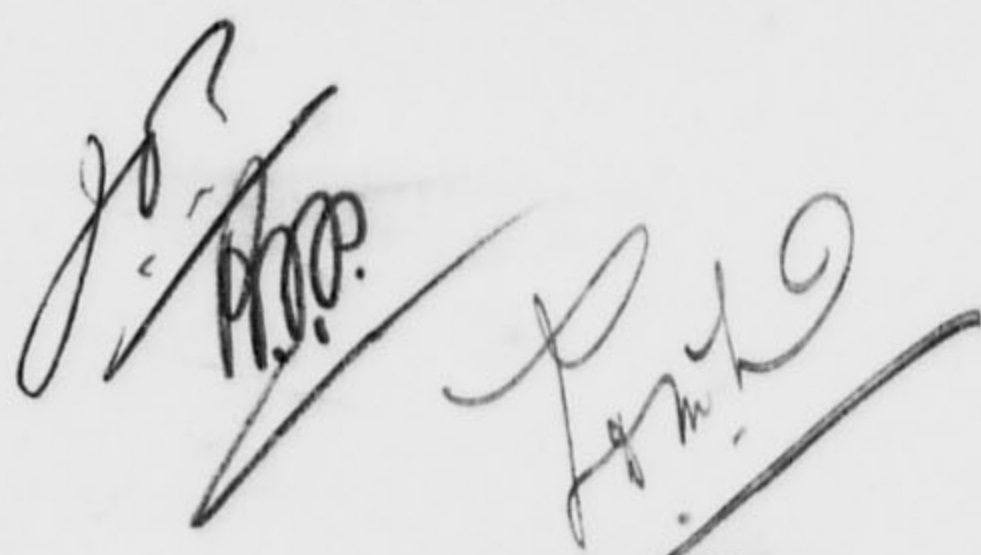

Sir:

I have your letter of the 19th instant, relative to the request of the Principal of the Old Sun's Residential School that a grant be provided to pay for the services of two Indian girls who assist in the preparation of the noon day meal supplied the pupils of the day school at Gleichen.

In reply I beg to say that the department will approve of remuneration to these girls for their services at the rate of \$5 per month each. You should forward properly certified accounts, in duplicate, from time to time for the amount due these girls for their services at the above rate.

Your obedient servant,

J. D. McLEAN

The Secretary,
Department of Indian Affairs,
Ottawa, Ont.

Dear Sir:-

During my visit to the Blackfoot Reserve last week, my attention was directed to the need of a Farmer's cottage in connection with the new building which it is expected your Department will provide during the coming summer to replace the Old Sun School. I undertook to bring this matter to your attention and I shall be obliged if you will give it your sympathetic consideration. Mr. Bates, the Farm Instructor is a very competent staff agent, and may be relied upon to place the farming activities in connection with this institution on a satisfactory basis. He should, however, have a cottage of his own detached from the main school building, and I beg to suggest that steps be taken at the earliest date possible to have this building erected.

When I visited the St. Paul's School a few days before proceeding to the Blackfoot Reserve, I went carefully over the Farmer's cottage which you have provided for this institution, and am of the opinion that a cottage built on the same plan and of the same dimensions and material would do very well for the Farm Instructor's residence at the Old Sun School.

I commend this request to your favourable consideration, and have the honour to remain, Sir,

Your obedient servant,

T. B. R. Westgate

Field Secretary, M.S.C.C.

Sir:

Dr. Westgate has written, urging the provision, this year, of a farmer's cottage at the Old Sun School. He represents that Mr. Bate, the present farm instructor, is very competent and that a cottage should be provided for him without delay. Dr. Westgate states that one similar to that erected at the St. Paul's Indian Residential School would be suitable. Please let me have your recommendation in this connection.

Your obedient servant,

J. D. McLean
Asst. Deputy & Secretary.

Reverend Sir:

I have your letter of the 7th instant, regarding the advisability of erecting, this year, a farmer's residence at the Old Sun Indian Residential School. There are no funds specifically provided for this purpose, but I am making enquiries, and, at a later date, you will be advised if the Department is able to make the necessary arrangements.

Your obedient servant,

J. D. McLEAN

R. Gurney Orr, Esq.,
Architect,
Department of Indian Affairs,
Ottawa, Ont.

Dear Mr. Orr:-

With further reference to my letter of the 9th ultimo and your reply to the same on Jan. 14th, enclosing plans for the new School to replace the Old Sun School on the Blackfoot Reserve, I beg to state that during my recent visit to this Reserve I had an opportunity of discussing the whole situation with Mr. Gibney, the Principal of the old School up until the time it was destroyed. Mr. Gibney showed me a copy of the memorandum which had been prepared by Mr. Gardner-Smith in consultation with himself, and also a copy of the suggestions which he himself was forwarding to you in connection with the proposed plans for the new School which he had examined. Beyond the suggestions made by Mr. Gibney, all of which I approve, I have only a few remarks to offer, and these are as follows:-

1. A suitable garage is a necessity and should be built as part of the main School building in order that it may be heated from the central heating plant. A motor car is required summer and winter in connection with the School work all over the prairie provinces, and my recent visit to Southern Alberta when the weather was at times 50 below zero, convinced me that a heated garage is a necessity. The suggested location of this garage, as given by Mr. Gibney, appears to me to be suitable.
2. The Principal's residence should be large enough to include 4 bedrooms and a den or study. Owing to the dust-laden winds which prevail at times in Alberta, the glazed verandah off the living room of the Principal's

Indian Affairs. School Files.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

residence is very necessary, and I trust it may be provided, and have the sun porch above it as requested by the Principal, as well.

- Yes on 9/2/10*
3. The plans do not make provision for an Indian room, and this is a very essential part of a residential school building.
- at the school as per the plan*
4. A partition should be installed on the first floor so as to keep the two sides of the building separate.
5. I should like to suggest that this School be provided with spiral fire escapes instead of the ordinary ladder type which the younger children find it very difficult to use. So far as I know the spiral type has not been supplied to any Indian Residential School, and even though the cost might be greater than the ladder type, I am of the opinion that they are the safest and should be provided.
6. I have already addressed a separate communication to the Secretary with regard to the provision of a Farm Instructor's cottage. I have suggested that one built on the same plan and of the same material as the one provided at the St. Paul's School on the Blood Reserve, would meet the needs of this institution. I see no reason why the erection of this building should not be taken in hand at once. The Farm Instructor who is a very efficient man, and who is at present living with his wife at a very considerable distance from the School site, should be comfortably and conveniently settled when the time comes to begin the Spring work, and I trust that prompt action may be taken in this matter.
- Yes*
7. It is understood by our Society that the new School will be built of brick.

I am holding the plans until our Commission have had an opportunity of examining them at their next meeting after which they will be returned to you.

Very kind regards,
Yours very truly,

J. B. R. Westgate

Field Secretary, M.S.C.C.

Dear Dr. Westgate,-

I have your letter of the 8th instant with further reference to the plans for the new Old Sun's School. I will deal with your suggestions in the order in which they appear in your letter.

1. In the plans returned by the Agent no mention was made in the notes by either the Agent or Mr. Gibney for the need of a garage.
2. Four rooms and den are being provided in the residence also a glazed verandah off the living room together with sun perch.
3. An Indian room is being provided.
4. It is the intention to provide a partition in the corridor on the first floor.
5. Consideration will be given to the spiral type fire escape.
6. The question of a Farm Instructor's cottage will be dealt with in a separate communication.
7. It is the intention to construct the building with outside walls of hollow tile veneered with brick.

Yours very truly,

Rev. T.B.R. Westgate, D. D.,

COMMISSIONER'S OFFICE,

D REGINA, SASK., February 16th., 1929

IN YOUR REPLY REFER TO

No. 401-11A C.E.

ALSO TO DATE OF THIS LETTER

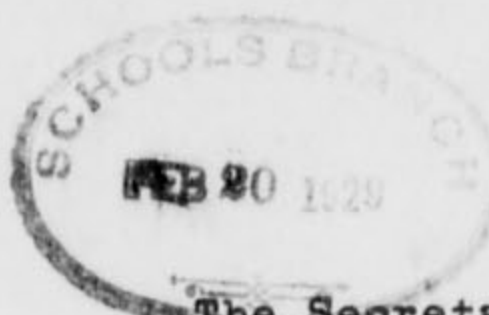

Sir:-

I beg to acknowledge receipt of your letter of the 12th. instant No. 104-1-5, informing me that Dr. Westgate had written to the Department urging that provision be made this year for a Farmer's cottage at the Old Sun's Indian Residential School. If it is the intention of the Department to rebuild this school there is no doubt a residence should be built for the Farmer, provided he is a married man. At some of our schools they are not particular whether the Farming Instructor is married or not, and in the past we have had a single man at the Old Sun's School so far as I know, but if Mr. Bate is a married man he should have a home. At the present time the Farmer is living in an Indian cottage about half a mile from the school, and this arrangement is not very satisfactory. A request for a cottage was made in September last by Dr. Westgate, and I informed the Department that there was no urgent need for it at the time. The cottage at the St. Paul's School on the Blood Reserve cost in the neighborhood of \$4000.00, and it would perhaps cost \$4500.00 to build a similar cottage at Old Sun's, that is by putting in the plumbing, etc.

Your obedient servant,

W. L. Graham,
Indian Commissioner.

The Secretary,
Dept. of Indian Affairs,
Ottawa.

Dear Mr. Graham:

I have your 401-11A C.E. of the 16th instant, with reference to a farmer's cottage at the Old Sun Indian Residential School. In view of your recommendation, the Department has decided to provide this building at the earliest possible date, and I have now to authorize you to make the necessary arrangements. Your estimate of \$4,500 should not be exceeded and a saving should be effected if possible. In the engagement of labour and the purchase of materials, please adopt the usual procedure.

Yours very truly,

Duncan C. Scott

Dear Sir:-

With further reference to my letter of Feb. 7th, and your reply to the same on Feb. 12th, 104-1-5, relative to the provision of a Farmer's residence at the Old Sun Indian Residential School, I beg to state that in a letter just received from the Rev. F. M. R. Gibney, Acting Principal of this School, and dated Feb. 19th, he informs me that the immediate need of this residence has been accentuated through the decision of your Department to have the house which is at present occupied by the Farm Instructor, fitted up as a residence for Dr. Windsor, the Medical Health Officer. Mr. Gibney's letter reads, in part, as follows:-

"The Department may not be aware of the fact that we have the loan of one of their buildings, adjacent to No. 1 Government Farm Instructor's house, as a temporary home for our Farm Instr. Mr. Indian Agent Gooderham has just received a communication from the Indian Department at Ottawa, requesting him to have this house renovated and wired for electric light for a residence for our Medical Health Officer, Dr. Windsor. This means that we shall be without a house for Mr. and Mrs. Bates. This leaves us in a quandary. Perhaps, they could find a temporary above in town, but this would mean extra expense for somebody. I can see only one way out of our difficulty and that is the immediate erection of a suitable residence near the site of our proposed new school building. It would be well to point out this new development."

From the above information it is quite clear that some immediate action will have to be taken to provide accommodation for the Farm Instructor, and as a residence at the School will be

indispensable if we are to retain the services of the splendid man who now fills this position, I beg to request that a special effort be made to have this residence provided in the immediate future.

I commend this request to your careful and sympathetic consideration, and remain, Sir,

Your obedient servant,

L. A. R. Nestor

Ref. No. I. A. 53

Dear Sir,-

Complying with the request contained in yours of the 18th instant, already acknowledged, I beg to enclose herewith a fair wages schedule for use in connection with a proposed contract for the erection of an Indian school on the Blackfoot Reserve near Calgary, Alta.

Yours truly,

A handwritten signature in ink, appearing to read "Gerald H. Brown".

Gerald H. Brown,
Assistant Deputy Minister of Labour.

Dear Sir:-

On the occasion of my last visit to your Department I was informed that it was your intention to have the work of constructing a new building to take the place of the Old Sun School, begin as soon as the frost was out of the ground this spring. I shall be obliged if you will kindly inform me if any action has yet been taken in this connection. In your letter of March 7th. last you stated that Commissioner Graham had been authorized to build a residence for the farmer at this institution, and it will be a help to our Commission in the preparation of their estimates for 1930 if you will advise me with regard to the arrangements you are making for the construction of the main school building.

I have the honour to be, Sir,

Your obedient servant,

T. B. R. Westgate

The Department of Indian Affairs,
Ottawa, Ont.

Dear Sir:-

The Rev. F. M. R. Gibney, Principal of the Old Sun School, has directed the attention of our Commission to the need of a suitable shelter for the stock, in addition to the existing stock barn. He states that he has talked the matter over with Mr. Indian Agent Gooderham, who promised to take the matter up with your Department, and urge that a shelter about 75' long x 14' wide, with two 12' partitions under the same roof, be provided before next winter. He estimates the cost at approximately \$385.00, this amount not including the cost of the partitions which should be made of planks, nor the cost of fencing.

In connection with this need, he also directs attention to the urgent need of more pasture land being attached to the school for the use of the school in the summer. Suitable pasture land is available, by extending the land already set apart for the use of the school, and I beg to recommend that you authorize Mr. Indian Agent Gooderham to arrange with the Principal for this extension.

The farming activities at this school are gradually developing into first class condition, and it will be an encouragement to the school management if the above needs, neither of which involve a very heavy expenditure, are provided. I commend them both to your sympathetic consideration and have the honour to be, Sir,

Your obedient servant,

T. S. R. Westgate

Field Secretary, M.S.C.C.

Ottawa, June 5th, 1929.

Sir,-

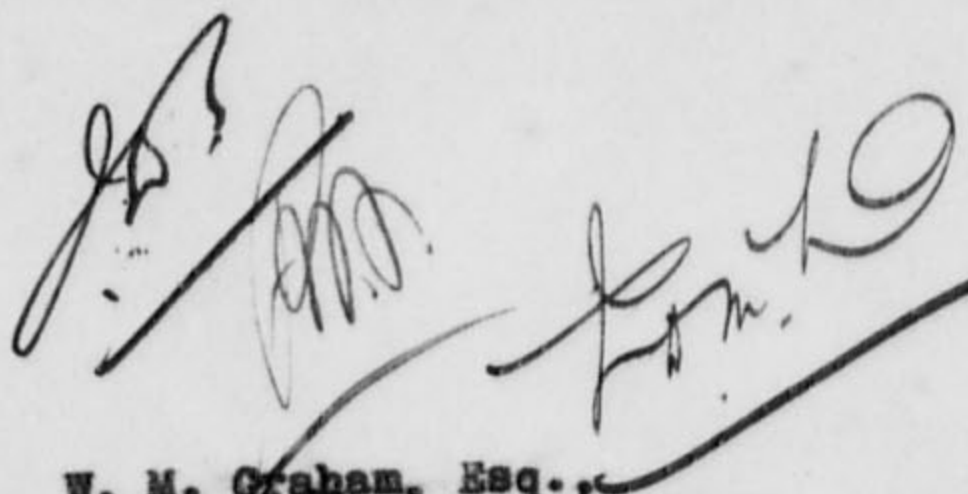

A communication has been received from Rev. T.B.R. Westgate, Field Secretary, M.S.C.C., relative to the need of a suitable shelter for the stock, in addition to the existing stock barn, at the Old Sun's School. He requests that a shelter about 75' long by 14' wide, with two 12' partitions under the same roof, be provided before next winter and estimates the cost at, approximately, \$385.00, this amount not including the cost of the partitions or the cost of any fencing required.

Dr. Westgate also directs attention to the need of more pasture land. He states that suitable pasture land is available by extending the land already set apart for the use of the school. I shall be pleased to have your views regarding the necessity for the erection of the shelter for the stock and the providing of more pasture land. If you approve of the above improvements being carried out, you should state the approximate cost of erecting the shelter with the necessary partitions and fencing and, also, furnish particulars in connection with the land required for pasture purposes.

Your obedient servant,

J. D. McLEAN

J. D. McLean.
Asst. Deputy and Secretary.

Reverend Sir,-

I have your letter of the 28th ultimo, requesting the erection of a suitable shelter for the stock at the Old Sun's School and, also, the providing of more pasture land for the use of the stock at the school during the summer. These matters are being referred to Mr. Commissioner Graham for his report.

Your obedient servant,

J. D. McLEAN

IN YOUR REPLY REFER TO
No. 401-11A R.C.
ALSO TO DATE OF THIS LETTER

COMMISSIONER'S OFFICE,

W. REGINA, SASK., 30th May, 1929.

Sir:-

I have received a request through the Indian Agent at Gleichen for authority to buy 5 gals. of good floor paint to paint the floors in the verandah porches at the back and sides of the Crowfoot School. I shall be glad to have your authority to make this purchase, the cost of which will be approximately \$25.00.

Your obedient servant,

W. M. Graham,
Indian Commissioner.

CANADIAN COAT OF ARMS.
TENDERS WANTED.

Sealed tenders addressed to the Undersigned and endorsed on the envelope "TENDER FOR INDIAN RESIDENTIAL SCHOOL ON THE BLACKFOOT INDIAN RESERVE NEAR GLEICHEN, Alta.," will be received up to noon of the 8th day of July, 1929 for the erection of the above mentioned building.

Plans and specifications may be seen at the Post Office at Calgary, Bassano, Lethbridge, Medicine Hat; at the Indian Offices at Gleichen, Regina and Winnipeg; and at the Department of Indian Affairs, at Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada for ten percent of the amount of the tender, payable to the order of the undersigned (War bonds of the Dominion or Canadian National Railway Bonds will also be accepted as security, or Bonds and cheque if required to make up an odd amount) which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The lowest or any tender not necessarily accepted.

INDIAN AGENT

Gleichen, Alta

June 18, 1939

Attention Mr. Orr.

Dear Sir:-

I beg to acknowledge receipt of yours of the
12th inst. with plans and specifications for the proposed
new Old Sun's School.

ReWater-Supply: do you propose to drill
in pump room or clean out well in former school? Are the
remains of the former school to be cleaned away? I ask this
as enquiries are being made re disposition of old iron etc.
and possibly this stuff could be cleared away before work
was started on the new building.

Your obedient servant,

AGREEMENT Re LABOUR - Old Sun School

Farm Instructor's Bungalow.

Gleichen Alberta
April 23/1929

I, the undersigned, W.T. Scott, do hereby agree to
~~erect~~ perform all labour in the erection of a Five-roomed bungalow
at the Old Sun's Boarding School according to specifications as
follows:-

- JUN 16 1929
- (1) Excavate a full-sized cellar to a depth of 5' and complete same to 7' clear in the basement. I will pour all concrete making and completing an 8' concrete wall and a concrete cellar floor, setting all cellar windows well above the ground.
 - (2) All carpenter work will be done in a workmanlike manner using material as supplied. Painting, inside and outside where necessary, will also be done in a proper manner. If so desired, I will submit bills of material used from time to time and state that I am satisfied that the original bill of material is sufficient to complete the job.
 - (3) All work as herein set out will be done for my tender price of One thousand and fifty Dollars (\$1050.00)
 - (4) STUCCO - I have sub-contracted this work to a specialist in this work, Mr. Alex Sutherland of Calgary and I agree to submit an agreement from him setting forth the nature of the work and I guarantee that the material supplied will be properly used and that the finished job will be satisfactory.
This work will be completed for the sum of \$250.00
 - (5) I guarantee that the workmanship on the entire building will be satisfactory to the Department of Indian Affairs.

COMMISSIONER'S OFFICE.

REGINA, SASK., June 18th, 1929.

IN YOUR REPLY REFER TO
No. 401-11A
ALSO TO DATE OF THIS LETTER

Sir:-

I beg to forward and recommend for payment the undernoted vouchers in connection with the material, hauling and labour on the Farmer's new cottage, Old Sun's School, Blackfoot Agency.

Abstract of Tenders accompany the material vouchers, and the labour contract is attached to Vouchers Nos. 134 to 137.

Extras include a back porch, coal bin, cupboard in the kitchen, closet outside, and eavestroughing leading to the soft water tank. The house is excellent and particular credit is due to W. T. Scott, the Contractor.

TENDER FORM
DEPARTMENT OF INDIAN AFFAIRS
OTTAWA, CANADA

Building..... Indian School,
Location..... Gleichen, Alberta,

I (we)..... THE BENNETT & WHITE CONSTRUCTION COMPANY LIMITED
the undersigned, hereby offer to the Deputy Superintendent General of Indian Affairs, to furnish all the necessary tools, implements, materials and labour, and to execute and complete in a satisfactory and workmanlike manner, all the works required in completing the aforesaid building, according to drawings, specifications and form of contract exhibited to (me, us), and prepared under instructions of the Deputy Superintendent General of Indian Affairs, for the sum named as under.

Tender for the whole of the work as shown on drawings and described in the specifications (Amount of tender to be written) One Hundred Sixty-five Thousand Seven Hundred
Seventy Dollars..... (\$165770.00)

I (we) herewith agree to complete the work within a period of six months from the date of notification of acceptance of tender, and hold myself (ourselves) ready to enter into a contract for the due execution of the work.

(a) ~~XX~~ (we) herewith enclose an accepted cheque for \$ 16,000.00 on a chartered bank, payable to the order of the Deputy Superintendent General of Indian Affairs, equal to ten (10) per cent of the amount of the tender, as per terms of the advertisement and specifications for this work.

(b) Attached hereto is a letter from the Manager of the Bank of....., have been deposited in the Bank certifying that War Bonds of the Dominion of Canada or bonds of the Canadian National Railway Company to the value of....., subject to the order of the Deputy Superintendent General, of..... Department of Indian Affairs at Ottawa, Ont.

War Loan Bonds of the Dominion or bonds of the Canadian National Railway Company will be accepted as security, or Bonds and cheque, if required to make up an odd amount.

Envelopes containing this tender are to be endorsed "TENDER FOR....."

and addressed to the Deputy Superintendent General of Indian Affairs at Ottawa, Ont.

"TENDERS MUST BE IN THE HANDS OF DEPUTY SUPERINTENDENT GENERAL BY 12 O'CLOCK NOON OF DATE FIXED FOR THEIR RECEPTION. CARE SHOULD THEREFORE BE TAKEN TO MAIL SAME IN PROPER TIME."

The signatures of persons tendering must be in their respective handwritings.

In the case of firms, the signature, post office address and occupation of each member of the firm must be given.

SIGNATURES, OCCUPATIONS AND POST OFFICE ADDRESSES OF PERSONS TENDERING:

.....
THE BENNETT & WHITE CONSTRUCTION COMPANY LIMITED,
1116-9th Avenue West, Calgary, Alberta.
Per. W. J. Bennett
Dated at Calgary, Alta., this Third day of July, 1929.

NOTE.—The security cheque or Bonds will be forfeited if the person or persons tendering refuse to enter into a contract when called upon to do so, or fail to complete the work contracted for. The Department does not bind itself to accept the lowest or any tender. No conditional tender which is not in accordance with the above will be considered.

NOTE.—Amount of deposit security should be indicated in space provided above.

R

IN YOUR REPLY REFER TO

No. 401-11A C.E.

ALSO TO DATE OF THIS LETTER

COMMISSIONER'S OFFICE,

D REGINA, SASK., July 2nd, 1929

Sir:-

I beg to acknowledge receipt of your letter No. 104-1-5, dated the 5th. June, in connection with a request made by the Principal of the Old Sun's School, at Gleichen, to be provided with a shelter for cattle and more pasture accommodation.

I wish to inform you that I have had this matter investigated and I find that the School has about 35 head of cattle, and there is only room for 17 cows and some calves in the stable. As this institution is evidently depending considerably on their live stock, an outside shelter for the young stock is needed, and the cost of same would be somewhere in the neighborhood of what they estimate, namely \$385.00, as this cost was figured out by the local carpenter. It might, of course, be built a little cheaper.

Extra pasturage is also required, and there is an abundance of land available adjoining the school land on the south. There is a fractional part of a section there which would meet the requirements for the present time. This would take between 2½ and 3 miles of fencing, which would cost in the neighborhood of \$300.00 for material, and the work of erecting the fence might be done by the school.

Your obedient servant,

W. M. Graham

W. M. Graham,
Indian Commissioner.

104-1-5.

Ottawa, July 9th, 1929.

Sir:

I have your 401-11A C.E. of the 2nd instant, relative to the providing of a shelter for the cattle and more pasture accommodation at the Old Sun's School.

Relative to the erection of a shelter, I have to say that you may arrange to have this accommodation for the cattle erected, and the cost should, if possible, not exceed the estimate furnished by the Principal, viz., \$365, the work to be completed before the cold weather next Fall.

Regarding the extra pasturage, would it be necessary to get the Indian Band to set aside the fractional part of a section for school purposes? If so, you should endeavour to secure the consent of the Band, and, when this is obtained, you may incur an expenditure of approximately \$300 in providing the fencing material required to fence same. It is thought that the work of erecting the fence might be done by the school authorities.

Certified accounts, in duplicate, covering any expenditure incurred for the above purposes should be forwarded in the usual manner.

Your obedient servant,

A. F. MacKenzie

R

July 9, 1929.

Memorandum:

Acting Deputy Minister.

Plans and specifications have been prepared for the new Old Sun's School to replace the one destroyed by fire last year. Tenders were invited by advertising in the newspapers in Calgary, Gleichen, Bassano, and Medicine Hat. Tenders closed at noon yesterday and two have been received as follows,-

		Fire-proof construction.
J. McDiarmid Co Ltd., Winnipeg, Man.	\$155,000.00	\$169,000.00
Bennett & White Construction Co. Calgary.	\$ 165,770.00	\$182,750.00

Both these tenders exceed by a considerable amount the estimated cost of the building and I consider both prices high and beg to recommend that new tenders be invited and that in addition to the newspapers previously used that an advertisement be placed in the Winnipeg papers.

I would recommend that the above firms deposit securities submitted with their tenders be returned to them.

Mr. Duncan G. Scott, Deputy Supt. General,
Department of Indian Affairs,
Ottawa, Ont.

Dear Sir,

We would greatly appreciate it if you would let us know to whom the contract has been awarded for

the erection of Indian residential school on the Blackfoot Indian Reserve near Gleichen, Alta.

If you could also let us know the total amount of the contract, the unit prices bid, and the names and addresses of all bidders, we would be much obliged to you.

Do not bother to write a letter. Just make a memo on the margin or reverse side of this letter and mail it in the enclosed return envelope.

Trusting that you will be kind enough to co-operate with us by letting us have this information as promptly as possible, so that we in turn can pass it on to engineers, contractors and manufacturers throughout Canada, we remain,

Yours truly,

Dear Mr. Gooderham,-

With reference to my letter of the 12th of June regarding the inviting of tenders for the Old Sun's School, I beg to say that owing to the fact that a satisfactory tender was not received it has been decided to advertise again. An advertisement will appear shortly in the same newspapers to which the Winnipeg Free Press has been added inviting tenders receivable here up to noon of August 5th.

Please give the contractors ample opportunity of examining the plans and specifications and if you require same tender forms will be sent to you.

Yours very truly,

R. GURNEY ORR.
Architect for the Department.

TENDERS WANTED.

SEALED TENDERS Addressed to the Undersigned and endorsed on the envelope "Tender for Indian Residential School on the Blackfoot Indian Reserve, Near Gleichen Alta.," will be received up to noon of the 5th day of August, for the erection of the above mentioned building.

Plans and specifications may be seen at the Post Office at Calgary, Bassano, Lethbridge, Medicine Hat, at the Indian Offices at Gleichen, Regina, and Winnipeg, and at the Department of Indian Affairs at Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada for ten percent of the amount of the tender, payable to the order of the undersigned, (War Bonds of the Dominion or Canadian National Railway Bonds will also be accepted as security, or Bonds and cheque if required to make up an odd amount) which amount will be forfeited in the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The lowest or any tender not necessarily accepted.

TENDERS WANTED

SEALED TENDERS addressed to the undersigned and endorsed on the envelope "Tender for Indian Residential School on the Blackfoot Indian Reserve near Gleichen, Alta.," will be received up to noon of the 8th day of July, 1929, for the erection of the above mentioned building.

Plans and specifications may be seen at the Post Office at Calgary, Bassano, Lethbridge, Medicine Hat; at the Indian Offices at Gleichen, Regina and Winnipeg; and at the Department of Indian Affairs, at Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada for ten per cent of the amount of the tender, payable to the order of the undersigned (Warrant Bonds of the Dominion or Canadian National Railway Bonds will also be accepted as security, or Bonds and cheque if required to make up an odd amount) which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The lowest or any tender not necessarily accepted.

DUNCAN C. SCOTT,
Deputy Superintendent General,
Department of Indian Affairs,
Ottawa, June 13, 1929.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

August 6, 1929.

MEMORANDUM:

ACTING DEPUTY MINISTER.

Plans and specifications have been prepared for the new Old Sun's School to replace the one destroyed by fire. New tenders were invited receivable here up to noon of August 5th, and in response the following have been received,-

	SEMI FIREPROOF	FIREPROOF.
Wyndels Construction Co., St. Boniface, Man.	\$131,800.00	\$143,178.00
R. N. Wyatt, Winnipeg, Man.	\$142,066.00	\$158,154.00
Smith Bros. and Wilson, Regina, Sask.	\$144,770.00	\$160,600.00
J. McDiarmid Co. Ltd., Winnipeg, Man.	\$150,650.00	\$163,600.00
Scanlan & Kennedy, Medicine Hat, Alta.	\$150,900.00	
Bennett & White Construction Co. Calgary,	\$160,770.00	\$177,750.00

All of the above tenders have been forwarded on the forms required and accompanied by the necessary deposit security.

A tender has been received from S. Brown of Winnipeg, of \$149,786.00 for fireproof and \$145,988.00 semi fireproof. This tender is irregular as it is not submitted on the form required. A tender has also been received from the Hipperson Construction Co. of Regina amounting to \$164,556.00 semi fireproof and \$195,000 for fireproof. This tender is also irregular as a contractor's bid bond is enclosed in place of the security required by the specifications.

As the tender of the Wyndels Construction Co. for fireproof construction is fair and reasonable, I beg to recommend that it be accepted. Funds are provided for this work in the vote for Indian Education.

Ottawa, August 6, 1929.

104-1-15

His Excellency

The Governor General in Council.

The undersigned has the honour to report that the same being necessary, tenders were called for the new Old Sun Indian Residential School, on the Blackfoot Indian Reserve, in the Province of Alberta, to replace the one destroyed by fire, and that the following tenders were received, in regular form and accompanied by the required deposit security:-

Wyndels Construction Co., St. Boniface, Man.,.....	\$143,178.00
R.H. Wyatt, Winnipeg, Man.,.....	\$158,154.00
Smith Bros and Wilson, Regina, Sask.,.....	\$160,600.00
J. McDiarmid Co. Ltd., Winnipeg, Man.,.....	\$163,600.00
Scanlan and Kennedy, Medicine Hat, Alta.,....	\$150,900.00
Bennett and White Construction Co., Calgary, Alta.,....	\$177,750.00

All the above tenders are for Fireproof construction, with the exception of the tender of Scanlan and Kennedy, of Medicine Hat, Alberta, which is for Semi-fireproof construction.

A tender has been received from S. Brown of Winnipeg, Manitoba, for the sum of \$149,786.00 for Fireproof construction, and \$145,988.00 for Semi-fireproof construction. This tender is irregular as it is not submitted on the form required. A tender has also been received from the Hipperson Construction Company of Regina, Saskatchewan, amounting to the sum of \$164,556.00 for Semi-fireproof construction and \$195,000.00 for Fireproof construction. This tender is also irregular as a contractor's bid bond is enclosed in place of the security required by the specifications.

Re Voucher # 204.

Dear Sir:-

The writer found the litter carrier at Old Sun School broken in the month of June and advised the Principal to wait for the Inspector of Buildings before putting it in order again. I found no wheelbarrow at this institution and I know from experience that one of these is very necessary on any farm, in fact it is the litter carrier for most small barns.

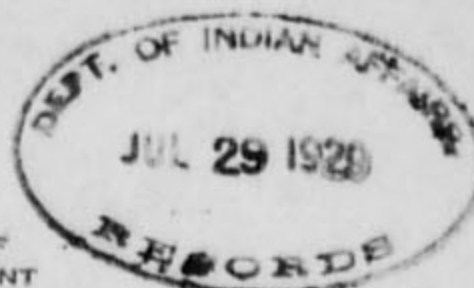

The Principal could not purchase and I told him to do so and I would submit the voucher.

Your obedient servant,

The Secretary,
De t. of Indian Affairs,
Ottawa, Ont.

Memorandum:

DR. SCOTT.

With reference to that part of Mr. Graham's letter which is relative to a farm instructor's house at the Blood Indian Residential School, I may say the Rev. Principal was informed that there were no funds for the purpose.

Evidently, the Rev. Principal of the St. Paul's School has had the Agent include in his estimates for the coming fiscal year a utility building, a garage and a horse stable. These three items have been in Dr. Westgate's requests for the past three years; but, as there appeared to be no urgency in connection with any of them, they were not included in the Estimates.

Dear Sir,

We would greatly appreciate it if you would let us know to whom the contract has been awarded for

construction of the Indian Residential School on the Blackfoot Indian Reserve, near Gleichen, Alta.

If you could also let us know the total amount of the contract, the unit prices bid, and the names and addresses of all bidders, we would be much obliged to you.

Do not bother to write a letter. Just make a memo on the margin or reverse side of this letter and mail it in the enclosed return envelope.

Trusting that you will be kind enough to co-operate with us by letting us have this information as promptly as possible, so that we in turn can pass it on to engineers, contractors and manufacturers throughout Canada, we remain,

Yours truly,

TENDERS WANTED

SEALED TENDERS addressed to the undersigned and endorsed on the envelope "Tender for a Residential School on the Blackfoot Indian Reserve, Near Medicine Hat, Alta." will be received up to Noon of the 31st day of August, for the erection of the above mentioned building.

Plans and specifications may be seen at the Post Office at Calgary, Banff, Lethbridge, Medicine Hat, at the Indian Office at Edmonton, Regina and Winnipeg, and at the Department of Indian Affairs at Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada for ten per cent of the amount of the tender, payable to the order of the undersigned. War Bonds of the Dominion or Canadian National Railway Bonds will also be accepted as security, or Bonds and cheque if required to make up an odd amount; which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The board of any tender not necessarily accepted.

CHECK

Send the following message, subject to the terms on back hereof, which are hereby agreed to

Wyndels Construction Co. Ltd.,
St. Boniface, Man.

Ottawa, August 25rd. 1929.

Your tender Old Suns School fire proof construction accepted. Letter following.

Chg. D.I.A.

Duncan C. Scott.

Certified to be a true copy of a Minute of a Meeting of the Committee
of the Privy Council, approved by His Excellency the Governor
General on the 21st AUGUST 1929

R

The Committee of the Privy Council have had before them a Report, dated 6th August, 1929, from the Superintendent General of Indian Affairs, submitting that the same being necessary, tenders were called for the new Old Sun Indian Residential School, on the Blackfoot Indian Reserve, in the Province of Alberta, to replace the one destroyed by fire, and that the following tenders were received, in regular form and accompanied by the required deposit security:-

1. - Wyndels Construction Company,
St. Boniface, Man., \$143,178
2. - R. N. Wyatt, Winnipeg, Man., 158,154
3. - Smith Bros & Wilson, Regina, Sask., 160,600
4. - J. McDiarmid Co., Ltd., Winnipeg, Man., . 163,600
5. - Scanlan & Kennedy, Medicine Hat, Alta., . 150,900
6. - Bennett & White Construction Co., Calgary, 177,750
Alta.,

All the above tenders are for Fireproof construction, with the exception of the tender of Scanlan & Kennedy of Medicine Hat, Alta., which is for Semi-fireproof construction.

A tender has been received from S. Brown of Winnipeg, Man., for the sum of \$149,786 for Fireproof construction, and \$145,988.00 for Semi-fireproof construction. This tender is irregular as it is not submitted on the form required. A tender has also been received from the Hipperson Construction Company of Regina, Sask., amounting to the sum of \$164,556.00 for Semi-fireproof construction and \$195,000.00 for Fireproof

The Honourable
The Supt. General of Indian Affairs.

-2-

construction. This tender is also irregular as a contractor's bid bond is enclosed in place of the security required by the specifications.

The Architect of the Department of Indian Affairs has reported that the lowest of the above tenders, namely, that of Wyndels Construction Company, St. Boniface, Man., is fair and reasonable, and the Minister accordingly, recommends that it be accepted pursuant to the requirements of Sub-section 2 of Section 36 of the Public Works Act. Funds for this purpose have been provided by Parliament.

The Committee concur in the foregoing recommendation and submit the same for approval.

Clerk of the Privy Council.

Sir,-

As advised by telegram you have been appointed Inspector of Construction for the new Old Sun Indian Residential School. The contract for this building has been awarded to the Wyndels Construction Company, St. Boniface, Man., on their tender price of \$143,178.00, for fireproof construction. They have been advised that you have been appointed Inspector of Construction and that all correspondence relating to the work should be forwarded to the Department by you. You will be paid for your services at the rate of \$6.00 per day and Indian Agent Gooderham has been instructed to issue the necessary vouchers.

Your obedient servant,

A. F. MacKenzie.
Acting Assistant Deputy and Secretary.

% Indian Office.
Gleichen, Alta. Aug. 30th, 1929.

The Secretary.
Department of Indian Affairs.
OTTAWA.

Re- OLD SUNS NEW RESIDENTIAL SCHOOL.

Sir:

I duly received your telegrams of August 19th and 23rd, and your letter of the 26th, with reference to the erection of the new school on the Blackfoot Reserve. I note the contract has been awarded to the Wyndels Construction Company, of St. Boniface, Manitoba, and that I have been appointed Inspector of Construction. Please accept my thanks for this expression of the Department's continued confidence in me.

The contractor has not yet arrived at Gleichen, but is expected at any time, and it will be my aim to cooperate with him in the furtherance of the work and in the carrying out of the Plans and Specifications.

With regard to the old ruin, and the water supply for the new building, I shall be glad to receive some early intimation of the Department's intentions concerning these matters.

At the time of my leaving Lytton, B.C. there was still some painting to finish, pews to install, and a few small odds and ends to clean up, all of which was being supervised by the Reverend Principal as this work was not of sufficient importance to detain me there. I expect to receive the bills for these small services within the next few days, and shall then be in a position to render the complete accounts for all labour and materials, including a Statement of Cash Receipts and Disbursements, and a certified Statement of Balance at the Bank.

I have the honour to be, Sir,

Your obedient servant

E. Gardner-Smith

Inspector of Construction.

BULLETIN No. 29

Indian Affairs. School Files.
(RG 10, Volume 6359, File 758-5, part 6)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

INGLIS SUPREME BOILERS

SUPREME BOILERS Are constructed of flange steel plates with electrically welded seams, and are sold complete with base as a self contained unit ready for operation.

It is not necessary to build a special foundation as the boiler is carried on a cast iron base distributing the load over large area.

An ash pit not less than 6 inches deep should be excavated in floor or if this is impossible a high base should be ordered.

SUPREME BOILERS Are properly proportioned to give highest efficiency.

The boiler will carry the rated load quite easily and it is not necessary to choose a larger size than listed.

The area of grates governs the amount of coal which can be burned, the grate area can be increased to give proportionate extra boiler rating but efficiency will not be as good when proper ratio between grate and heating surface is reduced.

SUPREME BOILERS—Have an unusually large fire box, the crown of which is arched up to eliminate sediment pocket over the fire.

The return smoke box at front end of boiler is formed within the boiler and is surrounded by water. This makes a flush front boiler giving most freedom for firing.

All firing and flue door frames have flanges within the openings to protect welded seams from cold air blasts.

SUPREME BOILERS—Are designed for 30 pounds steam pressure and are approved in Ontario, Quebec, Alberta and Saskatchewan for this pressure, other provinces approve the boiler for 15 pounds which is the maximum they allow on welded boilers.

Special boilers are designed to suit conditions where standard boiler dimensions will not work in, provided that these conditions do not call for unbalanced design or sacrifice to boiler efficiency. Our engineering dept. will be pleased to give you information on proper settings for stokers or oil firing and any other advice on boilers or engineering in general.

THE JOHN INGLIS CO., LIMITED, TORONTO, CANADA

INGLIS SUPREME Steel Heating Boilers

SPECIFICATION

TYPE—INGLIS SUPREME Steel Heating Boilers are made in three types: Class S for low-pressure steam heating with a maximum of 30 pounds working pressure, Class W for hot-water heating installations for any head up to 100 ft. and Class L for water, low type for any head up to 100 ft.

Unless specially mentioned, these boilers will be equipped with shaking grates for hand firing and boiler mounted on cast-iron base.

These boilers can be readily adapted for stokers or oil firing, in which case the grates are not supplied and a special base can be furnished to suit the application.

BOILER—The boiler is of flange steel construction, electrically welded and thoroughly tested before shipment.

The fire box and combustion chamber are completely surrounded by water. Front end smoke box is set within the boiler shell, which eliminates the objectionable projection on front above firing doors.

BOILERS OF ALL STYLES BUILT TO SUIT REQUIREMENTS

THE JOHN INGLIS CO., LIMITED, TORONTO, CANADA

BASE—The base is of cast-iron in four sections and is fitted with shaking grates, bridge wall support, front ash and regulator doors, and rear cleanout door.

DOORS—The firing and front cleanout doors with baffles are of cast-iron mounted on cast-iron frames studded to boiler front head.

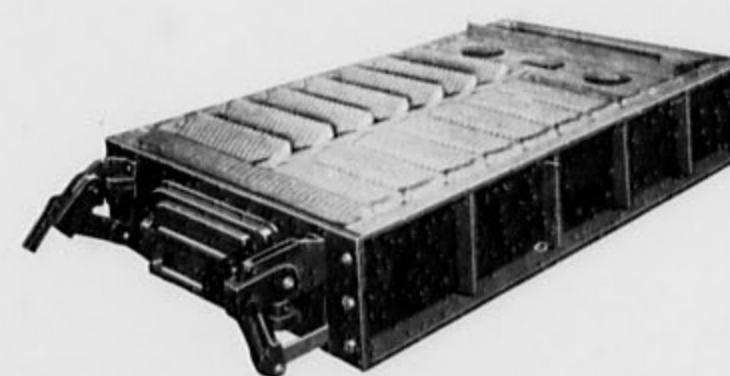

ACCESSIBILITY—All tubes are cleaned from front end and no openings are placed on side of boiler, unless specially required so that boiler can be set against side wall if space is restricted.

See Dimension Tables on pages 6 to 11.

FITTINGS—Each Class S Boiler is equipped with shaking grates, bridge wall fire brick, water column, water gauge, try cocks, steam gauge, safety valve, damper regulator, poker, rake, hoe and flue cleaner.

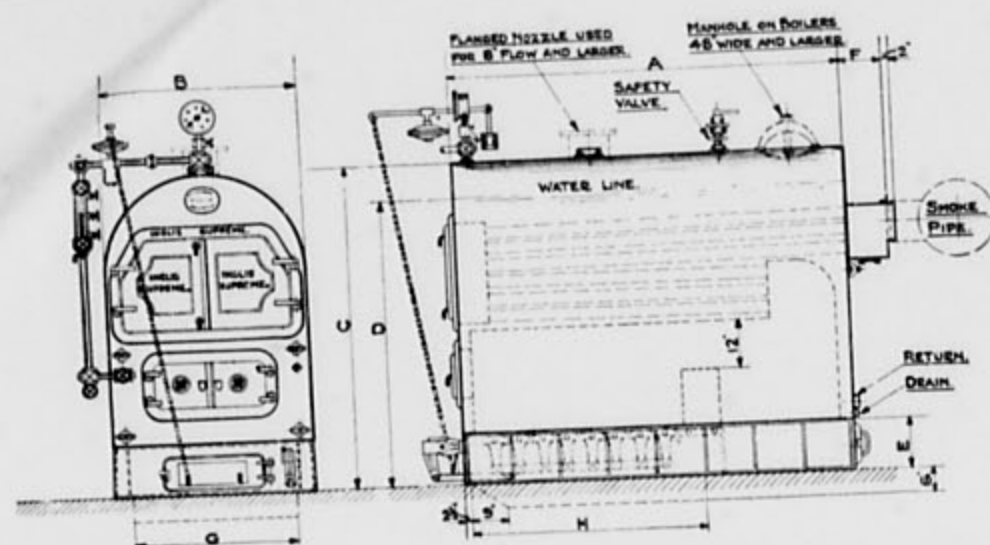

Class W and L Boilers are equipped with shaking grates, bridge wall fire brick, poker, rake, hoe and flue cleaner.

GUARANTEE—All INGLIS SUPREME Boilers are built to comply with interprovincial regulations and workmanship and performance guaranteed.

BOILERS OF ALL STYLES BUILT TO SUIT REQUIREMENTS

The John Inglis Company Limited
Engineers and Boiler Makers

Architects
44 Strachan Avenue

Toronto, 2 Ont. Sept. 14th. 1929.

Department of Indian Affairs,
Ottawa, Ontario.

Gentlemen:

We understand you are about to build Schools at
Gleichen, Alta., and Punnichy, Sask.

We manufacture an all-welded Steel Heating
Boiler, as described in the enclosed catalogue. This boiler
is designed on the three pass principle of gas travel, and on
account of this long gas travel is more efficient than the
usual type of heating boiler. The boiler is a self contained
unit, and, after being set in place, requires only to be
covered with magnesia blocks or asbestos cement to a thickness
of $1\frac{1}{2}$ to 2". No brickwork is required for setting, except a
few firebrick for the bridge wall - which bricks are furnished
with the boiler.

The boiler is equipped with shaking grates, and
the regular steam trimmings. It is designed to conform to all
Provincial boiler regulations, and is accepted by the Boiler
Inspection Branches throughout Canada for 15 pounds working
pressure.

During the past year we have built and installed
over two hundred "SUPREME" Boilers.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

P.O. Box 31.
Gleichen, Alta. Sept 11th, 1929.

Arthur
The Secretary.
Department of Indian Affairs.
OTTAWA.

Re- Old Suns School, Gleichen, Alta.

Sir:

I am in receipt of your letter of the 6th instant, and have duly noted your instructions regarding the old ruin, and your invitation to submit a recommendation regarding the water supply system for the new building.

On the 5th inst. I wired you McQueen's tender of \$1200.00 for the removal of the debris, the breaking off of the concrete walls below grade, and the filling in and levelling of the old basement. I received no reply to said wire. Since sending that quotation--which was the best I had received at that time--I have been able to get a much better figure from the contractors, through their local sup't, Mr. Ducharme. At first these people would not undertake this work at all, stating they had enough on their hands without it, but yesterday they agreed to tackle it on the understanding that they might do it at once, using surplus earth from the new excavation for filling in the old basement, and at a price of \$500.00. After consultation with Mr. Gooderham, I decided to anticipate the Department's acceptance of this figure, and notified the contractors accordingly. This is much cheaper than we could possibly get this work done afterwards. I had previously accepted the only offer I could get for the twisted and tangled mass of ironwork, viz \$50.00, from the Calgary Scrap Iron Co., and they now have their men at work removing the debris, and shipping it away. This reduces the ~~price~~ cost of disposing of the old ruin to \$450.00.

I enclose photos of the old ruin, from which you will see that there is an enormous amount of difficult work in removing the wreckage, breaking off the concrete walls, and filling in. The contractors now have a gang of hardy Frenchmen at work breaking off the walls, using Roman battering-rams, screw-jacks, sledges and levers. Earth from the new excavation is being dumped into the old basement as fast as the walls can be broken off and the debris removed.

Regarding the water supply system, I may say that in the

2.

Original recommendations which were sent you last December, it was suggested that a tower and tank be installed similar in principle to those provided on the Blood Reserve, but as we are getting a building of fire-proof construction, it does not seem necessary to have so large a reservoir of water on hand. A 2500 gal tank previously authorized for Old Suns School is lying in the town here, and this tank should meet the ordinary requirements of the school. Unless otherwise instructed, I shall have it set up in the chamber marked "Pump Room" in the basement plan, and connected to the existing well. As this tank is of 6' diameter, and 15' in length, it is too long for the room in which it should be placed, so I propose extending the length of the pump room 4 or 5 ft., which will then leave the usual walking room in front, and accessibility all around it for inspection or repair. The extended wall will jut out from the main wall of that area, thus requiring 2 or 3 extra steel joists. The window will be moved out also, and will have a reinforced concrete beam over, and brickwork on either side and below, so that if ever the tank should require to be replaced, a suitable outside opening could be readily made by removing a small amount of brickwork instead of having to cut through a concrete wall.

With reference to the source of water supply, I should have preferred having the well come right in the pump room so that the entire service could have been under the one roof, but there is not time to have a new well drilled now without tying up the job, even if a well-drilling outfit were immediately available. I am therefore arranging to utilize the existing well in the old basement, and am having the contractor carry up a suitable concrete foundation from the former basement level to the level of the surrounding grade, on which we shall afterwards build a small well-house to house the pumping plant yet to be provided. You will readily understand that it is necessary to carry up this concrete foundation previous to the filling in of the old basement in order to avoid building on newly filled ground. The water will be conveyed from the pumping plant through an underground pipe to the pressure tank in the pump room of the new building.

I am gathering data on the most suitable type of motor-driven, deep-well pumping outfit, and shall make this service the subject of another letter. The contractors are installing a temporary pump for their own requirements.

The new excavation is well under way, temporary buildings are nearly completed, and excellent gravel is being hauled for the concrete. The weather is fine, but windy, and this morning we had a dust-blizzard of glorious proportions!

I have the honour to be, Sir,

Your obedient servant

E. J. Gardner Smith
Insp. of Construction

OTTAWA, Ont.

Dear Sir,

Re : Old Suns School
Gleichen, Alta.

We are enclosing herewith letter which was addressed to us by Messrs Allen & Grant, cut stone contractors, and which is self explanatory.

We will be greatly obliged if the required informations in connection with the cut stone for the above school, could be given to this Contractors at an early date.

Word was received to-day from Gleichen that lay-out was started and excavation will be commenced immediately. Mr Wyndels is still in a poor condition and will not be operated on for another two or three days, pending improvement in his condition.

Thanking you very much in advance for your kind and prompt attention to our letter, we remain,

Yours very truly

DEPARTMENT OF INDIAN AFFAIRS
CANADA

P.O.Box 31.
Gleichen, Alta. Sept 13, 1929.

R. Guernsey Orr Esq.
Architect.
Department of Indian Affairs.
OTTAWA.

Re- Old Suns School, Gleichen, Alta.

Dear Mr. Orr:

Mr. J. Ducharme,

The contractors' superintendent, at present in charge of his firm's interests here, informs me that they have had very unsatisfactory results with gypsum partitions in a previous job. He states that their Mr. Wyndels intended writing you on the subject, but owing to his illness in the hospital at present, the letter may not have been written. His objections to gypsum partitions are that it is flimsy, plaster adheres poorly and cracks develop badly, and door frames soon become insecure unless framing is carried up to the ceilings. He suggests ordinary hollow tile partitions in place of gypsum. I promised to pass his views on to you, but told him that unless you authorize a change we must adhere to the specifications in this regard.

Mr. Ducharme also asks if the stucco walls leading to the X Chapel are to be of frame construction, or if you intend these walls to be of fire-proof construction too; and in the latter case, what material do you wish used?

The excavating is nearly completed, and a start will soon be made on the concrete. The adjoining old ruin is being demolished and surplus earth is being used for filling and levelling. We are carrying up concrete walls, 10'x 10', enclosing the former well, on which to erect the future pump house, as indicated in my letter of the 11th instant.

Your obedient servant

Inspector of Construction.

P.S.

Kindly send me some stationery, - the usual consignment,
as I'm nearly out.

Dear Sir,

Could you please let us have
two or three more sets of blue prints and specifica-
tions for the Old Suns School at Gleichen, as we require
same for the sub contractors.

If possible, let us have same
by return mail.

Thanking you very much in advance
for your good and prompt attention to our request, we remain,

Yours very truly

Sept. 26, 1929.

Dear Sir,-

With reference to your letter of the 13th instant, regarding plans for the Old Sun's School, I beg to say that I am today having these printed, and will forward you two copies of the plans and specifications.

Referring to your letter of the 6th instant, I would ask you to kindly in future address all correspondence of this nature to Mr. E. Gardner Smith, Inspector, and you should forward him copy of letter from Allan and Grant which was enclosed with your letter.

Yours very truly,

R. GURNEY ORR.
Architect for the Department.

OTTAWA.
Sept. 26, 1929.

Dear Mr. Smith,-

I have just recently returned to the office after an absence of a couple of weeks on business, which accounts for the delay in replying to your letters with regard to the Old Sun's School. With reference to your letter of the 13th instant I would say that from my experience partitions as specified are satisfactory providing they are properly laid, and gypsum blocks are of good quality. I do not agree to making the change to the tile as suggested by the foreman. It is the intention that the stucco walls leading to the Chapel are to be of fireproof construction and I will leave the type of construction to be decided on between you and the contractor.

I have received a letter from the Wyndels Construction Co., enclosing a letter from Allan & Grant, Stone Cutters at Winnipeg, who have been asking for some information with regard to the stone for the stone details. I am writing the Wyndels Construction Co., asking them to direct all such correspondence to you.

I note from your letter of the 11th instant that you have made satisfactory arrangements for the demolishing of the old building and the filling in of the old excavation, also that you are gathering the necessary data regarding the water supply system. With reference to the water supply system with power available at the school, it will be possible to make the system entirely automatic.

With reference to your telegram of the 16th you may arrange to have the space under the new residence utilized as a garage at the price quoted.

Yours very truly,

E. Gardner Smith, Esq.,
Inspector, Old Sun's School,
P.O. Box 31,
Gleichen, Alta.

TENDERS WANTED

Sealed tenders addressed to the Undersigned and endorsed on the envelope "Tender for Indian Residential School on the Blackfoot Indian Reserve, Near Gleichen, Alta." will be received up to noon of the 5th day of August, for the erection of the above mentioned building.

Plans and specifications may be seen at the Post Office at Calgary, Bassano, Lethbridge, Medicine Hat, at the Indian Offices at Gleichen, Regina, and Winnipeg, and at the Department of Indian Affairs at Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada for ten per cent of the amount of the tender, payable to the order of the undersigned. (War Bonds of the Dominion or Canadian National Railway Bonds will also be accepted as security, or Bonds and cheque if required to make up an odd amount) which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The lowest or any tender not necessarily accepted.

September the 16th 1929.

Mr R.J.Orr
Chief Architect
Department of Indian Affairs
OTTAWA?Ont.

Dear Sir,

We feel deeply sorry to inform you that Mr F.Wyndels, President and Manager of the Wyndels Construction Co.Ltd, passed away Saturday night at 6.10p.m. at the St.Boniface Hospital.

Mr Wyndels had been confined to the Hospital for the last two weeks and was operated on during the past week : it was then found out that he could not recover from his illness.

In connection with the construction of the Old Sun School, at Gleichen, we must say that ~~it~~ is the intention of our Superintendent, Mr J.Ducharme, and also of the writer, to do our very best for the satisfactory construction and completion of the above school, just as we have promised Mr Wyndels a few days before his passing away.

Yours very truly,
WYNDELS CONSTRUCTION CO.LTD

B./ 12.

OFFICE OF
INDIAN AGENT

Blackfoot Agency, *104-1-5*
7th Sept. 1929. *R* Gleichen, Alberta.

Sir:

Attention Mr Ferrier.

An allowance of \$10.00 per month is made to pay the service of the cook who prepares the mid-day meal at the Gleichen temporary day school.

The meal is needed for the pupils as the parents do not understand the lunch idea-and in many cases they are nearly destitute and the mixed diet at the school keeps the children well and strong.

We supply a cook car and certain supplies while Mrs Gibney with a maid have done the work. Mrs Gibney has a large family and cannot continue this work since there are 20 to 40 pupils to feed.

I recommend that \$20.00 be allowed to pay the wages of the cook. It is little enough and it is not fair to ask the Gibneys to meet part of this from private sources.

Your obedient servant,

[Signature]
C. H. Goodenham.

Ottawa, September 12, 1929.

Sir:

I have your letter of the 7th instant, relative to the monthly allowance for the services of the cook who prepares the midday meal at the Gleichen (temporary) Indian Day School.

In reply I have to say that, in view of your recommendation as to the number of pupils for whom it is necessary to prepare the midday meal, and the work entailed, the Department will approve of an allowance for this service at the rate of \$20 per month from the 1st of October, next. You should prepare and forward, at the end of each month, a voucher at this rate in favour of the Indian woman who does the work.

Your obedient servant,

A. F. MacKenzie

Re- Old Suns Indian School.

Dear Mr. Orr:

Yesterday I issued Certificate No. 1 to Wyndels Construction Co., Ltd. for \$6862.50, in payment of 90% of the value of labour and materials supplied by them to date on the above-mentioned work. I have asked for the usual segregated Estimate totalling the amount of their tender, and when this is received I shall send you a copy. The excavation is completed, the footings run, and to-day the concrete foundation walls are being poured. Also, they have erected an unusually fine winter camp, and have several carloads of materials on hand.

On the 16th inst. I wired the Department conveying the Reverend Principal's request for a private garage under the new residence, and asking for a decision. No reply came. We are making the necessary provision in the concrete wall so that in the event of the Principal's request being granted there will be no cutting of concrete for the doorway.

With reference to my letter of the 13th instant, will you please instruct me concerning the matters brought up in that letter.

Is it your intention that the walls of Principal's basement be plastered, or just left with the tile walls exposed? The contractors state that they figured on plastering the stairway to basement only.

Will you kindly send me a set of Plans and Specifications, and the usual assortment of stationery.

Our weather is very cool, and snow seems imminent.

Your obedient servant

E. Gardner Smith
Inspector of Construction.

Ottawa.

Dear Mr. Orr: With reference to Certificate No. 1 which I issued to Wyndels Construction Co. Ltd, a few days ago, I am now able to enclose a copy of their complete Estimate of cost, from which you will also see how the amount of said Certificate was arrived at. You will also observe I have included the \$625⁰⁰ (less 10% holdback) for demolishing the old ruin & the levelling of the old school area. There was insufficient soil to spare from the new excavation & I had to allow them the extra cost of bringing other soil from a greater distance. As this work was done right at the start I deemed it only fair to include their outlay in this regard in their 1st Certificate,

Indian Affairs. School Files.

OLD SUNS SCHOOL.

NOTES.

1. In Boys Toilet Room reverse positions of Urinal & Slop Sink.
2. In Girls' Toilet Room place Slop Sink near door.
3. In Boys' Wash Room omit 1 bath and install 2 showers. Omit one bath from Girls' side, to save cost, if necessary.
4. Floor Drains required in Bath Rooms off Recreation Rooms.
5. If possible, widen Refrigerator 1 foot.
6. Place Majestic Coal Chute in Domestic Coal Room.
7. Install extra outside door from Laundry.
8. Vent Basement Toilet Rooms to Ventilating Flue.
9. Put Man-hole Opening in Coal Bin.
10. Move lights near doors in Coal Bins.
11. In Principal's Basement install 1 pair Wash Tubs and Sink, also Range Boiler (These are on hand in old residence) Put in floor drain, and make hot and cold water connections.
12. Place radiation in Principal's Basement.
13. Verandahs to have V. Joint or Brick walls to height of hand rail instead of balustrades.
14. Arrange for Hose Bib connections where indicated.
15. Omit doors to Boys Toilets.
16. Use "Vita Glass" in Sun-Rooms instead of ordinary glass
17. Extend Pump Room 4' and install Pressure Tank there, as directed.
18. Build concrete walls around Old Well, bringing same up to 1 foot above surrounding grade, and as directed.
19. Provide Garage under Principal's Residence as indicated, at cost of \$250.00.
20. Install 3-Way Switches for Stairs of Principal's Residence.

Gleichen, Sept 30th, 1929.

R.Guerney Orr Esq.
Architect.
Department of Indian Affairs.
OTTAWA.

Re- Old Suns School, Gleichen, Alta.

Dear Mr. Orr:

Many thanks for your letter of the 26th instant. The instructions contained therein have been duly noted.

We shall change the stucco walls leading to Chapel from stucco to brick veneer and 4" tile. I have wired the Truscon Steel Co., of Winnipeg, notifying them of this change, so that the I Beams will be of sufficient strength to carry the slightly added load; also I asked them to send an extra I-Beam to span over the Servery where there is no carrying wall.

Both the Indian Agent and the Reverend Principal have requested that full size screens be placed over all windows, instead of the half-screens specified for most windows. The special reason for this request is that the locality is subject to bad hail storms, and that the windows ~~xx~~ would have been smashed several times in recent years, and particularly on one occasion, had it not been for the full-size screens used on the former building. The contractors quote an extra price of \$250.00 for full size screens throughout. Will you please instruct me in this regard.

The Reverend Principal is very desirous that "accordeon" doors be installed instead of a solid partition separating the Boys' Class Rooms, the reason being that at times the entire space will be needed for concert and other purposes. The accordeon doors would slide back in two series, from the central column, thus leaving the two class rooms as one large auditorium. The contractors' quotation for making the change is \$327.00, and I should like your early decision with reference to this request.

Enclosed please find a list of "NOTES" pertaining to the new building, and which embody suggestions and requests emanating from the Principal after a careful scrutiny of the plans. Many of the items on the list are more or less trivial; and the cost of some of the things asked for can be met by savings in other items, as in Item 3. It would take too long to go over this list in detail, but you will understand them at a glance, and if there are any items unacceptable to you, will you kindly notify me to that effect.

Your obedient servant

E. Gardner-Smith
Inspector of Construction.

Re- Old Suns School, Gleichen Alta.

Dear Mr. Orr:

There seems to be some difficulty in understanding just what finish the various floors are to receive. Would it be asking too much for you to amplify the Specifications in this regard?

The Reverend Principal asked me to-day if it would not be possible to provide a soft water cistern to receive the rain water from the roofs of the laundry and chapel. He states it is not only desirable to have some soft water for the laundry but that it is essential that water other than the well water be available for the heating boilers on account of the soda content in the well water causing the heating boilers to foam and blow off through the safety valves. In the past it has been necessary to haul river water for the heating boilers and laundry boiler, which was found a great inconvenience. It is considered that a 2000 gal. concrete tank placed underground outside the laundry, with pumping connection in the laundry and overflow to drain, would meet the requirements. The cost of a soft water supply as indicated would be about \$300.00. If authorized, I could have it installed while other concrete work is being performed. Will you please instruct me in this matter.

Your obedient servant

E. Gardner-Smith

Inspector of Construction.

Dear Mr. Smith,-

Replying to your letter of the 30th ultimo with reference to the Old Sun's School, I beg to say that I do not think it will be necessary to install screens the full size of the windows.

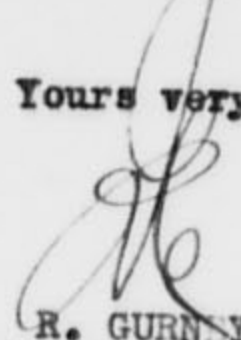

With reference to the twenty notes included with your letter all suggestions appear to be satisfactory except numbers 7 and 16. With reference to item number 13 v-joint may be used in place of balustrades.

With reference to your inquiry regarding the finishing of floors on pge 93 it states that all basement floors shall be finished as before specified, which refers to page 19 of the specifications where it states that all rooms in basement, except where concrete floors are indicated terrazzo flooring shall be laid. Referring again to page 93 all remaining floors in the building shall be finished with terazzo with the exception of the following rooms; staff bedrooms, office, store rooms, and closets. These rooms shall be finished in cement

I have had a telegram from Stanley Brock with reference to the laundry machinery. There seems to be some misunderstanding. It was my intention that the laundry machinery at the school be operated by electric motors as there is power available.

As requested I am sending you, under separate cover, a supply of stationary.

Yours very truly,

R. GURNEY ORR.
ARCHITECT FOR THE DEPARTMENT.

Mr. A.F. MacKenzie
Acting, Asst. Deputy & Secretary
Department of Indian Affairs
OTTAWA, Ont.

Dear Sir,

Under date of September the 4th we wired the Department as follows :

" Supplying for Gleichen School Boilers known to the trade as Supreme Manufactured by John Inglis Co. Ont. are these acceptable"

and regret to say that so far we have had no definite reply to this matter, although two more wires were sent to the Department in this connection.

As soon as boilers will be approved by the Department, it will take another three weeks at least before same will be on the site and therefore we are very anxious to have this matter settled so that there may be no delay in the progress of the construction which is going fast ahead. Furthermore, these boilers will be used for temporary heating of building.

Under the circumstances, we would ask you to kindly have this matter settled as early as possible and wire us as to the decision so that the order for the boilers may be placed immediately.

Thanking you very much in anticipation for the good and prompt attention which you will no doubt give our letter, we remain,

Very truly yours,

Dear Sir,

Re : Old Sun School - Gleichen, Alta.

which reads as follows :

We hereby confirm our wire of to-day

"Installing Spencer Boilers for Gleichen School
will cost 3625 dollars over contract price as
Portable Steel Boilers are specified rush reply"

and therefore would ask you to kindly confirm acceptance of this
new Type of Boiler for the above quoted price, as we are particular-
ly anxious to have the order placed immediately, so that heating may
be provided in the building as soon as same will be required.

Thanking you very much in advance for
your kind and prompt attention to, our request, we remain,

Yours very truly,

WYNDELS CONSTRUCTION CO. LTD

OFFICE OF
INDIAN AGENT

Gleichen, Alta.

October 26, 1929

Dear Sir:-

The litter carrier at Old Sun School barn has been out of use for several months. The swinging extension of the carrier pulled out of its fastening on the barn. This was not well secured.

to

I have asked Mr. E. Gardner-Smith look at it and he suggests the erection of a trestle at the extreme end of the carrier and that the trestle be strong and imbedded in concrete. This would relieve the barn of the strain which it bears at the present time.

Mr. Gardner Smith estimates the cost of labour and material to put the carrier in repair at \$40.00 and recommends that the work be done now as there is available labour on the job under construction. I agree with Mr Gardner-Smith and beg to recommend the repairs. Awaiting your reply.

Your obedient servant,

Indian Agent.

Re Indian School Gleichen.

Dear Sir:-

Last Session, vote 226 page 56 of the Estimates called for \$2,240,500 for Education and school buildings. Part of that vote I believe is being used for an Indian School at Gleichen Alberta.

The details of the cost of each building is not given in the estimates. I should like to be informed about the following concerning the schools at Gleichen.

- (1) What was the amount of the contract ?
- (2) Who was the successful contractor ?
- (3) Was there a "Fair Wage clause" in the Contract ?
- (4) Will you kindly supply me with a copy of the fair wage clause in that contract ?
- (5) ~~Was the Fair Wage clause~~ in the said contract?
- (6) Was the Fair Wage clause submitted to the Minister of ~~Lab~~ Labor for his approval ?
- (7) What wages are being paid to (a) Common Laborers (b) Bricklayers (c) Carpenters
- (8) Is the labor being supplied from the district or from distant parts of the Dominion ?

Thanking you for the courtesy of your reply
I am, yours very truly,

A. P. Odoheal

Adshhead

Oct. 18, 1929.

Dear Mr. Adshhead,-

I have your letter of the 14th instant, with reference to the new Old Sun's Indian Residential School near Gleichen, Alta., and I beg to give you the following information in answer to your inquiries,-

1. The contract price for this building is \$143,170.00 for complete fireproof construction.
2. The contract has been awarded to Wyndels Construction Co., of St. Boniface, Man.
3. There is a fair wage clause in the specifications for this building.
4. A copy of the fair wage schedule is attached hereto.
5. The fair wage schedule was supplied by the Minister of Labour.
6. You will find in the fair wage schedule the rates for all labour employed on the work.
7. I regret I have not the information asked for regarding labour employed.

Yours very truly,

H. B. Adshhead

Dear Mr. Orr:

The contractors have raised the question of Fire Escapes being uncalled for in the fireproof construction decided upon. Their Superintendent, Mr. Bacharme, seems to be under the impression that the Fire Escapes shown and specified in the Plans and Specifications had reference to the original type of building intended, and not to the present fire-proof construction, and that they may now be omitted. I told Mr. Bacharme that I had no authority for deviating from the original Specifications in this regard, but would refer the matter to you. Please advise me in the matter promptly. Should the Fire Escapes be omitted, we should place windows where the door exits are shown.

The contractors' St. Boniface office has written to say that telegrams and letters to Ottawa on the matter of authorizing the design of the heating boilers have not been answered, and as these boilers are yet to be manufactured, it is important to have an early decision, - hence my wire on the subject to you this morning.

The work is making good progress, the concrete walls are completed, and yesterday a start was made on the brickwork. I enclose 2 or 3 snap-shots taken about a week ago, and shall send others as the work progresses.

Yours obedient servant

E. Gardner Smith

Inspector of Construction.

Dear Mr. Smith,-

Replying to your letter of the 4th instant, with reference to the new Old Sun's School, the plans and specifications call for installation of fire escapes, and the Department will expect the contractor to install these.

I expect to leave around the twentieth for the West and will, in all probability, see you at the Old Sun's School around the last of the month.

Yours very truly,

R. GURNEY ORR.
Architect for the Department.

INDIAN AGENT

Old Suns School.
Gleichen, Alta. Oct. 18th, 1929.

The Secretary.
Department of Indian Affairs.
OTTAWA, Ont.

Sir:

I beg to advise you that I have to-day issued a second Certificate, for \$22,774.50, to the Wyndels Construction Co., Ltd., in payment of 90% of the value of labour and materials supplied by them to date on their contract for the erection of the above-mentioned school.

I enclose a copy of their Progress Estimate, which will enable you to see how the amount of the said Certificate is arrived at.

Rapid headway is being made on this building, and the brickwork is completed all round up to the ground floor. There is also a large quantity of materials on hand. About 50 workmen are being employed, including 18 bricklayers, the object being to get as much work done as possible during favourable weather.

We are having a fine open fall, which greatly facilitates outdoor work.

I have the honour to be, Sir,

Your obedient servant

E. Gardner-Smith.
Inspector of Construction.

Re - Old Suns School, Gleichen, Alta.

Sir:

I beg to advise that I have to-day issued a third Certificate, for \$19620.00, to Wyndels Construction Co., Ltd., general contractors for the above-mentioned building, in payment of 90% of the value of labour and materials supplied by them on their contract to date.

I enclose a copy of the contractors' 3rd Progress Estimate, which shows how the amount of the Certificate was arrived at.

Excellent progress is being maintained on the new building, and the brickwork is almost up to ground floor ceiling all round. We are getting fine mild weather, with no snow. Everything is going along satisfactorily.

I have the honour to be, Sir,

Your obedient servant

E. Gardner Smith

Inspector of Construction.

Old Suns School, Gleichen, Alta.
Oct. 5th, 1929.

R. Guerney Orr Esq.
Architect.
Department of Indian Affairs.
OTTAWA.

Dear Mr. Orr;

As requested, I beg to append the list of decisions regarding the work here which you sanctioned when here recently.

1. Omit Aspirating Coils in Ventilation Flues.
2. The Stairways in Principal's Residence to be of wood.
3. No substitute for Slate Blackboards specified.
4. Base for Terraza Floors to be of concrete.
5. Iron Doors to be placed over Ash Hoist.
6. Heavier Power Wiring approved for Laundry Machines.
7. Dark Red Bricks approved for Stair Walls, with narrow joints and colored mortar.
8. Detail to be sent for Front Balcony.
9. South Verandah to have brick piers, sheet metal cornice, brickwork to hand rail height, and stone coping.
10. Main chimney to be increased in height 10'
11. Kitchen Chimney to be suitably anchored.
12. Fire Insurance of \$10,000.00 to be placed at once.
13. Basement Partitions, other than brickwork, to be clay tile.
14. All Corridor Doors to have glass panels.
15. Refrigerator Room to be widened one foot.
16. Basement Range Closets to be changed in accordance with Provincial regulations.
17. Grease Traps in Kitchen & Seryery to be water-cooled type.
18. Build in gypsum Clothes Closets in Staff Bed Rooms.
19. Demolish old residence on completion of school
20. Install Iron Hand-rail, newels and balustrades at Main Entrance Steps at quoted price of \$147.00 FOB Calgary.

The general work is going ahead steadily, there now being 12 bricklayers at work. Our weather continues fine, with frosty nights. We all appreciated the friendly counsel you gave us, and we are doing our best to get the results that you have visualized in the plans of this splendid building.

The snap. Shots turned out well. Shall send you them shortly.

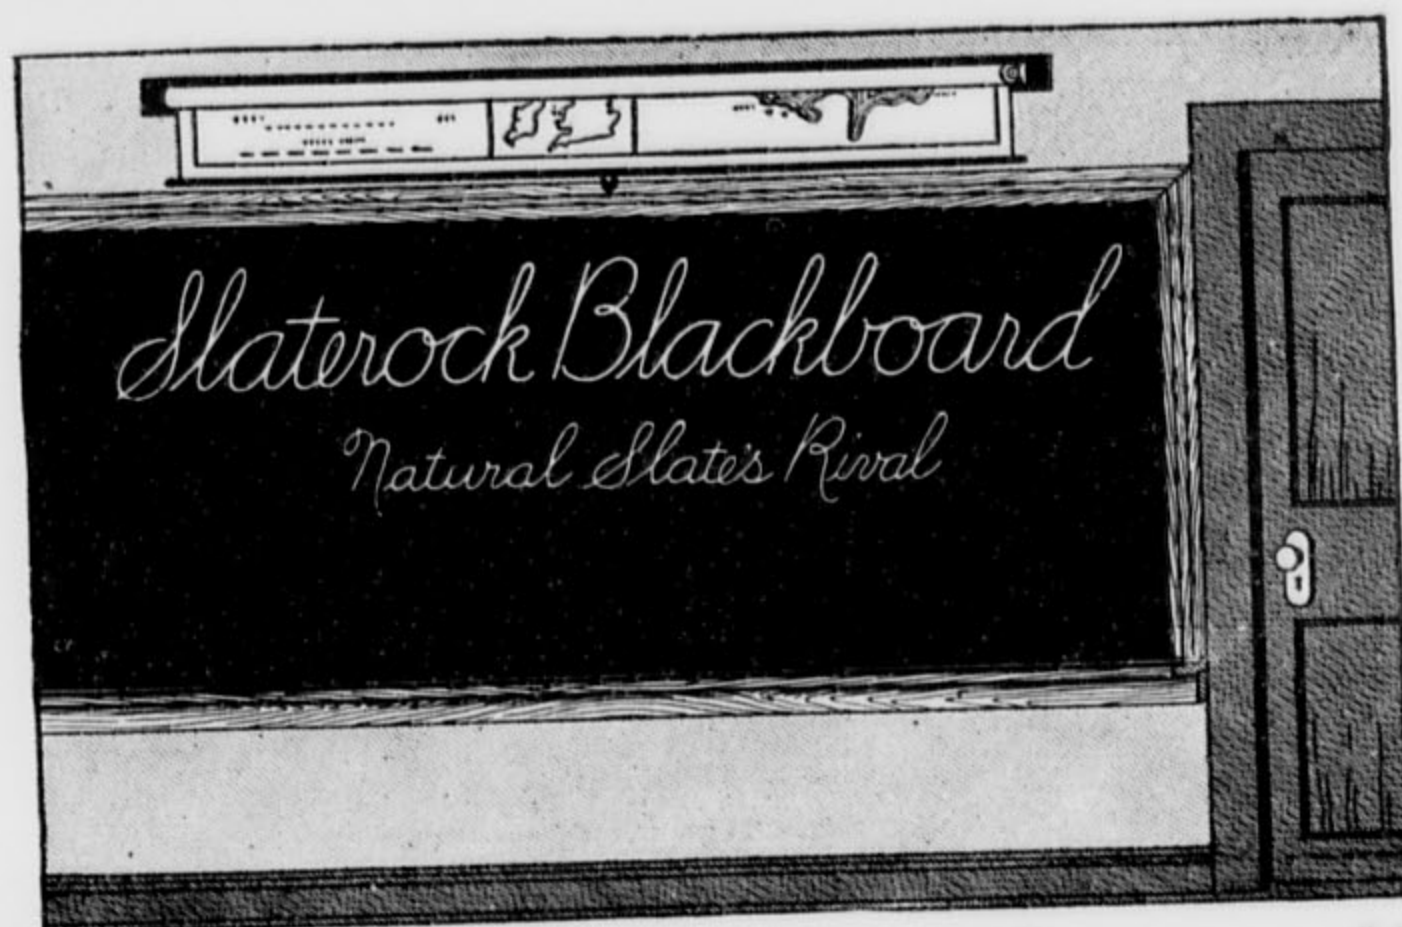

Your obedient servant

O. Gardner-Smith

Slaterock Blackboard

How Slaterock Is Made

The core or foundation of Slaterock is made from pure gypsum rock. The gypsum is made plastic and then moulded and compressed between two sheets of tough mineralized fiber boards, forming when set a sheet of rock uniformly $\frac{3}{8}$ -inch in thickness, possessing all of the inherent properties of the native rock.

Slaterock Blackboard is true and straight and being made from rock cannot warp, crack or buckle. Changes in temperature or excessive moisture have no effect on Slaterock—it always retains its original shape and condition. Besides, it is reinforced at top and bottom by a specially patented reinforcement which protects the board from injury in handling. It is absolutely impervious to moisture, and in this respect it differs from boards made of pulp or paper which naturally do not possess these qualities.

The Writing Surface

The writing surface of Slaterock is produced by the application of a series of heavy layers of blackboard surfacing, rubbed down to a uniform, hard, velvety finish. This finish supplies a dull blue-black chalk-marking surface, possessing wonderfully long-wearing and easy-erasing qualities. Uniform quality is maintained by frequent tests of the material during the manufacture of the boards. Although Slaterock is not affected by moisture, two coats of waterproofing are applied to the back and edges of the board as an added insurance.

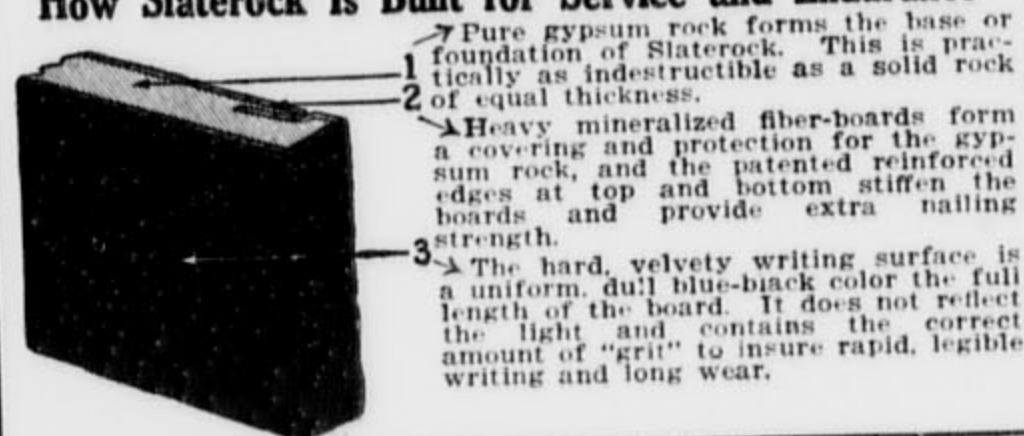

Lengths to 8 Feet

Slaterock Blackboard is made in standard widths of 3, 3½, and 4 feet, and in lengths from 1 to 8 feet. Any desired length will be cut, but a fraction of a foot in length is charged as a full foot. Always state width and lengths wanted. However, since Slaterock Blackboard is so easy to cut, we recommend ordering in long lengths and cutting at the building to insure perfect fit and prevent waste. Weight, crated, about 2 lbs. per sq. ft. (one-third the weight of slate). Furnished in black, green or brown.

Slaterock may be used on any kind of wall—stone, brick, plaster, boards, or directly over the bare studding, and can be installed by anyone. As there is no contraction or expansion with Slaterock, no expansion space is necessary in applying moulding to Slaterock Blackboard; therefore it is recommended that it be nailed all around. Simple directions for installing Slaterock are sent with each order.

SLATEROCK is just what its name implies: a rock core with a slate surface. It is a permanent blackboard, the life of which is measured only by the life of the school building itself. Extreme care and exacting supervision in the process of manufacture have made a superior rock into a blackboard that is supreme in every way. Sample mailed free upon request.

How Slaterock Is Built for Service and Endurance

GUARANTEE

We guarantee every sheet of SLATEROCK Blackboard to be equal in quality to any sample (since samples are cut from odds and ends of regular stock.) If properly installed and cared for, it will give entire satisfaction for a period of many years, and in most instances will last the life of the building.

Prices

Slaterock (including transportation and installation) costs only about one-half as much as natural slate. Every piece is thoroughly tested before shipment and is guaranteed satisfactory.

	Black	Green or Brown
500 sq. ft. or more, all sizes, price, per sq. ft.	\$0.24	\$0.26
300 to 499 sq. ft., all sizes, price, per sq. ft.	.25	.27
100 to 299 sq. ft., all sizes, price, per sq. ft.	.26	.28
1 to 99 sq. ft., all sizes, price, per sq. ft.	.29	.31

Advantages Over Natural Slate

Slaterock Blackboard possesses many distinct advantages over natural slate. School boards planning new buildings as well as replacements in old ones should give consideration to the following:

Surface and Color: Slaterock has a fine velvety surface with a rich, deep, blue-black color, soft to the eyes, supplying a sharp contrast for chalk marks. Even the best grades of natural slate are gray in color.

Price: Slaterock costs about one-half as much as natural slate (considering transportation and installation).

Permanency: Slaterock will last as long as your school building. There is little advantage in having a blackboard last longer.

Saving in Transportation: Slaterock weighs per square foot about 2 lbs.—natural slate, 6 lbs. Slaterock is shipped from Chicago—natural slate from eastern quarries. The difference in freight is enormous.

Breakage: Hardly a shipment of natural slate reaches its destination without some breakage. There is no breakage with Slaterock.

Installation: Anyone handy with a saw and hammer can put up Slaterock. Only an expert can install natural slate.

Prompt shipment: Slaterock is manufactured and carried in stock at Chicago in all sizes, thus you are assured of prompt shipment. Natural slate must be made up for each order. Frequently several weeks are required for shipment.

Slatoplate Blackboard

Manufactured and Guaranteed by Beckley-Cardy Company

Slatoplate is a character blackboard from the foundation up to the last blackboard finish, and is deservedly popular with every type of school building. Made in plates or slabs up to 12 feet in one piece. Sample mailed free upon request.

How It Is Made

The base or foundation of Slatoplate Blackboard is made entirely of spruce and other pure wood fibres. These long, tough, wiry fibers make a stiff, wood-like board, while the special processing hardens and toughens it. Each sheet is thoroughly and scientifically kiln-dried, waterproofed and surface-filled. Thus Slatoplate Blackboard is stiffer, harder, stronger and more dependable than other boards. A strong statement, but a true one.

More Durable

Most composition blackboard is four-ply. Slatoplate Blackboard is five-ply and will therefore stand unusually severe usage. Some boards are so soft that you can easily dent them with your finger nails, and a little pressure will open up their corners. Slatoplate is harder because of its fine tough fibers and the greater pressure with which they are put together. The corners therefore do not split open, and the board lays and stays perfectly flat to the wall. Slatoplate contains no irresponsible (old news) or dirty (chip) fibers with their tendency to buckle and warp. Take a knife and cut a sample of Slatoplate. It cuts with a smooth edge like a piece of pine lumber. Most boards saw or cut with a ragged edge.

Very Strong

No other board has so many distinctive qualities. No other manufacturer urges you to test or compare his product by an open test that you can make. Throw a piece of Slatoplate down on the floor and hear its wood-like thud—scratch its surface and see how hard it is—break a corner and see how stiff it is—bend it and see how strong it is!

A Dependable Blackboard

Forty years of use in schools is conclusive proof of the serviceability of wood-pulp composition blackboards. During that time they have been used successfully in every type of building. There is hardly a school system today that does not use some wood-pulp blackboard. The great popularity of this blackboard is evidenced by the fact that several million square feet of it are installed annually for permanent use, in Portable Buildings, Kindergartens, Private and Sunday Schools, Lecture Halls and many other places of instruction.

Slatoplate is the best Wood-Pulp Blackboard manufactured. Made at Chicago and carried in stock for prompt shipment.

The Writing Surface

Slatoplate writing surface is hard, close-grained, and of an even, uniform color. It is obtained through a series of slating coats which are prepared in our own plant and applied by experts. The last coat is hand-rubbed to a fine, velvety writing surface which makes for rapid, legible writing. Slatoplate has the best chalk-marking surface, with just enough "bite" to cut the crayon noiselessly and make a clean, white, distinct mark. It erases easily and will not pit, peel, check, nor wear shiny. It will not change color with age, and retains its splendid writing surface under the most severe usage. Two waterproof coats are applied to the back. Slatoplate is guaranteed for ten years, but frequently outlasts the building.

GUARANTEE

We guarantee every sheet of Slatoplate Blackboard to be equal in quality to any sample (since samples are cut from odds and ends of regular stock), and to give entire satisfaction for a period of ten years of ordinary schoolroom usage.

Colors

Slatoplate is made in three colors: Black, Green, and Brown. Black is shipped unless otherwise specified.

Lengths to 12 Feet

Slatoplate Blackboard is made in standard widths of 3, 3½ and 4 feet, and in lengths of from 1 to 12 feet. Any desired length will be cut, but a fraction of a foot in length is charged as a full foot. **Always state width and lengths wanted.**

However, since Slatoplate Blackboard is so easily cut, we recommend ordering in long lengths and cutting at the building to insure perfect fit and prevent waste.

Slatoplate may be used on any kind of a wall—stone, brick, plaster, rough boards, or directly over bare studding, and can be installed by anyone. Simply put it on the wall and nail the moulding around. It is easily cut with an ordinary saw. Simple directions for installing Slatoplate are sent with each order.

Prices

Slatoplate costs no more than ordinary blackboard, but lasts twice as long. Every piece is thoroughly tested before shipment and is guaranteed satisfactory.

Simplex and Duplex Bulletin Boards and Tack Strips

BULLETIN BOARDS are a necessity in the modern classroom to facilitate the showing of drawings, pictures, specimens of work, announcements, etc. To meet this growing demand for class exhibit space we manufacture two types of bulletin board as described below. You will find SIMPLEX and DUPLEX Bulletin Boards quality products of proven reliability, making appropriate companions for our Slatebestos, Slaterock and Slatoplate blackboards.

Bulletin Boards are as essential as blackboards and should meet certain definite requirements to give the utmost in satisfaction. The peculiar structure of the special cork composition used in the construction of SIMPLEX and DUPLEX bulletin and tack boards makes them always satisfactory. Thumbtacks can be easily pushed into the cork, hold securely and can be removed readily. The special cork surface does not show holes when tacks are removed.

Bulletin boards are usually installed as shown in illustration on page 1—above the blackboard in strips and at the ends of the blackboard in panels. They protect your blackboard from being used as a background for pinning and pasting pictures, which practically ruins the blackboard and makes unsightly schoolrooms as well.

SIMPLEX and DUPLEX Bulletin Boards do not warp, curl, check or buckle and when soiled can be cleaned easily with soap and water.

Simplex Bulletin and Tack Boards

Made from best quality cork board one-quarter inch thick, cemented to heavy burlap backing. Installed in hundreds of schoolrooms. Furnished in 6 in., 9 in., 12 in. and 18 in. widths. Cut to fit spaces any length. Easy to install and will last forever. Colors: light brown or green.

Guarantee

We guarantee SLATEBESTOS blackboard, when properly installed and cared for according to our printed instructions to give satisfactory service during the life of the school building.

Simplex Bulletin Boards and Tack Strips

THESE are as essential as blackboards in the modern school, and are easily installed. Simplex Bulletin Boards and Tack Strips are placed above and at the ends of the blackboards in panels and strips; also in panels in doors and partitions.

Simplex Bulletin Boards are uniform 1/4-inch thickness pressed cork of uniform color and resiliency with burlap backing. The cork surface holds pins or thumbtacks securely and does not show holes when tacks are removed.

Simplex Bulletin Boards do not warp or buckle, and when soiled can be cleaned easily with soap and water. They are easily installed by any carpenter by cementing to the wall or nailing along all edges before putting the moulding in position. Furnished in light brown or green color.

No. 60. Price per lineal foot, 12 inches wide. .\$.025
No. 90. Price per lineal foot, 18 inches wide. .\$.40

Blackboard Mouldings

For Use With Slatebestos

No. 1. Base moulding for use at bottom and which forms a support for No. 5 chalk trough. 2 inches wide. Per foot.\$.07

No. 2. Rabbed Moulding used for top and ends or for frame all around. 2 inches wide. Per foot.\$.07

No. 4. Quarter-round Moulding used at base of blackboard to hold in place, also used in corners and against window casings. 5/8 inch wide. Per foot.\$.02

No. 5. Improved Chalk Trough for use with mouldings. Center "hump" corner pockets collect and hold dust. Crayons and erasers can not pick it up. 2 inches wide. Per foot.\$.07

Simplex Invisible Blackboard Joining Strips

"H" SHAPED

For use with Slatebestos Blackboards. The modern way of joining blackboards where necessary to use more than one piece on long walls.

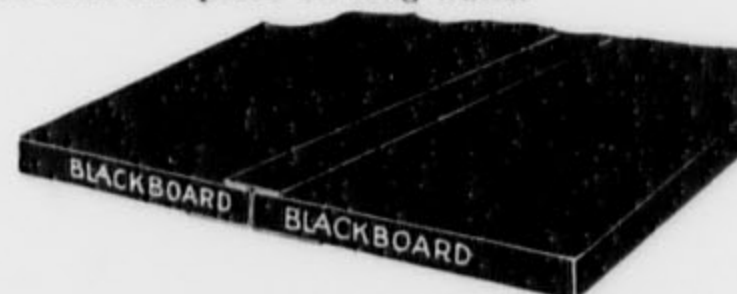

Illustration shows how Simplex Joining Strips are fitted to the blackboard

The illustration shows the proper method of covering joints on large wall spaces when more than one piece of blackboard is used. This method does away entirely with the unsightly "hump" produced by the half-round moulding which many manufacturers of composition blackboard use. The installation is most simple—the strips merely being fitted in between the two slabs of blackboard, the moulding at top and bottom holding them in place. Made in two lengths to fit width of blackboard.

Prices Simplex Joining Strips

No. 40. For use with Slatebestos Blackboard.
Price, per strip 3 1/2 ft., or 4 ft., each.\$.40

Joining strips are furnished to match color of the blackboard, thus making one continuous writing surface.

A Tested, Superior Blackboard

Slatebestos has established a new standard of blackboard excellence by practical proof and demonstration of its durability, economy and desirability.

How Slatebestos is Made

The base of Slatebestos consists of asbestos fibre, hard minerals and cement, united under a tremendous pressure of 24,000 lbs. to the square foot.

Slatebestos has great tensile strength because of the fine, extra long, tough, clean, selected asbestos fibres employed in its manufacture, which preclude any tendency to buckle or warp.

Slatebestos contains a special, high grade cement mixture with hard minerals, which improve with time. In fact, it actually becomes tougher and harder the longer it is used.

Slatebestos is as hard as rock, possesses extreme density with almost no expansion. It is built solid throughout its full 3/16 inch thickness.

Perfect Writing Surface and Color

The writing surface of Slatebestos is produced through a series of liquid blackboard surfacing coats, which penetrate the body of the board. The method is to apply each coat and then rub it down, thus building up the incomparable, velvet like, non-reflecting, dark slate color writing surface.

The result is ideal for rapid, legible writing. The chalk marking surface contains just enough "bite" to cut crayons, without noise and makes a clean, white, sharp mark, which can be plainly seen from all parts of the schoolroom without eyestrain. Erasures can be made easily and rapidly.

Just a few of the many good reasons why Slatebestos has the advantage over other types of Blackboards

MORE ENDURING: Slatebestos actually improves with age. It will render years of satisfactory service. Due to its composition of asbestos and cement, Slatebestos is the greatest fire-resisting and enduring blackboard on the market today.

NO BREAKAGE: Because Slatebestos possesses elasticity, it is subject to practically no breakage. Users of natural slate know from experience a shipment seldom arrives in perfect condition, with consequent delays, expense and annoyance.

LONGER LENGTHS: Slatebestos is manufactured in long lengths up to 8 feet. Hence it requires fewer joints. You are assured of a more continuous and better writing surface.

LOW UPKEEP: Slatebestos surface is perfect and uniform, and remains so indefinitely. Refinishing is infrequent and far less costly than slate. When necessary it can be done at a very small expense. Cost of maintenance is reduced to a minimum.

SAMPLE FREE ON REQUEST

Permanent, Durable, Dependable

There is no better blackboard made than Slatebestos for installation in new schools or for replacement in old ones where a permanent blackboard is required.

Low Cost — Saving in Freight

Slatebestos costs considerably less per square foot than natural slate. Your cost of installation is much less. But that is only a part of the actual saving. You pay freight on two-thirds less weight. There is little or no breakage, no inconvenience, no delays. And above all you have a better blackboard.

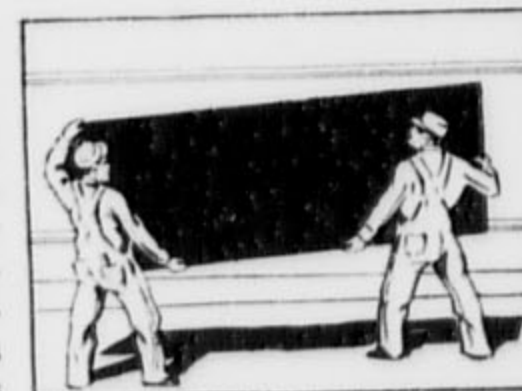

Sizes and Widths

Slatebestos is made in standard widths of 3 1/2 and 4 feet, and in any length up to and including 8 feet. Any desired length will be cut, but a fraction of a foot is charged as a full foot. Slatebestos is 3/16 inch thick and weighs 2 1/4 lbs. to the square foot.

Easily and Quickly Installed

Slatebestos can be installed over any kind of even wall of plaster, stone, brick or tile. Joints can be made secure with Simplex Joining Strips, so that writing over them is always possible, thus forming a continuous writing surface.

We furnish complete directions for the installation of Slatebestos—directions so simple that it is possible for any one to install it.

Service

Slatebestos is carried in stock in Chicago and immediate shipments are assured.

We have a thoroughly efficient Service Department, competent to advise in all questions pertaining to blackboards. If there are any points not clear, write us.

BLACKBOARDS

Re: School at Gleichen, Alberta.

WE
MANUFACTURE

Dear Sir:-

We wish to inquire how plans for the above school are progressing. Our records indicate that we sent you a letter recently, soliciting your consideration of our SLATEBESTOS blackboard, inquiring if you would be interested in our sending you sample and offering special prices according to requirements.

As you, undoubtedly know, we are also manufacturers of SLATEROCK and SLATOPLATE Blackboards and Cork Bulletin Boards. These blackboards are Guaranteed, less expensive and are giving splendid service in the many schools in which they are now being used.

Briefly, we wish to state that SLATEBESTOS, manufactured slate, is rapidly taking the place of quarried slate. It can be bought at a large saving. It is preferable in many ways to slate. It is Guaranteed to last the life of the building, when properly installed and cared for. It is easy to install, write on, read from and erase, and improves with use.

We shall appreciate your courtesy and fair consideration in answering the following inquiries at your early convenience and thanking you for same, we are

Very truly yours,
BECKLEY-CARDY COMPANY

RCC ML

Sir:

I have your letter of the 26th ultimo, relative to the repairs required to the litter carrier in the barn at the Old Sun Indian Residential School.

In this connection I have to say that you may incur an expenditure not exceeding approximately the sum of \$40 in carrying out the repairs as suggested by Mr. E. Gardner Smith. After this work has been completed, please forward an account, in duplicate, properly certified, covering the expenditure incurred.

Your obedient servant,

J. D. McLean,

Sir:

Re- Old Suns School, Gleichen, Alta.

I beg to advise that I have to-day issued a 4th Certificate, for \$17,280.00, to the Wyndels Construction Co., Ltd., in payment of 90% of the value of labour and materials supplied by them to date on the above-mentioned building.

I enclose herewith a copy of the contractors' 4th Progress Estimate, from which you will see how the amount of said Certificate was arrived at.

The work is progressing satisfactorily, and the weather continues fine and mild.

I have the honour to be, Sir,

Your obedient servant

E. Gardner-Smith

Inspector of Construction.

Dear Sir:

Re Indian School,
Gleichen, Alberta.

We would like very much to have the opportunity
of quoting on the refrigerating equipment suitable for
this installation.

We understand that specifications for a cork
insulated refrigerator box are included in the original
contract. We presume that the actual refrigerating
equipment will be supplied separately.

Would you be good enough to advise us what type
of equipment you had in mind installing, and we will
be glad to quote you our very best prices.

Yours truly,

BRUCE ROBINSON ELECTRIC LTD.

Old Suns School.
 Gleichen, Alta. Dec. 11, 1929.

DEC 16 1929

RECORDS

REPORT OF PROGRESS ON OLD SUNS SCHOOL.

Sir:

The general work of construction advanced at a very satisfactory rate of speed during Sept, Oct. and Novr, the weather being favorable for outside work. However, with the advent of December came snow and cold weather, and we are now in the grip of the worst storm yet experienced since the job started. For a full week the temperatures have been sub-zero, reaching 18 degrees below zero last night. To-day at 3.30 P.M. the thermometer is at 8 below, with a cutting north wind, and light snow falling.

The outside brickwork is temporarily halted by the cold weather. Most of the outside brick walls are completed, including the walls of chapel, laundry, both wings, and residence, but the last storey of the main building is not much more than started, and the chimneys are yet to be built. The bricklayers are now erecting the tile partitions in the basement, and to-morrow will start erecting the gypsum partitions in the residence. Storm sash have been placed in most of the window openings, and several coke-burning heaters have been set up, and a working temperature is thus obtainable for some of the inside mason work.

The heating boilers arrived a few days ago, and were got into place yesterday. The openings which had been left to admit the expected Spencer boilers proved inadequate for the boilers supplied, and considerable cutting of brickwork was inevitable to get them in. This was carefully done, and will be restored without detriment to the building. The heating boilers seem fully satisfactory, being much like the Birchfield boilers in use at the Lytton school, and are the product of the Vulcan Iron Works, of Winnipeg. The hot water storage tank and 10 H.P. high pressure boiler have also arrived, and it is proposed to utilize the latter boiler for temporary heat until the large heating boilers can be made ready.

The roofing contractor is also here, and to-day is laying the roofing paper over the residence, but I am advising him to await more moderate weather before starting on any

Indian Affairs. School Files.
 (RG 10, Volume 6359, File 758-5, part 6)

PUBLIC ARCHIVES
 ARCHIVES PUBLIQUES
 CANADA

2.

for roofing work. I am afraid of subsequent buckling of the roofing if laid in extremely cold weather.

The electrical sub-contractor is carrying along his work well, and keeping ahead of the trades which will follow.

The plumber is also well along with his roughing-in, and doing good work. I made a water test of his work as far as it was ready, and there was not a single leak.

The heating contractor's men were here some time in advance of the arrival of the boilers, and have the steam mains in place all through the basement, and are now making the connections to the boilers. The Trane heating specialties will be used on this job. I should have preferred the Dunham, but had no ground for refusing the Trane.

The concrete slabs have been run on all floors, and at present look satisfactory, but I shall examine them more closely when heat is available, and the frost driven out of the building. Should there be any faulty spots, I shall have them relaid in respect of same.

The roofs are all sheeted in, and ready for the tar and gravel, with the exception of the main building, as already mentioned.

The gypsum tile has been delivered in the building. I am in communication with the gypsum manufacturers, and have their detailed specifications for erection of same, which we shall endeavour to follow to the letter.

The rate of progress has inevitably slowed down in consequence of the extreme weather we are now experiencing, but we're hoping for the early arrival of a Chinook, and then we should be able to get back into high gear again.

I have the honour to be, Sir,

Your obedient servant

E. Gardner Smith

WINNIPEG, MAN. December 19, 1929

The Secretary,
The Department of Indian Affairs,
Ottawa, Ont.

Dear Sir:-

During my visit to the Old Sun School on November 1st. last, my attention was directed to the need of a new switch for the electric motor in the pump-house of the stock barn, and also for the need of a heater to warm the motor in cold weather. I was informed that much difficulty was experienced in getting the motor heated especially in the colder weather which had then set in, and as I was then on my way to the Carcross School in the Yukon and could not take the matter up with you myself, I suggested that this need be made known to the Indian Agent with a request that he should take any further action necessary.

As the motor has been installed on the wall of the pump-house at about 7' from the floor, it was suggested to me that it should be lowered to the floor, and also that a pump jack should be installed to take the place of the 14' pull rod which causes sufficient strain to put the motor out of commission prematurely. If you have not yet received any communication from Mr. Indian Agent Gooderham in connection with these matters, I shall be deeply obliged if you will take them up with him at your earliest convenience and authorize him to effect any changes or improvements which he may consider necessary.

While visiting this school, I went carefully over the farm instructor's cottage, which your Department so kindly provided, and was very much pleased with the same. There were a few improvements such as storm windows for the basement, the placing of some of the windows in the sun-porch on hinges, etc., which had not been provided, and I referred these to the Inspector of Construction on the new school for reference to you for further consideration.

The Farm Instructor, Mr. Bates, who is one of our most competent appointees for the position he holds, presented a strong request that the cottage be linked up with the water main at the main school building, and I undertook to refer the

request to you and ask for your favourable consideration of the same. Speaking for myself personally, I beg to state that I consider the request altogether reasonable. I do not know of any staff agent at our Society's Schools who is better entitled to the comfort which a bath would furnish, than the farm instructor. In the cultivating and harvesting periods, he must frequently return from his work in a very labour-soiled condition and one can easily understand what a bath would mean to him at such a time. As matters stand at present, he is left without either a bath, or water for bathing purposes, or for the numerous household requirements unless it is carried in pails by himself or the bigger boy pupils from the main school building. I shall be very grateful, therefore, if you will reconsider this matter, and grant the farm instructor's request to have a bath installed and the water laid on from the main school supply system.

*Extract
103-1-5* [I should like to make the same request with regard to the Farm Instructor's cottage at our Blood School. At the Blood School there is a room with a bath in it, but the building has never been linked up with the main school's water system. The expense involved at either school would be a very little, and I am of the opinion that if your Department supplied the materials, the School management would undertake the work of installation. *no funds
AT*]

With the compliments of the season,

I have the honour to be,

Sir,

Your obedient servant,

DEPARTMENT OF INDIAN AFFAIRS
CANADA

R

P.O. Box 31.
Gleichen, Alta. Dec. 23, 1929.

The Secretary.
Department of Indian Affairs.
OTTAWA.

Re- Old Suns School, Gleichen, Alta.

Sir:

I beg to advise you I have issued a 5th Certificate, for \$19,440.00, to Wyndels Construction Co., general contractors for the above building, in payment of 90% of the value of labour and materials supplied by them on their contract to date.

I enclose a copy of the contractors' 5th Progress Estimate, which shows how the amount of the Certificate was arrived at.

As advised in my Report of the 11th instant, the work of construction had slowed down in consequence of severe wintry weather, and this condition has been continuous since. No outside brickwork worth mentioning has been done during the past fortnight, and there still remains to be done the carrying up of the top storey of the central portion of the main building, and the completion of the chimneys. A week or ten days of suitable weather should enable the outside brickwork to be completed.

The erection of the interior tile and gypsum partitions is completed, except for the unfinished portion of the main building. We followed the manufacturers' specifications closely, and it looks as if we have a satisfactory job. This work was done by the bricklayers when the inclement weather stopped outside work, and a limited amount of temporary heat was supplied by a number of coke-burning heaters.

The roofing sub-contractor made a start, and laid the roof over the Principal's residence, but I then stopped him as I was afraid of the roofing buckling afterwards when laid in very cold, stormy weather. He was a real Spartan for tackling it when he did. All the roofs are sheeted in readiness for the tar-and-gravel roofing, with the exception of the before-mentioned central portion.

The weather has recently moderated, and Chinook breezes have

Indian Affairs. School Files.
(RG 10, Volume 6359, File 758-5, part 6)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

2.

commenced to blow, so I trust better conditions for outside work will soon prevail. Deep snow covers the prairies.

With the exception of 10 labourers and a foreman, the rest of the crew have migrated to their various homes for Christmas and New Year, so there will not be very much advancement made until after the New Year. I shall spend Christmas Day at my home in Calgary.

The heating and laundry boilers are now in position, but the first steam heat will come from the high pressure laundry boiler, which will be temporarily connected to the steam mains.

After the New Year, weather permitting, the work will again be speeded up.

Wishing everybody at the Department's headquarters the Compliments of the Season,

I have the honour to be, Sir,

Your obedient servant

E. Gardner-Smith

Inspector of Construction.

Dear Mr. Smith,-

When the time comes to arrange for the installation of the refrigerating plant at the new Old Sun's School, I would ask you to please obtain from the Bruce Robinson Electric Company, Ltd. of Calgary, a price for the complete installation of a suitable plant.

Yours very truly,

R. GUENNY ORR.
Architect for the Department.

Gleichen, Alta.

OLD SUN INDIAN RESIDENTIAL SCHOOL.

Dear Sir:-

Regarding our conversation re float traps on the end of the mains in the above named school. We have talked this over with the Dunham Co. and also the Trane Company representatives in this City and they are under the impression that it would be advisable to use traps on the end of each separte circuit.

On using traps on the end of each circuit we are going to keep the steam in the mains for a longer period than if we leave the ends open as shown on the plans.

We are under the impression that No. 22 traps would be of ample capacity to take care of each circuit. These traps have an inlet and an outlet of one inch and the cost per No. 22 trap and strainer would be \$37.50 each.

Trusting this is the information that you require and that you can arrange to have these traps installed on the end of the circuits, we are

Yours truly,

JEAN J. DAOUST LIMITED

R. Guerney Orr Esq.
Architect.
Department of Indian Affairs.
OTTAWA.

Re- Old Suns School, Gleichen, Alberta.

Dear Mr. Orr:

I enclose a letter received to-day from the heating sub-contractor, Jean J. Daoust, Limited, of St. Boniface, Man., in which he refers to the advisability of installing float traps on the ends of the steam mains.

Mr. Couture called my attention to this feature when he visited the job two or three weeks ago, and I then asked him to go into the matter with the Dunham Co's engineer in Winnipeg, and with the Trane Co's representative, and to ascertain if in their opinion these additional specialties were needed, and then to write me. The enclosed letter is the result of the conference.

Mr. Couture claims that too much steam will be lost from the mains, and pass down into the returns, if the said float traps are not used. This is a highly technical point which heating engineers can best advise upon, in the light of their experience elsewhere.

Will you please wire me on receipt of this letter, advising me whether you approve the heating contractors recommendation, and I will give orders in accordance with your decision.

Your obedient servant

E. Gardner Smith

R

Dear Mr. Orr:-

During a recent visit to the building, Mr. G.H. Gooderham, Indian Agent, urged the desirability of installing the necessary wiring so that an electric range might be used in the Principal's residence. He mentioned that the Reserve is being brought under a much lower cost of electric current than before, and that, in his opinion, advantage should be taken of the lower rate in the instance mentioned, especially as the residence kitchen is rather small.

Under the new contract with the Calgary Power Co. the school will get a "commercial rate" of current, which will run from 5¢ to 10¢ per KWH, according to amount used, and Mr. Gooderham thinks the school will earn the minimum 5¢ rate during at least part of the year. For power purposes (laundry, pumping, etc) a power rate lower in cost than the commercial rate will obtain.

The contractors quote a price of \$120.23 for running a feed from the distribution panel in the tank room connecting up with the power service, including all labor and materials, and making connection to the electric range in the Principal's kitchen. This would give the lower power rate, and would probably average out about 2¢ per KWH less than the commercial rate.

As an alternative, the contractors quote a price of \$75.51 for running a feed from the main lighting panel in the Principal's office to the Principal's kitchen, making necessary connections, etc. This would come under the commercial rate.

The Rev. Principal asked me to mention that in the event of the Department sanctioning the proposal of the electric range, he will be willing to omit the usual range boiler in his kitchen, which he estimates will make a saving of about \$40.00, the saving to be applied against the suggested extra wiring. Also, he states he would engage to pay the difference between the cost of the ordinary kitchen range and an electric range.

I promised the Indian Agent and the Rev. Principal that I would refer the matter to you for decision, and I would ask that you please wire a reply. In the event of this request being granted I want to have the wiring done ahead of the lathing and plastering.

Your obedient servant

E. Gardner-Smith
Inspector of Construction.

Construction Office, Old Suns School.

Gleichen, Alta. Jan. 23, 1930.

The Secretary.
Department of Indian Affairs.
OTTAWA.

Sir:

REPORT ON OLD SUNS SCHOOL, GLEICHEN.

Since my last Report the progress of construction has been greatly retarded by the extremely cold weather. Sub-zero temperatures, with snow and wind, have been almost continuous, reaching 45 degrees below zero. The result was we could not complete the brickwork of the central portion of the main building, or do any other outside work. The bricklayers have been idle for weeks. About three days ago the temperature commenced to moderate, and to-day at 2 P.M. the thermometer is at 26 degrees above zero, and our full crew of bricklayers are again at work. By the end of this week the top storey of the central part should be finished. The brickwork then to be completed will be the setting of all the coping stones, the completion of the front verandah and sun-parlour, the completion of the main chimney (about half up now), the kitchen chimney, the topping off of the ventilating flues, the cleaning off of the face brickwork, the building of the stair walls, and the laying of the enamel brick in the kitchen and scullery

The heating contractor made an attempt to supply temporary heat in a good part of the building. He first tried the high pressure laundry boiler, but found he could not hold the water in the boiler, and lost a couple of days experimenting. He then had a temporary breeching made locally, and hooked up one of the large boilers, but again he could not hold the water, so had to have water hauled six miles from the river in 30 below zero weather, and fill the boiler with the river water instead of that from the well. Since then he has been able to deliver a fair amount of heat into the greater part of the building, and the various workmen were thus enabled to carry on. At present a number of rads are connected on all but the top floor of the main building, and comfortable working temperatures prevail.

The gypsum partitions have been erected throughout except the top floor, and we appear to have a good job done. I received from the manufacturers detailed specifications and

Indian Affairs. School Files.

(RG 10, Volume 6359, File 758-5, part 6)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

2.

explicit directions, which we followed to the letter. Of course it is too soon to tell how this material holds up, especially with regard to plaster cracks as complained of elsewhere. In the basement, as previously authorized, we built the partition walls of clay tile; and on the other floors we used clay tile for the bottom course because of its less porous surface for taking the concrete base.

The plumbing contractor has his roughing-in well advanced and in so far as I have yet been able to test his work it is well done, with tight joints, and neat workmanship. We are putting in the stand-pipe system just the same as called for in the specifications except I have asked for an extension of the feedline so that the protection will be available in both the top dormitories. We have connected the temporary pumping plant to the permanent pressure tank in the building, and find ~~that~~ there is a small leak at one of the rivetted seams. If this leak does not take up I shall have a welder come and stop the leak by brazing the seam at the leaky spot.

Three painters are now at work glazing and painting the sash. They seem competent workmen, and are using good materials.

The plastering contractor has not yet arrived, and we saw in the paper an account of his being held up in Winnipeg just after he had drawn about \$700.00 for the pay-roll of the plastering labour at the Brandon Indian school, and robbed of this large sum at the point of the gun. The plaster material has been delivered, and much of the building is now ready for lathing.

The roofer came at the commencement of the very cold weather, and made a start at laying the tar-and-gravel roofing, but after he had finished the roof of the Principal's residence I stopped him as I deemed it impossible to get good work done in such cold stormy weather. Word was wired to Winnipeg last night reporting milder weather, and asking that the roofing work be now proceeded with. This work must be done before it will be safe to start plastering.

Weather permitting, good progress should be made from now on. It is rather early to hazard an opinion as to when the job will be completed, but it looks at present that it will run into April.

I have the honour to be, Sir,

Your obedient servant

E. Gardner Smith

Inspector of Construction.

Re- Old Suns School.

Dear Mr. Orr:-

Re- the electric refrigeration required for
this school, I have procured the following tenders:-

X Bruce Robinson Electric (Frigidaire)	625.00
with ice freezing coil, 18 lbs. daily,	
extra,	100.00
Kelvinator Electric Refrigeration,	665.00
with ice freezing unit, 12 lbs. in 12 hrs,	
extra,	100.00
Welsbach Electric Refrigerator,	740.00
with ice freezing unit, approx. 25 lbs day,	
extra,	110.00

I shall be glad to have your instructions as to the selection
of the plant you would like us to install; also please state
whether or not the ice freezing unit is to be included.

We are getting a good old-time Chinook at last, and at
present writing the temperature is 40 degrees in the shade,
which is much more agreeable than the 40 below which we had
recently.

OFFICE OF
INDIAN AGENT

The Secretary.
Department of Indian Affairs.
OTTAWA.

104-1-15
Construction Office, Old Suns School.
Gleichen, Alta. Feb. 5th, 1930.

Sir:-

I beg to advise that I have to-day issued a Sixth Certificate, for \$10,980.00, to the Wyndels Construction Co., Ltd, general contractors for the above-mentioned building, being in payment of 90% of the value of labour and materials supplied by them on their contract to date.

I enclose herewith a copy of the contractors' Sixth Progress Estimate which shows how the amount of said Certificate is arrived at.

I am glad to report that much better progress is now being made. The long-continued cold weather of December and January is now being followed by mild Chinook days, and all work is being speeded up in consequence. The outside brickwork is almost completed, and the tar-and-gravel roofing is now being laid under favourable weather conditions. The entire building is almost ready for plastering, the lathing being practically finished, and I expect the plastering will start within the next few days. The terraza work has not yet been commenced, although the materials are here.

I expect to send some recent photos of the building in a couple of days, which will give you an idea of the present stage of construction.

I have the honour to be, Sir,

Your obedient servant

E. Gardner Smith

Inspector of Construction.

OFFICE OF
INDIAN AGENT

Construction Office, Old Suns School.
Gleichen, Alta. Feb. 14, 1930.

R. Guernsey Orr Esq.
Architect.
Department of Indian Affairs.
OTTAWA.

Dear Mr. Orr:-

Regarding the small open porch shown on the Plans at the rear of the Principal's residence, the Rev. Mr. Gibney requests that this be closed in, and provided with a door and window. The reason he gives is that he fears his rear entry will receive the full force of the prevailing west wind, which often blows with great violence. Also it will receive the wind deflected from the adjoining blank wall of the school.

I recall that in the former building we had to build protection porches to keep the wind from striking the exposed entry doors--and this after two doors had been torn off their hinges and door checks, and their stiles split.

The contractors agree to make the desired change at a cost not exceeding \$100.00, and as much under this figure as possible. Will you please instruct me whether or not this requested change may be made.

The Provincial Boiler Inspector, Mr. Dick, gave us a call two days ago while passing through the locality. I shall have him come again and make a more thorough inspection before accepting the heating plant. While here Mr. Dick stated that in his opinion it would be advantageous to place a flange in the line of steam main in the basement corridor, which he said would greatly facilitate making repairs in the event of future trouble, and might save having to send a 6" main to Calgary to be threaded if a Tee or elbow had to be replaced. The heating contractor's representative does not take kindly to the idea, and will expect to be paid for the additional time and material involved, which may amount to \$20.00. I should like you to instruct me whether to carry out the Boiler Inspector's recommendation, or whether to omit the flange in question.

Your obedient servant

E. Gardner Smith

Re: Old Sun School

Dear Sir:

Just a few lines to let you know that I am having a little difficulty in collecting balance of my wages, the sum of \$75.00 for last December. Also note that my board and room at the above Hotel has not been paid for the period from November 25th, 1929 to January 31st 1930, the account has been sent to them, \$91.50.

I have a yearly contract with the Wyndells Construction Co Ltd which is enclosed, or rather copy is enclosed.

I also have a balance of \$116.10 due from the Cecilia Jeffrey school at Kenora Ont. This is not from the General Contract but for the Waterworks which was a separate contract with the Wyndells Construction Co Ltd.

My last years contract with them was on a salary basis plus ten percent of net profits.

I am sorry to have to draw your attention to this matter, but do not see of any other way to settle same.

Just as far as the work is concerned Mr. Smith, the inspector seems to be very satisfied. The outside work is practically completed and the plasterers are off on a good start. The terrazzo men are suppose to start tomorrow.

Kindly let me know when Hospital plans are coming out, and would greatly appreciate if you could send me a set as I would like to submit a tender.

Thanking you in advance for your kind and prompt attention to this letter.

I am
Very truly yours.

J. Decharme

Old Suna Indian School.
Gleichen, Alta. March 1st, 1930.

F.E. Harrison Esq.
Western Representative
Department of Labour.
OTTAWA, Ontario.

Old Suna School

Dear Sir:-

As mentioned in my telegram of yesterday, I called on the plastering contractors in Calgary mentioned by you with the exception of Mr. Alex. Sutherland, who was ill in bed at the time. I also had an interview with Mr. J.E. Wilson, Secretary of the Builders' Exchange, whose name and address you had also given me.

There was no question at any time regarding the wages being paid the plasterers, but the Calgary Union demanded that the plasterers employed be 50-50 Calgary men, - that is to say for each outside plasterer there must be one Calgary plasterer too. Mr. Boux the plastering sub-contractor conceded this, and dismissed good plasterers who had paid their own fare to work here, and put on Calgary men in their place.

Regarding the rate of pay for labourers employed by the plastering contractor, I was advised by the persons to whom you referred me that in Calgary it is now the practice to pay all such men on the basis of "plasterers' helpers", viz at 77¢ per hour. I have therefore given a ruling to this effect, and the higher rate of pay will be made retroactive, in the case of all men who attend on plasterers, including wheelbarrow men, mixers, and hod carriers.

With reference to the complaints of Louis Ducharme, and the two brothers Laune, these men are making claims for carpenters', steel workers and hoisting engineers' wages for the time they were assisting artisans, or running a small gasoline engine hoist. The youth Ducharme is the son of the foreman, nineteen years of age, and worked in the office as time-keeper, book-keeper, etc, pending the arrival of the contractors' accountant, Mr. DeBuck. He was then taken into the building at the same rate of pay as his own father had set on his services, and has since been working under the supervision of an experienced carpenter. This youth can not fairly claim carpenter's wages, as at the best valuation he is only an apprentice, and to concede such a claim would, in my opinion, be a gross injustice to the carpenter trade. He has a good knowledge of telegraphy, and I have seen his transit messages in the Gleichen station, but I am sorry that his talent in this respect did not hold him to that profession.

When in Calgary I enquired as to the qualifications of a "hoisting engineer", and was told by several builders, and also by a hoisting engineer himself then at work at his hoist, that the term has reference to men qualified to operate a steam hoist, and who hold at least 3rd class papers. Any intelligent labourer, with but a few minutes' instruction, can operate such a hoist as has been in

Indian Affairs. School Files.
(RG 10, Volume 6359, File 758-5, part 6)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

2.

operation at our job here, and every person among the builders I consulted in Calgary agreed that only qualified engineers can fairly claim a rating as "hoisting engineers".

Labourers are necessarily a movable quantity, and are frequently called from place to place to assist where assistance is needed. On country jobs particularly, labourers have to help to carry I Beams, Columns, and other heavy materials, and assist in lifting them to place, but such work does not, in my judgment, warrant a claim for structural steel workers' rates, which is a trade in itself. Nor if carpenters have two or three labourers helping for them to get a roof closed in (as was the case here) during bad weather, this does not, in my opinion, entitle a labourer to the wages of a qualified carpenter because of this casual rough help. On this job the amount of such work done by labourers is practically negligible, and in no case has any but competent carpenters been employed at strictly carpenter work, and they have been paid the fair wage rate of \$1.00 per hour.

The claims of the plasterers' labourers, - or rather, claims put forward on their behalf by the delegate from the Calgary Union-- has been satisfactorily adjusted, and everything is harmonious in this trade. The claims of Louis Ducharme, Albert Laune and Gus Laune for artisan's wages for part of their time, I have not endorsed. These three men were hired as labourers at the start, they have had several months' steady work, they were paid regularly as building labourers at 50¢ per hour, and signed their pay-sheets accordingly. Only when they were laid off, when there was no longer any work for them, were these claims brought forward.

I am sorry to say there has been growing friction between the officers of the Syndels Co. and Mr J. Ducharme, the foreman. I shall not go into the merits of the disputes, but I am of the opinion these fantastic claims for higher pay have their genesis in the bad feeling which unhappily is all too evident. It looks to me as inevitable that Mr. Ducharme be relieved of his position, and another competent foreman put in his place. I am expecting a climax at any time. Beyond seeing that good work is being done, I am trying to maintain a neutral attitude.

Yours faithfully

Inspector of Construction.

Dear Sir:

With reference to conversations
and correspondence with you in connection
with refrigeration for the Indian school,
I am sending to you under separate cover new
folder in connection with our commercial
system. You will find outlined in this the
many outstanding points of the Welsbach
system; most of these advantages which are
not possible with other systems, and I feel
sure that on due consideration you will
conclude the Welsbach system is the superior
refrigerating system offered to-day.

Yours truly,

MANAGER

TCB/EBG

Sir,-

With reference to the electric refrigerating plant required for the Old Sun School you may arrange with the Bruce Robinson Co. to install this plant, including an ice freezing coil of the capacity of 16 pounds daily.

When the plant has been satisfactorily installed and tested kindly submit a voucher for same in the regular way.

Your obedient servant,

R. W. M.

Old Suns Indian School.
Gleichen, Alta. March 11th, 1930.

F.E.Harrison Esq.
Western Representative
Department of Labour.
Saskatchewan Hotel.
REGINA, Sask.

Dear Mr.Harrison:

Your night letter of the 10th, sent from Port Arthur, reached me this morning. In the night letter are embodied complaints from several men purporting to say their wages are still owing them.

Each man whose name appears in said night letter has been paid up to his last hour of service, and in no case is there a single instance of any employee of the contractors being compelled to wait a single day for his pay when due. I inspected the pay-sheets this morning, and found thereon the signatures of the complainants themselves, thus acknowledging the receipt of their wages.

The real crux of the situation is simply this: a number of the workmen who were hired and paid as labourers were laid off when there was no more work for them, and now they are coming forward with claims for the higher wages of skilled artisans in the various crafts. It is for back-pay, on this higher scale, that they are seeking. In the main, I consider these claims invalid, and not in keeping with recognized building practice.

When I have a chance to talk with you personally I shall be able to throw more light on the subject than I can do by letter. However, I may now say that it appears to me that these complaints and claims all have their genesis in the ill-will of a deposed foreman, and that he has implanted this germ of discontent in the minds of others, and I believe these claims for higher classification of work owe their inspiration to him.

I shall be glad to see you on your western trip.

Yours faithfully

(Sgd) E.Gardner-Smith.

Inspector of Construction.

No. 850 Pumping Head With Belt Drive

No. 850 6-Inch Stroke

No. 1050 10-Inch Stroke

No. 1050 Pumping Head, Silent Chain Drive

The Crane No. 850 and 1050 Deep Well Systems effectively meet the need for reasonably priced, well-made systems which will pump water from any depth. With such systems on the market, no one is justified in doing without the health-giving, comfort-giving, labor-saving qualities of running water.

These new systems are made in capacities to pump 125 to 990 gallons an hour from depths down to 500 feet. Built of the finest materials, machined to a precision not found in ordinary pumps, these systems are constructed in every detail for enduring untroubled operation.

They share with other Crane systems the advantages of accessibility, simplicity, and easy repair which are so valuable in assuring buyer-satisfaction.

They are self-oiling. Most heads of this type depend on the dip of the crosshead and crank pin for oiling of these parts. In the Crane No. 850 and 1050, this practice has been improved by providing a positive overhead oiling system. The oil is collected in a reservoir between the pinions at the high point and carried by gravity to every bearing and pin, including the cross-head and guide rod. This construction means longer life for every part.

An important feature is the ease with which the sucker rods and plunger can be removed when connected to an open type working barrel or cylinder. The head need never be removed from the foundation to accomplish this occasional servicing. Since the water chamber and head proper remain intact in this operation there is no possibility of the two parts ever getting out of alignment when removing the rods and plungers. It is entirely enclosed as a protection against dirt and foreign substances.

It will not pound. The pump, of the walking beam type, has a sliding crosshead which moves the rod down at greater speed than up, cushioning the upstroke.

The system can be operated with either electric or gas engine power. The chain drive, supplied at slight extra cost on the No. 850, is recommended for its long, troublefree service and greater efficiency. For those who have their own gas engine power and belt drive, the pumps are available with tight pulley only; while for line shaft drive they can be furnished with tight and loose pulley at a small extra charge.

Alta.

Dear Sir.

I beg to tender on installing a Pumping Unit
at the Old Sen School Gleichen Alta. As follows .

One Number 1050F With 3 H.P Electric Motor 60 Cycle With Silent Chain
Drive, Cylinder Air Pump, Relief Valve, Automatic Pressure Tank Control,
Capacity 525 Gal Per Hour . With the nessary Weed Reds and drop Forged
couplings . One 3 inch Working Barrell with spring Valves . With Swing
check Valve, Pipes, and fittings, nessary to connect to Pressure tank.
And Labour to take up the present pump and install the above mentioned
Pump complete for the sum of Seven hundred and eighty five dollars
\$ 785.00

Trusting this will receive your consideration
and thanking you in advance.

Yours truly

L. Michael

OFFICE OF
INDIAN AGENT

Gleichen, Alta. March 19th, 1930.

Archibald
R. Guernsey Orr Esq.
Architect.
Department of Indian Affairs.
OTTAWA.

Re- Old Suns Indian Residential School.

Dear Mr. Orr:

With reference to a permanent water system for the above-mentioned school, you will recall that we are at present using the contractors' temporary engine and plant, and are pumping water from the old well on the site of the original building about 50' distant from the new school.

At the time of demolishing the old ruins, and filling in and grading, we carried up a foundation wall around the well, bringing same up to grade height, and thus having a secure foundation for a future well-house. The contractors placed a temporary wooden building on said foundation wall to give protection from the weather to the temporary pumping plant on the level of the former basement floor.

We shall soon require a permanent well-house, and I would respectfully suggest that a brick house be built, 10' x 10', for which the concrete foundation is in readiness. I could arrange with the contractors to erect this little building at proven cost, plus 10%, or get from them a straight tender. Will you kindly advise me as to the Department's wish. A suitable gal. iron water line has already been carried underground from the well to the new school, and connected to the pressure tank there.

With regard to a permanent pumping plant for the new school, I have received three tenders from three different firms, each firm being given full data bearing on the requirements. The tenders received from two of the firms quote on equipment so manifestly unequal to the work that I am not considering them. The third tender is from L. Michael, of Gleichen, a copy of which I enclose. Mr. Michael has done a great deal of work for the Department, and his work stands up well. I enclose Cut and Specifications of the pumping plant Mr. Michael proposes to instal, which I believe would prove very satisfactory over a long period of years. Mr. Michael has installed several pumping plants of this type, all of which are giving untroubled service.

Indian Affairs. School Files.
(RG 10, Volume 6359, File 758-5, part 6)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

2.

The Crane pump quoted on has many excellent features among which may be mentioned the enclosed frame, self lubricating, silent chain drive, accessibility of parts, ease of withdrawing rods and cylinder, etc. It has a 3 HP Motor attached rigidly to top of frame. The 1050F model has slightly more lifting capacity than our well calls for, but on the other hand we shall pump against a maximum pressure of 70 lbs instead of the tank pressure of 40 lbs shown on the Table of capacities, which difference will thus be taken care of. (Our well is about 175' deep and Table shows the proposed plant equal to a well of 275')

Mr. Michael's quotation of \$785.00 covers the entire work, including preparing suitable reinforced concrete base, removal of existing well equipment, installing the new equipment, extending the existing well casing, and leaving the new plant in perfect working order, and with 12 months' guarantee of satisfactory performance.

The proposed pumping plant will, of course, be provided with an automatic electric starter and cut-out, which will maintain a pressure ranging from say 35 to 70 lbs in the water supply.

I have no hesitation in recommending the acceptance of Mr. Michael's tender.

Awaiting your kind instructions regarding the well-house and permanent pumping plant,

Your obedient servant

E. Gardner Smith

Inspector of Construction.

R

OFFICE OF
INDIAN AGENT

Gleichen, Alta. March 26th, 1930.

Cushing
The Secretary.
Department of Indian Affairs.
OTTAWA.

Re - Old Suns Indian School.

Sir:

With regard to the Cupboards, Lockers, Tables, Shelving, and other equipment for the school building, I enclose herewith a list of requirements as asked for by the Rev. and Mrs. Gibney, and approved by the Indian Agent, Mr. Gooderham.

This list is rather formidable, though perhaps not more is being asked for than a school and institution of this kind should have. In any case this is a matter for the Department to decide.

I submitted said list to three competitive millwork firms in Calgary, and their quotations are as follows:

D.V.Cope & Company, Millwork & Hardware,	\$3600.00
W.H.Cushing, Limited, Millwork Only,	3971.00
A.B.Cushing Mills, Ltd. Millwork Only,	6420.00

It is difficult to understand why there should be such a wide difference in these tenders, as each firm had the same identical list and detail sheets.

With the exception of Cope Co's tender, the cost of hardware should be added, also painting, and erection, in order to get at the finished cost of the entire installation of this additional millwork.

If the list be approved, I should like your instructions as to how to place this order, and whether the work be done by the general contractor at cost plus, or on a straight tender; or whether the Department prefers some other arrangement. Awaiting your valued instructions, I have the honour to be, Sir,

Your obedient servant

E. Gardner Smith
Inspector of Construction

The Secretary,

D. of Indian Affairs
Ottawa

Stechen, Alberta
March 21st /30

5255-17-10

Sirs-

In reference to the account rendered of one dollar and thirty five cents (\$1.35)

In October the account amounted to eighteen dollars and forty five cents (\$18.45)

The cheque (No 5255) amounted to only seventeen dollars and ten cents (\$17.10)

This left a balance due of one dollar and thirty five cents (\$1.35) which has been carried forward on each monthly account sheet. Therefore when cheques are sent and amount taken from total there is always the balance due of one dollar and thirty five cents.

Hoping this explanation will help you to adjust matters

I remain Yours truly
R. W. Brown

Per H. Wood.

after scanning of the
store I believe the above
explanation correct.

F. 104-1-5 G.

Dear Sir,-

Ottawa, March 27th., 1930.

Referring to your letter of the 21st instant, claiming a balance of \$1.35 to be due you on your October account for bread supplied to the Old Sun's Residential School, I beg to state that the account for that month was not rendered at \$18.45 as stated in your letter, but at \$17.10, which amount has been paid. The account represents the supplying of 205 loaves of bread at 12 for \$1.00 - \$17.10. In your November account for 220 loaves of bread, you include in addition to the amount of the bread supplied during that month an item marked "account rendered \$18.45" which it is assumed represents the account for October. The error appears to be made in your books in that account, as the account rendered for October reads \$17.10. The Department therefore does not owe the balance of \$1.35 claimed by you.

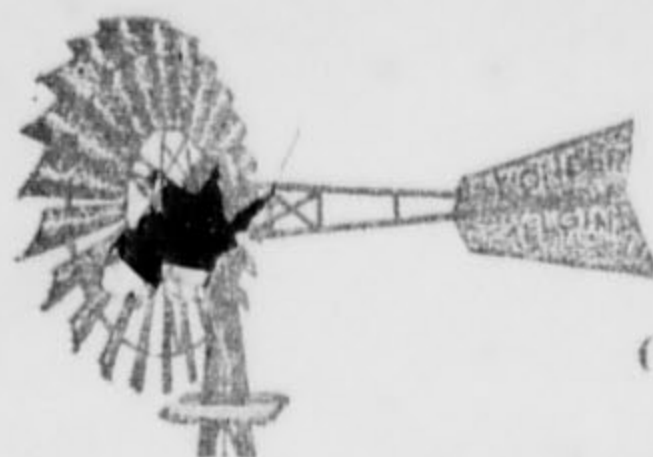

Yours truly,

F.H. Paget
Chief Accountant and Purchasing Agent.

R.W. Brown Esq.,

The Secretary,
The Department of Indian Affairs,
Ottawa, Ont.

Dear Sir:-

On December 19th last, I reported to you the need of a new switch for the electric motor in the pump house of the stock barn at the Old Sun School; the need of a heater to warm the motor in cold weather; the desirability of having the farmer's cottage linked up with the water system at the main school building; certain improvements to the farmer's cottage, such as storm windows for the basement, the placing of some of the windows in the sun porch on hinges, etc., but so far I have not received any acknowledgment of the receipt of this letter, and on my recent visit to the Old Sun School (March 20th) I was informed that these requirements had not been supplied. In addition to the above, which I strongly commend to your early and careful consideration, I beg to request that the farmer's cottage be supplied with screens for the doors and windows, and that the water tank in the basement be placed on a platform instead of on a cement floor, with a tap installed for drainage purposes.

During my visit to this School last autumn I directed the attention of the Indian Agent and the Inspector of Construction on the new building to the need of the improvements mentioned above, and they agreed with me that they were very necessary and should be supplied.

I shall be pleased to know that the above matters are receiving your careful and sympathetic consideration.

I have the honour to be, Sir,
Your obedient servant,

W. Westgate

Field Secretary, M.S.C.C.

RE: Voucher #10.

Dear Sir:-

Paul Little Walker, one of the Minor Chiefs, turned over his house for use by the teachers at the Day School at the West end of the Reserve in 1928. It is still occupied by them.

He farms the land adjoining and needed some place to live in during the summer. I suggested that a tent would serve the purpose and he was quite satisfied.

I submit herewith Voucher #10 for a small tent and trust that it will be paid. This would be a fair charge against Band Funds unless, of course, all cost in connection with the Schools is chargeable to Education Account. This matter I will leave for your decision.

OFFICE OF
INDIAN AGENT

104-1-5
Gleichen, Alta. May 1st, 1930.

The Secretary.
Department of Indian Affairs.
OTTAWA

No. 104-1-5.

Sir:

Replying to your letter of the 16th ^{ultimo.} instant with reference to various requirements for the outbuildings at Old Suns School, I beg to report as follows:

The electric motor at the stock barn should be wired from the power distribution panel in the new school instead of on a lighting service. This would give more power, and take a cheaper rate. To make this change would entail running two No. 8 conductors, change cross arms on existing poles, and extra guying, also necessary connections. The motor as at present installed in the pump house of the barn would not pass inspection, and should be wired in conduit, and provided with an externally operated switch. This service should also be grounded. To do this work, and make the changes indicated, would cost \$103.00. To provide and install a suitable electric heater to keep the motor at a proper working temperature in cold weather would cost about \$20.00, making a total cost of \$123.00. I would not recommend a stove and chimney adjoining the barn because of fire hazard.

Regarding the installing of a water service in the farmer's cottage as follows: Digging and backfilling approximately 300 ft. of trench, connection to the pressure tank of school, laying a 3/4" gal. iron pipe line, stop and waste in basement, connection to a 30 gal. range boiler, stove connection, a hot and cold water tap at sink, with trap and roof vent, and waste outlet to a sump hole outside, would cost \$267.00 complete.

If the water service were to include a properly equipped bath room with wash basin, toilet and 5 ft bath in addition to the equipment mentioned in the last paragraph, and to include a suitable septic tank and field-tile distribution, with fixtures vented in accordance with Alberta plumbing by-laws, the total cost would be \$649.00 complete.

To provide needed windows in the sun porch and screens for the windows would cost \$50.00, including painting.

I have the honour to be, Sir, Your obedient servant.

E. Gardner Smith

May 12, 1930.

Sir,-

I have your letter of the 1st instant, with reference to the various requirements to the outbuildings at the Old Sun's School, and would ask you to please arrange to have the electric motor in the stock barn wired from the power distribution panel in the new school, also the providing of a suitable electric heater. It is noted that the cost of this will be approximately \$123.00.

You may also arrange for the installation of a water service to the farmer's cottage at a cost of approximately \$267.00.

It is not considered necessary at the present time to install complete plumbing fixtures as funds are limited.

You may arrange for the windows in the sun porch and screens for the windows at a cost of \$50.00.

Your obedient servant,

A. F. MacKensie.
Acting, Assistant Deputy and Secretary.

Gentlemen:- Re. Cut Stone Gleichen School, Gleichen, Alta.

We beg to advise you that we supplied the cut
stone for the Gleichen Indian School at Gleichen, Alberta.

This material was supplied to the credit of the Wyndels
Construction Co. Ltd., and there is a balance owing to us
of the sum of One Thousand One Hundred and Forty Dollars
and Fifty-seven Cents, (\$1,140.57.). We would kindly
ask you to protect this amount for us.

Thanking you in anticipation of a favorable reply.

Yours very truly,

ALLEN & GRANT.

March 31, 1930.

The Architect,
Dept. Indian Affairs,
Ottawa, Quebec.

Dear Sir:-

We have an amount due to us of \$4791.70 for supplying millwork for Wyndels Construction Co. the contractors for Gleichen School, Alberta.

The total amount of our contract with Wyndels Construction Co was \$6291.70 and the only amount we have received from them, to date, is \$1500.00 by cheque Nov. 8th last. We are therefore writing to ask you to protect us for the balance of \$ 4791.70 and a few small extras which might amount to \$200.00

We understand that the Wyndels Const. Co. are withdrawing from business after completion of contract at Gleichen and as we had made several applications to them for further payment receiving no response, we deemed it advisable to secure your protection for this amount approaching \$5000.00

Yours truly

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Gleichen, Alta. March 26th, 1930.

R. Guernsey Orr Esq.
Architect.
Department of Indian Affairs.
OTTAWA.

Re- Old Suns School.

Dear Mr. Orr:

Quite apart from the information contained in my regular Reports on the progress of the work here, I feel that I should like to tell you something of what has been going on beneath the surface.

Owing to the death of Mr. Wyndels shortly after the contract was let, this job was started under inauspicious circumstances. Mr. Ducharme, the foreman, promised a dying man that he would do all possible to make the undertaking a success, and to protect the interests of the Company employing him. He arrived on the scene in due course, and brought with him, or there followed soon after him, about a dozen French Canadian friends of his to work on the job. Things went quite well on the start, but it was not very long before friction developed. It seems a Mr. Tallieu-- a Belgian compatriot of the late Mr. Wyndels--had come to the Company's assistance financially, and it was his money that kept the concern ~~a~~ going. He arrived later on the ground, and noticing what he considered extravagance in the carrying out of the work, he asked Mr. Ducharme to curtail the seeming excessive pay-roll. Then the sparks commenced to fly. Mr. Ducharme flaunted a written agreement executed by the late Mr. Wyndels appointing him (Ducharme) foreman with full authority in all matters pertaining to the work, at a salary of \$300.00 per month plus board and transportation, and to run one full year, and with no restraining conditions. He openly defied Mr. Tallieu, and encouraged his men to do the same. It so happened that the sub-contractors were mostly Belgian, and there seemed to be an undercurrent of hostility between the two races. During the past two months it has been my daily concern to avoid an open rupture, and to try to keep the peace between the rival crews until the job could be finished. The friction spread until I don't think there was a single man on the works but was more or less affected by the undercurrent of jealousy and ill-will, and the atmosphere was electric. In the meantime Mr. Tallieu had received from the Company's directors a legally executed document giving him full authority over the entire job, with authority to hire or discharge workmen. We then had two captains

ARCHIVES PUBLIQUES
CANADA

2.

on the same ship, each at enmity with the other, and both with documentary authority. It was an impossible situation, and the climax had to come. Mr. Debuck, the accountant, became almost ill over the friction, and left on half a day's notice for Winnipeg. Mr. Tallieu, acting on his duly executed credentials, dismissed several of Mr. Ducharme's men despite the latter's denial of such right.

There was ample cause for these dismissals. In the first place the brickwork was just finished, which meant less labourers were needed; and in the second place a number of Ducharme's men, following his example, had left the camp and were boarding in town. As the Company had been to the expense of building and equipping the camp, and engaging a first class cook, an order had been given that only men boarding at the camp were to be employed. This order Ducharme defied. These discharged men, aided and abetted by Ducharme himself, then brought forward all sorts of claims for higher pay than they had been getting. It would take too long to explain this feature of the trouble in all its ramifications. I passed on them as fairly as I could, but my decisions were refused by the disgruntled ones, and led by Ducharme's 19 year-old-son, numerous telegrams (sent collect) were despatched to the Department of Labour, Ottawa, purporting to say that wages were being withheld. As time went on these discharged workmen plotted and schemed to extort more money from the Company, and the fantastic claims which evolved from their brains had by this time extended into higher mathematics. Then we had the unique spectacle of the foreman for the contractors, still drawing their money, and still under promise to do his best for the widow and orphans, taking a half-day off and going to Calgary with his dismissed followers, to start legal action against the Wyndels Company. Ducharme told me himself on his return that he had placed his own claims in a lawyer's hands, and that a suit would follow. I shall not take time to explain his strange grounds for suit.

In the meantime Mr. F.E.Harrison, Dominion Fair Wage Officer, was on his way West, and the day before his arrival Mrs. Wyndels, with a 6 mos. old nursing baby, arrived from Winnipeg to see if she could help in the crisis which had arisen. I met her at the station, and owing to the kindness of Mr. and Mrs. Hutcheson, I was able to bring her to their home. The next day Mr. Harrison interviewed each claimant for higher wages in turn. He threw out about 75% of the men's claims, but made some allowances in their favour amounting to over \$300.00 altogether. A day or two later, after consultation with the local lawyer, Mr. Tallieu and Mrs. Wyndels jointly signed a letter of dismissal, which was served on Mr. Ducharme, and they also dismissed Ducharme's two sons, and two others of that persuasion.

3.

law-suit was then inevitable between Ducharme and the Wyndels Company. This would mean the whole gang of mutineers would remain in the locality as principal or witnesses, and the publicity of it, and the consequent effect on our job, was something I was very desirous of avoiding. It was out of the question to try to bring Tallieu and Ducharme together; the enmity was too great. Acting as a disinterested intermediary, I finally succeeded in bringing Ducharme and Mrs. Wyndels together in friendly conference at Hutcheson's home last Saturday night, and got them to agree on the sum of \$368.00 in settlement of Ducharme's claims, and while they were both still in the mood, I slipped upstairs to my typewriter, and typed out a document covering all outstanding points, and they both signed it, and I witnessed it, at 11 P.M. Next day Ducharme, his two sons, and three of the mutineers left by car for Winnipeg. Two mutineers, Maranda and Lauze, remain, and the former man, even after Mr. Harrison had allowed his claim in full, is still nursing some imaginary grievance, and told me he would continue sending night-letters to the Hon. Peter Henen ad infinitum, or until he gets his chimerical claims granted.

Mrs. Wyndels has appointed a local builder, Mr. Scott, to take over Ducharme's duties, and already the atmosphere at the job almost suggests the millennium after the previous conditions, and the utmost harmony now prevails.

The foregoing is merely a very brief outline of what has been going on; to tell it in full would fill a good sized volume. Never before was I ever involved in anything like so unpleasant a situation. Fortunately I was able to consult Mr. Gooderham, and his wise counsel and moral support were like the shadow of a rock in a weary land.

Needless to say, all the friction and disagreements have not helped to make the job profitable to the contractors. There has been no bad effects on the job itself, but the lack of harmonious cooperation, and active friction within the organization itself, certainly must have its reflex action on the balance sheet. I'm much afraid the job will not more than break even, and may do even worse than that. Probably the contract was taken at rather a close price. However, there has been no attempt to depart from the high quality of workmanship and materials called for, and the last job of the Wyndels Construction Company will, I feel sure, redound to their credit. For this reason, and also because all that Mrs. Wyndels possesses, including her late husband's life insurance, is invested in this undertaking, I would respectfully recommend that as far as possible any remaining work apart from the contract be awarded to the Wyndels Company. Now I must have pity on you and close this lengthy epistle. I am not often so verbose.

Sincerely yours

E. Gardner Smith

Dear Mr. Orr:

In the case of such odd bills as the enclosed, should I allow this to pass through the contractors' hands, to which they would, of course, add their 10% profit, or should I voucher it direct to the Department, and only pay the contractors for the work of installing it?

This particular item is for the front entrance steps, and was authorized by you when here.

Your obedient servant

COPY FOR MR. ORR.

Gleichen, Alta. March 25th, 1930.

F. E. Harrison Esq.
Department of Labour.
Palliser Hotel.
CALGARY, Alta.

Dear Mr. Harrison:

I am enclosing herewith the signed receipts of the various workmen at Old Suns Indian School acknowledging the respective adjustments in wages authorized by you.

Most of the mutineers left by car this morning for their homes in Manitoba. By request, I saw them at the hotel last night, and listened to more of their whinings. It seems that each time I see them they have thought up something more, until at last my poor tired brain refuses longer to function in such a maze of endless grievances. I think it is the frequent potations, strong in alcoholic content, which stimulates their imaginations.

That Maranda fellow is still hanging around, and as I told you over the phone, he said he was about to send a long, personal night-letter (collect, of course) to his friend The Hon. Peter Hemeny telling of the great injustice he (Maranda) is having to suffer, and demanding that the grievances be immediately redressed. Further, he states he is prepared to stay around all summer to fight for what he deems his rights. For the life of me I cannot imagine what grievance he pretends to have. However, that quarrelsome, disgruntled, mutinous gang are now off the job, and to-day Mr. Scott, a local builder, has taken over the foreman's duties on behalf of Mrs. Wyndels, and already a very different atmosphere prevails. Mr. Gooderham has offered to instruct the Mounted Police to keep the trouble-makers off the Reserve if any of them come around the building.

I will sift Emil Dechambault's story of wrongly kept Time Sheets, etc, but I don't expect to find any discrepancy. I have received the paid cheques, earlier Time Sheets, and other data from St. Boniface. I regard the charge as absurdly fantastic, but will check up carefully just the same.

Again thanking you for your kind cooperation,

Yours faithfully

(Sgd) E. Gardner-Smith.

OTTAWA.

Dear Mr. Orr:

On the school job here there are 1800 sq. ft of
4" Gypsum Tile left over, and Mrs. Wyndels is anxious to get
out of it what she can.

It occurred to me that possibly you might like to
use Gypsum for some of the partitions in the proposed
extension to the Indian Hospital, although apart from ~~their~~ its
advantage as sound-resisting, there may not be much object
in placing this material in a building that is not of fire-proof
construction. However, I thought it could do no harm to tell
you of this material now on hand, and you can readily decide
if you can use it. The blocks are 12"x 30"x 4", and they are
stored under cover in an implement shed nearby.

Dear Mr. Smith,--

Replying to your letter of the 27th ultimo with reference to a quantity of gypsum tile left over at the school, I do not think that the Department can make any use of this material and the Wyndels Construction Co. should therefore make arrangements for disposing of same.

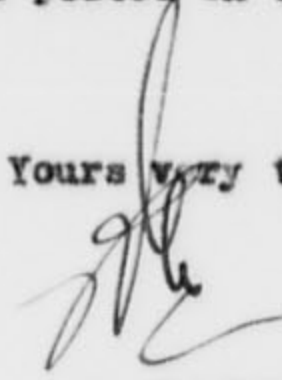

With reference to your letter of the 29th accounts for extra work such as the one submitted should pass through the contractor's hands and appear as extra work on the final certificate. I am returning herewith the account.

I am enclosing copies of letters which I have received with reference to accounts for materials supplied to the Wyndels Construction Co. I would ask you to please see that these firms are paid before the final certificate is issued. I am also enclosing a letter addressed to you which has been forwarded to the Department.

Regarding the pumping plant and ~~stapboards~~ lockers, etc. I will communicate with you as soon as I am able to give you definite instructions.

Many thanks for keeping me posted on the labour conditions at the school.

Yours very truly,

R. GURNEY ORR.

MEMORANDUM:

DR. SCOTT.

Mr. Gardner Smith has submitted the following prices for the installing of the necessary cupboards, shelving, tables, etc. in the new Old Sun's School.

D. V. Cope and Co., Millwork and Hardware,	\$3,600.00
W. H. Cushing, Ltd., Millwork only,	\$3,971.00
A. B. Cushing Mills, Ltd., Millwork only.	\$6,420.00

Will you please advise me if Mr. Smith may be authorized to have the equipment installed by the D. V. Cope Co., as they have submitted the lowest price, or are there other firms in Calgary in addition to the above who should be asked to submit prices before the order is placed.

With reference to the installation of the pumping plant will it be satisfactory to arrange with L. Michael, Plumber and Steamfitter of Gleichen to make this installation.

Memorandum,-

Mr. Pratt.

It will be necessary to install some cupboards, shelving, tables, etc., in the new Old Sun's school. The Inspector of Construction, Mr. E. Gardner Smith, has submitted the following prices for the installation of these : -

D. V. Cope and Co.,	Millwork and Hardware,	\$3,600.00
W. H. Cushing, Ltd.,	Millwork only,.....	\$3,971.00
A. B. Cushing Mills, Ltd.,	Millwork only,...	\$6,420.00.

You will note that the D. V. Cope Company have quoted the lowest price. Will you kindly advise me whether the order should be placed with them or whether we should invite prices from other firms in Calgary before taking action?

It will be necessary to install a pumping plant; will it meet the Minister's wishes to have this work done by L. Michael, Plumber and Steamfitter, of Gleichen?

Re- Old Sun's Indian School.

Sir:

I beg to advise that I have to-day issued an Eighth Certificate, for \$9805.70, to Wyndels Construction Co., Ltd., general contractors for the above school, in payment of 90% of the value of labour and materials supplied by them on their contract to date.

I enclose herewith a copy of the 8th Progress Estimate, from which you will see how the amount of the Certificate is arrived at.

You will also please note the adjustment I have made in consequence of the increased amount of the 7th Certificate.

I am writing this letter from Calgary, but shall return to Gleichen to-morrow, and shall then write at greater length.

I have the honour to be, Sir,

Your obedient servant

E. Gardner Smith
Inspector of Construction.

The Secretary.
Department of Indian Affairs.
OTTAWA.

Sir: Report on Old Suns School Construction.

Steady progress has been maintained in the erection of Old Suns Indian School here, and we are now within measureable distance of the completion of the contract.

The terrazza floors were completed this morning, and a very good job has been done by this contractor, Mr. Fabro, and his experienced assistants. The same crew were engaged to lay the cement floors in the various rooms where specified, and again I found their work very satisfactory.

The plastering of the building is well advanced, and should be fully completed next week. On the whole the plaster work is quite satisfactory, and so far remarkably free from cracks. My chief concern in connection with this branch of the construction was caused by the frequent high winds and dust blizzards which have been our almost everyday experience for weeks back. It seems that west of the school is a large area of bone-dry summer fallow, and clouds of this light powdery soil have been frequently blown by the prevailing west winds, thus enveloping the new building in a haze of dust, and which it seemed impossible entirely to keep out. Such a condition has not been conducive to the very best results in either painting or plastering, and occasionally gave rise to language scarcely in keeping with missionary enterprise. However, not very much of the newly plastered walls suffered noticeably, and the plasterer has undertaken to remedy any smudged places before leaving the job.

The painting is proceeding at a fair rate of speed, and I have yet to meet a more worthy or more efficient exponent of this branch of art. And he has had his full share of tribulation too. The dust storms referred to have given him much extra work, and several times his paint has had to be scraped off and done again, and again. Through it all he remains unperturbed, indifferent to the buffetings of sand storms, and resolute in his determination to turn out first class workmanship. Truly this man is captain of his soul! He has four assistants who follow in his footsteps, and strive to emulate his high example of painstaking efficiency.

The plumber and steamfitter returned to-day to set up plumbing fixtures and radiators. This work will occupy at least another fortnight. These mechanics had left until the building was sufficiently advanced so that they could finish up all their work. In both these trades we are getting full satisfaction.

2.

The sheetmetal and roofing is completed with the exception of the providing and setting up of the steel partitions for the small bathrooms off recreation rooms. These had been entirely overlooked by this contractor in figuring the job, and nothing sent. However, measurements have been sent him in Winnipeg, and these partitions will be installed as shown on the Plan.

Carpenters are hanging windows and doors, and setting up trim. in the 2nd and 1st floors, these being now reasonably dry. We have received exceptionally good millwork from St. Boniface, and I'm very pleased with it.

The electricians are now drawing their wires through the conduits, and will soon be ready for hanging lighting fixtures.

From the foregoing brief resume you will see that the job is well advanced. I am still awaiting your valued instructions with reference to a well-house and permanent pumping plant, as dealt with fully in my letter of March 19th.

Another matter in which I am still awaiting the Department's decision is with regard to the cupboards, lockers, tables, pews, etc. Underdate of March 26th I wrote you, enclosing tenders I had received for this line of equipment, and asking for your kind instructions concerning these requirements. It will take some time at the mills, even after the order is placed, before this material can be delivered.

I have the honour to be, Sir,

Your obedient servant

E. Gardner Smith

Inspector of Construction.

B
Old Suns School Construction Office.
Gleichen, Alta. April 12th, 1930.

R. Guernsey Orr Esq.
Architect.
Department of Indian Affairs.
OTTAWA.

Dear Mr. Orr:

The Rev. Principal, Mr. Gibney, is somewhat concerned as to where he can store the large number of storm windows and screens when not in use. He says the store rooms provided in the school will be required for other purposes. This morning he brought this matter up again, and it was suggested that if the space under the entrance verandah, and under the class-room verandah, were enclosed the problem would be pretty well solved;

These spaces would give about 240 square feet of floor room. The walls should be in brick to match the existing brickwork, and should finish flush with the outside of the existing brick piers. A door and small window should be provided for each suggested enclosure, and a concrete floor laid.

The cost of this proposed work should not come high, and the contractors could use gravel, sand, etc, left over from the main work. I would suggest that if the idea commends itself to you that authority be given to have this small additional work done at proven cost plus 10%.

Will you kindly give an early decision regarding the proposal to enclose and utilize the verandah spaces as outlined.

Your obedient servant

E. J. Gardner Smith

Re- Old Suns Indian School.

Sir:

I beg to advise that I have to-day issued a 9th Certificate, for \$4185.00, to Wyndels Construction Co., Ltd., general contractors for the above-mentioned building, in payment of 90% of the value of labour and materials supplied by them on their contract to date.

I enclose a copy of their Progress Estimate No. 9, from which you will see how the amount of the said Certificate is arrived at.

This work is now nearing completion, and the actual contract should be fulfilled by the latter part of this month.

It appears to me that the contractors are going behind on this contract, and are somewhat in arrears in their payments to sub-contractors. Before issuing the final Certificate I will advise the Department should it become necessary to protect the sub-contractors by making payments to them direct.

I have the honour to be, Sir,

Your obedient servant

OFFICE OF
INDIAN AGENT

104-1-15
R
P.O. Box 31.
Gleichen, Alta. May 6th, 1930.

The Secretary.
Department of Indian Affairs.
OTTAWA.

Re- Old Suns School, Blackfoot Reserve.

Sir:

With reference to my letter of March 19th regarding a well-house and permanent water service for the above mentioned job, I am not yet in receipt of the Department's instructions. As mentioned in previous correspondence, we carried up concrete foundations around the old well, to the former building to carry a well-house 10'x 10'. The contractors installed a temporary pumping plant at the old well for their own use, and put a rough building over it as a protection against the weather.

We have already carried a gal. iron pipe line from the well to the new building, and connected it to the pressure tank in the room designated for that purpose. It now remains for the Department to erect the well-house and install a permanent pumping plant. In my letter of March 19th I gave my reasons for recommending the installation of a particularly sturdy and efficient Crane motor-driven (3 HP) pumping service.

I received the Department's authority to enclose the space under the two verandahs of the school for storage purposes. I am delaying this work pending the decision regarding the suggested brick well-house, for the reason that one small car of bricks will do both jobs.

In our new school building we have 86 casement windows. No adjusters are specified, and I'm certain if some means be not adopted for controlling these windows they will suffer serious damage, and will damage the plaster by swinging back against it. I have explored the market trying to find a suitable adjuster for windows swinging in, and adapted to our type of construction. The ordinary adjusters will not do. We might use a barrel bolt attached to the lower bar of the sash, but this would just allow the window to open a little; also there would be scratching of the stool. Ashdowns procured for me a sample "Rixson" adjuster which I have tried out and found fully satisfactory. It is attached to the top of the window frame and to the top rail of the casement,

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 7)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

2.

and it works by tension, regulated by an easily operated set screw. In other words, a degree of stiffness is attained which prevents the sash from being blown about in the wind, and yet the sash can be readily pushed shut or drawn open as required. The adjuster when installed is up out of the way. Ashdowns quote a price of \$1.25 each, and the adjusters would have to be imported, as I appear to have procured the only one in Alberta. If the Department considers the outlay too great to equip all the casements with adjusters, it occurred to me that perhaps it would answer well enough if we placed adjusters on the alternate casements where they come in pairs, and fasten the adjoining window shut. This would reduce the number to about 4 dozen. Or must we fall back on bolts? Will you please instruct me as soon as possible in this regard, so that these windows may be equipped against damage to themselves and to the plaster.

I duly received the Department's letter of the 24th ultimo giving additional names of firms from whom prices are desired for the cupboards, lockers, etc. Within a few days I hope to send the additional quotations for consideration.

The general work of construction is now well advanced, and the contract should be completed by the end of this month. I enclose a couple of snap-shots, but hope to have better photos of the building to send you soon.

I have the honour to be, Sir,

Your obedient servant

E. Gardner-Smith

Inspector of Construction.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Gleichen, Alta. May 12th, 1930.

The Secretary.
Department of Indian Affairs.
OTTAWA.

Re- Old Suns School, Blackfoot Reserve.

Sir:

Replying to your letter of the 24th ultimo with reference to cupboards, shelving, tables, etc, required for the above school, I beg to advise that I called on each of the firms named in your letter, viz:

Crown Lumber Co.,	Gleichen, Alta.
W. T. Scott,	"
D. Ackland & Son,	Calgary, "
Riley & McCormick Ltd.	" "
Prairie Lumber Co.,	" "
A. B. Cushing Mills,	" "

D. Ackland & Son stated they were not in a position to tender as their trade is in hard wood and blacksmiths' supplies.

Riley & McCormick reported that their trade is in harness and leather goods.

Prairie Lumber Co stated that they have gone out of the retail lumber trade, and deal in car lots, and could not tender.

Regarding the other firms mentioned by you, I procured from them tenders on the list of additional millwork, etc, as submitted with my letter to the Department of March 26th, and I ~~enclose~~ *append* herewith a summary of these tenders:-

A. B. Cushing Mills, Ltd.,	\$6420.00
Crown Lumber Co.,	4385.00
W. T. Scott,	4350.00

The Dowse Sash & Door Co., Ltd. of St. Boniface, Man., who have supplied the rest of the lumber and millwork, asked to be allowed to tender on this list too, and their figure is \$4442.00. Although this figure is slightly higher than two of the other quotations, they explain it by saying that most of the items will be put together in their factory if they get the business, instead of

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 7)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

2.

shipping it all in the K.D. , and as this would greatly lessen the labour of erecting, the Dowse Co's figure is very probably the most attractive. This firm's millwork in the general contract was much above the average in quality.

The Wyndels Construction Co. are very desirous of installing this additional millwork, and as they have undoubtedly gone behind on the main contract, they are anxious to pick up a few dollars' profit from this source. They hope to be awarded this work at cost plus 10%. I told them I have no discretion in the matter, but must pass on to the Department the quotations asked for, and await your decision.

Awaiting your valued instructions in the matter,

I have the honour to be, Sir,

Your obedient servant

E. Gardner Smith

Inspector of Construction.

P.S.

Mr. Scott wishes me to append to his quotation the sum of \$950.00 additional to his tender for the erection of the various items complete, including hardware and painting.

Dear Sir:-

THIS QUOTATION IS CONDITIONAL ON SATISFACTORY TERMS IN RESPECT TO PAYMENT AND SECURITY BEING
ARRANGED AND IS SUBJECT TO PROMPT ACCEPTANCE.

THIS COMPANY WILL NOT BE RESPONSIBLE FOR DELAYS DUE TO FIRES, STRIKES, LABOR DIFFICULTIES,
ACCIDENTS, DELAYS IN TRANSPORTATION OR OTHER LIKE CAUSES.

Replying to your inquiry of the 13th inst., we are prepared
to supply three Steel Ladders as detailed in your sketches(which
we enclose), all for the sum of \$78.00, whole, F.O.B. Calgary.

Rungs will be made from 5/8" square iron, side bars 5/8" x 1-1/2"
and with movable brackets to enable you to strike the mortar joints.
We have not allowed for bolts or screws for fixing ladders in position,
as we assume you will provide these.

Hoping to be favoured with your valued order, we are,

Yours very truly,

The Secretary,
Department of Indian Affairs.
OTTAWA, Ont.

Sir,

In order to provide safe and easy access from the lower to the higher roof levels, and vice versa, three ladders are required. Should these not be of iron, to be attached permanently? I enclose rough sketches of what I considered most suitable, and the Riverside Iron Works, Ltd. of Calgary quote a price of \$78.00 for making these ladders as shown. Will you please instruct me promptly whether or not these iron ladders should be installed. Access to the different roofs is essential for the inspection of roof hoppers in particular.

The Reverend Principal is desirous that woven guards be placed over the windows of the Recreation Rooms. I enclose quotation of \$111.00 for the 12 Guards required. Please instruct me in this regard also.

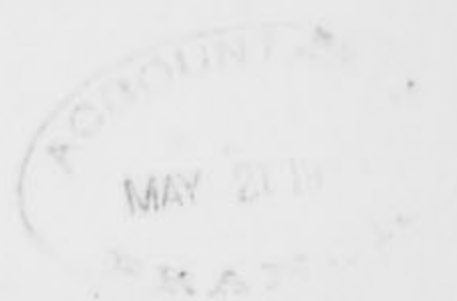

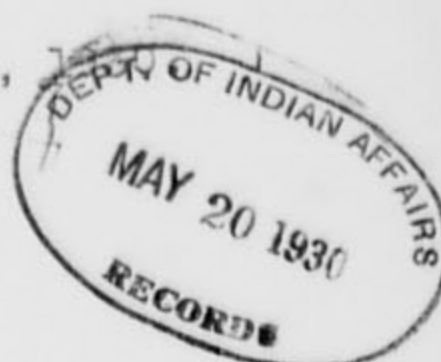

Kindly return the sketches of the ladders.

I have the honour to be, Sir,

Your obedient servant

E. Gardner Smith

Inspector of Construction.

R

May 21, 1930.

Sir,-

With reference to the providing of pump etc. required for the new Old Sun's School you may make the necessary arrangements for this work with Mr. Michael of Gleichen, Alta. I note in your letter that the pump suggested has a capacity of 525 gal. per hour. It is considered that it would be better to install a pump with a capacity of at least 1000 gal. per hour. This will be required in order to give a certain amount of fire protection. The pump should be installed and connected up to work automatically as mentioned in your letter.

Referring to your letter of the 6th instant, you may arrange to have the windows fitted with adjusters of the type recommended in your letter.

Referring to your letter of the 12th instant it is noted that the price quoted by W. T. Scott of Gleichen is the lowest for the cupboards, etc. You may therefore arrange with him to provide this equipment and also install same complete at his price quoted.

With reference to your letter of the 16th instant you may arrange to have the ladders installed, also woven guards on the windows of the recreation rooms.

Your obedient servant,

A. S. Williams

A. S. WILLIAMS.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

PERSONAL.

Gleichen, Alta. May 21st, 1930.

R. Guerney Orr Esq.
Architect.
Department of Indian Affairs.
OTTAWA.

Dear Mr. Orr:

Re- Old Suns School.

With regard to Certificate No. 9, for \$4185.00, issued on May 1st, I received a letter yesterday from Mrs. Wyndels from which I quote as follows:-

"As to the payment of the last Certificate, same has not yet been received, which of course I am anxiously waiting for... I would very much like to have this Certificate filed as it would leave some money on hand."

I may say that with the exception of about three weeks' painting, and a little finishing in the plumbing and some patching of plaster and brickwork, this contract is about completed. There remains \$2750.01 coming to the contractors on the general contract, besides additional work authorized.

As instructed by you, I shall make it my business to see that all sub-contractors' accounts, and bills for materials, are fully paid before I issue the final Certificate; and in the event of the contractors being unable to meet these accounts (and I doubt their being able to do so) I shall submit to the Department certified statements of these various outstanding accounts so that they may be paid by the Department direct. I have already notified the contractors of the procedure I propose following in this regard, to which no objections have been raised.

I hope to be your representative again at the proposed new school at St. Paul de Metis, the plans of which I saw when in Calgary recently. The experience I have gained here in fireproof construction would stand me in good stead there. However, I'm equally willing to serve the Department wherever my services may be most needed, and will do my very best under all circumstances.

Your obedient servant

E. Gardner-Smith

R

OFFICE OF
INDIAN AGENT

Gleichen, Alta. May 28th, 1930.

Architect
The Secretary
Department of Indian Affairs.
OTTAWA.

Re- Old Suns Residential School.

Sir:

I beg to advise that I have to-day issued a 10th Certificate, for \$2250.00, to Wyndels Construction Co., Ltd., in payment of 90% of the value of labour and materials supplied by them to date under their contract for the erection of the above mentioned school.

I enclose a copy of the Contractors' 10th Progress Estimate, from which you will see how the amount of the Certificate is arrived at. It had been my intention to await the completion of the contract before issuing any further Certificate, but Mrs. Wyndels has written me stating she is rather pressed for money, and was desirous of receiving this comparatively small payment while awaiting the final clean-up.

With the exception of about a week's or ten days' more painting, and the hanging of some more electrical fixtures, and the window shades, the contract is completed except for some extra work recently authorized.

With regard to balances still due to sub-contractors and material dealers, I shall be careful to have certified statements of these outstanding accounts before issuing the final Certificate, and if the Wyndels Co. are not in a position to meet these bills I shall ask the Department to pay them direct, as already instructed by you. There will be ample margin left after paying the 10th Certificate of \$2250.00 to take care of all unpaid bills.

I have the honour to be, Sir,

Your obedient servant

E. Gardner-Smith

Inspector of Construction.

The No. 1 Canadian Handy Flat Work Ironer

Motor Driven

Padded Roll and Chest

Shall be one padded roll, 13 $\frac{1}{2}$ inches in diameter, when padded, operating in a steam chest. The ironing surface shall be not less than inches in width, and shall be concave in shape to conform to the padded roll, ground and polished; and shall be tested at 200 pounds hydrostatic pressure and designed for 100 pounds working steam pressure, fitted and mounted true, making a smooth surface over which the pieces to be ironed shall pass. The back of chest shall be covered with asbestos, protected by planished sheet steel to prevent loss of heat by radiation.

The heated surface shall be as follows:

Size	Surface under Pressure of Rolls	Total Heating Surface
54-inch	366 sq. in.	990 sq. in. X
66-inch	1,055 sq. in.	1,206 sq. in.
100-inch	1,585 sq. in.	1,313 sq. in.

Frames and Gears

The two end frames shall be cast iron, of neat and substantial design, with four supporting legs and equipped with bearing boxes; also devices for adjustment of pressure. Roll shall be provided with driving gear on one end. All gears shall be machine-cut from solid blanks and covered by solid paneled guards.

Pressure Device

Pressure shall be regulated by springs, encased in spring boxes working on the end of eccentric rods, with compensating attachment for light and medium pressure. The eccentric rods shall be controlled by large eccentric, operated by hand wheel for applying and releasing padded roll from contact with steam chest and admit the regulation of the pressure suitable for the fabric being ironed. It shall be possible to remove the padded roll (7) inches from contact with steam chest, to allow for thorough cleaning of polished surface of chest.

Feed and Delivery

The construction of machine shall be such that the operator not only feeds the goods into the machine, but takes the goods off, thereby allowing the machine to be placed, if necessary, against the wall and save floor space.

Goods shall be fed in over the top of the roll and returned to the feeder at the bottom of same.

Shall be provided with a wooden feed box, mounted on brackets. This box shall be equipped with curved brass plate for conveying goods from steam chest.

The No. 1 Canadian Handy Flat Work Ironer—Continued

Motor Driven

Automatic Safety Guard

Shall be applied to the feeding side, constructed of nickel-plated tubing, and delicately swung the full width of machine, directly in front of and over the feeding point, and pivoted at each end by bracket. This guard shall be provided with a special mechanism, connected with the power in such a manner that the swinging of guard toward feeding point shall cause the entire machine to stop instantly.

Electrical Equipment

Shall be furnished for the following power characteristics:

(a) **Direct Current**

110 volts,
220 volts.

(b) **Alternating Current**

Single phase, 110 volts — 220 volts, 50 cycles — 60 cycles.
Two phase, 110 volts — 220 volts, 50 cycles — 60 cycles.
Three phase, 110 volts — 220 volts, 50 cycles — 60 cycles.

Motor

Shall be of Canadian design, of ample capacity and proper speed to insure quiet running, guaranteed to meet operating characteristics of machine. Shall be mounted on iron bracket integral with the machine, driving by belt. Both direct and alternating current motors shall be horizontal type and insulated to withstand heat incidental to laundry machinery.

Direct Current

Shall be protected on commutator end by grid covers.

Alternating Current

Shall be squirrel-cage, constant-speed type.

Controller — Direct Current

Shall consist of a manual speed controller in an approved enclosing case with line switch and fuses.

Alternating Current

Shall consist of approved enclosed line switch and fuses.

Wiring

Shall be furnished with all wiring run in conduit between motor and controller or switch, and suitable terminals shall be provided for line wires.

Act
The Secretary,
Department of Indian Affairs.
OTTAWA.

Sir:

I beg to enclose herewith a Voucher in duplicate for \$125.00, in favour of Mr. E. Taillieu, Gleichen, Alta. for taking out the two 1000 gal. Pressure Tanks from beneath the ruins of the former school, at the quoted price of said \$125.00.

These Tanks are now on the surface of the ground, ready for hauling away. I have written the Riverside Iron Works, Calgary, asking for advice as to the best method of testing said Tanks--whether by water pressure, air pressure, or both--and on hearing from them I shall have a test made. One of these Tanks has just been in use since 1922, and I expect to find it suitable for installing at the Pump House which supplies the Indian Hospital and Agency Buildings in the event of the Department wishing to augment the present water storage there of less than 1000 gals. The other salvaged Tank is much older, and may or may not be fit to use again, depending on how it stands the proposed test.

I have the honour to be, Sir,

Your obedient servant

E. Gardner-Smith

ST. BONIFACE, Man.

Dear Madam:

I propose leaving for Winnipeg by next Thursday afternoon's train (the 5th inst.) in order to assist in getting all the accounts in line for settlement.

Will you please have everything ready as far as possible, including your sub-contractors' and all other outstanding accounts, so that I may not be unduly detained.

I shall bring with me all the available data from this end, including Statements from Calgary and local firms who have supplied materials; also the vouchers for extras now in my possession.

Yours faithfully

Mr. R. Guerney Orr.
Architect.
Department of Indian Affairs.
OTTAWA.

Re- Old Suns Indian School.

Dear Mr. Orr:

You will see from the enclosed copy of a letter addressed to Mrs. Wyndels that I deem it necessary to go to St. Boniface to confer with her and the Company's Auditor.

I'm afraid it is well nigh impossible to arrive at a settlement with the Wyndels Construction Co. with accuracy or finality from this distance. Their affairs are considerably muddled, and if we are to avoid an aftermath of unpaid bills it devolves on me to be very circumspect at this juncture. This is the more necessary because of the unsound financial condition of this moribund concern.

ninth
Should you wish to reach me at Winnipeg by wire you can do so up to say the 8th instant, in care of the Royal Alexandra Hotel; and, of course, I shall write or wire you from there. I expect to get to Winnipeg by the evening of the 8th, and to complete my work over the week-end.

It is only fair to add that the Wyndels Co. have given us a first class job despite the unusual difficulties under which the contract was performed.

Your obedient servant

OFFICE OF
INDIAN AGENT

Gleichen, Alta,

June 4, 1930.

Attention Mr. E. Guerney Orr.

Dear Sir:-

Some time ago I directed the Canadian Dustbane Company of ~~Tippett~~ Ottawa to consult you in regard to their Tannel Equipment which is used for cleaning & polishing floors etc. Yesterday, I had a phone call from their Alberta representative stating that you had been interviewed and that you were favourably impressed, and further, that you would favourably consider a requisition from here for a scrubber equipment to be used on the terrazo floors of the Old Sun School.

I am not familiar with the different makes of scrubbers and possibly the Tannel Equipment is as good as any, and I understand that they are offering a special discount on their products at the present time. When the contractors laid the floors I learned from them that an electric machine would probably be needed and this might be an opportune time to consider a purchase.

For your information, please.

Your obedient servant,

TENDERS WANTED

Sealed tenders addressed to the undersigned and endorsed on the envelope "Tender for Indian Residential School on the Blackfoot Indian Reserve, Near Gleichen, Alta." will be received up to noon on the 5th day of August, for the erection of the above mentioned building.

Plans and specifications may be seen at the Post Office at Calgary, Bassano, Lethbridge, Medicine Hat, at the Indian Offices at Gleichen, Regina and Winnipeg, and at the Department of Indian Affairs at Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada for ten per cent of the amount of the tender, payable to the order of the undersigned. (War Bonds or the Dominion or Canadian National Railway Bonds will also be accepted as security. Bonds and cheque if required to make up an odd amount) which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. The lowest or any tender not necessarily accepted.

Gentlemen:- Re New Indian School, Gleichen, Alta.

We wish to advise that we supplied material on the above school to a sub-contractor on the job, namely, Leon Boux, 478 St. Jean Baptiste, St. Boniface, Manitoba. As we would not supply Mr. Boux on his own credit, we obtained an order for payment from him on the general contractor, namely, Wyndels Construction Company Limited, St. Boniface, Manitoba.

Enclosed you will find a statement of our account showing a balance due of \$411.74. The total amount of our account was \$1911.47, but the Wyndels Construction Company Limited have paid to us \$1500.00, leaving the above balance unpaid.

We have just been informed that there has been some difficulty on this contract and that your department is paying sub-contractors and material men direct. We wish you would have this matter checked up and pay direct to us the balance due. If you require any further information, please call on us.

Yours very truly,

MCCURDY SUPPLY COMPANY LIMITED,

Sir:

Re- Old Suns School, Gleichen.

I beg to enclose herewith Voucher in duplicate covering the expenses of my recent trip to Ottawa in connection with the affairs of the Wyndels Construction Co., with reference to the large list of unpaid bills now outstanding against them.

Mrs. Wyndels, on behalf of the Wyndels Co. agrees to the Department's suggestion that she give written authority ^{for} ~~to~~ the disbursing ^{by the Dept} of all funds still due said Company, including the original deposit cheque. Only in this way can all debts of the Company in connection with the Old Suns contract be met.

It will be another few days before the contractors will be entitled to the final Certificate. They have not quite finished removing the temporary buildings, and the cleaning up of the grounds; nor are their complete accounts yet rendered me.

I have the honour to be, Sir,

Your obedient servant

ALBERTA

ADDRESS ALL COMMUNICATIONS TO THE

THE WORKMEN'S COMPENSATION BOARD

QU'APPELLE BUILDING
EDMONTON, ALBERTA

July 2nd, 1930.

Department of Indian Affairs,
OTTAWA - Canada.

Dear Sirs:-

Re--Wyndels Construction Co.Ltd.

Our records show that the above quoted concern is undertaking a contract at the Old Sun School at Gleichen, which we understand is an Institution under the administration of your Department.

As the Wyndels Construction Co.Ltd., are undertaking operations coming within scope of The Workmen's Compensation Act of this Province, you will realise it is necessary for them to comply with the same, but I regret to advise you that we are having considerable trouble to get them to meet the duties and charges leviable under this said Act. Section 36-2 of The Workmen's Compensation Act of Alberta, provides as follows:-

"Where any work within the scope of this Act is undertaken for any person, in this section referred to as the principal, by a contractor, it shall be the duty of the principal to see that any sum which the contractor or any sub-contractor is liable to contribute to the accident fund in respect of the work so undertaken is paid, and if any such principal fails to do so he shall be personally liable to pay it to the Board, and the Board shall have the like powers and be entitled to the like remedies for enforcing payment as it possesses or is entitled to in respect of an assessment".

In view of the above will you be good enough to authorize that no final settlement be made with the Wyndels Construction Co.Ltd., until there has been produced to you a Clearance Certificate from this office showing that all liabilities have been fully met.

Your kind co-operation in this respect will be much appreciated.

Yours truly,

Asst. Secretary.

Gentlemen:- Re. Cut Stone Indian School Gleichen.

With reference to the balance of our account for cut stone supplied to the credit of the Wyndels Construction Co., for the Indian School at Gleichen, Alberta. This balance, namely, \$1140.57, was passed for payment by Mr. Gardner-Smith, (Supt. of Construction) on June 7th.

We are at a loss to know whether this payment will come to us from the Dept. or from the Wyndels Construction Co. If the Dept. makes payment to us direct, we would kindly ask you to do so as soon as possible, as we are quite short of funds, and it is some considerable time since we completed our part of this work.

Please advise us in this matter.

Yours very truly,

ALLEN & GRANT.

Dear Mr. Paget:-

In rendering my June expense
ac, Old Sunn School, my charge of \$6⁷⁵, June 27th,
Hotel York, was not receipted on hotel bill head.

I recall you once wrote me regarding a
missing hotel receipt, so I am now
sending the June 27th hotel charge made out
on the hotel's new form which had not
come back from the printers when I was
checking out on June 27th.

Trusting this item is now O.K.

Yours faithfully

J. Gardner Smith

OFFICE OF
INDIAN AGENT

104-1-15
Gleichen, Alta. July 11, 1930.

The Secretary.
Department of Indian Affairs.
OTTAWA.

Sir:

Please find enclosed herewith Voucher in duplicate for \$5364.00, in favour of Mr. W.T.Scott, of Gleichen, Alta. for installing the additional Millwork in Old Suns School. This contract has been well performed, and the materials supplied are of good quality.

In addition to the millwork comprised in the list given Mr. Scott, the Reverend Principal pointed out the need for partitioning off a coal bin in his basement, and installing two cupboards there. This work totalled \$45.05.

The charge of \$19.80 is for labour placing the 72 Friction Stays on the Casement Windows. The purchase of these attachments was authorized in the Department's letter of May 21st.

I would respectfully suggest that Mr. Scott's cheque be sent in care of Mr. G.H.Gooderham, Indian Agent, for the reason that Mr. Scott has undertaken to demolish the old residence, and break off and bury the concrete walls to one foot below grade, level up the basement, and leave the grounds tidy. He is to pay the Department \$100.00 besides. This work is not yet completed, and I shall ask Mr. Gooderham in my absence to check up this work, and collect the \$100.00, before handing Mr. Scott his cheque for the installing of the Millwork.

I have the honour to be, Sir,

Your obedient servant

OTTAWA, Ontario.

Gentlemen:

- RE: GLEICHEN -

paid Aug 15/30

Some time ago we supplied the Wyndels Construction Company with material in connection with the construction work going on at Gleichen. The account is now long past due, and our draft on the Wyndels Construction Company, St. Boniface, has been returned to us unaccepted, with the notation "This account will be paid by Ottawa Government" endorsed thereon, but we do not appear to have received any orders covering the purchases, from the Department, and we would like to hear from you as to whether the above remarks are correct, or not, and, if so, when we may expect a remittance.

We might state that under date of May 30th we received a letter from Mr. E. Gardner Smith, Inspector of Construction, Department of Indian Affairs, asking for a statement of the account, which was forwarded to him, but we have received no reply to our letter, and although we wrote him again on June 17th, we have not been able to receive a reply to the last letter either.

Awaiting your advice, we remain

Yours truly,

Re- Old Suns School Contract, Gleichen, Alta.

Gentlemen:

Enclosed herewith please find Certificates 11 and 12, for \$14,528.63 and \$10,000.00 respectively, in full payment of your contract and extras in connection with the above-mentioned contract. The reason for splitting the final Certificate into two parts is because any Certificate of \$20,000.00 or more must pass through the Finance Dep't, which occasions delay.

You will note that Certificate No. 11 credits your account with the extras of \$9923.33, full particulars of which are being sent you under separate cover; also that these Certificates included the 10% holdback on the Progress Estimates. Please sign both Certificates in duplicate, and forward same to The Secretary, Department of Indian Affairs, Ottawa, for payment.

I am also enclosing a letter written as from you, and addressed to the Deputy Superintendent General, with reference to the Department making direct payment to the firms mentioned, and of the amounts specified, on your behalf. Please sign this letter before a witness, and forward same with the Certificates.

Under separate cover I am writing you with regard to two or three accounts not included in the list being submitted to Ottawa; also with reference to slight adjustments in the amounts shown as due ~~the~~ two or three firms in the list being forwarded. I am awaiting confirmation of the balances claimed by the firms whose accounts I have thus far omitted to send forward for payment.

Yours faithfully

E. Gardner Smith

Inspector of Construction.

Re- Old Suns School Contract, Gleichen.

Gentlemen:

With regard to the list of firms, and the amounts the Department is being asked to pay, in connection with the above contract, I wish to make the following explanations in those instances in which the balances shown in the letter to the Department differ from figures previously confirmed by you.

The account of M. Fabro has been reduced by \$101.70 as a result of a charge against him of \$101.70 for electric current supplied by Old Suns School. A charge of \$50.00 is levied against you also. I enclose the details of these charges, as submitted by the Rev. Principal. I understand Mr. Taillieu advised the Principal as to the apportionment of the electric bill as between you and M. Fabro.

R. S. McQueen notified me of a further charge of \$5.50 for hauling bricks for the pump house, and as I have personal knowledge of this transaction I have added this small sum to his bill, thus making a total of \$815.05.

Regarding the account of the Crown Lumber Co., I called at their Gleichen office the day before I left for Winnipeg, and the Manager being absent, his assistant gave me a memo purporting to show their balance to be \$551.20. A few days ago the Manager, Mr. Matson, advised me that their account now stands at \$753.00. I wired you for confirmation of this figure ~~being correct~~, but in your letter of the 11th inst. you state you have no knowledge of any other figure than that of \$551.20. Mr. Matson states that he wired me the day after I left for Winnipeg, in care of the Wyndels Co, stating his assistant had made a mistake, and that the then correct figure was about \$100.00 higher. This telegram never reached me. I am adopting your suggestion of including this account at \$551.20, and any additional sum due this Company will have to be dealt with later. Perhaps Mrs. Wyndels has not forwarded to you all the bills that have been sent to her.

The Beaver Soap & Chemicals, Ltd. state their balance at

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 7)

CANADA

2.

\$850.00, but in your list of June 17th this is shown at \$780.13, the difference being accounted for by your deduction of freight \$69.87, to which deduction I presume you are entitled.

The McDonald Bros. Sheet Metal & Roofing Co. Ltd. sent me a Statement under date of June 20th, showing their balance as \$3363.00. In going over this account with you in Winnipeg, a charge of \$24.00 was added to this balance for a Tar Kettle; then a Contra Account of \$534.35 was deducted, thus leaving the balance at \$2852.65. This firm was not represented at our meeting in the Trustee Co's office, so on my return I wrote them asking for confirmation of the balance arrived at of \$2852.65, and it was in answer to this letter that I was advised of the higher figure of \$3363.00. I wrote again to this firm drawing attention to the divergence in figures, and asking them to confer with the Winnipeg Trustee Co. and get the difference straightened out. Under date of July 2nd I received the following message:- "Adjusting Wyndels Account with Winnipeg Trustee Co. (Stop) Writing later." (Signed) The Macdonald Bros. Sheet Metal & Roofing Co., Ltd. I have heard nothing further from this firm, so in the meantime I am passing their balance at the figure agreed on when I was in Winnipeg, viz at \$2852.65, and any balance beyond that will have to be dealt with afterwards.

You mention that there is still some difference between you and the Manitoba Bridge Co. regarding the balance due them. I recall you were trying to obtain a small reduction in their account in consequence of loss sustained through waiting for steel. I am, therefore, passing the figure you gave me in Winnipeg, viz, \$3014.15, and any sum beyond this amount must remain unpaid for the present. If by any chance I am overstating this balance, you may have this figure amended by writing at once to The Deputy Superintendent General, Department of Indian Affairs, Ottawa,

The balance in favour of Brotherston Electric Co. Ltd. has been increased by \$82.10, being the charge for the electrical connections to the motors of the laundry machines, thus bringing this firm's balance up to \$1659.23. I wired Ottawa for a ruling as to whether this was a charge against the general contractor or against the Department, and was instructed to charge it to you. I enclose details of this charge of \$82.10.

The Canada Seating Company have written me stating they have a claim against you for \$223.04 for Blackboards supplied on your contract here. No mention was made to me of this account when I was conferring with you in Winnipeg. I wired asking if this balance is correct, and in your reply you referred to other matters, but passed this firm's claim in silence. Does silence give consent? I am having to defer taking any action to procure payment of this

3.

account until confirmed by you.

write

The Sherwin-Williams Paint Co. regarding their unpaid account of \$329.00, and although this balance was also included in my telegraphed inquiry, you made no reference to it in your reply. I enclose their letter to me, in which they appear uncertain as to whether their bill should be charged to your painting sub-contractors or to you.

May I urge that you give careful and immediate attention to all accounts not yet included, or fully disposed of, in the list forwarded to Ottawa? I felt that I should not take the responsibility of delaying the payments any longer, for some of these people appear to be pressed for money, and they have already waited a long time for settlement of their accounts.

I am sending you the various invoices, correspondence and other data which have come to me from your various creditors. The Department will obviously be unable to release the final balance that will be coming to you until all the outstanding accounts are disposed of, so please lose no time in sending me confirmation of any remaining balances, and I will do all I can to expedite the settlement.

You may now apply for cancellation of your Fire Insurance Policy on Old Sunn School, and thus procure credit for the unexpired insurance. Perhaps you will have to send it to me for assignment.

You will note I am not differentiating between letters from the Wyndels Co, and from the Trustee Co; but am treating them as from the same source.

Yours faithfully

E. Gardner Smith

Inspector of Construction.

Re- Old Suns School Contract, Gleichen.

Sir:

I beg to advise you that I am to-day forwarding to the Wyndels Construction Co., Ltd. Certificates No. 11 and 12 (final) in payment of their remaining balance in connection with the above mentioned contract. Bearing in mind your previous injunction against issuing Certificates in excess of \$20,000.00, I have divided the sum ~~of~~ due them of \$24,528.63 into two Certificates of \$14,528.63 and \$10,000.00 respectively, which I trust was the right procedure.

I enclose a copy of the contractors' Progress Estimate No. 11, which shows how the amounts of the Certificates was arrived at.

I am also enclosing a copy of a letter addressed to the Deputy Superintendent General, ~~and~~ to be signed by the Wyndels Construction Co., in which the Department is being requested and authorized to disburse the monies at the credit of the contractors, including the deposit sent with the tender, in settlement of the various listed claims set forth in said letter. I regret that this list is not quite complete, but a very few supplementary items are all that remain, and I'm hopeful that these will soon be ready for submission, and then this ill-fated contract can be completely disposed of. In the meantime I think those creditors whose accounts are being forwarded to the Department should not be expected to wait much longer for their money.

I enclose, also, a copy of my letter of to-day to the Wyndels Co. regarding outstanding accounts and amended balances, which you may find informative.

Under separate cover I am sending you complete details of the additions, extras, and auxiliary work in connection with the Old Suns building. All the larger items, and most of the lesser ones, were authorized by the Department either by letter or telegram, and the list was gone over and explained when I had the pleasure of conferring personally with the officers of the Department when in the East a few weeks ago. If there should be any item in the list on which the Department desires further information, I shall be glad to make full explanation on being told of it.

The building is now completed, and the last of the contractors' workmen are leaving to-day. The Rev. Principal, Mr. Gibney, and family are already in residence in the new quarters provided, and I have asked Mr. Gibney to be responsible for the care of the building after to-morrow. The local contractor, Mr. W.T. Scott has also finished installing the new millwork, etc, but a few days' painting in connection with this work remains to be done.

2.

Despite the handicaps under which this contract has been carried out, --the death of the president and manager of the contracting firm, the labour troubles, the disloyalty of the foreman and his satellites-- the Department is receiving a high class building in every respect, and although a certain loss was inevitable almost from the start, there was no attempt to evade the high requirements of the Specifications at any time. Unfortunately a heavy loss has resulted, and Mrs. Wyndels will be left almost, if not quite, destitute, even her late husband's life insurance, which had been pledged as collateral, being wiped out. This is doubly regrettable as she is left with 6 or 7 young children. The job was taken at too low a price, and it proved impossible to keep their costs down to their estimates. The Department is getting this fine building at about \$10,000.00 below cost, and as this firm were not strong financially, the result is bankruptcy for them, I'm afraid. However, such are the fortunes of contracting, and stern fate is no respecter of widows and orphans.

The additional pressure tank salvaged from the former Old Suns School has just been joined to the existing one at the pump house of the Hospital, which doubles the water reservoir, and is already much appreciated. A Voucher for this work will be issued soon. This work was authorized by Mr. Orr, and is being performed by Mr. Michael of Gleichen.

I have the honour to be, Sir,

Your obedient servant

E. Gardner-Smith

Inspector of Construction.

P.S.

In addition to the loss sustained by the general contractor, the sub-contractors lost money in most cases too. The plasterer went broke, and left many unpaid bills which Wyndels Co. had to shoulder,--but we got an excellent plastering job. The plumbing & heating contractor (Dacust) reports a loss of over \$1200.00. Other sub-contractors about broke even, or made bare wages.

OFFICE OF
INDIAN AGENT

104-1-15
Architect
The Secretary.
Department of Indian Affairs
OTTAWA, Ont.

Gleichen, Alta. July 13th, 1930.

Sir:

Yesterday I had a call from Mr. French, of the Water Branch of the Department of the Interior, who had just come down from St. Paul. He reports the new well as yielding over 600 gals. per hour on a baling test. The water seemed of good quality except that a good deal of fine sand came with it, which may lessen as more water is used.

In discussing the matter of pumping plant, water storage, etc, we thought it would be best to wait until the contractors have drawn a lot of water from this well for their construction work before deciding on the most suitable equipment. We shall then have a better idea whether we shall have sand to contend with or not. The contractors will install their own temporary pumping service.

Mr. French said the excavating had commenced the day before he left, and should be completed within the next few days. I propose leaving for St. Paul by to-morrow evening's train from Gleichen so as to be present when the actual construction work starts. The contractors have shipped in a rock crusher, and propose crushing their own stone. A large pile of rocks and small boulders have been hauled to the site by local people, and these stones are clean and hard, and of good texture, and if broken up to correct sizes, excellent concrete should result. I approved a sample of sand, which I had subjected to a careful test.

While here Mr. French inspected the pumping plant at both Old Suns School and the Indian Hospital, and thought something somewhat similar would be about right for the Blue Quills School. I expect to return to Gleichen for a day or two within a couple of weeks' time in connection with a little work not yet quite finished.

I have the honour to be, Sir,

Your obedient servant

E. Gardner Smith
Inspector of Construction.

Ottawa, July 18th., 1930.

Sir,-

Referring to your letter of the 11th instant, enclosing a voucher amounting to \$5364.00 in favor of Mr. W.T. Scott, of Gleichen, for installing the additional mill-work in Old Sun's School, etc., I beg to request that you will forward the contract entered into with Mr. Scott covering the item \$4350.00. In your letter of the 12th May last you give a summary of the tenders received, including Mr. Scott's, but the Auditor General will require either the original tender, or the contract itself. The voucher will be paid and the cheque sent to Mr. Gooderham as requested, but you should send the contract referred to with the least possible delay.

Dear Sir:-

Re:- Old Suns School, Gleichen, ALTA.

Please find enclosed two Certificates Nos. 11 & 12, totalling \$24,528.63. You also have on hand Certificate No. 10 for \$2250.00, which has never been paid. This makes a total of \$26,778.63.

We also enclose list of the different amounts due subcontractors with authorization from the Wyndegs Construction Company to pay those amounts out of those three Certificates, also the deposit made by the Wyndegs Construction Company.

We are doing this on the instruction of Mr. Gardner-Smith. As you will no doubt readily understand, this matter has been delayed a great deal by circumstances that were entirely out of the control of the Wyndegs Construction Company and those subcontractors are all very anxious to get their money, and we hope the cheques will be forwarded them by return mail.

Thanking you in anticipation, we are,

Yours faithfully,

THE WINNIPEG TRUSTEE COMPANY OF CANADA.

Sir:

Your letter of the 12th instant was forwarded to me here from Gleichen.

With regard to the balance said to be due the Workmen's Compensation Board of Alberta by the Wyndels Construction Co. I had no advice regarding this arrear when making out the list of creditors. However, I shall be in Edmonton on the 24th, en route to Gleichen, and shall call at the office of the Board for details of this claim, while in that city.

Regarding the balance of \$411.74 claimed by the McCurdy Supply Co., Ltd. of Winnipeg, this claim is admitted and included in the list being sent to Ottawa for direct payment.

In a recent letter received from The Winnipeg Trustee Co. of Canada, who are looking after the affairs of the Wyndels Estate, I am advised that there will be a slight adjustment in two or three of the balances shown on the list of creditors in consequence of goods returned, and that details of these adjustments were to be forwarded to me in a day or two. When these changes reach me I shall communicate them to you promptly so that clamoring creditors may be appeased as soon as possible.

Yek

I have the honour to be, Sir,

Your obedient servant

E. Gardner Smith

Inspector of Construction.

Re- Old Suns School, Gleichen, Alta.

Sir:

Enclosed please find Voucher in duplicate, for \$119.36, in favour of Messrs Brotherston Electric Co., Ltd. of Calgary.

The first item of \$7.75 is for a small Electric Heater in the chamber under the ground floor of the Pump House, its purpose being to warm this little room sufficiently at times of low temperature so that no frost damage will result to the motor which drives the pump. Both the pump and motor occupy the chamber alluded to, and are both mounted on the one frame. Had we not adopted this method of supplying heat when needed we would have had to build a chimney and procure a stove.

The second item of \$111.61 covers the cost of bringing both light and power from the main school building to the Pump House in accordance with Underwriters' requirements. This charge is explained in full detail in the accompanying invoices.

I have the honour to be, Sir,

Your obedient servant

E. Gardner-Smith

Re- Old Suns School, Gleichen, Alta.

Sir:

Your letter of the 18th instant only reached me this evening, after being forwarded from Gleichen.

With regard to Mr. W.T. Scott's account of \$5364.00 for installing the extra millwork, I regret that I omitted enclosing Mr. Scott's tender when sending the voucher. My Old Suns files are in a box with much other miscellaneous data, plans, etc, being forwarded to me here from Gleichen, and should be at the St. Paul station now. I shall call at the station before the train goes out in the morning, and get the tender asked for and enclose it in this letter. There was no formal contract drawn, - just the list of millwork and details, and Mr. Scott's tender for installing them as per list and accompanying blue prints, including painting and hardware. This work has been performed quite satisfactorily.

I have the honour to be, Sir,

Your obedient servant

E. Gardner Smith

Inspector of Construction.

P.S. We have just three trains a week to and from St. Paul.

Dear Sirs:-

Re:- Wyndels Construction Co. Ltd.

It is our understanding that the above noted Company carried out the building contract for your Department at the Old Sun School, Gleichen, Alberta. No actual payroll statement has been received from them covering their operations on this contract this year.

We are now advised that Mr. Wyndels is now deceased and that all of the payroll records of the Company are in the hands of your Department and that there are still monies due by you to the Company in connection with the work referred to.

If such is the case we would greatly appreciate your making remittance to this Board to cover 2% of the total payrolls of the current years operations on assessment account plus 3% for each day or part of day worked by all persons employed.

Thanking you in anticipation of your early attention to this matter.

Yours truly,

J. Cadence

Auditor.

(COPY)

Crossfield, Alta.,
July 15, 1930.

Hon. Peter Heenan,
Minister of Labour,
Ottawa, Ont.

Dear Sir:

Last winter I was employed as a cook by the Wyndells Construction Co. to work at Gleichen while they were constructing an Indian School.

I was employed to work on a percentage basis and I have owing to me for the month of March, 1930, the sum of \$175.00 and this represents a balance. The month of April I had seventeen days labor as I left their employ on April 17, 1930.

I was employed on a 50% basis over all costs.

The profit for the seventeen days was approximately \$374.00 of which I have still one-half owing to me.

I left the correct statement with a lawyer at Winnipeg by the name of Broad and Smith of 801-805 Somerset Building, corner of Portage avenue and Donald street.

You may remember me when I cooked for this same Company at Kenora, Ont. Indian School at the time you paid a visit.

When first hired to them I was to receive a salary of one hundred dollars a month besides the commission and after Mr. Wyndels death they discontinued my salary and I worked on the commission basis.

I have two witnesses to this contract, Mr. Hutcheson, School Inspector at Kenora and Mr. J. F. Sweeney of Winnipeg.

Thanking you for any assistance you can render in regard to this matter.

Yours truly,

(Sgd.) P. Allcet.

Dear Mr. Ward,-

Replying to your letter of the 15th with reference to the claim of P. Allcot of Crossfield, Alta. against the Wyndels Construction Co., I beg to say that a final settlement was made with the Wyndels Construction Co. on the 15th of this month and a cheque for the balance due them was forwarded to the Winnipeg Trustee Co. of Canada, Winnipeg. The cheque forwarded represented the balance due after the Department had paid all the claims against the Company which had been filed with our Inspector of Construction and forwarded to the Department. Mr. P. Allcot should therefore communicate direct with the Winnipeg Trustee Co. of Canada.

Yours very truly,

R

Dear Sirs:-

Re:- Wyndels Construction Co.Ltd.

It is our understanding that the above noted Company carried out the building contract for your Department at the Old Sun School, Gleichen, Alberta. No actual payroll statement has been received from them covering their operations on this contract this year.

We are now advised that Mr. Wyndels is now deceased and that all of the payroll records of the Company are in the hands of your Department and that there are still monies due by you to the Company in connection with the work referred to.

If such is the case we would greatly appreciate your making remittance to this Board to cover 2% of the total payrolls of the current years operations on assessment account plus 3% for each day or part of day worked by all persons employed.

Thanking you in anticipation of your early attention to this Matter.

Yours truly,

Auditor.

Dear Sirs:-

Re:- Wyndels Construction Co.Ltd.

With further reference to our letter of the 28th ultimo I beg to advise that we have been informed by The Workmen's Compensation Board of Manitoba that they have made a careful examination of the payroll records of the above mentioned Company in connection with the work done in Alberta this year and find that the total payroll amounts to \$11,280.06 for which sum we are enclosing an assessment herewith, the original assessment levied in the sum of \$100.00 still remaining unpaid.

In addition to the above we are advised that a total of 1192 days were worked which at 3¢ per day produces the sum of \$35.76 and we are enclosing our Form 15a for this sum.

Trusting that we may have your remittance for the total of \$261.36 at your earliest convenience.

Yours truly,

JC/IM

Auditor.

Re: Old Suns School, Gleichen, Alta.

Sir:

The Winnipeg Trustee Company of Canada, who are looking after the affairs of the Wyndels Estate, write me as follows:-

"In regard to the Workmen's Compensation Board of Alberta, we think the estimated pay-roll for \$5000.00 is about right, and we are satisfied that Mrs. Wyndels has no objection to the Government holding the necessary amount to pay for it, and thank you for your kindness in the matter.

"We have not heard from Ottawa at all since we sent them the different papers, and one of the parties here in Winnipeg 'phoned us yesterday. We wish Ottawa would send them their cheques, as really it is a hardship on some of those parties.

"We will have another small sum to pay to the Crown Lumber Co as we have final explanation of their account.

"We will as soon as we can, send you the list of two or three other small accounts to be paid in order to entirely settle this ~~xx~~ matter.

"We believe that likely the best thing will be that when everything is settled, Ottawa sends in our care a cheque to the Wyndels Construction Company, and we will see they all agree together before the cheque is used.

"As far as we can figure, there should be about \$8000.00 left of the original deposit."

I realize it is very probable that by this time cheques will have been sent by the Department to the various creditors whose accounts have been accepted by the Wyndels Co. and sent to you for direct payment. As there are still two or three other small accounts in process of adjustment, I ~~submit~~ ^{commend} the suggestion to send whatever portion is left of the original deposit in care of the Winnipeg Trustee Co. This seems a very reliable concern, and I have every confidence that they will see that all accounts are paid.

With regard to the claim of the Workmen's Compensation Board of Alberta, I called at the Board's office when last in

Indian Affairs. School Files.

2.

Edmonton, and the Board agreed to accept the estimated pay-roll of \$5000.00 for 1930, and were to advise you of the amount due from the Wyndels Co. on that basis, with the request that you make payment to the Board direct of the prescribed assessment.

I think this item of Workmen's Compensation is the only account in addition to the list sent you by the Winnipeg Trustee Co. that calls for direct payment from Ottawa. Anything then remaining will be very small, and can be dealt with by Winnipeg Trustee Co., as suggested in their letter.

I'm sorry that the Department is being troubled in this way, but as the contractors are apparently bankrupt in consequence of losing heavily on the Old Suns contract, the procedure being followed seemed the only way of protecting the various creditors.

I have the honour to be, Sir,

Your obedient servant

E. Gardner Smith

Inspector of Construction.

Dear Sirs:

Re Adjustment of Medical Aid Account

We have received an audit of your payroll for the year 1930 which shows the amount of \$ 35.76 should have been deducted from the wages of your employees for Medical Aid, during the period reported.

Our records show that we have received only \$ Nil from you on this account, and we must, therefore, ask you to make remittance for the balance of \$ 35.76 to this Board by return, so that your account may be placed in good standing.

Yours truly,

R

Re- Old Suns School, Gleichen, Alta.

Sir:

The accompanying bill of \$35.55 is Mr. Michael's charge for labour and materials in making and installing the outlet connection from the fan of the drying tumbler in the laundry, and carrying same in heavy guage gal. iron to the outside of the building, with proper wind-proof outlet against back draft.

I called on the Beaver Soap & Chemicals, Ltd. in Calgary regarding this charge, but they state that they never supply this connection with the machines, and that it is an expense invariably borne by the owner. They offer, however, to send an expert to demonstrate the machines, and to give directions as to the operation of same, and will supervise the first day's washing when the school is in session. I have asked the Rev. Principal to notify the Beaver people when ready for the first washing.

I have the honour to be, Sir,

Your obedient servant

St. Paul, Alta. Sept 9, 1930.

McDonald Bros. Sheet Metal & Roofing Co., Ltd.
WINNIPEG, Manitoba.

Gentlemen:

Re- Old Sunn School, Gleichen, Alta.

With reference to the repairs on the tar and gravel roof of the above school, you will recall my advising you of wind damage to a portion of the roof of the south wing of the main building. You replied authorizing us to engage Mr. Michael of Gleichen to make the necessary repairs. This he has done, using the 2 bbls. of tar, and your kettle, which your men had left on the premises. I enclose Mr. Michael's bill for the work as authorized by you, via \$31.28, and I would ask you please to send Mr. Michael your cheque in payment of his charge, and instruct him as to what you wish done with your tar kettle.

In order to safeguard the school roof against further wind damage, the Department has since added a great deal more gravel and tar than was called for under the specifications, at a cost of \$292.76 additional to what is being charged to you.

Apparently you have never rendered your bill for extending the vents from the basement wash-rooms to the toilets, nor for supplying the two heavy ash cans for the boiler room. If you will let us have your account for this extra labour and materials I will send it forward for payment to you direct.

Yours faithfully

E. Gardner Smith
Inspector of Construction.

St. Paul, Alta. Sept 9th, 1930.
The Secretary,
Department of Indian Affairs.
OTTAWA.

Re- Old Suns School, Gleichen, Alta.

Sir:

I beg to submit herewith the account of Mr. Michael, of Gleichen, for \$292.76, being the cost of labour and materials for applying additional tar and gravel to the roofs of the above mentioned school.

This bill may come somewhat as a surprise to the Department, and calls for a special explanation.

Owing to winds of almost cyclonic violence, and which blew many crops of the district right out of the ground, some damage was caused to part of the tar & gravel roofing over the south wing of the main building. The suction of the wind "drew" the roofing into slight corrugations, and which would ultimately cause leaks if not remedied. McDonald Bros. of Winnipeg, the roofing sub-contractors, assumed responsibility for the repairing of the damaged portion, and this expense is being charged to them, as you will note from the enclosed letter to that firm. While Mr. Michael and his men were on the job with the necessary equipment, I took it on myself to authorize the applying of additional screened gravel, and to give the entire roof of the main building and residence a further dressing of tar. This has developed into a more extensive job than expected, but in my absence Mr. Michael conferred with Mr. Gooderham, and they deemed it best to make a thorough job of it while in the business, and altogether 18 bbls of pitch, and much more screened gravel, has been applied. When I tell you that in a neighboring municipality a new school had its tar & gravel roof blown entirely off the building, you will have some idea of what these roofs have to stand in the windy belt of Alberta.

INDIAN EDUCATION
This additional work on the school roofs is no reflection on the roofing contractor, for their work was done in full conformity with the specifications.

When in Gleichen last week I made a careful inspection of the extra work done on the roofs, and I can assure the Department that the expense incurred will prove an excellent insurance against the extreme vagaries of the weather for many years to come. These roofs are now models of solidity and weather resistance.

THE WORKMEN'S COMPENSATION BOARD

QU'APPELLE BUILDING,

EDMONTON, ALBERTA

Sept. 23rd, 1930.

and
A. F. MacKenzie, Esq.,
Secretary,
Department of Indian Affairs,
OTTAWA.

Dear Sir:-

Re--Wyndels Construction Co. Ltd.,
Winnipeg, Man.
Your file No. 104-1-105.

I have for attention your letter of the 17th instant wherein you advise us to apply to the Winnipeg Trustee Co., of Canada, 322 Main St., Winnipeg, Man., as all monies due The Wyndels Construction Company have been forwarded to them and they have agreed to settle everything satisfactorily.

May I kindly advise you that some weeks ago when endeavoring to establish contact and get some satisfaction out of these people we finally had to request The Workmen's Compensation Board of Manitoba whose office is at Winnipeg to interview the Winnipeg Trustee Co., of Canada and the information given by such Company to the Manitoba Workmen's Compensation Board was that they had absolutely no funds on hand to meet our assessment. The report in question dated July 24th, 1930, states that monies were still in the hands of the Government of Canada and suggesting that we write to your Department in order to obtain satisfaction of the debt which has been referred to in our former correspondence with your office. It is possible, of course, that you may have paid over to the Winnipeg Trustee Co., of Canada, the amount due by your Department to the Wyndels Construction Co., Ltd., in satisfaction of their contract at a date subsequent to July 24th, in which case, of course, the statement already quoted herein, that they had absolutely no funds on hand, may not now actually be the case. I am, therefore, writing again today to The Workmen's Compensation Board at Winnipeg sending them a copy of your own letter to us of September 17th and also a copy of this our acknowledgement and reply to you in order that they will understand the situation.

In our letter to The Workmen's Compensation Board of Manitoba, we are asking them to interview the Winnipeg Trustee Co., of Canada to ask for a definite de-

cision as to whether such Trustee Company is now in a position to make payment of our assessment or whether we shall be required to collect from your Department under the terms and provisions of Section 36-2 of The Workmen's Compensation Act of this Province, such having been quoted to you in the last paragraph of our letter of the 3rd instant. As soon as any communication is received in reply from the Manitoba Board I will again get into touch with you on the subject in question.

Yours truly,

G. W. Waistell
Asst. Secretary.

Re- Old Suns School, Gleichen, Alta.

Sir:

With regard to the installing of glass panels in the doors opening from corridors in the above-mentioned school, as authorized by the Department as an extra to the contract, only the labour for this was included in the list of extras forwarded with the final certificate, and up to the present the Wyndels Co. has not been paid for the glass. The reason for the omission was because the painter talks but little English, and I evidently did not make him understand that only on receipt of the invoices for the extra glass could credit be given for it.

The Winnipeg Trustee Co. of Canada, who are looking after the Wyndels Estate, has recently forwarded to me the Pilkington invoices for the additional glass, and I am now able to voucher forward for payment this outlay of \$72.53. In this list of glass are one or two windows which the Rev. Principal wished to be of obscure glass because of the fire escape giving vision through them.

In the specifications for the lights of front entrance, mention was made of the glass being 1/8" plate, but Pilkingtons advise there is no plate glass on the market less than 1/4", so we incurred the expense of the 1/4", as shown on accompanying voucher.

As the final certificate has been given to the contractors, I thought the best way of dealing with this remnant was by Voucher, which I am accordingly enclosing. I have not added the usual 10% contractor's profit.

I have the honour to be, Sir,

Your obedient servant

E. Gardner-Smith
Inspector of Construction.

The Manager,
Winnipeg Trustee Company of Canada,
322 Main St., Winnipeg, Man.

Dear Sir:- Re--Wyndels Construction Co.Ltd.

Within recent date we requested the Workmen's Compensation Board at Winnipeg to assist us in clearing up our account against the above mentioned concern who undertook a contract at Gleichen for the Department of Indian Affairs and which operations came within scope of The Workmen's Compensation Act of this province.

The Wyndels account was established in the usual way and an assessment levied upon them which was never paid. Had any of their workmen during the process of the contract had the misfortune to sustain any injury this Board would most certainly have been left to pay notwithstanding the employers delinquency.

It is now found that the Winnipeg Trustee Company of Canada is custodian of the affairs of the Wyndels Construction Co.Ltd., and after communicating with the Department of Indian Affairs in an endeavor to get our account settled we are finally referred to yourselves as per letter from such Department dated September 17th, 1930, of which a complete copy is attached hereto.

We are now advised by The Workmen's Compensation Board of Manitoba that if you can be shown proof of indebtedness that payment of the same would be made by yourselves.

The original assessments were sent out to The Wyndels Construction Co.Ltd., by registered mail and I now attach hereto certified copies of such assessment notices and I also attach carbon copy of the original medical aid memorandum, but of course it is impossible for us to say what has become of the originals which we consigned to the addresses shown on the documents in question. They certainly have never been returned to this office undelivered. It is also

Dear Sir:-

Re--Wyndels Construction Co. Ltd.,
Winnipeg, Man.
Your file No. 104-1-15

Following receipt of your letter of the 17th ulto., we solicited the assistance of The Workmen's Compensation Board at Winnipeg who interviewed the Winnipeg Trustee Company of Canada, whose Manager told the official interviewing him that if The Workmen's Compensation Board of Alberta would submit to him a statement of account he would see to it that the matter in question was paid.

I am now attaching copy of my letter to the Winnipeg Trustee Company of Canada, and also a copy of the statement herein referred to.

I sincerely trust that there will not be any hitch now in obtaining settlement of our account, but if such item is shown to be uncollectible from the Winnipeg Trustee Company of Canada, I will certainly notify you accordingly.

Yours truly,

COMMISSIONER'S OFFICE,

D REGINA, SASK., Oct. 6th, 1930

IN YOUR REPLY REFER TO

NO. 401-111 C.E.

ALSO TO DATE OF THIS LETTER

Sir:-

I beg to inform you that I visited the Old Sun's Indian Residential School on Wednesday last, and my attention was drawn to the fact that the school bull is kept in with the rest of the cattle, which is most unsatisfactory, and that the animal being a Holstein is more or less ferocious.

The suggestion was made that he be removed to a shed in the rear of the barn, but before doing this it would be necessary to make the place good and strong by lining and bracing it. I would therefore ask that I be authorized to spend \$85.00 in making this change, as I do not see how we can get along without it.

Kindly let me know at the earliest possible moment so that I may give the necessary directions.

Your obedient servant,

W. M. Graham
W. M. Graham,
Indian Commissioner.

Ottawa, October 9, 1930.

Sir:

I have your 401-11A C.E. of the 6th instant, requesting authority to expend \$85 in preparing accommodation for the bull in a shed at the rear of the barn at the Old Sun Indian Residential School. In this connection I have to say that you may arrange for the work required in making a secure place in the shed for the accommodation of this animal. The cost should be kept within your estimate. It is thought that the school staff themselves could carry out a certain amount of the work. The member of the staff responsible for the care of this animal should use every care to see that there is no danger of the bull incurring injury to any of the boys or other members of the staff.

Your obedient servant,

A. F. MacKenzie,
Secretary.

RE: Voucher #296.

SIR:-

Re attached voucher: Owing to the loss of some of the vegetables which were stored in the root cellar at Old Sun's it was found necessary to make certain changes and improvements to obviate any further loss and I authorized the Principal to purchase the lumber - the school will do the work.

When Mr. W. T. Scott was setting up the desks at the school it was found necessary to erect them on a base as they cannot be screwed into the tarrazo floors. The shelving shown on this voucher was for this purpose.

Your obedient servant,

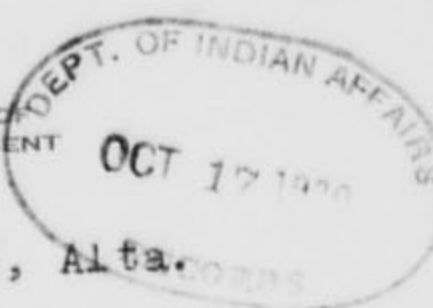

W. T. Scott

Old Sun School,
Gleichen,
Alta..

Nov. 28th. 1930.

Mr. R. Gurney Orr,
Architect for the Dept. Indian Affairs,
Ottawa.

Dear Mr. Orr,

At the time of your visit to Old Sun School, you asked me about our heating system, but as I had not had opportunity to test it out under proper conditions I said that I could not tell you anything about it. You then asked me to let you know how things were later on. I have now had opportunity to give it a good test and report as follows;

The main part of the building is in good working order, and now the equalizer is in, the boilers are O.K.. The only part of the building that causes difficulty is the residence (Principal's) and here it is almost impossible to get heat. When the boilers are running full blast, so that it is unbearably hot in the main building, we barely get the tops of our radiators hot in the residence. We freeze in the top bedrooms in mild weather.

During our testing time I thought that I would try to get a fair idea of what temperatures we could obtain, so I used a maximum and minimum thermometer in my bedrooms. I found that the temperature never rose beyond 50 degrees, and usually stood at about 40. This was with both boilers going full, and a calm day. That end is the North and, although I have not bothered to test it, I am certain that when a slight breeze is blowing, the temperature would not be far off freezing point.

When Mr. Walker was down, I spoke to him about it, and he tested the radiators, finding them alright. He said that the only way to get heat to the residence was to carry a separate line direct from the boiler to that end of the building. In case you thought of doing that, he left a plug in the main line just above the equalizer.

With kindest regards, and many thanks for the interest you have taken in fitting the school out.

Yours very sincerely,

John W. House, Principal.

OTTAWA.
Dec. 2, 1930.

Dear Mr. House,-

I have your letter of the 28th ultimo with reference to the heating system at your school and am glad to have the information submitted.

I am today directing a letter to the Indian Agent authorizing the installation of a separate steam main from the boiler to the residence. This, I think, will solve the difficulty.

Yours very truly,

R. GURNEY ORR.
Architect for the Department.

Rev. John W. House,
Principal, Old Sun's School,

Dec. 2, 1930.

Sir,-

It has been reported that it is difficult to heat the residence in the new Old Sun's School. To overcome this difficulty it will be necessary to run a separate main from the boiler to the residence and I would ask you to kindly arrange to have this done as soon as possible. Please consult with Mr. Walker and be guided by his instructions in this installation.

Your obedient servant,

A. F. MacKensie

RE: Voucher No.439

Dear Sir:-

The chimney belonging to the Principal's residence at Old Sun School was smoking badly and the Principal tried to use an extension of galvanized iron but this was blown down by a strong wind. As there was sufficient brick on hand Mr.Clifford Fleury was employed to build an extension in brick and I submit herewith Voucher No.439 in settlement.

GYP SUM, LIME AND ALABASTINE,
CANADA, LIMITED

504 TRUST AND LOAN BLDG.
WINNIPEG, MAN.

December 8, 1930.

The Department of Indian Affairs,
OTTAWA, ONTARIO.

Dear Sirs,-

Re Indian School built at
Gleichen, Alberta, this year.

The Wyndels Construction Company
were the general contractors on the work.
Mr. L. Boux was the plastering contractor.
We supplied the plaster to Mr. Boux for this
work, prepaying the freight on it to Gleichen.

Shortly after the work commenced
Mr. Wyndels died, causing considerable confus-
ion as to what procedure was necessary to
protect our interests on the work. We assumed
that since it was a Government contract those
supplying materials would be protected, particu-
larly as we were given to understand it was
impossible to apply a lien on a building erected
under the Indian Department.

Our bill against Mr. Boux amounts
to \$ 1837.50, of which \$ 578.10 was for prepaid
freight on the material from Winnipeg to Gleichen.
We have been unable to get any payment whatever
from Mr. Boux. He advises us that he is insolvent.
We have been unable to obtain any payment from the
Wyndels Construction Company Estate being handled
by the National Trust Company, who advise us that
Boux is already overpaid on the work.

We are writing to ascertain what
stand your department is taking in connection
with materials supplied on this work for which
no payment has been received.

Yours very truly,

W.E.A.

January 9, 1931

Mr. Gurney Orr,
Architect,
c/o Dept. of Indian Affairs,
Ottawa, Ont.

Dear Mr. Gurney Orr:

Yesterday I made a test on the heating plant at the Old Sun School, Gleichen, and I was very pleased indeed with the manner in which the Residence heats up. Without any pressure showing on the gauge, every Rad in this part of the building was hot, and the temperature was 72°.

Mr. House seems to be very pleased indeed, and I asked him to write you and explain just how he felt about the heating of his residence.

If you will remember, the dairy part of the building and the room where the storage tank was situated, the Rads in this part of the building would not heat up, and I was afraid that if we got a cold snap, that much damage would be caused to this tank, so I had the steam-fitter make some changes, with the result that the Rads now heat up very easily, and there is absolutely no danger from freezing now.

Since we made the changes to the header in the Residence part of the building, the whole school seems to heat better, and on testing out, I found that every Rad in the building with the exception of the basement Rads which are on the wall, would heat up with no pressure showing on the gauge. The basement Rads of course would heat up when slight pressure was ~~put~~ on the boiler.

ALL CONTRACTS AND AGREEMENTS OF THIS COMPANY ARE MADE CONTINGENT UPON STRIKES, ACCIDENTS AND OTHER DELAYS BEYOND ITS CONTROL, AND ARE ONLY BINDING UPON THE COMPANY WHEN APPROVED IN WRITING BY THE HOME OFFICE. STENOGRAPHICAL AND CLERICAL ERRORS SUBJECT TO CORRECTION

C. A. DUNHAM CO., LIMITED, TORONTO, ONT.

I also paid a visit to the Hospital Job. The new boiler is hooked up and everything appears to be heating nicely, but I will give it a thorough check over when the installation is finished.

By installing the steel boiler on this Job, the heat was never cut off, as they had steam on the new boiler before they cut off the old one.

Yours very truly,

A. Walker.

Dear Mr. Walker,-

I have your letter of the 9th and am very glad indeed to hear that the heating system at the Old Sun's School is giving such excellent satisfaction, the credit for which is due, I think, to your efforts.

I am also pleased to learn that the Hospital job is getting along well and will be glad if you will make a thorough test when same is completed.

With best wishes for the new year, I remain

Yours very truly,

OFFICE OF
INDIAN AGENT

104-1-5
Eichen, Alta.

January 23, 1931.

Attention Mr. R.G. Orr

Dear Sir:-

Re attached Voucher #469 in favour of F.H. Lepper & Company, I have to report that the heating system at the Old Sun School is now working splendidly with uniform heat throughout the building and with a considerable saving in fuel.

On completion of the line to the residence it was noted that the subsidiary system for the laundry, dairy and pressure ~~room~~ tank room was giving practically no heat. If it had been severely cold weather this would have been disastrous. Before working on this system, I had Mr. Lepper come from Calgary and explain, as best he could, what would be necessary to get heat into these rooms. As the electric pump was then installed for the long distance work to the residence, the work in putting the subsidiary system into good order was not great and was done before Mr. Lepper took his mechanics off the job.

Mr. Walker inspected the finished job and was satisfied all would work well now. The account is submitted for your disposal, please.

Pay when
funds available

The Secretary,
Department of Indian Affairs,
Ottawa, Ont.

Yours obedient servant,
Indian Agent.

Re- Plaster Supplied at Old Suns School.

Sir:-

I beg to acknowledge the receipt of your letter of the 30th ultimo, with enclosed copy of a letter received by the Department from Messrs Gypsum, Lime and Alabastine Canada Ltd. in which it is stated by this firm that there still exists a balance due them of \$1837.50 for plaster supplied to L. Boux, plastering contractor for the Wyndels Construction Co.

In reply I can only express my amazement that this firm has waited until this late day before notifying either the Department, or the Inspector on the job, of the existence of this unpaid balance. Had they given notice of it at the proper time their account would have been protected in common with the other unpaid accounts of creditors. I received no word of any kind from any source that there was any money due to this firm, and therefore no consideration was given by me to an account that I did not know existed, in the preparation of the final certificate.

Much as I regret the circumstance, it seems to me that this firm have themselves to blame for their surprising tardiness in giving due notice of their outstanding balance.

I have the honour to be, Sir,

Your obedient servant

E. Gardner Smith
Inspector of Construction.

Sir,-

With further reference to my letter of the 30th of December I have today received a letter from the party who acted as Inspector of Construction during the erection of the Old Sun's Indian Residential School, and I am advised by him that as he had not been notified by you before the final certificate was issued of the balance due it was not considered when he was making out his final certificate. For payment of this account you will, therefore, have to communicate with the Winnipeg Trust Co. to whom the balance of this contract was paid.

Your obedient servant,

T. R. L. MacInnes.

Department of Indian Affairs,
OTTAWA, ONTARIO.

File No. 104-1-15.

Dear Sirs,-

Replying to yours of the 29th;

We are very much disappointed
in the attitude taken in connection with
our account against the new Indian Resident-
ial School at Gleichen.

On the grounds that this was a
Government job and on the grounds that the
general contractor in charge of the work
died during the progress of the work, we
had assumed that we would be protected in
the settlement of accounts on this job.

We are still of the opinion
that the Inspector of this work should not
have issued the final certificate before
obtaining a clearance from us for our
account.

There does not appear to be any
hope of obtaining a payment from the Winnipeg
Trust Company on this work as they claim to
have paid the plastering contractor in full.
The plastering contractor is, in turn, an
irresponsible party against whom there would
be no object in taking legal action.

We are investigating this matter
further and will communicate with you later
in the matter.

Yours very truly,

W.E.A.
'A

WESTERN MANAGER.

COPY OF LETTER

Mr. Indian Agent Gooderham
Blackfoot Indian Agency
Gleichen, Alta.

Winnipeg Man.
February 24th 1931.

Dear Mr. Gooderham:-

Since returning to Winnipeg I have gone carefully into the matter of the best kind of weatherstrip to make the new Old Sun School dust-proof, and strongly recommend the "Peace" weatherstrip, samples of which I am forwarding to you by parcel post today. Enclosed herewith you will find the original of a letter from the Manager of the Peace Weatherstrip Company and a copy of the same, giving the price per foot of the different kinds of weatherstrip for windows french windows and doors. The "Peace" weatherstrip double brass groove is dearer than the other kinds but it is undoubtedly the best for the windows. You will note that there is a weatherstrip meeting rail to close up the space where the upper and lower sashes meet. This seems to me to be very important. I may state for your information that I have consulted Mr. Claydon of the Claydon Co Ltd. who built our Blood School, also Mr. Simmons who built our Sioux Lookout school, and ~~Mr. Simmons~~ Mr. H. E. Matthews, chief architect of the Dominion Govt. in this city, and all three men spoke in the highest terms of the "Peace" weatherstrip and of Mr. H. J. Dennis the manager of this company. I have therefore the fullest confidence in recommending that the "Peace" weatherstrip be utilized in making the Old Sun School dust-proof. There are other kinds of weather-strip but they will not be so effectual. I shall be glad to be advised in due course of the decision which you and your Department may reach in this important matter.

I have not forgotten the question of the terrazzo floors but so far have been unable to locate the firm that installed them. I asked Mr. Inspector Bunn to help me in this matter but he had no information on record.

Best wishes.
Yours very truly,

Signed: T. B. Westgate.

Note This is in regard to
the cleaning of said floors
There appears to be a dust on top
which never entirely disappears
according to the school staff - not important

OFFICE OF
INDIAN AGENT

Oleichen, Alta.

March 3, 1931.

Attention Mr. R. C. Orr.

RE:- Old Sun School windows & doors

Dear Sir:-

I attach hereto copies of letters from Dr. Westgate and the Manager of the Peace Weatherstrip Company of Winnipeg. Considerable time and thought has been given to find a remedy for the loose and shrunken condition of the windows and doors. Various schemes were suggested by local contractors but nothing appeared to be entirely satisfactory.

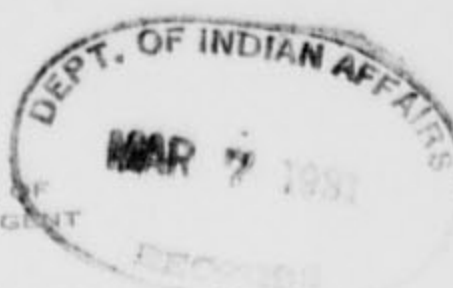

After the school opening Dr. Westgate kindly offered to get data in Winnipeg and his letter is the result. Where ~~these~~ windows have shrunken, a strip of wood will be necessary as well as the weather strip, I believe. This is mentioned because the "Peace" people may not realize this. It was ascertained in Calgary that it is almost ^{impossible} to get windows of wooden construction which will not shrink and become loose in this dry climate. This is certainly evident at Old Sun school as most parting rail windows are loose in every direction and casement windows have shrunken and even warped to the extent that they are far from weather proof.

There is a heavy dust storm today and I believe the standard groove "Peace" strip is the only thing that will keep most of the dust out of the building. On such a day the school is a terrible mess. Something must be done and it is presumed that you are familiar with this weatherstrip. The Principal advises me that the Company asked for measurements of all windows and doors and have been given the information. Awaiting your instructions.

Your obedient servant,

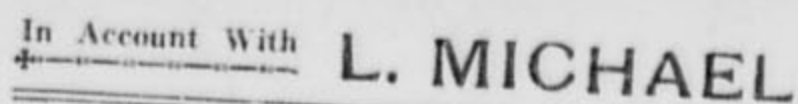

Indian Agent.

RE: Voucher #573.

Dear Sir:-

Twenty two toilets were leaking when put into use at Old Sun School when the school opened. The writer took this up with Mr. E. Gardner Smith who recommended that Mr. L. Michael do the necessary work and submit the account through the Department to the Wyndell Construction Co of St. Boniface. I believe I brought this to the attention of Mr. Orr and he instructed me to submit the account direct to the Department.

Mr. Michael also had to fix basins and bath tubs. The basins had fallen away from the wall and it was necessary to drill through the concrete wall to hold them firm. With regards to the bath tubs, the floor connections were leaking. In the basement the overhead closet tanks did not have proper trip. It was found that twisted wire had been used to make a connection and the wire had straightened out. He also had to solder rings to chains. The ash-hoist also had to be bolted through the concrete wall.

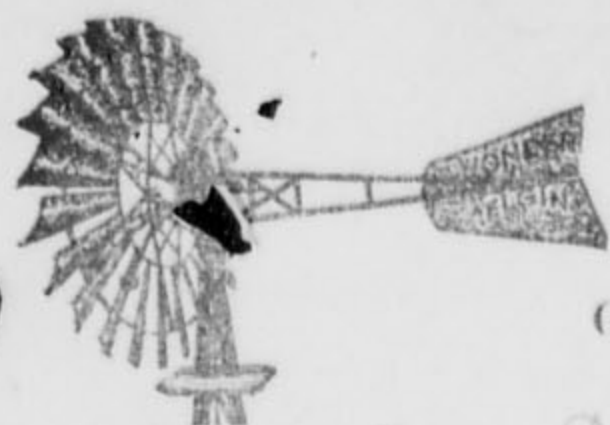

Your obedient servant,

RE: Voucher #573.

Dear Sir:-

Regarding attached voucher #573, please note particularly a steam trap costing \$51.50. This was necessary in laundry to hold steam in dryer. The new stove had to be installed and bricked as no water front was put on it.

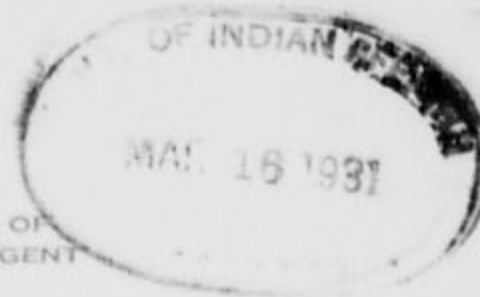

Please note also the sum of \$119.80 for safety guards on laundry machines. The necessity for these was apparent from the first and a diagram showing what was necessary was sent to Western Steel Products Co. at Calgary and this Company made the guards. The cost was greater than expected but investigation showed it to be unusual work and also that it was made to comply with Regulations of the Factories Act of the Province of Alberta.

Also please note the repair to motor which pumps water in the barn. The total cost is \$27.50. This item is included though it is not known whether or not the account should be met by the M.S.C.C. Neither the writer or the Principal knew at the time. The total may appear large but all material and labour was necessary.

Dear Sir:-

As the Old Sun School is to be placed on the per capita grant basis from April 1st. next (see your letter Feb. 12, #104-1-3) I requested the Principal to furnish me with a list of buildings, equipment, etc. required to complete the school plant before that date. In his reply, just received this morning, he mentions the following items:-

BUILDINGS.

(1) Poultry house with a capacity of 200 birds. Estimated cost \$400.00. The Principal states that the present building has been condemned as useless by a Government Inspector.

(2) Piggery. Estimated cost \$400.00. The building now used for this purpose is less suitable than the one used for the poultry.

EQUIPMENT

(1) One waggon complete with high boxes and broad tires. The Principal states that with one waggon it is impossible to haul the school's supply of coal and the Railway Co. charges demurrage after the car has been on the siding for two days.

(2) Electric ironer, 54". The Principal states that this method of ironing would be cheaper to operate than the coal stove which is in use at present. Cost ?

no funds at present

no funds

no

Indian Affairs, School Files.
(RG 10, Volume 6360, File 758-5, part 7)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

not supplied

(3) An electric scrubber and polisher for the terrazo floor. Estimated cost about \$600.00.

For some reason or other which the school management have not been able to ascertain, very fine sand like dust keeps coming out of the terrazo, and the Matron finds it impossible to keep the building clean. I have been unable to find out the name of the firm who installed the terrazo, and beg to suggest that you direct their attention to this defect in their workmanship.

(4) All the doors and windows should be supplied with weatherstrip on account of the dust storms which are frequent in that part of the country. In a letter dated March 5, the Principal wrote, in part, as follows:-

"We have just had two solid days of dust and everything looks like it. On Tuesday it was like a London fog and we had to burn lights all day. The inside of the school is like a ploughed field. Russian thistles were piled up around the girls' entrance, but to such a height that the Head Matron could not see out of her window, and they are hanging on everything outside."

I took this matter up with Mr. Indian Agent Gooderham when I visited this school at the time of the official opening Feb. 17th., and have since written to him very fully recommending strongly that the "Peace patent metal weatherstrip" be supplied. Before making this recommendation I consulted contractors who have already built schools for your Department, also Mr. Inspector Bunn, and Resident Architect H. E. Matthews, Chief Architect's Branch, Public Works of the Dominion Government in this city, and all were of the opinion that no better weatherstrip is on the market. The Manager, Mr. H. J. Dennis, 285 Stradbroke Avenue, Winnipeg, submitted samples and estimates, and these were forwarded to Mr. Indian Agent Gooderham. As the health of the staff and pupils and the efficient management of the school will be influenced by this improvement, I beg to request that it receive your prompt and favourable consideration.

Mr. J. M.

(5) Provision for watering stock on the pasture land.

There are about 800 acres of pasture land without any water supply whatever except in the well which was put down in the basement of the old mission house about half a mile away from the school. The Principal suggests that a windmill and trough might be installed at this well for watering purposes, and I commend this suggestion to your sympathetic consideration. I would also commend to your sympathetic consideration the question of having the land attached to the school connected up with the irrigation system which I was informed is to be brought to the town of Gleichen. The Principal was of the opinion that this connection could be made without an exorbitant expenditure, and I beg to recommend that you ask Mr. Indian Agent Gooderham to take up the matter and furnish you with further detailed information.

The question of meeting the cost of light and power at this school is giving our Commission a great deal of anxiety at present. At the time of my visit to the school last February I was informed that an expert from the Calgary Power Company was about to visit the school and I awaited a report on his finding before taking the matter up with you. In a letter, dated March 16th., the Principal states that this expert visited the school, but could not see much possibility of a reduction in the cost of the power consumed, as the equipment installed required the full capacity of power to operate it. He states that the cost of power alone will be between \$50.00 and \$60.00 per month the year around.

With regard to the cost of light, he states that the only possible way of effecting a reduction would be by substituting bulbs of smaller wattage for those already in use. In a number of the rooms this could not be done without injury to the eyesight of the staff and pupils, but that smaller bulbs might be used in the dormitories. The chief consumption of light, the Principal states, is in the basement and in the corridors which are so dark that some of the lights must be kept going all day. The bills for December (only half the month full operation) amounted to \$100.80; for January \$115.30; for February \$102.70 (figures quoted from the Principal's letter). He estimates that the cost of light and power for the year will not be less than \$1,780.00, with an additional sum of \$50.00 for new bulbs, fuses, etc.

Regret
it is the practice
to ask School
management
to pay for electricity

- 4 -

In the light of these figures you will understand the anxiety of our Commission as to how so heavy an expenditure is to be met with the present pupilage, and at the present rate of the per capita grant of only \$165.00 a year. I took this matter up with Mr. Indian Agent Gooderham at the time of my visit, and informed him that our Commission would be obliged to ask for some help in meeting this heavy expenditure.

I shall be obliged, therefore, if you will give this matter careful consideration and arrange to provide the additional financial help required in any way within your power.

Your obedient servant,

L. R. Neill

under

Ottawa, March 26, 1931.

Rev. Sir:

I have your letter of the 19th instant, regarding the list of buildings, equipment, etc., furnished you by the Principal of the Old Sun Indian Residential School.

Relative to the erection of a poultry house and piggery, I have to say that the Department has no funds at present to provide the cost of these buildings. We are not prepared to supply an electric ironer, and an electric scrubber and floor polisher are not supplied.

Regarding the question of meeting the cost of light and power, I have to regret that the Department will be unable to provide for this expense. It is the practice to ask the school management to pay for electricity from per capita earnings or other receipts. Our funds for the next fiscal year will be extremely limited, and I regret that only the more urgent buildings, equipment, etc., can be favourably considered.

You will be written in separate communications regarding the farm waggon; the supplying of weatherstrip; the installing of a windmill and trough for watering purposes and the question of having the school land connected up with the irrigation system in the town of Gleichen.

Your obedient servant,

A. F. Mackenzie

Ottawa, April 25, 1931.

Sir:

Dr. Westgate, of the M. S. C. C., writes that dust is getting into the Old Sun Indian Residential School, and he strongly recommends that "Peace Patent" metal weather strip be supplied for the windows. On the 23rd instant, he telegraphed: "Principal reports machinery is giving trouble and is being damaged and that the staff and pupils complain of chest pains." The Department is informed that you have an estimate of the cost of doing this work, and I should be pleased if you would forward this to Ottawa, with your recommendation. I may say that only really urgent improvements can be effected this year, as the Appropriation is very limited.

Your obedient servant,

A. F. MacKenzie

COPY OFF LETTER.

B.12.

Gleichen, Alta.

March 3, 1931.

Attention Mr. R. G. Orr.

RE: Old Sun School windows and doors.

Dear Sir:-

I attach hereto copies of letters from Dr. Westgate and the Manager of the Peace Weatherstrip Company of Winnipeg. Considerable time and thought has been given to find a remedy for the loose and shrunken condition of the windows and doors. Various schemes were suggested by local contractors but nothing appeared to be entirely satisfactory.

After the school opening, Dr. Westgate kindly offered to get data in Winnipeg and his letter is the result. Where windows have shrunken, a strip of wood will be necessary as well as the weather strip, I believe. This is mentioned because the "Peace" people may not realize this. It was ascertained in Calgary that it is almost impossible to get windows of wooden construction which will not shrink and become loose in this dry climate. This is certainly evident at Old Sun School as most parting rail windows are loose in every direction and casement windows have shrunken and even warped to the extent that they are far from weather proof.

There is a heavy dust storm today and I believe the standard groove "Peace" strip is the only thing that will keep most of the dust out of the building. On such a day the school is a terrible mess. Something must be done and it is presumed that you are familiar with this weatherstrip. The Principal advises me that the Company asked for measurements of all windows and doors and have been given the information.

Awaiting your instructions.

Your obedient servant,

The Secretary,
Dept. of Indian Affairs,
Ottawa, Ont.

G. W. Gooderham
Indian Agent.

COPY OF LETTER.

Winnipeg Man.

Feb 24th. 1931.

Dear Mr. Gooderham:-

Since returning to Winnipeg I have gone carefully into the matter of the best kind of weatherstrip to make the new Old Sun School dust-proof, and strongly recommend the "Peace" weatherstrip, samples of which I am forwarding to you by parcel post today. Enclosed herewith you will find the original of a letter from the Manager of the Peace Weatherstrip Company and a copy of the same, giving the price per foot of the different kinds of weatherstrip for windows, french windows and doors. The "Peace" weatherstrip double brass groove is dearer than the other kinds, but it is undoubtedly the best for the windows. You will note that there is a weatherstrip meeting rail to close up the space where the upper and lower sashes meet. This seems to me to be very important. I may state for your information that I have consulted Mr. Clayton of the Clayton Co Ltd. who built our Elora school, and Mr. Matthews, Chief architect of the Dominion Govt. in this City and all three men spoke in the highest terms of the "Peace" weatherstrip and of Mr. W. J. Dennis, the Manager of this Company. I have, therefore, the fullest confidence in recommending that the "peace" weatherstrip be utilized in making the Old Sun School dustproof. There are other kinds of weatherstrip but they will not be so effectual. I shall be glad to be advised in due course of the decision which you and your Department may reach in this important matter.

I have not forgotten the question of the terrazo floors but so far have been unable to locate the firm that installed them. I asked Mr. Inspector Bunn to help me in this matter but he had no information on record.

Best wishes,
Yours very truly,

T. B. R. Westgate, D.D.

RE: Old Sun School, Blackfoot Reserve.

As requested we are sending you under separate cover samples of "Peace" weather strip which we trust will be satisfactory.

We wish also to submit the following net prices for the strip installed complete in the above mentioned building. The order to be for not less than three thousand five hundred feet and any number of feet over that amount to be paid for at the same rate per foot.

"PEACE" weather strip - standard groove		17¢ per foot
" " " Single brass groove		30¢ "
" " " Double brass groove		33¢ "
" " " Meeting rail (two members)		17¢ "
" " " Doors & casements		17¢ "
" " " Door bottom with complete door		17¢ "
" " " Door bottom only.....		\$1.00 per door.

Trusting these samples and prices will meet with your approval and awaiting your esteemed order,

We are yours sincerely,

"PEACE" weatherstrip

OFFICE OF
INDIAN AGENT

Gleichen, Alta.

April 29th, 1931.

Dear Sir:-

Answering yours of the 25th. inst. re Old Sun School and Weather strip for the windows, I cannot understand why you have not received my letter of March 3rd. in regard to the condition of the windows. I am attaching hereto a complete copy of all correspondence forwarded at that time.

Something must be done but I am not sufficiently conversant with this type of construction to give any recommendation. I do know that there is 3/8" to 1/4" play in practically all the windows and during the past month, when the district experienced the worst dust storms ever seen in these parts, it was nearly impossible to live in the building. Pupils were put to bed with chest pains and it is reasonable to assume that the fine dust was the cause. Today the principal and a mechanic are taking the extractor to pieces and cleaning out the dust. This machine was so clogged with dust that it didn't work. I mention these things to show the urgency of necessary improvements and hope that something will be done to the windows at an early date.

*Mr. D. J. ...
What do you think?*

Ottawa, May 5, 1931.

Sir:

I have your B.12 of the 29th ultimo, with enclosures, concerning the advisability of having weather strip placed on the windows and doors at the Old Sun's Indian Residential School. As our funds are so low at the present time, the Department is unable to authorize any expenditure for this purpose. I am informed that the dust storms this year have been particularly extreme all over the West, and it is probable that this improvement would not be so urgently required in future.

The Secretary
Department of Indian Affairs
Ottawa

Re - the new Old Sun's School, Gleichen

Sir:- Replying to your letter of the 7th inst. with regard to looseness of windows at the above school I would say that at the time they were installed they were fitted as tightly as would allow of their working at all. Any looseness now existing can only be the result of the inevitable shrinkage of winter construction followed by the extreme dry weather of summer.

I am inclined to think that the conditions have been somewhat exaggerated, but when next in Calgary I shall go on to Gleichen and check over the building, especially the windows, and shall then report back to the Department.

I have the honour to be, Sir,
Your obedient servant

E. Gardner-Smith
Inspector of Construction

104-1-5
- 3 -
R
JUN 1951
OLD SUN'S C. of E. INDIAN RESIDENTIAL SCHOOL.

As this school has just recently been opened, there is very little that I can report upon. At the time of my visit there were 72 children in residence. There is practically an entirely new staff at this institution. The Rev. J. W. House, is in charge as Principal, and the staff consists of 10 - 7 women and 3 men, including the Principal. From my observations of Mr. House and the staff, I would say that there is quite an improvement here. The Principal is energetic and active, and appears to have some force behind him. Naturally, a man of this type would demand a better staff, and I would say, from the Department's point of view, that this part, which is an important one, is quite satisfactory.

There is a tremendous lot of work to be done around the premises in the way of cleaning up, re-arranging the grounds, and getting them in shape, and a good start has certainly been made.

The farming operations are very discouraging as the top soil on their farm land, consisting of approximately 300 acres, had practically all blown away. This land is comparatively light, and it is absolutely useless to try to farm it under present conditions. One hundred acres have been sown to coarse grain, and 40 acres to grass. It is the intention of the Agent and Principal to seed all this land to grass and coarse grain. Feed is going to be a valuable asset in this part of the country, and hay would be of just as much value to the school as grain. The Agent had already suggested to the Principal that he break up 100 acres of prairie land, which is

available

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 7)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

OLD SUN C. of E. INDIAN RESIDENTIAL SCHOOL (CONT'D.)

available in the valley towards the river from the school. I think this would be a good idea as no doubt there is more moisture there and less wind. This land could be used for the purpose of sowing wheat, oats, etc. The Principal, however, did not know whether he would have time to break up this land this summer or not. As an old irrigation ditch runs around this land, if surplus water comes down through the C.P.R. spillway, they might be able to irrigate this part at very little cost. The matter is being looked into by the Agent.

The school has a very good herd of milk cows, 12 in number, mostly holsteins, 10 of which were milking, so the children are getting an ample supply of milk. They have approximately 25 head of cattle altogether, and 11 good horses. The Principal brought to my attention the fact that he needs a holstein bull as the one he has should be destroyed as he has become quite vicious. It occurred to me that Dr. Murray had a 4 yr. old bull which we purchased from the C.P.R. Farm at Strathmore, and for which he has no further use. I advised Mr. House to see this bull, and told him that the Department might be willing to turn it over to him. If he decides that this animal would be suitable, a request will no doubt be made by the Agent.

Pigs and chickens are also kept at the school. The boys do the milking in the winter, and the girls in the summer.

The school building, as you are aware, is new; it was only opened in February of this year. They are experiencing a great deal of difficulty in connection with the windows. They have shrunk until there is a space of about

OLD SUN C. of E. INDIAN RESIDENTIAL SCHOOL (CONT'D.)

about one-eighth of an inch between the outside of the window and the casing. The dust that has been blowing in is terrible; although they still had all the storm windows on, there was dust all through the building. It was being cleaned up all the time, but there was so much of it coming in that it was impossible to keep it clean. The Agent has taken up with the Department the matter of tightening the windows, but nothing definite had been decided upon. I wish to point out that something should be done to remedy this condition as, when winter comes, if the windows are not tightened up in some way, there will be sufficient cold air coming in to make the school impossible to live in.

I have the honour to be,

Sir,

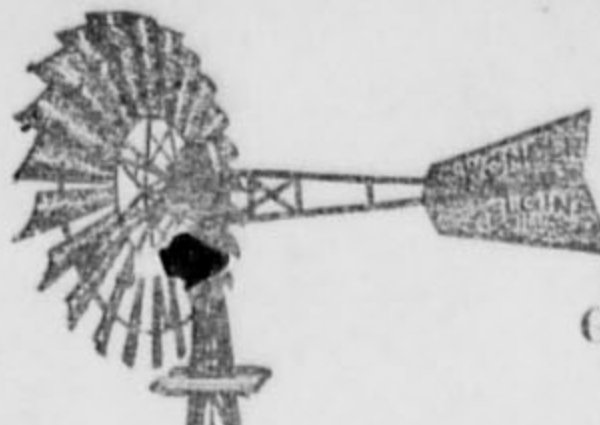

Your obedient servant,

M. Christianson

RE: Voucher #101.

Dear Sir:-

Some of the plaster around the windows at Old Sun School was badly cracked and while Sutherland the plasterer was finishing his work at the Hospital Mr. Scott asked him to do what was necessary at Old Sun's. So far, no further cracks have been noticed in the plaster. The account was paid by Mr. Scott some time ago and I would ask that this amount be refunded to him.

MAKE
YOUR
HOUSEWORK
LIGHTER

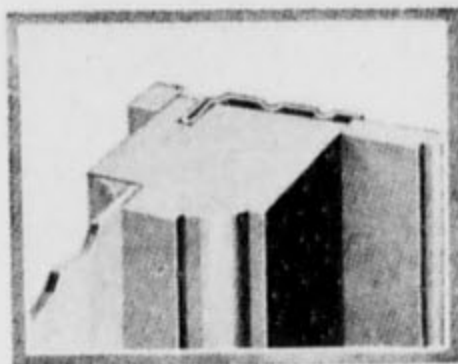

With Chamberlin protected windows and doors you can use **all** of each room. There are no cold spots. You are not driven from the bright cheerful window by chill draughts. The health of children is protected from dangerous colds.

The **whole** of each room is easily kept at an even, comfortable temperature at a saving of fuel of at least one fifth—often more. And Chamberlin Metal Weather Strips on your windows and doors keep out dirt and dust as well as cold air. Your house is easier to keep clean. Curtains actually wear longer and your upholstered furniture keeps its freshness.

Chamberlin Metal Weather Strips are year-round protection from cold and dirt. They stop rattling windows by making them tight; at the same time windows slide easier on the **Chamberlin** tracklike **corrugations**.

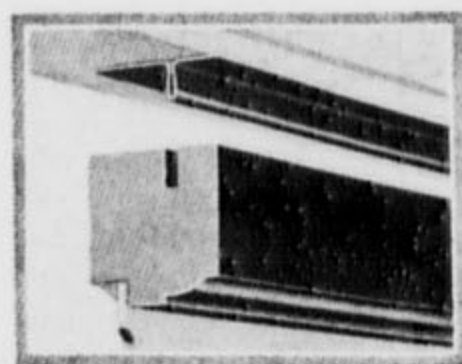

LIKE A METAL SHIELD BETWEEN YOU AND DIRT LADEN DRAUGHTS

The Chamberlin tongue and groove make a 90° air tight joint for the sides of sliding windows absolutely stopping rattling side play. (Fig. 1)

Tender for Weatherstrip on Old Sun School. Gleichen.

Dear Sir,

Hereunder I beg to quote you to install Chamberlin Metal Weatherstrip on All Windows and all outside Doors (excepting those which have Vestibule) being a total of 240 Windows and 9 Doors;

All material to be of the best quality Chamberlin, using Chamberlin interlocking Zinc equipment on all Check Rail Windows, Chamberlin Hemmed Bronze on Heads and Sides of Casement Windows, and Chamberlin Cast Aluminum Casement Channel (3 member, as Fig; 4 on attached Folder). Price to include refitting all Windows both C.R. and Casements, and to Calk all possible leaks in frames etc. All work to be done by Chamberlin Mechanics and guaranteed. Material to carry the usual Chamberlin Guarantee, and Installation will be serviced by the Chamberlin Calgary Office;- for the Sum of-

Eight Hundred and Ninety Five Dollars \$895.00-----

If desired, the Casement Channel may be substituted by ordinary Zinc and Bronze combination, on Sills. This would reduce above figure by \$65.00, but recommend that Channel be used.

Respectfully submitted

Stanley Ford

Dear Sir.

I am obliged by your promptness in sending Plans of Old Sun School Gleichen. I am sorry that The Plans for the Hospital are not complete, therefore I am not able to send you figure on this just now.

Mr Gooderham has promised to get a complete set up to me shortly and I shall then submit figure. I enclose alternate Tenders on School and have kept my price down as low as possible and yet be able to spend time enough for a good job. You may rest assured that everything possible will be done to insure a Dust proof ~~Mr~~ and a Coldproof Job.

May I be pardoned if I tell you that Mr Walter Douglas of Smith Bros and Wilson, stated last week to the Plumbing Supt, that The Weatherstrip installation on The New Post Office Bldg, was the best he had yet seen, and I am prepared to guarantee just as good a job on the Old Sun School. Thanking you for your kindly interest

Yours truly.

Stanley Ford

P.S. What do you wish done with the plans?

The Secretary.
Department of Indian Affairs.
OTTAWA.

St. Paul, Alta. June 15, 1931.

Re- Windows at Old Suns School, Gleichen, Alta.

Sir:

No. 104-1-5.

In reply to your letter of May 7th regarding reported looseness of windows in the above school, I may say that on the 5th instant I visited this school, as instructed, and made a careful inspection. I was accompanied by the Indian Agent, Mr. Gooderham, and by the Rev. Principal, Mr. House.

There has been very little, if any, more than normal shrinkage in these windows. It is impossible to fit windows so tightly under winter-time construction that when they become exposed to the extreme heat and dryness of southern Alberta's summer climate a certain looseness will not develop. At the time these windows were fitted, the painters complained that it was almost impossible to raise them. However, regardless of the cause, it must be admitted that a considerable shrinkage has taken place, with very trying consequences to the inmates of the building, as I shall try to point out.

It may be recalled that in my regular reports sent to the Department during the construction of this school, I made ~~frequent~~ references to the frequent and almost overpowering dust storms driven over the school site by the strong prevailing west winds. So bad was this condition at times that it seriously interfered with the progress of the work, and the workmen had to be supplied with fur-lined aviator's goggles to enable them to carry on. As the building approached completion it was found that even then, with absolutely tight windows, the fine smoke-like dust penetrated to some extent, to the great chagrin of the plasterers and painters.

Since the completion and occupancy of the school the conditions have grown worse. The windows have inevitably become somewhat looser, and raging west winds have forced dust into the building to an almost unbelievable extent. To appreciate fully the conditions it may be well to point out that Old Suns School finds itself in the very path of a dust blizzard every time the prevailing west wind blows, during dry weather; and as the late seasons have been unusually dry, with abnormally frequent and high winds, this condition has been the rule rather than the exception. To make matters still worse, there is a large field of summer fallow S.W. of the school where it has been the intention to get a catch of hay, but owing to

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 7)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

2.

successive dry seasons this has been found impossible, and the necessary working of the land to keep down weeds, has had the result of providing a never failing dust reservoir for the winds to draw upon. Apart from this, the lightness of the soil in the locality is such that this particular location will always be subject to more than the usual amount of dust. Even the added protection of storm-windows is not sufficient to prevent dust penetration, and additional special protection seems called for.

Previous to visiting the school I took some pains to investigate what was being done elsewhere to exclude dust. I found that in the Calgary schools it had been found necessary to provide the windows with additional protection, and that the school architect, after investigating the various weather strips on the market, has had 21 schools equipped with Chamberlin Metal Weather Strips. The new Post Office building now being completed in Calgary is being similarly equipped with Chamberlin window protection; also Lethbridge schools.

After consulting with the Indian Agent and Rev. Principal, I 'phoned ~~to~~ ~~Mr.~~ to Mr. Stanley Ford, the Calgary representative of the Chamberlin line, and he came to the school for the purpose of seeing for himself the existing conditions, and to prepare an estimate for installing the Chamberlin protection on the windows and doors of Old Suns School. Mr. Ford was asked to submit alternative tenders, one for equipping all the windows and outside doors; and one for equipping part only, the idea in the latter case to give protection where the access of dust is the worst, with a view to the rest being done later. It will be noted that for complete protection the quotation is \$895.00; and for partial protection where the conditions are the worst, the quotation is \$545.00, the expectation being that the cost of the complete protection might be deferred to another year, if necessary. Now that the maximum shrinkage has taken place, I should prefer seeing the complete job done while the workmen are there, if the necessary funds are available, and if the Chamberlin proposals meet with the Department's endorsement.

I enclose correspondence and tenders on the Chamberlin line submitted by Mr. Ford for the consideration of the Department. The quotations are slightly less than I expected (a most unusual event) and I believe that the proposed protection would prove efficacious in removing what is at times an almost unbearable condition, or at any rate in very greatly ameliorating it. Mr. Ford will guarantee the Chamberlin protection to keep out 90% of the dust. There are other lines of window strips on the market, but I do not care to recommend costly experiments.

Should the Department sanction proceeding with this proposed installation, the Rev. Principal would like the work to be done during the approaching school vacation.

I have the honour to be, Sir,

Your obedient servant
E. Gardner Smith

DEPARTMENT OF INDIAN AFFAIRS
CANADA

July 6, 1931.

Memorandum:

OK
DR. SCOTT
DR. SCOTT.

There has been considerable correspondence concerning dust getting in through the windows and doors at the Old Sun Indian Residential School. The southern Alberta climate is dry and hot and perhaps there is a bit more shrinkage than usual. It also appears that the Old Sun School is in a particularly dusty section.

Dr. Westgate is urging weather stripping for the windows and doors. Mr. Gardner Smith, at the request of the Department, made an inspection and he believes it advisable to improve conditions at this school. Mr. Stanley Ford, of Calgary, who is favourably mentioned in your memorandum of the 26th ultimo, has quoted \$895 for a complete job and \$545 for weather stripping for the most exposed parts of the building.

No funds were provided for this purpose and the Miscellaneous item in the Indian Education Vote has but \$3,000 unassigned. What are your instructions?

Russell Brier

Supt. of Indian Education.

284 Stradbrook Ave.,

Winnipeg, July 2, 1961.

The Secretary,

Department of Indian Affairs

Ottawa, Ont.,

Dear Sir,

Re Old Sun School, Gleichen Alta.

On Feb. 2, we wrote Dr. Westgate of this city with reference to weather strip for the above building. At that time we quoted him a price per foot, installed. The price per foot now is one cent lower than at that time. Since then, we have received a complete list of all sizes of windows and outside doors that require to be weather stripped and we can now quote you a straight price for doing the complete job.

We understand you have already received samples of our weather strip through your agent at Gleichen, and we would be pleased to submit the following prices for the whole job complete.

"PEACE" Weather Strip, Standard Groove, in all sliding windows; spring brass in all outside doors and casements. \$838.00.
windows,----- Seven Hundred and Fifty Dollars, (\$750.00).

Should you decide to use single spring brass in the groove of the sliding windows, the price then would be Eight Hundred and Thirty-eight Dollars, (\$838.00), installed complete.

The single spring brass ~~strip~~ ^{groove} is the strip we would recommend for your building. Where the dust is very bad, it needs a strip with an absolute point of contact to keep it out, and this is the strip for that purpose.

Awaiting your pleasure, we are,

Yours truly,

Peace Metal Weather Strip

July 6th, 1931.

Mr. W. M. Graham,
Indian Commissioner,
Regina.

Dear Mr. Graham,

I wonder if you can help me to get some paint for the school right away. As you may remember all our walls are bare plaster and the play-rooms, lavatories and toilets are in an awful condition because every mark will show in spite of all our efforts to get them off.

During the holidays, I would like to get those rooms, at least, properly painted. Both Mr. Gooderham and Mr. Christianson agreed that I should do these together with various other little jobs around the building, but there is a week of the holidays over and no word of authority to go ahead.

I know that the present retrenchment on the part of Government is making things very difficult, and I expect this is why everything is so badly held up. If, however, I could get just a little, so that we might do the most necessary parts, it would help considerably.

I originally asked for \$100 for paint for this year, and I need all of that, but I can wait for half of it until after the holidays, if it is necessary. Unfortunately I cannot hope for much success in painting such things as lavatories and playrooms after the children get back, that is why I am in such a desperate hurry to ~~get~~ be getting on with it.

I think everything is going tolerably well at the school but it isn't by any means what I want it to be yet.

With kindest regards,
Yours very sincerely,

Sgd. John W. House, Principal

B.12

Dear Sir:-

On a recent visit to Old Sun School by Mr. Inspector Christianson, the matter of doing some painting in the basement as well as painting the fences newly erected was taken up. If the Department will purchase the material the Principal will look after the labour. It is estimated that the material would not cost more than \$100.00.

The Principal would like to have the work done while the children are out on holidays and it would be appreciated if authority were granted at an early date.

Your obedient servant,

Sgd. G. H. Gooderham,

COPY OF LETTER

Old Sun School,
August 10th 1931.

G.H. Gooderham Esq.
Indian Agent,
Gleichen, Alta.

Dear Sir:-

After the experience of last Monday's dust storm, I am of the opinion that we made a mistake in not including the Main entrance doors of this school in our estimate for weatherstrip.

These doors, having vestibules, were not considered necessary at the time, so were omitted, as you will note by referring to your office copy. We are now convinced that they should have been included. I would also like to state that the plans did not indicate how the transom windows over the fire-escape doors and chapel windows were set in place. These are all movable instead of being fixed as is usually the case in buildings of this type.

40
50
These transoms and entrance doors should most certainly be weatherstripped and I beg to quote you the sum of Forty Dollars (\$40.00) for this extra work.

I have also been asked by Mr. House to quote you to equip the Engineer's house, and beg to say that it would cost for all outside windows and doors, the sum of Fifty Dollars (\$50.00) not including basement windows.

Respectfully submitted,

Signed: Stanley Ford.

August 13, 1931.

Dear Sir:-

Under authority of your letter of July 8th. last, Mr Stanley Ford of Calgary has proceeded with the work of installing Chamberlin weatherstrip on windows and certain doors of the Old Sun School. It would appear that Mr. Ford's tender did not include certain moveable transoms and entrance doors and the Principal is very anxious to have these weatherstripped.

He also makes a request to have the Farm Instructor's house equipped with weatherstripping. The windows are very loose and something must be done to make them more weather proof.

I submit herewith a copy of Mr. Ford's letter giving quotations on this work. Please advise at an early date if authority to have this extra work done will be granted.

The Secretary,

DEPT. OF INDIAN AFFAIRS
OCT 20 1931

Office of the Indian Commissioner ~~Blackfoot Agency~~

October 17th, 1931.

Sir,

I enclose herewith Vouchers Nos. 297
from the Blackfoot Agency,

amounting to \$50.64 in favour

of McKay Hardware Co., Gleichen, Alta.,

for paint for Old Sun School.

This expenditure was authorized by Departmental

Letter No. 104-1-5 dated 22nd July, 1931.

Your obedient servant,

W. M. Graham

Indian Commissioner.

The Secretary,
Department of Indian Affairs,
Ottawa.

Oct 31 1931
Re Kools
Sir:-

The main double doors on either end of the large barn at Old Sun School are in very bad condition. They are pannelled with glass in the top and the pannells have broken until they are beyond repair.

The Principal has tried to repair them; now new doors are required. Double doors made of V joint and boards, without any glass will be stronger. There will be about 500' material and to make them properly the total cost would be close to fifty dollars (\$50.00).

OK
AM
Is the Department prepared to pay for new doors?. They are certainly needed.

Your obedient servant,

G.H. Gooderham
G.H. Gooderham.

Ottawa, November 3, 1931.

Sir:

I have your letter of the 27th ultimo, regarding the main double doors at each end of the large barn at the Old Sun Indian Residential School, which you state are in very bad condition and beyond repair.

In reply I have to say that the Department will approve of an expenditure not exceeding approximately \$50 in having new doors supplied. The Department agrees with you that the doors should be made of V joint and boards, without being panelled with glass at the top. After the doors have been supplied, you should forward an account, in duplicate, properly certified, covering the expenditure incurred.

Your obedient servant,

A. F. MacKenzie,
Secretary.

December 27th 1931

COPY OF LETTER

Dept. of Indian Affairs,
Blackfoot Reserve,
Gleichen, Alta.

Dear Sir:-

Report on explosion of hot water Service Heating
Eliment, Old Sun School.
In compliance with your request, I have investigated the explosion
examined the exploded eliment, upon which I submit to you the
following report:-

The heating ~~which~~ eliment which exploded consisted of a Pease
Boiler constructed of cast iron for the purpose of low pressure
(not over 10 lbs) heating, such heating applies to radiators etc.
This type of boiler was not intended for the purpose of a hot
water service heater, in as much that it was designed for not
over 10 lbs. whereas all hot water services require at least 40 lb
in the installation referred to a pressure of 60 lbs. is required.

I examined and tested the safety valve which operated satisfactory
at 63 lbs pressure.

I examined the parts of the eliment broken by the explosion and
found the casting very irregular varying in thickness from 1/2 in
to 5/16" the cast iron stays in head not bonded to the inside
casing, this being the weakest part of the eliment.

I find the explosion was not due to neglect in attendance but due
to the heating eliment not being of proper strength to withstand
the pressure of the system.

I would suggest that it was very fortunate the explosion occurred
during the night, in as much the exploded eliment is located
in the boiler room near a much used corridor during the day, in
which was emptied the contents of the boiling water of some 500
gallons from the storage tank.

I would recommend a steel heater be installed having an ample
number of hand holes to facilitate the cleaning out. Such heaters
have a much longer life than a cast iron heater and use less fuel.

Also have the safety valve placed direct on the heater not in a
remote position as at present.

I am yours very truly

(Signed) A. W. Dick

OFFICE OF
INDIAN AGENT

Gleichen, Alta.

December 28th 1931.

Dear Sir:-

The hot water service heating element at Old Sun School was broken by an explosion during the early hours of December 13th. Fortunately, no one was near when the explosion took place. The Principal reported the matter later on in the day and it was decided to call in the boiler Inspector for the Province of Alberta and have him examine and report. He made his inspection on the 14th and a copy of his report is submitted herewith.

There is nothing further to be said, except of course, that this institution must have a replacement as early as possible.

Awaiting your instructions.

Your obedient servant,

Indian Agent.

The Secretary,
Dept. of Indian Affairs,
Ottawa, Ont.

Ottawa, January 4, 1932.

Sir:

I have your letter of the 28th ultimo, enclosing copy of the report of the Provincial Inspector of Boilers on the explosion of the hot water service heating element in the Old Sun Indian Residential School. It is noted that the Inspector did not find the explosion due to neglect in attendance but owing to the heating element not being of proper strength to stand the pressure of the system.

Alman
J. R. L. MacInnes

As it is necessary that replacement be made, I have to say that you may arrange for the purchase and installation of a steel heater having an ample number of hand holes to facilitate the cleaning out. Proper safety appliances should be installed on both heater and storage tank, and the installation inspected by the Provincial Boiler Inspector before the heater is used. You have not stated the cost of supplying and installing the new heater. I have to request that you will see that the total cost of this work is kept down to the lowest possible point. After same has been satisfactorily installed, you should forward accounts, in duplicate, properly certified, covering the cost.

Your obedient servant,

T. R. L. MacInnes
T. R. L. MacInnes,

RE: Voucher #485.

Dear Sir:-

Items of the months of August & September were created when the main pumping plant failed to work and no water was available for the institution. Immediate action was necessary and trouble located in the valves. In November it was necessary to replace taps on may basins. The type supplied at installation were very poor and the wastage of water was excessive.

It is regretted that the account covers such a long period. Mr. Michael has been advised many times to submit accounts promptly at the end of each month. This office cannot keep everything in mind over a period of months.

RE: Voucher #510

Dear Sir:-

Owing to the frothing created in making steam by the water in use at Old Sun School, it is necessary to empty the system at frequent intervals. The pump originally installed was too small and it took about two days to do this work, but with the pump purchased from F.H. Lepper, the system can be emptied in about three hours. The work of installing was done when F.H. Lepper Company were putting in a new boiler to replace the one which burst some time ago.

COPY OF LETTER.

Old Sun School
Gleichen, Feb. 24/1932

Mr. G. H. Gooderham
Indian Agent,
Gleichen.

Dear Sir:-

The Department by their circular 1-1-5 dated February 5th. lay down a rule that all fire escape doors and the approaches to them must be left unsealed. Our Commission have the same rule.

None of us doubt the wisdom of such a regulation but there are certain difficulties accompanying the carrying out of it that, in this school, are of a serious nature.

We have already had an attempt by an outside Indian to gain admission to the Senior Girls' dormitory and have had our store room entered with intention to steal.

Our fire escape doors enter rooms as follows: Two open directly into the Junior dormitories on the top floor. On the Senior floor, the girls escape goes through a Staff bedroom and out to the stair. On the boys' side, the escape is opening from what we call our "bale room". It is a store room for all our clothing, bedding etc. In order to have this escape open we have to leave one door open to the boys inside, and another to the outside Indians. We have no other room we can change into a bale room, so we cannot avoid this. On the main floor one escape goes through the Matron's bedroom and the other through the boys' club room.

Now as these rooms are in such places that they cannot be continually under supervision, we shall have to have some means of knowing when the fire escape doors and that to the bale room are opened. I have investigated the ways of doing this and think that a burglar proof system should be installed, such as was explained to us by Mr. Cole. The cost of this would be approximately \$100.00.

Would you please take this up with the Department at your earliest convenience.

Yours very sincerely,

SIGNED: John W. House
Principal.

OFFICE OF
INDIAN AGENT

Gleichen, Alta.

February 27th. 1932.

Dear Sir:-

I attach hereto a letter from the Principal of Old Sun Residential School relative to Fire Escapes and Protection.

Fire escapes at this institution are situated so that access to private quarters and to store rooms is unavoidable. It is not reasonable to expect doors leading in or out of these rooms to be left unlocked. The suggested burglar alarm system will solve the problem and will be further protection against illicit entry into dormitories.

The cost is based on wholesale prices submitted by the Canadian General Electric Company of Calgary plus cost of installation. If the Department has funds to instal such a system in this school, I believe the expenditure is justified. Your reply will be awaited with interest.

100
system needs
too expensive. Why
not locks on doors, that
can be opened from inside
only

The Secretary
Dept. of Indian Affairs,
Ottawa, Ont.

E.A.M.

Ottawa, March 2, 1932.

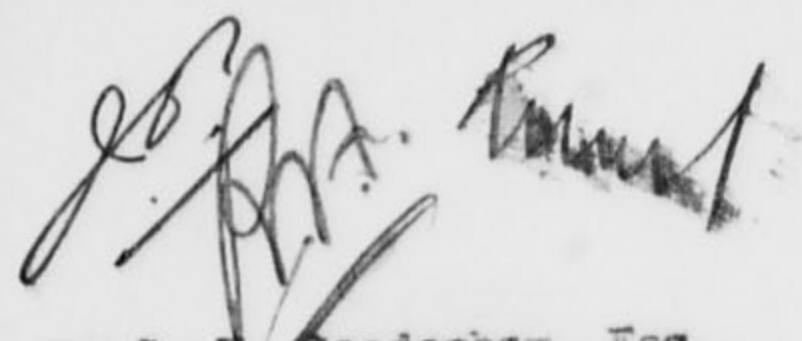

Sir:

I have your letter of the 22nd instant, enclosing copy of a communication which you received from the Principal of the Old Sun Indian Residential School regarding the installing of a burglar proof system on the doors leading to the fire escapes.

In reply I have to say that it is considered the system suggested by the Principal is too expensive. Where it is necessary to have the exits leading to the fire escapes locked from the outside, it is thought that a suitable door lock could be installed - one where the outside door lock refuses to turn the lock and the inside one opens freely. There are comparatively inexpensive sets of this kind on the market - for example, a lock of the Yale type. It is thought this would be less expensive and just as suitable as an electric alarm bell. Could not a lock of this type be installed, which would prevent access to the school by way of the fire escapes? The school authorities should be able to arrange that the pupils would not leave the school by the fire escapes, except in case of fire or during fire drill.

Your obedient servant,

T. R. L. MacInnes,
Acting Secretary.

Old Sun School,
Gleichen.
Mar. 10th. 1932.

Mr Gooderham,
Indian Agent,
Gleichen.

Dear Mr Gooderham,

In reference to our conversation re the possibility of some cheaper method of making our fire exits safe from the outside, I beg to state that in my opinion the only satisfactory protection is by the Alarm system outlined in my letter to you of the 24th. Ult.

As you know I am desirous of eliminating as much expence as possible these days, but where the safety and wellbeing of the children under my care are at stake it is not right to risk them for the sake of saving a few dollars. The suggestion of the Department, that locks which will only open from the inside of our fire escape doors, is not any more protection than the catches we have already installed, and has the disadvantage of being more complicated for little children. Any expence on an installation of that kind would be wasted.

The difficulty of the whole situation lies in this. Being right on the Reserve, with numbers of young men looking for something to do all around us, there is nothing to prevent one of my children being intimidated by them and getting up in the middle of the night and admitting as many as like to come. Once inside the whole school is open to them. The first thing I know I shall find some of my big girls pregnant and then the damage is done. It isn't fair to take a girl away from her parents and make her sleep in dormitories that are unsafe from outside or even our inside boys. To imagine that any school management can prevent such a thing happening when doors are at the mercy of ~~IND~~ Indian Children is absolutely unreasonable. I would not have one of my own girls in a school where such a condition existed and neither would any other father. Since we have already had evidence of the desire of outside boys to get into our girls even with locked doors, our fears are by no means groundless.

Then, on two floors the fire exits are through our store room and staff bedrooms. The latter are alright, but having to have both entrances of the Store room at the mercy of anyone is surely not businesslike. This cannot be altered, because I ~~am~~ have no other room available as a store room.

Now I think that unprotected doors in a school of this description, where everything is as fireproof as possible, is liable to result in more harm to the children than locked fire escapes. Our Fire protection and drill is fairly efficient, so that even with locked doors the chances of children being damaged, in case of fire, are very remote; but the possibility of immorality and theft are at a maximum, ^{with} unlocked doors that are not properly protected.

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

If the Department is not willing to spend \$166.00 in a system of protection which will be adequate, there is the alternative of withdrawing their ruling about locked fire escapes and leave that question to my own common sense. I would sooner that the doors were open, because it is better to be prepared when Childrens lives are at stake, but I have no doubt that we could get everyone out before fire did much damage here, under almost any condition. It seems as though there is no half way house in this question, it is a matter of either doing the thing properly or leaving it alone. The matter of saving a few dollars should not enter into the consideration when the price of saving, is either the lives or morality of Children.

Yours very sincerely

John W. House Principal.

March 11th. 1932.

Dear Sir:-

Answering yours of the 2nd, inst. in which you state that a burglar system to fire-escapes at Old Sun School is too expensive and suggest instead Yale type locks, I attach hereto a letter from the Principal of the school in which he clearly explains the situation.

The hook now used on the inside of the doors leading on to the escapes is quite as effective as a Yale lock and certainly much cheaper. Neither is of any value when a scheme has been arranged between pupils and outsiders to get in or out of the school. Inside doors cannot be fitted with either hook or lock if the regulations in connection with fire escapes are to be carried out.

Your obedient servant,

Indian Agent.

The Secretary,

RE: Voucher #56.

Dear Sir:-

The tar and gravel roof at Old Sun Residential school started leaking in two places and the plaster in the interior was being spoiled. Mr. Michael was called and repairs were made to the roof as well as to the down pipe.

The deep seated pump also quit operating. The staff at the school had not the necessary equipment to repair and Mr. Michael had to be called. Without the pump the institution got no water supply.

During the storm of the 20th to 25th April last when all power lines were down for days, temporary arrangements to supply water were made by fixing up the barn pump with a high speed gas engine which Mr. Michael secured. This was urgent.

Ottawa, May 31, 1932.

Sir:

I have your letter of the 25th instant, regarding the request of the Principal of the Old Sun Indian Residential School to incur an expenditure of approximately \$15 in the purchase of a ladder.

In reply I have to say that it is considered one of the members of the staff should be able to construct a ladder that would be suitable for the purpose for which it is required. There is, no doubt, material available at the school, and the work should not involve any difficulty. Our funds this year are so limited that it is necessary to curtail all expenditure. If the school authorities are unable to make the ladder, the Department would approve of an expenditure of approximately \$15 in the purchase of one, in which case you should forward an account, in triplicate, properly certified, covering the cost.

Sir:

I beg to submit the following report for the
month of May 1932.

x x x

SCHOOLS

At Old Sun's good gardens are planted, coarse
grain and grass crops seeded and fences repaired. Pasturage
of the school herd is good and plenty of water is available
from a dam which the Principal made in a coulee. The roof
of the school has been leaking in various places and one
drain is badly blocked. On inspection, it is found that
the contractors did not leave a good finished job. School
work is progressing favourably.

RE: Voucher No 230

Dear Sir:-

Attached Voucher #230 for repairs to sewer at Old Sun School, I beg to say that during the heavy rains early in the month of June, the cellar of the Principal's residence was flooded. The drain was examined and it was discovered that no ~~pipes~~ had been laid to connect with the sewer. Mr. Michael was instructed to make the necessary connection. It was also necessary to make certain repairs to the pump when the water supply failed.

Your obedient servant,

Indian Agent.

The Secretary,
Dept. of Indian Affairs,
Ottawa, Ont.

Ottawa, November 2nd, 1932.

Sir,-

I beg to acknowledge the receipt of your Voucher No. 314, for \$34.84, covering the cost of repairs to barn pump at the Old Sun's Indian Residential School.

It is noted that you quote as authority for this expenditure "Estimates 1932-33". You should obtain specific authority from the Department before incurring any expenditure and not proceed with same simply because it was included in your estimates.

Is the pump which has recently been repaired the same as the one for which a charge of \$10.15 was included in your Voucher No. 230? It is also noted that the amount of \$34.84 includes 14 hours' labour at \$1.10 an hour. This appears rather high.

Consideration of payment of this account will be withheld until full explanations are received from you.

Your obedient servant,

A. F. MacKenzie.
Secretary.

OFFICE OF
INDIAN AGENT

Gleichen, Alta.

November 8, 1932.

Dear Sir:-

Answering yours of the 2nd. instant, with respect to Voucher No 314 in favour of L. Michael for repairs to the pump at Old Sun School barn, I beg to say that the Principal of the School reported that it was practically impossible to get sufficient water for the stock from the well as the pump was not working properly. This is a deep well pump so I called up L. Michael to report on the matter.

Michael with assistance from the school went ahead and had to do considerable work in his shop besides using his car to haul material from his shop to the job. Michael is a first class mechanic besides being a plumber and steam fitter and works very rapidly. In fact, there is no one in the district available who has the necessary tools to do this class of work.

I have interviewed Mr. Michael regarding his charges stating that I considered \$1.10 per hour rather high and he has consented to accept \$1.00 for future work. This wage is much less than that paid in Calgary for similar work and with the equipment available. The job was an emergency and fortunately was completed in the nick of time as a few days afterwards, the pump which supplies the water for the school broke down and the water supply was obtained from the barn well.

The item on Voucher #230 amounting to \$10.15 was for work done on the pump which supplies the school and not the barn well.

Your obedient servant,

Indian Agent.

The Secretary,
Dept. of Indian Affairs,

OFFICE OF
INDIAN AGENT

B.12.

Gleichen, Alta.

November 10, 1932.

Dear Sir:-

The septic system at the Farming Instructor's house at Old Sun School is not working properly. In fact, in the vicinity of this building, the soil is so saturated that the sewerage oozes out to the surface.

While Mr. Fetterley was taking levels for the proposed irrigation system, he took levels about this house and tells me that it will be necessary to dig a ditch at least 300 feet long and lay tile into a new field. This is necessary since the condition of this sewerage is, to say the least, a danger to the health of the people who occupy the house as well as to the pupils at the school.

The cost of the tile will amount to \$30.00, and as the work will be done by the school no further expenditure will be incurred. Is the Department prepared to authorize this expenditure?

Your obedient servant,

Indian Agent.

The Secretary,
Department of Indian Affairs,
Ottawa, Ont.

Indian Affairs. School Files.

Ottawa, November 22, 1932.

Sir:

I have your letter of the 10th instant, regarding the septic system at the farm instructor's residence at the Old Sun Indian Residential School. It is noted that the soil in the vicinity of this building is so saturated with sewage that it will be necessary to dig a ditch and lay tile into a new field, and that the cost of the tile will be approximately \$30.

In this connection I have to say that you may incur an expenditure not exceeding the above amount in the purchase of the tile required. The work in digging the new ditch, laying the tile and refilling the ditch is to be carried out by the school authorities without expense to the Department. After you have purchased the tile, you should forward an account, in triplicate, properly certified, covering the cost.

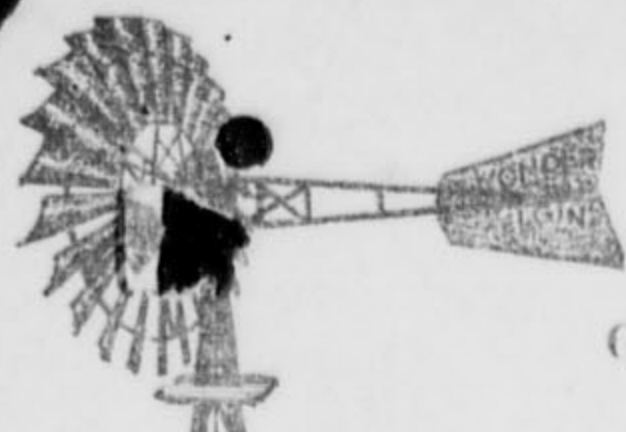

Your obedient servant,

A. F. MacKenzie,
Secretary.

DEPARTMENT OF INDIAN AFFAIRS - CANADA

Office of Indian Agent,
Gleichen, Alberta,
November 25th, 1932

B. 12

Dear Sir:

Re Voucher No. 367

I enclose herewith Voucher #367 in favour of L. Michael of Gleichen, for the sum of \$153.65 for repairs to the pumping plant at Old Sun Residential School.

As I reported to you previously, the deepseated pumping plant at this institution broke down on Sunday, October 2nd, and in a few hours no water was available for the school. I immediately secured the services of Mr. L. Michael and on inspection he found that the repairs would take some time to effect. In the meantime the school was carrying water in limited quantities, of course, from the barn well. A large sprocket wheel was broken and this had to be taken to Calgary and electrically welded because a new wheel could only be secured in the United States, and this would take at least one month. So far, the welding has held. It was also necessary to get a new silent chain as the one in use had stretched and could not be repaired.

I draw all this to your attention because the Department has not yet been advised, and recent letters and circulars emphatically state that emergency expenditures must be reported immediately. This pump has been a continual source of trouble. I believe it is required to lift too great a weight of water at each stroke as it is equipped with a 3½" pipe. The cause of the trouble has not yet been definitely ascertained. Fluctuations in voltage in the power line were suspected and the Calgary Power Company installed a volt meter to check this up. Whatever the cause, the pump had to be repaired as quickly as possible and Mr. Michael has done good work and his account is less than I expected.

I also attach Crane's account for material supplied and you will note that L. Michael has charged less than Crane. It will be appreciated if you will forward this voucher to Ottawa and return Michael's account with Crane. M. Christianson, Esq.,
Inspector of Indian Agencies,
CALGARY.

Your obedient servant,

"G.H. GOODERHAM"
Indian Agent.

Dear Sir:-

The hot water boiler at Old Sun Residential School has sprung a leak in two of the tubes and cannot be used. I have instructed Mr. Michael to give me a report on necessary repairs and he informs me that it may be necessary to purchase two new tubes in order to place the boiler in working order and the cost should not exceed \$25.00. I would therefore ask for authority to proceed with the repairs.

I may say that this boiler was installed about 8 months ago by the F.H. Lepper Co Ltd of Calgary and I wrote this Company explaining the matter and asked them if this trouble was due to faulty installation and if they would consider making the necessary repairs at no cost to the Department. They are not prepared to do this and they claim that the leak may be due to peculiarities in the water, probably lime, and that the deposit will increase very rapidly in another year or so. Under these circumstances, I did not think it necessary to call on this firm to come from Calgary to do the work when Mr. Michael is on the spot.

Your obedient servant,

Indian Agent.

OFFICE OF
INDIAN AGENT

Gleichen, Alta.
December 2, 1932.

Dear Sir:-

During the cold spell last month, a radiator in the verandah off the infirmary at the Old Sun Residential school burst. On inspection, the local plumber found that four sections were damaged beyond repair. The Peace Foundry Co of Toronto are the manufacturers of this radiator and as they have no Agents in this part of the country, it will be necessary to order from Toronto. It is estimated that the total of repairs will amount to \$20.00. As the infirmary is in constant use the radiator must be repaired immediately and I beg to ask for authority to proceed.

It has been found very difficult to heat the South wing and it can only be concluded that the heating system is at fault somewhere. Some qualified engineer who has nothing to sell should be asked to look over the system and report on it. Possibly the trouble can be corrected at a small cost and as this condition may be serious in extremely cold weather, I think that something should be done as soon as possible.

Your obedient servant,

Indian Agent.

Dec. 9, 1932.

Dear Sir,-

Replying to your letter of the 30th ultimo with reference to the hot water boiler at the Old Sun's Residential School, I beg to say that the Department approves of having the necessary repairs made.

With reference to your letter of the 2nd instant regarding the radiator on the verandah, you may also arrange to have the necessary repairs made. It is rather hard to understand why this radiator should have burst from freezing, as if the trap on the radiator is working properly there should be no water in the radiator.

In the last paragraph of your letter I note that there is difficulty in heating the south wing. If you will remember some changes were made in the heating system a few years ago, and this was supposed to have provided even and adequate heat for all of the building. If you think, however, that changes are needed I would ask you to kindly have Mr. A. Walker, who represents the Dunham Heating Co. in Calgary, make an inspection and report at the first opportunity. He is familiar with this installation and is probably in the best position to make a report and recommendation.

Yours very truly,

A. F. MacKensie.
Secretary.

Sir:

In your report for the month of December, last, you drew attention to the condition of the pumping plant at the Old Sun Indian Residential School which, you stated, is a constant source of trouble and that some remedy must be found to ensure a good water supply. In this connection I have to say that Mr. Inspector Christianson in a letter to the Department dated November 26th, last, enclosed a communication which he received from you, together with a voucher in favour of L. Michael, Gleichen, for the sum of \$153.65 for emergency repairs to the pumping plant. Did not the repairs carried out by L. Michael place this pumping plant in a satisfactory condition, or is it necessary that further work be carried out? If so, you should furnish a full report as to the work required, giving an estimate of the cost.

Your obedient servant,

A. F. MacKenzie,
Secretary.

Memorandum.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

Dr. McGill,-

Old Sun Indian Residential School on the Blackfoot Indian Reserve was destroyed by fire in June, 1928. As the Department had not sufficient funds to rebuild, the amount provided being only \$40,000.00, the Blackfoot Band asked that the new building be erected at an early date and that \$80,000.00 be taken from their interest funds to enable the building to be erected as the estimated cost was \$120,000.00. This was made possible by P. C. 207, dated 29th January, 1930; it was in the nature of a loan and it was expected that the money would be provided by Parliamentary Appropriation to restore the sum borrowed from the funds of the Blackfoot Band but this has not been done.

Buildings erected with funds provided by Parliament are not covered by fire insurance, but, as the Blackfoot Band has an interest of \$80,000.00 in this building, I am referring the matter to you to determine if the Indians' interest should be protected by placing fire insurance on the building.

G. A. Bailey

ARCHIVES PUBLIQUES
CANADA

104-1-5 I.

Ottawa, February 11th, 1933.

Sir,-

You will know that when Old Sun Residential School, on the Blackfoot Reserve, was destroyed by fire in June, 1928, that it was impossible to rebuild at that time until the Blackfoot Indians consented to loan \$80,000.00 from their interest account to enable the work to proceed. The Department paid \$40,000.00 from Appropriation and \$80,000.00 from the funds of the Blackfoot Band, with the expectation that this money would be returned to the Band account. Owing to financial stringencies the money has not been returned to the account and it is considered that the Indians' interest in the building should be protected by placing fire insurance thereon.

Accordingly it has been decided to place \$40,000.00 fire insurance on the building itself in which the Indians have an interest, no insurance on the contents. You should consult Mr. C. A. McKinnon, Insurance Agent, of Drumheller, Alberta, to have this insurance placed on the building for \$40,000.00. You should be able to give Mr. McKinnon full particulars as to the construction of this building which is considered fireproof. There is also water provided in case of fire and other precautions taken and it should be possible to secure a low rate of fire insurance on such building. It is advisable that the Insurance Agent himself should go over the building to determine the class of risk on which he is placing the insurance. The policy should be made to read that loss, if any, is payable to the Deputy Superintendent General of Indian Affairs, and be forwarded here.

Your obedient servant,

G. H. Gooderham, Esq.,
Indian Agent,
Gleichen,
Alta.

IN YOUR REPLY REFER TO

No. 401-11A., C.E.

ALSO TO DATE OF THIS LETTER

INSPECTOR'S OFFICE,

CALGARY, ALTA. January 28th, 1933.

INSPECTOR CHRISTIANSON'S REPORT ON OLD SUN'S INDIAN
RESIDENTIAL SCHOOL IN THE BLACKFOOT AGENCY:

Dear Doctor McGill;

I have the honour to report on an inspection of the Old Sun's School which I made on the 19th, instant, during my recent visit to the Blackfoot Agency.

There were 89 children present, -- 50 boys and 39 girls -- which number is two in excess of the total enrolment.

I spent all afternoon between the two classrooms of the school, and in my opinion, both teachers are very efficient in their work and are obtaining splendid results. Mr. Gooderham, the Agent, was with me, and we were both of the opinion that the children were responding well, taking into consideration that all the older children spend so much time out of the classroom.

HEALTH:

The children presented a well-kept appearance, and they are evidently being well fed and cared for in every way. I checked up on the amount of milk they were receiving as well as other food, and they are receiving an abundance of everything. Seventeen cows were being milked, and at the present time they are getting an average of 380 gallons of milk per month. This supply is sufficient to provide all the milk required for the children as

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

OLD SUN'S SCHOOL (Continued),-

Health (Cont'd),-

well as butter, which they have on the table at all meals.

I checked over the clothing supply and found that they are well provided with changes of apparel.

TRAINING OUTSIDE OF CLASSROOM WORK:

I questioned the cook, girls' matron, &c. as to what instructions the girls were receiving in the way of cooking and other household work. I saw the girls at work doing cooking, sewing, ironing, &c., and must say they were doing very nicely. In the summer they are taught milking, but the boys do this during the rest of the year.

The boys at this institution do all the outside work. I have mentioned that they do most of the milking, and besides this they do practically all the work on the land as well as the general chores. One thing, however, that is certainly needed here is a work shop of some kind. No instructions in blacksmithing or carpentering can be given to the boys as they have no place to work. I wonder whether it would not be to the advantage of the Indians to build work shops at the two schools in this Agency out of Band Funds.--I am quite sure that the Indians would readily agree to have this done, but I am merely putting this in the form of a suggestion.

BUILDING:

The school itself, of course, is new, and in first class shape. It is evident that the best of care is being taken of the entire building and equipment. During the present fiscal year the following painting has been done on the interior...

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

OLD SUN'S SCHOOL (Continued),-

Building (Cont'd),-

of the school by the staff and boys; the Department furnishing the paint: The corridor on the ground floor, bakery, staff dining room and pantry; Children's dining room, Principal's dining room and playroom. The Principal also informed that they still have some paint on hand and the matter of painting would be gone on with in the spring. This is a step in the right direction, as the boys are thus taught how to do this kind of work, and the building is kept looking well at a very small cost.

FARMING:

This school has about 1240 acres of land. They have 200 acres under cultivation and out of this acreage 60 were seeded down to grass. No wheat was threshed, but 1000 bushels of oats and 500 bushels of barley were harvested, as well as 20 tons of green feed and 40 tons of hay.

They harvested an excellent crop of potatoes: 700 bushels, which was sufficient for all needs. Besides this they had a ton and a half of other garden truck.

Forty-six head of cattle are kept at the school,--mostly cows, as they sell the calves as veal, or butcher them. They also have 10 horses, and 24 pigs, but no chickens.

GENERAL:

The staff at this school consists of the Principal and two other men as well as seven women. From my observation and what I gathered while there they have a very good staff there at the present time, with the exception of the Farming Instructor, whose services, I understand, are not very satisfactory.

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

OLD SUN'S SCHOOL, (Continued),-

General, (Cont'd),-

Mr. House, the Principal, informed me that he intended making a change there.

Since coming to this school, Mr. House has been showing splendid results, and I have no criticism whatever to offer: I am quite sure he is doing his utmost to cope with the situation there. The condition of the farm a few years ago was very bad, and before much can be accomplished, the land has to be brought under a proper state of cultivation. Most of the land under cultivation is sandy and without irrigation will not yield very much.

The outbuildings at this institution, with the exception of the barn, are simply terrible. I will admit that I arranged for the erection of these buildings, &c., some years ago, but at that time I had only \$1,000 to spend, so had to keep within that amount. The reason that the school has not been keeping chickens is that they have no chicken coop.

The machinery all seemed to be well taken care of and was all in good order except the well. The school is having some trouble with the cylinder in the well, and I am arranging with Mr. Fetterley, from the Water Power Branch, to go down on Monday to look this over.

Dr. Harold W. McGill,
Deputy Superintendent General,
Dept. of Indian Affairs,
O T T A W A.

I have the honour to be,

RE: Old Sun School Water System.

Dear Sir:-

This matter has received the attention of Mr Inspector Christianson, P.A. Fetterly and mechanics in whom we have confidence and the finding is as follows:-

That the existing 3 1/2" pipe is too large - there are 175 feet of pipe in the well and the load raised in a pipe of this size as well as pumping against 60 lbs pressure is too much for the pump causing frequent minor breakages and will ruin the plant in two or three years. The remedy is to replace the 3 1/2" pipe with a 3" pipe and a 3" ball valve cylinder which will be longer than the existing 3 1/2" spring valve cylinder. The spring valve has caused a lot of trouble.

The approximate cost of the pipe, cylinder and labour is estimated at \$300.00 and we will have the 3" pipe for some other use.

You will no doubt receive through the Director of Water Power Bureau Mr. Fetterly's report. I may say that Mr. Fetterly made his findings when on a visit to this Agency in connection with our proposed Irrigation system for which he is now preparing plans.

Awaiting your instructions.

Your obedient servant,

Indian Agent.

104-1-5.

Ottawa, February 15, 1933.

Sir:

I have been directed to acknowledge receipt of your No. 401-11A C.E. of the 28th ultimo, reporting on your inspection of the Old Sun Indian Residential School. It is noted that conditions generally at this school are satisfactory; that the teachers are efficient and obtaining good results; also that the children are in good health and are receiving an abundance of food. The training which the children are receiving, outside of classroom work, is also noted.

I regret that there will be no funds during the next fiscal year to build workshops at the two residential schools in your Agency, or to provide any outbuildings or repairs to same at the Old Sun School.

Regarding the repairs required to the well, I have to say that Mr. Agent Gooderham, in a recent communication, stated the requirements in placing the well in satisfactory condition, and he has been authorized to make immediate arrangements to have the work done and to forward a voucher covering the cost in time for payment before our books close at the end of the present fiscal year.

REPORT
on
WELL SITUATION
at
OLD SUN (C of E) INDIAN SCHOOL,
Gleichen, Alberta.

by P.A.FETTERLY
Assistant Hydraulic Engineer.

I. Purpose of Report.

While in Gleichen on January 30th on the proposed Irrigation Scheme for Old Sun Indian School, Mr. Christianson, Inspector of Indian Agencies, Mr. Gooderham, Indian Agent, and Mr. House, Principal, requested the writer to advise them regarding repair of the well at the School. As no extra expense or time was involved he acceded to their request.

II. Condition of the Well.

The well is 175 feet deep. The pipe is $3\frac{1}{2}$ " diameter, the cylinder $3\frac{1}{4}$ ". The cylinder is about 20" long. The pump was the highest priced pump on the market at the time it was installed costing over \$1000. It is very strongly built. The Government demanded a 1000 gallons per hour capacity. In order to obtain this capacity a $3\frac{1}{2}$ " cylinder was installed. This produced a load on the pump which was too close to the ultimate factor of safety and consequently the pump is overloaded. A weight of 150 lbs. per sq. inch is exerted on the plunger. As a consequence it has been breaking down more and more frequently during the last year or more. It now ceases to function almost every week, leaving the school without water

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

2.

for several hours at a time while it is being repaired.

The valve breaks through after a short time and is made into a washer. The cylinder and rods have to be removed and repaired and are a continual source of expense.

The overloading of the pump causes different portions to break. One main 16" drive wheel broke and a new one had to be purchased in the United States, the pump having been obtained originally from Ward Love Pump Corporation of Rockford, Illinois, through Crane's Ltd. The main drive chain also broke but was welded. It did not fit properly having stretched because of jerking, and will have to be replaced ultimately at a cost of \$100.

The pump does not get credit for the amount of work it does. The School uses upwards of 6000 or 7000 gallons per day when run to capacity.

The rods, 175 feet in length, have repeatedly been broken and splintered during the frequent removals and replacement for repair. Some of these will have to be replaced. At present the time of 3 men for 3 days is occupied each time it is repaired.

III. Necessary Improvements to the Well.

The present $3\frac{1}{2}$ " pipe should be replaced by 3" plugged and reamed pipe. The present $3\frac{1}{2}$ " cylinder should be replaced by a $2\frac{3}{4}$ " cylinder (for a 3" pipe) 3 feet long. The lower half of the cylinder can be used for a few years and then, if and when necessary, the rods can be shortened by cutting off a foot from the upper end, provided the

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

3.

lower part of the cylinder becomes so worn that new leathers will not repair it. The upper half of the cylinder can then be used. This method will double the life of the cylinder without having to remove it, as 9 men days are occupied each time it is removed. The capacity of the pump will then be 750 gallons per hour instead of 1000 gallons.

The cylinder should be driven at a slower speed than the motor is capable of doing. The motor is 3 h.p. 1725 r.p.m. , 21 amps at 220 volts, and 42 amps at 110 volts. By lengthening the time per day occupied in pumping, through a slower stroke, the lift of the cylinder is lengthened, and the change of weight is not so abrupt.

IV. Estimates.

175 feet plugged and reamed pipe @ 80¢	140.00
100 feet of rods, each 20', @ 32¢	32.00
With drop forged couplings.	
5 sets couplings @ \$4.50	22.50
1- Cylinder, ball valve. 3' x 2 3/4"	60.00
Labour, 3 men, 6 days.	60.00

TOTAL.	314.50
--------	--------

V. Conclusion.

It is obvious from the frequent failure of the pump to function, that something more must be done than to withdraw the pipe and cylinder every week or so for repair as this is an ever recurring source of expense.

R

Sir,

Enclosed herewith is a report on the condition of the well supplying water to the Old Sun Indian School on the Blackfoot Reserve at Gleichen, Alberta, prepared by Mr. P.A. Fetterly of our Calgary staff.

The report shows that the well is not in a very satisfactory condition. Repairs are continually being required at a considerable cost. Mr. Fetterly suggests replacing the present pipe liner and cylinder with one of a slightly smaller size, the estimated cost of which is \$314.50.

I shall be glad to have your instructions regarding this matter.

Your obedient servant,

J.T. Johnston,
Director.

Feb. 25, 1933.

Dear Sir,-

I beg to acknowledge receipt of your letter of the 11th instant, and to thank you for the report with reference to the well situation at the Old Sun's School, Alta.

On January 31st a letter was received from Indian Agent Gooderham, advising the Department that Mr. Fetterly had made an inspection and asked that he be allowed to proceed with the work as recommended. Mr. Gooderham was instructed on the 14th to proceed with the changes as recommended by Mr. Fetterly.

Yours very truly,

A. F. MacKenzie.

INDIAN AGENT

22nd February.1933.

Sir:-

Re.Voucher No.495 - A large part of this
account was for labour on the pumping plant.

This was urgent as the institution was
without water until the plant was again put into
working condition.This condition happens frequently.

A burst water front was also an emergency
job.

Your obedient servant,

G.H.Gooderham.

RE: Voucher #521.

Dear Sir:-

Authority for repairs to a radiator and the boiler at Old Sun Residential School was granted in Department Letter of December 9th last File 104-1-5 but you will note an item for hydrant valves which had to be replaced owing to leakage and water seeping through the floor. The cost seems high but Mr Michael informs me that it was necessary to send to the United States for these and he has made no profit in the transaction. I would ask that the A/C be paid, please.

Re: Voucher #536.

Dear Sir:-

I attach hereto Voucher #536 in favour of Bell & Morris of Calgary for material supplied for changing the pumping system at Old Sun Residential School. It was necessary to send to the United States for some of the material and some delay has occurred. As soon as weather conditions are favourable, Mr Michael will install the outfit and I to be able to submit the Voucher for the labour early in April. I do not think that the work will be completed before March 31st. In any case, no delay will occur in submitting the voucher in favour of Mr. L. Michael.

Your obedient servant,

Indian Agent.

March 29th, 1933.

Dear Sir,-

I beg to acknowledge the receipt of insurance policy for \$40,000.00 on the Old Sun Residential School. Payment of the premium has not been made because it is considered that the rate of 1 1/2% is altogether too high for a fire proof building such as this is and isolated from other buildings or a large community.

The Department is asking for a report from an Insurance Appraiser, and, until this is received, definite action cannot be taken, but if Mr. McKinnon cannot give a better rate than this on the building, it will likely result in the insurance being placed elsewhere.

Yours truly,

Deputy Superintendent General.

Gentlemen:-

Further to our letter of March 21st regarding your inquiry on the Indian Residential School at Gleichen, Alta., we have received word from our Calgary Branch Office that the rates on the risk are as follows.

Net Rate	-	building	- .75¢
		contents	- .75¢
80% Co-Ins. rate	-	building	- .37¢
		contents	- .47¢

These rates are annual, and if the policy is written for three years, rates are doubled the above figures.

We are requesting further details in connection with the construction from our Western Branch Office, and if you require this information we shall send it along when it is received in this Office. We trust you will be successful in securing this business and are glad to have been of any help to you in this connection.

Yours very truly,

RE: Old Sun School - Farm House

Dear Sir:-

The hot water boiler which is attached to the cook stove in the Farmer's house at the Old Sun Residential School is leaking badly and the Principal advises that it will have to be replaced immediately. The cost will not exceed \$15.00.

I do not know if this repairs is considered a responsibility of the Department or of the M.S.C.C. but in any case, the replacement is necessary. Please advise if this account may be charged to Education Vote.

Your obedient servant,

Indian Agent.

Sir:

I have your letter of the 11th instant, regarding the repairs required to the hot water boiler attached to the cook stove in the farmer's house at the Old Sun Indian Residential School. In reply I have to say that the Department will have no funds to pay the cost of the repairs. It is considered that the school authorities should provide the amount from their per capita allowance or other receipts.

Your obedient servant,

Dear Sir:-

Reporting on the Insurance Policy for the Old Sun Residential School, I beg to say that some few weeks ago, Mr Michols of Calgary who is Inspector of Insurance for the Newark Life Insurance Co and in which Company Mr McKinnon placed the insurance, interviewed the writer. He told me that he had inspected the building with Mr. McKinnon and on your request for a re-rating, Mr McKinnon asked him to come and see me.

He stated that the Insurance rate had been fixed by the Underwriters Association and was high because the sum of \$40,000.00 covered only a small portion of the value of the building. I had given a value of about \$175,000.00 for the whole building. The rate would be much less if the amount of insurance was increased and the valuation decreased. In fact, I believe \$50,000.00 could be placed on the building for less than \$40,000.00 if the valuation was in the neighbourhood of \$100,000.00. It was finally agreed between ourselves that Mr Michols would advise the representative of the Insurance Company at Ottawa to discuss the matter with the Deputy when all values and other details could be settled, as it is a very difficult subject for me to explain fully by letter.

I am writing Mr Michols today to ascertain what may have caused the delay and also asking him to communicate direct with you giving the necessary details. I regret the delay in getting this matter settled and can assure you that the delay is no fault of mine.

Your obedient servant,

Indian Agent.

DEPARTMENT OF INDIAN AFFAIRS

MAY 31 1933

RECORDS

Ottawa, 30th. May 1933.

The Secretary,
Department of Indian Affairs,
Booth Building,
Ottawa, Ont.

Dear Sir:-

Re Newark Fire Insurance Company Policy No. 75862
'Old Sun' School, Gleichen, Alberta

This will confirm my interview with Mr. G. A. Conley on the afternoon of the 29th. inst., with reference to the fire insurance rate of 1.50% for three years charged under the above mentioned policy covering the building referred to for the sum of \$40,000.

The reason for the apparently high rate is that the building is insured for a small proportion of its value, whereas the usual practice in rating fire resistive buildings is to make the rate contingent upon insurance equal to at least 80% of value being carried. On this basis the rate on this school would be .74% for three years.

If less than 80% insurance is carried but more than 50%, the rate can be adjusted to any amount within this range, but a certified valuation by the architect must be filed with the Western Canada Fire Underwriters Association, and a clause inserted in the policy providing that a stated amount of insurance will be carried, and all losses adjusted on the basis of the agreed amount having been carried.

I understand the cost of the building was \$120,000. and the Indians have an equity of \$80,000. in it. If \$80,000. insurance was carried, representing two thirds of value, a rate of approximately .85% could be obtained, thereby giving you double the protection at a total cost of \$680., an increase of only \$80. over the present premium on \$40,000., for a further \$40,000. of insurance. These quotations are on a three year basis.

If you will forward to the undersigned at our Montreal office, No. 500 Place d'Armes Square, a letter setting forth the amount of insurance you propose to carry, and also the actual value of the building exclusive of such furnishings and fixtures as do not form part of the building, I will negotiate with the Western Canada Fire Underwriters Association for the promulgation of a revised rating.

Yours truly,

Harry W. Bell
Inspector.

MEMORANDUM

Honourable Thomas G. Murphy,-

In memorandum of January 25th last, instructions were asked as to name of person with whom fire insurance should be placed on Old Sun Residential School on the Blackfoot Indian Reserve.

The name of Mr. C. A. McKinnon of Drumheller, Alberta, was given and accordingly he was asked to place the insurance.

When this new building was erected it was necessary to use \$80,000.00 of the Trust funds of the Blackfoot Indians, and this was made possible by P. C. 207, dated 29th January, 1930. To protect the Indians' equity of \$80,000.00 it was considered a policy of \$40,000.00 should suffice, and a policy for this amount was secured. The rate charged was 1 1/4% which was considered too high a rate for the class of building and the matter was referred to the insurance company.

The Inspector of the insurance company, for which Mr. McKinnon is agent, was at the Department to-day and will place insurance for \$80,000.00, full equity of the Indians, at a rate of 92¢ per hundred for three years, and I would recommend that a policy for this amount be placed to cover fully the Indian equity. No insurance will be carried to cover money spent from Parliamentary Appropriation on the building. This new policy will go through the office of Mr. McKinnon.

Sir:

I beg to inform you that while down at Gleichen a few days ago the Principal of the **Old Sun's School** and the Agent brought to my attention that some painting was necessary on the interior of the school. Mr. House informed me that if the Department would furnish the paint, he and his staff would do the painting.

If the Department have any funds available to purchase this paint, it is a very economical way of keeping the building in repair. What he asked for was about \$100.00, but a smaller amount would be acceptable, as paint can be bought at a very reasonable price at the present time.

Your obedient servant,

M. Christianson,
Inspector of Indian Agencies,
Alberta Inspectorate.

Re:- Newark Fire Insurance Company Policy
No. 75862 'Old Sun' School, Gleichen, Alta.

With reference to your letter of the 30th May, I beg to say the Department is prepared to have an insurance to the amount of \$80,000.00 placed on the above mentioned School at Gleichen, Alta., and a policy may be written for that amount on the understanding that a rate of .92¢, or less, per \$100.00 for three years' insurance will be allowed. I inclose herewith a certificate of valuation of the building from the Architect, as required by the Western Canada Fire Underwriters Association.

I may add it is the Department's desire that the new policy shall be issued through the office of Mr. C.A. McKinnon, of Drumheller, Alta.

INSPECTOR'S OFFICE,

CALGARY, ALTA., June 9th, 1933.

Dear Doctor McGill:

I have the honour to report that on my recent visit to the Blackfoot Agency I visited the Old Sun Indian Residential School. I went over the building, &c., and found everything in good order with the exception of one of the walls in the play-room on the boys' side: The plaster was loose and some has broken off. This is going to be repaired by the Principal. Mr. House took up with me the matter of paint for the interior of the building, and in this connection I have written a special letter to the Department.

While there I saw all the children and they looked very well. There was no sickness of any kind in the school and everything seemed to be going along satisfactorily.

Doctor Harold W. McGill,
Deputy Supt. General,

RE: Voucher #91

Dear Sir:-

I am forwarding herewith an account submitted by L. Michael for work and material supplied for the pumping plant and the grease traps at Old Sun School.

The rod which is connected to the cylinder broke and to remove and replace takes considerable time. The check valve was so badly worn that it would not retain the back pressure and no doubt had a lot to do with the break-down. This was replaced to ensure satisfactory operation.

The grease traps in the kitchen & scullery had given trouble for some considerable time. Apparently, they had not been properly installed and the grease entered the pipes and blocked them. The stench was terrible. Mr Michael pulled the pipes and installed the traps so that the grease congealed in the trap. It is understood that this is the way these should function.

All this work was done, as you note, before the Departmental ruling of the 30th May File 104-2-5 was received here. The account is respectfully submitted for payment.

Your obedient servant,

Indian Agent.

The Secretary,

Ottawa, June 22, 1933.

Sir:

I have your letter of the 15th instant, enclosing an account in favour of L. Michael, for work and material supplied for the pumping plant and the grease traps at the Old Sun Indian Residential School and stating the work that it was necessary to perform in this connection.

In reply I have to say that a cheque in payment of this account will be forwarded in due course. I would point out, however, in connection with future repairs at the schools in your agency, that it will be necessary for you to report the matter to the Department before incurring any expenditure. You should give full particulars concerning the work, the materials required and the approximate cost.

I may add, further, that as our Appropriation has been so greatly reduced, we will have no funds to cover the cost of any repairs or the providing of any equipment for this school during the balance of the present fiscal year. Should it be necessary to undertake repairs, the expense required will have to be met by the school authorities from their per capita allowance or other receipts.

Your obedient servant,

EX'L.

Dr. Harold W. McGill,
Deputy Superintendent General,
Department of Indian Affairs,
Ottawa, Ontario.

Dear Sir,

'Newark Fire Insurance Company' Policy 75862
Old Sun School, Gleichen, Alta.

I duly received your letter of the 17th instant with enclosure of Architect's statement regarding the cost of the school covered by this policy and note that you are prepared to insure the school for an amount of \$80,000, provided a rate of .92% or less for three years will be granted. This figure is evidently an approximate verbal quotation made by the Writer during his interview with Mr. G. A. Conley, and while we will make every endeavour to obtain this rate for you, we have to advise you that the actual calculation on the basis of value given in the architect's statement, brings out a rate of .93%. In view of Mr. Conley's remarks when the approximate rate was quoted, we are assuming that such a small difference will not require reconsideration of the matter and are accordingly requesting our Branch Manager at Winnipeg to arrange for the issue of a new policy for the sum of \$80,000 dating from the 17th instant, the date of your letter, full credit for which will be given to Mr. C.A. McKinnon of Drumheller, Alberta.

Upon receipt of the new policy from Mr. McKinnon, kindly surrender for cancellation Policy 75862 and return it to Mr. McKinnon. The surrender form on the policy should be signed by a responsible official of the Department.

The 'Newark Fire Insurance Company', a subsidiary of the Royal Insurance Company Limited, is holding you covered for a total amount of \$80,000 on the Building of the Old Sun School further described in Policy 75862, which is to be cancelled upon the issue of a new contract, as of the 17th instant.

Yours truly,

Harry W. Bell
Inspector.

File No. 104-1-51.

July 7th, 1933.

Dear Sir:-

You will note that a policy for \$40,000.00 was placed through the office of Mr. McKinnon, of Drumheller, on Old Sun Boarding School.

The rate of 1.50 per hundred was considered excessive, and a lower rate of 92 cents per hundred has been obtained by replacing the policy for \$80,000.00, covering fully the equity of the Blackfoot Indians.

It is necessary to return the policy for \$40,000.00, and accordingly it is enclosed with the Form of Surrender duly signed. This policy with the attached Form should be delivered to Mr. McKinnon, and it will then be in order to submit his account to the Department for the premium.

For your information I might say that the new policy in the Newark Fire Insurance Company, and No. A 2287 for \$80,000.00, is in the hands of the Department.

Yours very truly,

Encl.

INSPECTOR'S OFFICE

PB CALGARY, ALTA. May 15th, 1934.

104-1-5

Sir:

OK

I beg to bring to your attention that on Thursday I was down to Gleichen and was talking to Mr. House, the Principal of Old Sun School, and he brought to my attention that he had asked for some paint in the Estimates, and he was very anxious to get it so that he could put the boys to work doing some painting in the interior of the school. I have looked up the Estimates and find \$200 was the amount placed therein for paint for the barn and interior of the building. If this amount cannot be allowed a smaller quantity of paint would do, as long as he gets 25 or 30 gallons of paint and some linseed oil, &c. Probably a few paint brushes would be required also.

I think in allowing a little for paint each year, the work being done by the older boys, a big saving can be effected, and at the same time the walls are kept in first class shape. I would ask that if at all possible this be allowed immediately so that the work can be proceeded with.

Your obedient servant,

M. Christianson,
Inspector of Indian Agencies,
Alberta Inspectorate.

The Secretary,

401-11A R.C.

Ottawa, May 21, 1934.

Sir:

With reference to your letter of the 15th instant, I beg to say that, owing to lack of funds, the Department is unable to provide the sum of \$200 for painting at the Old Sun Indian Residential School. You may, however, purchase approximately 25 gallons of paint and some linseed oil. It is noted that there will be no charge for labour.

Your obedient servant,

T. R. L. MacInnes,
Acting Secretary.

INSPECTOR'S OFFICE

PB CALGARY, ALTA. June 25th, 1934.

Sir:

I beg to bring to your attention that I was down at the Old Sun School on the Blackfoot Reserve a few days ago and the Principal pointed out to me that he had asked for a hen-house in the 1934-1935 Estimates, and he was wondering whether this was going to be allowed: I might state that this building certainly is required as he pointed out that the Doctor was continually advising him that he should feed eggs to the children, but he could not do this unless he produced them at the school, and if he is expected to feed eggs to the children, the Department will have to supply him with the necessary chicken coop. I shall be glad to be advised if this expenditure is going to be allowed.

The Secretary,
Department of Indian
Affairs,
OTTAWA.

Your obedient servant,

Ottawa, July 3rd, 1934.

Sir,-

With reference to your 401-11A C. E. of the 25th ultimo, I beg to say that no provision was made in our appropriation for the current fiscal year for the erection of a hen-house at the Old Sun's Indian Residential School. If the school authorities are willing to provide the labour, you might let the Department have an estimate of the cost of the material that would be required. On receipt of your reply, the Department will be in a position to decide if funds for the purpose can be allowed.

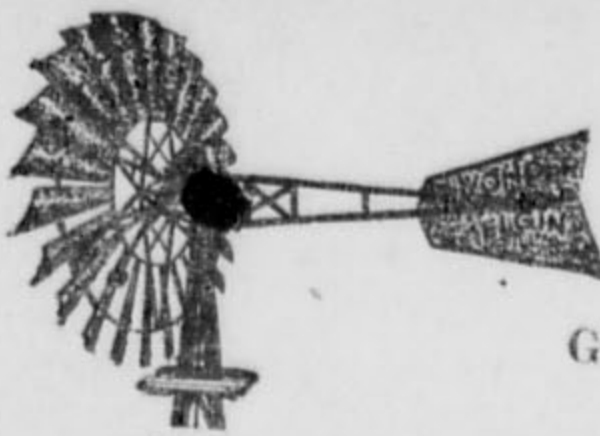

Your obedient servant,

A. F. MacKenzie.

RE: Voucher #135.

Dear Sir:-

Attached voucher No 135 is for urgent repairs to the plumbing at the Old Sun Residential School during the past three months. A heavy coating lines the water pipes due to the presence of alkali in the water and the Principal had no option and ordered the work to be done. The repairs were not due to lack of supervision or carelessness and I beg to recommend that the Department pay the account.

Your obedient servant,

Indian Agent.

OFFICE OF
INDIAN AGENT

104-1-5
Gleichen, Alta.

September 12, 1934.

Dear Sir:-

The Principal of Old Sun Residential School has requested that the fire escapes at this institution be lighted. The escapes are particularly dangerous to small children who sleep in the upper dormitories.

It will be necessary to run conduits from the front to the rear of the roof over the escapes. The Hunter Electric, the only qualified electricians in these parts, offers to install these, supplying material and labour, for the sum of \$20.00

I recommend that this be accepted and the work done immediately.

Your obedient servant,

Indian Agent.

The Secretary,
Dept. of Indian Affairs,

EXTRACT FROM REPORT OF MR. G. H. GOODERHAM
FOR THE MONTH OF DECEMBER, 1934, ON THE OLD
SUN INDIAN RESIDENTIAL SCHOOL.

Original on No. 104-1-7.

Somehting must be done to improve the
heating system. During the very cold weather
the radiators fill with water and the circu-
lation is poor.

Parts of the building are poorly heated and
radiators may freeze and burst. The Department
has on file a recommendation from the Dunham
heating expert in Calgary as to how this condition
may be remedied. This should be brought to
the attention of the departmental architect.

Ottawa, January 11, 1935.

Sir:

I have to refer to that portion of your report for the month of December, last, on the Old Sun Indian Residential School, in which you request that something be done to improve the heating system, as, during the very cold weather, the radiators fill with water and the circulation is poor, parts of the building are poorly heated and the radiators may freeze and burst.

In this connection I would refer you to the last paragraph of official letter dated December 9, 1932. You were requested, at that time, to have the representative of the Dunham Heating Company, at Calgary, make an inspection and report. We do not appear to have on file the recommendation of the Dunham Heating Company expert. As the Dunham Company are familiar with the installation of the heating equipment, they would, no doubt, be in the best position to make a report and recommendation. You may have their representative visit the school and submit a definite report, stating the cost involved in having the alterations made to the heating system in order that it will work satisfactorily in heating the entire building.

Your obedient servant,

T. R. L. MacInnes

C. A. DUNHAM CO., LIMITED, TORONTO, ONT.

but I will forward you a special bottle which you might fill with water from the well and forward it to the C. A. Dunham Company Toronto, and I will write and ask them to have the Vinco Company make a test of this water to see if Vinco will neutralize the effects of the soda.

You might see to it that your Engineer cleans out the boilers and changes the water as per the instructions I gave him.

Now that you have a twenty-four hour Electric Service, it would be a good investment to install an Electric Condensation Pump, instead of the Return Trap. To make this installation, however, it also requires that the Rads in your basement shall be fitted with a small trap and the ends of the steam mains trapped through #22 Float Traps.

The pump could be installed along side the small pump which takes care of the Residence, and the four return pipes going into the boiler room could be brought together into one header and connected to the pump. This change would allow your system to circulate steam much quicker and at lower pressure, and a saving in fuel would result and of course more comfort to the occupants of the School. For instance, just compare the comfort in your residence with what it was before the small pump was installed.

I have figured the cost of the above changes to be approximately \$375.00.

Yours very truly,

A. Walker

Re Heating Plant at Old Sun Indian School

Dear Mr. House:

Having checked over the above plant, I have found that the trouble you have experienced in heating the boys' class-room during the cold weather, was caused by two conditions. First, priming in the boilers, and second the Return Trap being unable to return the condensation to the boilers as fast as steam condensed, and the result was that the steam mains were filled with water and it was not possible to get circulation.

I do not possess a Trane catalogue, so I am unable to give you the manufacturer's rating of your Return Trap, but comparing the size with the trap that the Dunham Company would install for a building such as yours, I find that the Dunham trap is much larger than the Trane.

Your Engineer informed me that your Return Trap (before priming was noticed), was working continually, and this is not a good feature in a Return Trap.

It is pleasing to note, however, that the heating system in the Residence which Mr. Lepper changed last year, is giving you first-class service.

On testing the water in the boilers, I found that it was foaming and no doubt there is a quantity of oil in the boilers, as the water from the well appeared to be all right under a test

*18.1.35 - There is foaming in the boilers now;
this has been corrected.*

Dear Sirs:-

Re: Inspection of Heating Plant-Old Sun School.

I beg to inform you that I inspected the boilers and heating plant at the above school to day and wish to draw your attention to the corrosion taking place in the main underground return from the South side of the building running under the corridor from the boiler room to the main part of the building.

This corrosion is no doubt due to the poor circulation.

It is only a matter of time when this pipe will give out, therefore I would suggest that you have this matter corrected immediately.

Yours truly,

A.W. Dick

Gleichen, Alta.

January 18, 1935.

Dear Sir:-

In regard to your letter of the 11th instant regarding the heating system of Old Sun Residential School, I asked Mr Christianson to interview Mr Walker, Dunham Company Representative in Calgary and he did so. Mr Walker was ill at home but I secured from his office a copy of a letter written in 1931 when he inspected the heating plant at Old Sun's for the same trouble that exists today. Mr. Walker told Mr Christianson that there was nothing further that he could suggest and that the remedy and approximate cost would be very much the same as his recommendation in 1931. A copy of this letter is attached hereto.

The Provincial Boiler Inspector just dropped into the office after making an inspection of the boilers at Old Sun School and I also attach a copy of his report on the condition of the plant.

On discussing the matter with Mr Dick with a view to correcting the corrosion mentioned in his report, he is of the opinion that this would also correct the lack of heat in the South Wing. He drew my attention to the fact that there are three systems of return involved i.e the pump system from the residence, the Trane trap from the Central portion and the gravity from the South Wing. He recommends that the South Wing return be connected to the trap. This change would undoubtedly improve the system and the cost of alteration would be very much less than the installation of a pump system. Besides, no operating costs would be added. Something must be done as the cost of replacing corroded return pipes under the corridor and dining room floor will be very costly. Wouldn't it be good business to have the local Steam fitter make the alteration suggested by Mr Dick? No damage would result and the system could be tried out this winter. It is now 40 below and I would ask for a wired reply.

Acting Deputy Minister.

Memorandum:

It has been reported to the department that considerable difficulty is being experienced in heating a portion of the Old Sun's Indian Residential School near Gleichen, Alta., which is caused by priming in the boilers and the return trap not returning the condensation to the boilers as fast as the steam condenses.

In order to remedy this condition it will be necessary to install an Electric Condensation Pump in place of the return trap. The approximate cost will be \$875.00.

I would recommend that the Indian Agent be authorized to have this change made, the material and labour to be supplied from firms on his approved list.

Funds are available in the Vote for Indian Education.

IN YOUR REPLY REFER TO
NO. 401-11A.C.E.
ALSO TO DATE OF THIS LETTER

INSPECTOR'S OFFICE

PB CALGARY, ALTA., January 25th, 1935.

Dear Doctor McGill:

I have the honour to report on an inspection of the Old Sun Indian Residential School on the Blackfoot Reserve. In making this inspection I went over buildings and equipment, machinery, &c., and in general enquired into the management of this institution.

I found there were 88 children on the register: 83 present and 5 were at the hospital as T.B. patients.

HEALTH:-

The health of the children at the school seems to be good: There was no sickness of any kind at the time of my visit although a few children were under observation for T.B. and these children are given a rest period every afternoon.

I checked over the clothing supplied to the children and found that this was ample: Every child has three or four changes of clothing, and they are well dressed. I learned from the Principal that their method

Doctor Harold W. McGill, - of -

for

Health. (Continued),-

of providing the clothing is as follows: Until the children are 12 years of age, the supply of clothing is taken care of by the ladies of the Anglican Church in Toronto. They are made up there and forwarded to the school. When the children have reached the age of 12 years, their clothing is supplied by the Commission who purchase most of it in Winnipeg.

TRAINING OUTSIDE OF CLASSROOM WORK:-

Besides their academic instruction the children follow the general routine in vogue in practically every Indian boarding school. When the girls graduate they are fairly well fitted to look after their own homes as they are taught sewing, cooking, and general household science. They do the milking during the summer time and are taught how to make butter. The boys do the milking during the winter. I was there while they were milking, and was telling them that I hoped they would continue to do this after they left school.

In addition to this, the older boys are taken by the Principal every afternoon, for about two hours, to the carpenter shop where they are taught to do a certain amount of carpenter work. They are also taught by the Farming Instructor to repair machinery, &c. The work on the land, such as cultivating, &c., is all done by the boys attending the school.

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

FARMING:-

The farming operations at the school have not been very successful on account of the drouth. They only threshed 490 bushels of oats last fall and the balance of the crop was cut for feed. They had 7 tons of potatoes and about a ton and a half of turn-ips and some other small garden truck.

The only cattle kept at the school are cows and heifers, and they have 41 head at the present time and as a rule they have 15 or 20 cows milking. At the time of my visit they were milking 17. A register is kept of the quantity of milk that comes in- to the school every day and in checking it over I found that there are approximately 700 gallons of milk produced each month and the average amount of butter made per month is about 190 pounds. Both milk and butter are used by the Staff and the children of the school. I am quite sure the Department will see that the children here are getting all the milk they can drink; they also get butter with most of their meals.

BUILDINGS AND EQUIPMENT:-

The school building itself is in a first class state of repair: The Department have supplied a small quantity of paint each year which has helped to keep the interior of the school looking bright and clean. The painting is done by the staff and the older boys. There is a lack of cupboard space in the dormitories.

Indian Affairs. School Files.
(RG 1C, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Buildings & Equipment, (Continued),-

The only out-building worth mentioning is the barn. This building is in good shape and is kept very clean and tidy. The exterior, however, is badly weather-beaten and the paint is practically all worn off. As soon as arrangements can be made it should certainly be painted to preserve both the shingles and the siding. There is a silo attached to the barn, and it has been used regularly. It is now rotting, and I believe it is beyond repair: High winds have caused it to shift on the foundation and it is leaning to one side. The other out-buildings are not very good, and if my memory serves me correctly they were all put up for less than \$1000.00; but they are answering the purpose for the present, at least. As I have mentioned on several previous occasions, this school requires a chicken-house, and this should be provided.

As this school is connected with the hydre-electric, we have no expensive machinery here, with the exception of a few motors. The only machinery is a low-pressure boiler which furnishes the hot water to the school, and a high-pressure boiler for the laundry. I had a talk with the fireman who also handles the boilers and motors, and as far as I could ascertain, he has the necessary papers to look after a high-pressure boiler. He seems to keep the machinery in good working order.

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Buildings & Equipment, (Continued),-

The same applies to the heating plant which is in good order except that more water gets into the radiators than steam, evidently on account of faulty circulation. This is not noticeable when the weather is mild, but during this cold spell it has caused some trouble. I shall leave this matter stand as it has already been taken up by the Agent and reported on by Mr. Alex. Walker, one of the best heating engineers in this part of the country.

The school also had some trouble a few days before my visit with the school well, but it had been repaired and they were getting an abundance of water. The well that supplies the water for the school cattle needs cleaning out. At the present time it is only sending a very small stream through the pipe. I had a talk with a Mr. Michael from Gleichen, who looks after matters of this kind for the school and the Agency, and he advised me that he thought a new cylinder was necessary for the well.

GENERAL:-

As far as I could ascertain this school is very well conducted and has an efficient staff: For some years I was not satisfied with the different Farming Instructors they had employed, but the present man seems to be giving good satisfaction, and Mr. Gooderham informed me that he thought he was an exceptionally good man -- the best Farming Instructor they had ever had there.

Indian Affairs. School Files.
(RG 1C, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

- 6 -

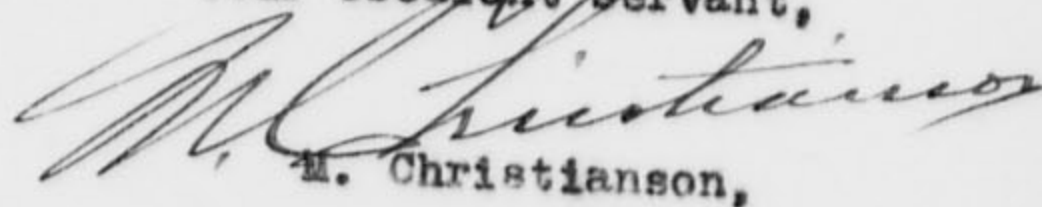

General, (Continued),-

I examined the fire equipment and learned that the fire extinguishers had recently been refilled. There are six rubber fire hose in the building and these have become useless as they are rotting and the water comes through the walls of the hose when the pressure is turned on. Therefore six rubber hose, 50-ft. lengths, should be supplied. Also reels of the round type, as the present one are those in which you fold the hose back and forth and lie it flat in the rack and this has been the cause of ruining the present hose. Although I am explaining these matters in the report, I shall take the requirements of the school up in a special letter so that they may be more easily dealt with.

There is a skating rink at the school and all the children are supplied with skates. They also play hockey and play with teams from the local towns around there.

The Staff of this institution consists of the Rev. Mr. House, Principal, the Fireman and Farming Instructor, and 7 lady employees; a total of 10. From personal observation I would say that the management of this institution is very satisfactory, and Mr. House is considered a fairly efficient Principal. The feeling between the Indians and the School is all that could be desired.

Your obedient servant,

M. Christianson,

Inspector of Indian Agencies,
Alberta Inspectorate.

The only outbuilding worth mentioning is the barn. This building is in good shape and is kept very clean and tidy. The exterior, however, is badly weather-beaten and the paint is practically all worn off. As soon as arrangements can be made, it should certainly be painted to preserve both the shingles and the siding. There is a silo attached to the barn, and it has been used regularly. It is now rotting, and I believe it is beyond repair. High winds have caused it to shift on the foundation and it is leaning to one side. The other outbuildings are not very good, and if my memory serves me correctly, they were all put up for less than \$1000.00; but they are answering the purpose for the present, at least.

As I have mentioned on several previous occasions, this school requires a chicken-house, and this should be provided.

As this school is connected with the Hydro-electric, we have no expensive machinery here, with the exception of a few motors. The only machinery is a low-pressure boiler which furnishes the hot water to the school, and a high-pressure boiler for the laundry. I had a talk with the fireman who also handles the boilers and motors, and as far as I could ascertain, he has the necessary papers to look after a high-pressure boiler. He seems to keep the machinery in good working order. The same applies to the heating plant, which is in good order except that more water gets into the radiators than steam, evidently on account of faulty circulation. This is not noticeable when the weather is mild, but during this cold spell, it has caused some trouble. I shall leave this matter stand, as it has already been taken up by the Agent and reported on by Mr. Alex. Walker, one of the best heating engineers in this part of the country.

The school also had some trouble a few days before my visit with the school well, but it had been repaired and they were getting an abundance of water. The well that supplies the water for the school cattle needs cleaning out. At the present time it is only sending a very small stream through the pipe. I had a talk with a Mr. Michael from Gleichen, who looks after matters of this kind for the school and the Agency, and he advised me that he thought a new cylinder was necessary for the well.

I examined the fire equipment and learned that the fire extinguishers had recently been refilled. There are six rubber fire hose in the building and these have become useless as they are rotting and the water comes through the walls of the hose when the pressure is turned on. Therefore, six rubber hose, 50-ft. lengths, should be supplied. Also reels of the round type, as the present ones are those in which you fold the hose back and forth and lie it flat in the rack, and this has been the cause of ruining the present hose. Although I am explaining these matters in the report, I shall take the requirements of the school up in a special letter so that they may be more easily dealt with.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

INSPECTOR'S OFFICE

PB CALGARY, ALTA., January 25th, 1935.

Sir:

I beg to bring to the attention of the Department matters which I have brought up in my report on Old Sun's School, addressed to the Deputy Superintendent General:

- 1.-The painting of the exterior of the barn at the School: If funds are not available next summer this will have to be left over for another year.
- 2.-The building of a new silo, as I do not think the one now in use can be repaired. This can be gone into again when the weather is milder, when it will be ascertained whether anything can be done with the old one.
- 3.-The building of a chicken-house: This is important as now poultry is kept at the school.
- 4.-The supplying of 6 fire-hose, 50-foot lengths X 1 $\frac{3}{4}$ " with reels.
- 5.-The supplying, next spring, of some paint, oil and varnish for the interior of the school. This work will be done by the staff and the older boys.
- 6.-The cleaning out of the well at the barn, and probably furnishing a new cylinder, if required. We would have to get an estimate from Mr. Michael of Gleichen.
- 7.-The extension of cupboards for clothing in the dormitories, which would mean the hiring of a carpenter. The material would not amount to very much.

The Secretary,
Dept. of Indian Affairs,
OTTAWA.

Your obedient servant,

M. Christianson,
Inspector of Indian Agencies,
Alberta Inspectorate.

Sir:

In further reference to official reply to your 401-11A C.E. of the 25th ultimo, reporting on your inspection of the Old Sun's Indian Residential School, the Department has noted the various items regarding repairs, the erection of a chicken house and the supplying of equipment. As you were informed in our letter of the 2nd instant, certain funds will be available for repairs and additions to the outbuildings at this school. I would suggest that, early next spring, you submit a definite report concerning the repairs that you believe should be undertaken, giving full particulars of the cost, etc. When the Department receives the information requested, regarding the fire hose required, consideration will be given to placing the order.

Your obedient servant,

A. F. MacKenzie

OFFICE OF
INDIAN AGENT

B.12.

Gleichen, Alta.

February 1, 1935.

Dear Sir:-

I have to advise you that during the month of January the pumping plant at Old Sun School gave a great deal of trouble. This commenced on the 4th when there was no water. The pipe was pulled and the lower valve was found to be stuck. This condition was repeated every few days and Mr Michael our local plumber made 15 trips to the school and pulled the pipe completely out 3 times and partially pulled up several times. The weather was subzero until the 28th when it again failed to pump water. Mr Michael pulled everything out on that date and made changes in the lower valve believing it would hold. The tremendous suction and force of this pump apparently unloosened it again and there was no water on the 30th.

We concluded that the well was drying up and would not stand continuous pumping so made arrangements with the Principal to shut it off at night. Even on part time it has failed again, so today we are pulling everything again and will have the lower valve electrically welded. If the pump then fails, and there is no water, I am afraid we are beaten. We can only conclude that the well is going dry. We hope not, since there is no well to replace it except one in the barn and the water is not very good.

What has already been done means a big labour A/C. We hope the well is not drying up but it is possible since there has been so little precipitation during the past two years. The Town of Gleichen had similar trouble in 1934 and a second well had to be drilled. We must hope for the best.

Your obedient servant,

Indian Agent.

Ottawa, February 7, 1935.

Sir:

I have your letter of the first instant, regarding the water supply at the Old Sun Indian Residential School. In this connection it is noted there is very little supply of water in the well and that the pipe has been pulled up and overhauled several times, in an effort to obtain a better supply.

As stated by you, the small quantity of water is, no doubt, due to the lack of precipitation during the past two years. It is hoped that conditions will soon improve and that an ample supply of water will be obtained. Would you recommend the deepening of the well? No doubt, there was certain expense incurred in the pulling up of the pipe. The Department will be prepared to pay for this work, upon receipt of a certified account, in triplicate, from you. Full details should be shown on the account, regarding the number of hours employed and the rate paid per hour.

I shall be pleased to be advised, later, if the water situation has improved and, if not, what steps you would recommend be taken in the matter.

Your obedient servant,

A. F. MacKenzie,
Secretary.

File 3676

Calgary, Alberta, Feb. 8, 1935.

Preliminary Report
on
Well Situation
at
Old Sun Indian School,
Gleichen, Alberta,
by P.A. Fetterly.

1. Purpose of Report.

Mr. G. Gooderham, Indian Agent, of Blackfoot Reserve, Gleichen, Alberta, phoned this office on Feb. 6, stating that the well at Old Sun School was failing. He stated that he had written to the Indian Department at Ottawa about Feb. 1 on the matter but that as some days would elapse before our Calgary Office would receive instructions, and since immediate action seemed necessary, he wished to have the writer investigate immediately. He stated that no expenses would be needed on the part of this office as he would supply gas, meals, etc.

The writer, after consultation with Mr. Hoover, proceeded to Gleichen on Feb. 7. He interviewed Mr. Michel, Gleichen plumber, who has been attempting to rehabilitate the well; Mr. Gooderham and Rev. Mr. House, Principal of the School.

2. Result of Investigation

(a) Former Activities

Reference to a report by the writer dated

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

2.

Feb.2, 1933, will indicate that the original well contained a 3½" pipe and 3¼" cylinder, installed in 1930. The pipe and cylinder were found to be too large, causing breakages, the load being too heavy for the plant. Consequently a 3" pipe and 2¼" cylinder were installed. This installation worked efficiently, until about Dec.25 1934. Trouble has occurred every day since then, a period of over six weeks.

(b) Primary Cause.

The primary cause of the trouble appears to be the lowering of the water table; in other words, the supply of water is lessening, the pump is removing water faster than it comes into the well. Every well in the vicinity of Gleichen has lessened considerably, including the two town wells, during the last year.

(c) Behaviour of Well.

The trouble began about Christmas. The pump activates for several hours. It then ceases to yield water. The plumber from Gleichen, Mr. Michel, then goes to the school (one mile south), disconnects the working head, and raises the rods and plunger a few inches in the cylinder (working barrel) by means of a chain and block which he installed in the pump house. After the first release the whole string jumps a foot, apparently releasing air. It then settles down and he reconnects everything. The pump will then activate properly for the rest of the day. Next morning he repeats the operation. Since Christmas he has had to do this every day except two days.

Indian Affairs. School Files.
(RG 1C, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

The writer tested the capacity of the well on Feb. 7, 1935. The well was idle for about half an hour while being disconnected and until an outside discharge pipe was connected. The performance was as follows:

3.35 p.m.	7½ gal. per minute.
3.40 "	5½ " " "
3.50 "	5½ " " "
4.30 "	5½ " " "
5.10 "	5-1/8 " " "

(d) Mr. Michel's Experiences.

Mr. Michel states that it never falls below 5 gal. per minute. He thinks that while idle the water rises 29' in the 8" casing of this 175' well. Then for a few minutes it pumps to full capacity (7½ gal.) per minute. Then the water is being pumped out faster than it comes in and the cylinder "sucks" air. This air stays in the cylinder and at last becomes so compressed that water is prevented from coming in through the lower valve. By disconnecting the working head and raising the rods and plunger - supposedly to a point just above the cylinder, the air is released and works efficiently as before until sufficient air accumulates to prevent ingress of water. In other words the cylinder becomes air-locked. It is known that so much air enters the pressure tank that the regular air-compressor is not used at all. On the contrary air is let out of the pressure tank for half a day at a time through the stop-cock on the glass gauge because

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

so much compressed air comes in with the water, It was noticed that the water from the discharge pipe yesterday was continuously full of tiny air bubbles.

Mr. Michel states that in 18 years' experience around Gleichen with wells he has never met this particular type of difficulty.

(e) Mr. Joe Maughan of Calgary, Well Driller.

Mr. Maughan, who rehabilitated the well at Sacred Heart Indian School last year, was interviewed to-day on the matter. The action was described to him. His opinion was that the length of pipe under the cylinder was too long or too short. He thinks that a vacuum is formed in the cylinder instead of compressed air. Thus on release the water rushes in through the bottom valve. He also thinks that an air hole $\frac{1}{2}$ " diameter should be drilled just under the working head to allow air to enter the casing as he thinks that a vacuum is being gradually produced in the casing. The writer visited Cranes Limited, who provided the working head. They stated that the casing does not fit tightly (air-tight) on the top of the casing.

(f) Bell and Morris.

This firm provided the Hoosier cylinder in use. Their opinion was that a length of $1\frac{1}{2}$ " pipe should be inserted below the cylinder (the well is 12' deeper than the pipe) so that the pipe will always be below the

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

surface. This is an obvious partial solution, of course, and occurred to the writer yesterday.

3. Remedies

The troubles are apparently two in number, viz:- apparent misbehaviour of the cylinder as described above. The plant has a larger capacity than the well will produce under present climatic conditions. Several remedies were proposed, as follows:-

(a) Mr. Michel.

Mr. Michel wanted to replace the 3" pipe and 2½" cylinder with a 1" pipe and 5/8" cylinder. This would produce 3 gal. per minute or more, being less than the probable 4 to 5 gal. capacity of the well, and thus being on the safe side. The writer negatived this solution for the present as being too expensive after the installation of two years ago and also because it would produce only 2160 gallons per day, the requirements of the school being 6000 gallons or more. It might be added that the present working head delivers with a 12" stroke, 40 strokes per minute with a 3 h.p. motor, $0.309 \text{ gal. per stroke} \times 40 \text{ strokes} = 12.4 \text{ U.S. gallons} - 10.3 \text{ Imp. gallons}$. Please note that the writer's full supply test was 7½ gallons per minute. Mr. Michel then proposed another alternative. This was to leave the plant as it is, but to demount the 3 h.p. motor from the top of the working head, suspend it from the ceiling to the east of the working head, place a pulley wheel on the drive shaft of the working head, and drive with a belt. The motor would be 7" away from the working head. The belt would be 7' centre to centre of pulley wheels. The pulley

Indian Affairs. School Files.
(RG 1C, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

wheels would be chosen so that their ratio would be 2 to 1, i.e. change from 40 strokes to 20 or, better still 5 to 2, and so reduce the strokes to 16. The production would then be 16 fortieths of 10.3 gallons or about 4 gallons per minute, which is a little less than the apparent capacity of the well.

The latter is the more sensible solution.

Mr. Gooderham, Indian Agent, and Rev. Mr. House, Principal.

Mr. House thought that possibly another well would have to be drilled. This is of course out of the question until the present well proves useless. He also was apprehensive of the fact that the 3 h.p. motor on the working head was only doing a portion of this work and so he was using twice as much electrical energy as he needed to activate the pump. The writer interviewed the Canadian General Electric on this point. They stated that if a 3 h.p. motor was called on to do, say, $1\frac{1}{2}$ h.p. of work, then the electrical energy was only about 1% or 2% more than $1\frac{1}{2}$ h.p. In other words the energy used is directly proportionate to the load regardless of the h.p. of the motor. Mr. House also complained that the power (Calgary Power Company's lines) fails for two weeks at a time occasionally, and after every thunder storm. At these times they have to haul water by team. He would like to have an auxiliary gas engine to connect up with the working head for use in time of failure of power. His point is well taken.

He has a well under the stables motivated

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

by a 3 h.p. motor. This well has been condemned for human consumption because of location. He objected to the use of a 3 h.p. motor here also as the load is much less than capacity. This well produces 3 gal. per minute by test yesterday. However his point is not well taken in this case as the above argument appertains here also as regards cost. The total bill for power for the two wells amounts to \$55 per month, according to Mr. House. He thinks this unnecessarily high, although it does not appear so to the writer, considering the rates at Gleichen nearly 100 miles away from the source of power, Ghost Dam.

Expenses are high at the school and present revenue is barely sufficient to allow them to carry on.

Mr. House would also like to have a windmill on the barn well to take care of this load. This point is also well taken as he would save considerable expense. This well has 138' of pipe, i.e., about 140' deep.

One water vein is at 65', the next is at 125' and the next at 175'. One horse power would raise 13.8 Imp. Gallons per minute to a height of 150'. Therefore 3 gal. per min. would be lifted 150' by a 10' windmill producing $3/5$ h.p. in a 15 mile wind. An 8' mill would leave no factor of safety. The cost of this windmill complete would be about \$150 with a tower 35' high.

(4) Conclusions.

The writer tested the well for 2 hours on Feb. 7, at the end of that time the well was still producing 5 gallons per minute. Mr. Michel and Mr. House both stated that the well

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

would be air-locked in the morning and would have to be temporarily rehabilitated. The writer considered waiting until morning unnecessary.

Mr. Gooderham called at the office in Calgary on Saturday morning, February 9, and stated that Mr. Michel has pulled all of the pipe four times since Christmas. These operations are gradually spoiling all of the threads and should be done as little as possible.

After discussion with Mr. Gooderham on Feb. 9 it was decided to pull the pipe on Tuesday (Monday is wash day). He will take a new cylinder with him to Gleichen, also a length of $1\frac{1}{4}$ " pipe. On receipt of news the writer will proceed to Gleichen on Tuesday and experiments will be carried on in an attempt to correct the difficulties.

Meanwhile the matter of an auxiliary Lister engine for the house pump and a windmill for the barn pump, together with the question of remounting the motor, can be left in abeyance. The latter problem which is involved with available supply, may be solved by the use of a $1\frac{1}{2}$ " pipe below the cylinder.

O.H. Hoover
.....
O.H. Hoover.
Engineer-In-Charge.

P.A. Fetterly
.....
P.A. Fetterly
Asst. Hydraulic Engineer.

Calgary, Alta. Feb. 9, 1935.

P.S. After the conversation in the Calgary Office

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

with Mr. Gooderham, it was expected that Mr. Michel would pull the pipe and rods on Monday, Feb. 11, attach the cylinder borrowed by Mr. Gooderham from Bell & Morris, and try again. However, Mr. House called the writer on the phone Saturday evening and said that there was seven or eight feet of pipe already below the cylinder and that Mr. Michel did not want to pull the pipe unless absolutely necessary as the threads and bolts were wearing badly, it having been pulled four times since Christmas. Mr. House wished the writer to authorize remounting and gearing the motor down from 40 to 16 or 20 strokes.

The writer called Mr. Maughan on the phone today to ask him whether he would be prepared to accompany Mr. Hoover and himself to Gleichen on Thursday or Friday. He agreed to do this providing expenses were paid together with a small unstated honorarium.

This will be carried out on Thursday or Friday. This is in accordance with your letter of Aug. 3, 1934, your file 41167-W., our file 4927, regarding emergency calls such as this one.

DOMINION WATER POWER AND RECLAMATION SERVICE

CALGARY, ALTA. February 11, 1935.

Re Old Sun School

Sir,-

Please find enclosed a Report in duplicate,
on the Well at Old Sun School, Gleichen, Alberta,
prepared by P.A. Fetterly of this staff.

As this information was completed at no
expense to this office or to the advance from the Indian
Department, I instructed Mr. Fetterly to proceed to
Gleichen.

I called Mr. Maughan on the phone to-day to
ask him whether he would be prepared to accompany Mr.
Fetterly and myself to Gleichen on Thursday or Friday
to examine the well. He agreed to do this providing
his expenses were paid. He would also accept a small
honorarium of unstated amount.

Enc.

I will carry out this plan, probably on
Thursday morning, before Mr. Michel, the plumber, releases
the air-lock. Mr. Michel will be away from Gleichen for
two or three days.

I beg to refer you to your letter of August 3,
1934, your file 41167-W, our file 4927, regarding emergency
calls such as this one.

Your obedient servant,

Engineer-In-Charge.

Sir,
Re: Old Sun School, Gleichen, Alberta

I enclose herewith copy of a letter dated the 11th instant regarding the well at the Old Sun School, Gleichen, Alberta, together with the report by Mr. P.A. Fetterly dated the 9th instant, from which you will see that some difficulties have developed which require attention.

A further report on the subject is expected in a few days, which will be forwarded as soon as received. From Mr. Fetterly's report I understand that Mr. Gooderham, the Indian Agent, has already written to the Department on this subject.

OLD SUN RESIDENTIAL SCHOOL

It is also agreed that boarding school conditions could always be improved. I have never been enamoured with church schools, but on the reserve, at the moment, they are looking after the health of the children quite well. The Anglican School has a fine infirmary and lots of dormitory space. They could care for & feed more children but there is no nurse on the staff and a capable nurse is required before they should be entrusted with diseased children.
..... Old Sun's have no nurse and should not have charge of active t. b.'s

Should not be

INTERIM REPORT
ON
WELL SITUATION
at
Old Sun Indian School,
Gleichen, Alberta,

by P.A. Fetterly.

1. Purpose of Report.

This report is submitted subsequent to a visit to the above-named school on February 18 by Messrs. Hoover, Wm. Maughan, Manager of the Union Drilling and Development Co. (named "Joe" in the preliminary report, dated February 8) and the writer. The imminence of this visit was mentioned in the report of February 8.

2. Result of visit.

The matter was discussed, and the well examined, by those mentioned above, with Mr. Michel, the plumber at Gleichen. No decision was reached as to whether the trouble was caused by compressed air or by a vacuum. A most searching enquiry was made by Mr. Maughan, than whom there is no better in the West, in the opinion of the writer, as he has obviously made a scientific study of these matters, being a theoretical as well as a practical well man.

His suggestion, after canvassing the matter thoroughly was as follows:-

The well is 177 feet deep. The cylinder

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 8)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

2.

is 153 feet deep. The cylinder is therefore 24' from the bottom of the hole. Under the cylinder is a 3" pipe, a continuation of the main 3" pipe, 18' long in which 1/4" holes were drilled by Michel below a point 12' below the cylinder. In other words, the last 6' were drilled with 1/4" holes close together. This is, then, virtually a screen. The bottom of this pipe is plugged and would be 12' from the bottom of the hole.

Mr. Maughan suggested that the cylinder be lowered several feet and a short piece of perforated pipe be placed below the cylinder. The clearance between the bottom of pipe and bottom of hole need be only 2 or 3 feet. He thought that the automatic switch, whose limits as to minimum and maximum pressure are now 25 and 55 lbs., should be 30 lbs. and 40 lbs. respectively. This would prevent the present wide spread of pressures. He suggested that the mounting of the motor or change of gearing from 40 strokes per minute to 16 or 20 be left for the present. He naturally will not guarantee that this will cure the trouble as the cause is not yet certain. However, in answer to this suggestion the following material has been ordered for immediate delivery:-

- 1 length (18' or 20') of 3" plugged and reamed pipe.
- 2 - 20' lengths 1-5/8" Octagonal wooden pump rods with 3/4" Blacksmith couplings attached.

The Crane Co., who supplied the working head and automatic switch, state that the switch need not be replaced as the present one may be adjusted.

3.

3. Further Developments.

Since writing the above it has occurred to the writer that the trouble may be caused by natural gas, i.e., that gas in some way became incorporated with the underground water about Christmas time. If that be the case, then the gaseous substance pumped into the pressure tank would be natural gas, not air. It would also follow that gas would be present in the cylinder, instead of air. In that case the accumulations over night in the pipe would be gas settling from the water and rising as far as possible, i.e., to the cylinder. This is rather a startling idea for several more or less obvious reasons.

No test was made of the nature of the gas in the water - the fine bubbles are easily noted in the free water immediately after pumping - either yesterday or during the last visit as air only was considered to be present. However one of the staff mentioned that a distinct odour of "coal oil" was noted in a pitcher of water standing over night but little attention was paid to this information at the time.

This new aspect of the case should and will be examined as soon as possible.

Mr. Michel is ready to attempt anything as he has reached the limit of his knowledge. Incidentally, he mentioned that when the screw valve in the supply pipe to the pressure tank, about 2' from the working head, is unscrewed, the gas - with little or no water -

CANADA

4.

shoots into the air, and would drive the 1 lb. screw cap 10' into the air if he allowed it. Gas is therefore present in this pipe at high pressure after pumping all day and allowing to stand all night, instead of water.

You will be advised of further developments.

IN YOUR REPLY REFER TO
NO. 401-11A.C.E.
ALSO TO DATE OF THIS LETTER

INSPECTOR'S OFFICE

PB CALGARY, ALTA., February 23rd, 1935 .

Sir,

Replying to your letter No. 104-1-6 of the 2nd instant in connection with rubber hose, couplings, and nozzles, &c., for the Old Sun Indian Residential School on the Blackfoot Reserve, I have asked Mr. Gooderham to check this up again and he now advises me that the 7 hose require to be replaced. At the time of my visit we were under the impression that one of them would last a while yet, but we will now require 7 50-foot hose, 1 1/4" inside measurement, with 7 couplings sweated into the hose, couplings to be 1 3/4" inside and 2" outside measurement, and two nozzles to fit the hose. The other five nozzles are in good condition.

I would recommend that rubber-lined hose be supplied: Although they cost a little more they last much longer and they are much more satisfactory.

Seven reels of the round type are also required.

Your obedient servant,

M. Christianson,
Inspector of Indian Agencies,
Alberta Inspectorate.

The Secretary,
Dept. of Indian Affairs,
OTTAWA.

Ottawa, March 5, 1935.

Sir:

I have your 401-11A C.E. of the 23rd ultimo, regarding the fire hose, couplings and nozzles required for use at the Old Sun Indian Residential School.

In reply I have to say that prices will be obtained here and the quantity of hose, couplings and nozzles forwarded to Mr. Agent Gooderham. The account covering the cost will also be forwarded to Mr. Agent Gooderham, to be certified by him and forwarded for payment when the goods are received.

The Department is not prepared to supply the reels on which to place the hose. We understand that there are at present in the building hose racks which can be used.

I may add that the Department is supplying linen hose, rather than rubber lined, as this is the type furnished other schools. Mr. Agent Gooderham is being informed.

Your obedient servant,

Sir:

I have to inform you that an order will be placed here for the supplying of seven 50 ft. lengths of 1 $\frac{1}{2}$ " fire hose, with 7 couplings and also two nozzles to fit the hose. This is the quantity of fire equipment stated in a recent letter from Mr. Inspector Christianson as being required at this school.

The account, in triplicate, with receipt for transportation charges prepaid, if any, will be sent you. Upon receipt of the hose, if satisfactory, please certify the account in the usual manner and forward for payment. I shall be pleased if this account is forwarded to reach the Department before April 10th, next, in order that payment can be made from our Appropriation for the current fiscal year.

Old Sun Indian School
at Gleichen, Alta.

Sir,-

In further reference to repair work at the above Indian School as mentioned in our report of the 19th ultimo, please find herewith, in quadruplicate, invoices from Bell and Morris, Calgary, Alta., for \$37.16 covering material supplied for the above repair work. It is recommended that this account be paid and I have forwarded the same as soon as possible in order that it might be disposed of before the end of the fiscal year.

Encls.

Since our report it has been learned that the automatic switch at present in use (having limits of 25 and 55 lbs. respectively) is of an old type, and cannot be adjusted to give limits of 30 to 40 lbs., and it may yet be found necessary to purchase a new switch.

Certain repairs with the material already purchased will however be made first and a further report will be forwarded when the information for the same is available.

Sir,- Re: Old Sun School, Gleichen, Alberta.

With further reference to my letter of February 15th last, regarding the well at Old Sun School near Gleichen, Alberta, I am advised by Mr. Hoover that since the repairs were made according to our specifications no further trouble has been encountered. At the present time plenty of water can be obtained except in cases when there is an abnormal draught on the supply. The pump is still sucking a certain amount of air which has to be disposed of from the pressure tank, but no airlocking has taken place.

The Reverend Mr. House is noncommittal regarding a permanent cure but at present no further attention appears to be necessary and Mr. Hoover has arranged that Mr. House will communicate with him in case any difficulty arises.

Re: Voucher # 512.

Dear Sir:-

On receipt of your letter of February 1st File 104-1-5 with regards to the installing of an electric pump etc. to correct the heating system at Old Sun Residential School, I immediately interviewed Mr Alec Walker, representative of the Dunham Heating Systems, and asked him to see that the work proceed immediately.

The work was done by F.H. Lepper & Co and I submit herewith account in their favour. I may say that Mr Walker checked the account before it was submitted to this office and found it o.k.

Your obedient servant,

Indian Agent.

The Secretary,
Dept. of Indian Affairs,
Ottawa, Ont.

INSPECTOR'S OFFICE

PB CALGARY, ALTA. April 16th, 1935.

Sir:

I beg to refer you to Dept.'s letter No. 104-1-5 of Feb. 5th last, in connection with repairs, &c., to Old Sun's School. As instructed, I have asked the Agent to give me an estimate of the cost of the various items and this is what he recommends:

Replacement of present silo.....	\$250.00 ✓
Paint, oil and varnish for interior.....	100.00 ✓
Cupboards for clothing in bale room, sewing room & dorms.....	300.00
Chicken house.....	700.00 ✓
Painting the barn.....	275.00 ✓
Windmill, and cleaning barn well.....	200.00

I believe this amounts to a great deal more than the Department is prepared to authorize and I would suggest that the following be gone on with if the Department have the funds:

✓ Replacement of present silo.....	\$250.00 -
✓ Paint, oil and varnish for interior decorating.....	50.00 -
✓ Cupboards.....	150.00
✓ Suitable chicken house I think could be built for.....	500.00 -
✓ Painting the barn.....	275.00 -

Cleaning out barn well, but not the windmill, as they have an electric pump to do the pumping. We could have Mr. Fetterly of the Dominion Water Power Branch look after the cleaning out of the well and I am sure this could be done for probably much less than \$100.00. 103 25

Your obedient servant,

M. Christianson,
Inspector of Indian Agencies,
Alberta Inspectorate.

The Secretary,
Department of Indian Affairs,
O T T A W A .

MEMORANDUM:

The Honourable The Superintendent General.

In the Appropriation for Indian Education for the current fiscal year, provision has been made for the following replacements at the Old Sun's Indian Residential School (Blackfoot Reserve No. 146 - Electoral District of Bow River):-

- (1) Replacement of present silo, approximately \$250.00.
- (2) Paint, oil and varnish to paint barn and for interior decorating \$325.00
- (3) New chicken house \$500.00
- (4) Cleaning out well at barn \$100.00

The above estimates have been submitted to the Department by Mr. Inspector Christianson.

I would recommend that the arrangements for the above work be left in the hands of Mr. Indian Agent Gooderham and Mr. Inspector Christianson, who will make all purchases from approved sources of supply.

Ottawa, April 30th, 1935.

Sir,-

With reference to your 401-11A. C. E. of the 16th instant regarding repairs required at the Old Sun's Indian Residential School, I beg to say that the following improvements may be made:-

- E.R. 3368 (1) Replacement of present silo \$250.00
 " (2) Paint, oil and varnish to paint barn and for interior decorating . . \$325.00
 E.R. 3367 (3) New chicken house \$500.00 X
 E.R. 3368 (4) Cleaning out well at barn \$100.00

The handling of the above improvements at the Old Sun's School will be left to Mr. Agent Gooderham and yourself. Purchases of materials should be made from firms on the approved list. You should be guided by previous instructions regarding the employment of any labour that is necessary, although it is hoped that the school authorities will give every possible assistance and, by this means, keep the cost as low as possible.

The Department does not see the necessity of employing Mr. Fetterly to look after the cleaning out of the well. You can engage a competent person to do this work and Mr. Agent Gooderham can supervise it.

Your obedient servant,

A. F. MacKenzie
 A. F. MacKenzie.

INSPECTOR'S OFFICE

PB CALGARY, ALTA., May 31st, 1935.

Sir:

Re Old Sun's School at Gleichen:

The sum of \$500.00 has been authorized for the hen-house at this school. When Mr. Christianson, Mr. Gooderham and myself were there yesterday, we found that the material for the hen-house will amount to approximately \$650.00. This means about \$150.00 more than already authorized. I thought it advisable to have the work go ahead, so I authorized the additional expenditure in this regard. The labour is being done by the School Staff.

The extractor in the laundry recently went out of commission and is being fixed. This will probably involve an expenditure of \$25.00 or \$30.00.

You will remember that the Principal wrote a few weeks ago requesting some manual training tools. He has a room fitted up for this purpose and as both the Inspector and the Agent consider it very advisable to go ahead, I authorized Mr. Christianson to incur an expenditure not exceeding \$50.00.

Your obedient servant,

The Secretary,
Department of Indian Affairs,
O T T A W A .

Sir:

I have to acknowledge receipt of your telegram of the 19th instant, regarding the repairs required to the domestic water boiler at the Old Sun Indian Residential School.

In this connection I have to say that the Department will approve of an expenditure, not exceeding the sum of \$150.00, in retubing and placing the boiler in a good, serviceable condition. After the work has been completed, please forward an itemized account, in triplicate, covering the cost. The length of time any outside labour was employed and the rate charged per day or per hour should be definitely stated on the account. I would request that you arrange to have the water boiler placed in a good, serviceable condition as soon as possible.

Your obedient servant,

A. F. Mackenzie,
Secretary.

Sir:

I have to acknowledge receipt of your telegram of the 10th instant, requesting authority to incur the expenditure required in moving the starter for the extractor at the Old Sun's Indian Residential School, in order to overcome the present difficulty in short-circuiting.

In this connection I have to say that the Department will approve of an expenditure, not exceeding the sum of \$45.00, in having the above work carried out. After the work has been completed to your satisfaction, you should forward an account, in triplicate, properly certified, covering the cost.

The Department has incurred considerable expenditure at this school during the present fiscal year, and it is hoped that there will be no further large expense required.

Your obedient servant,

A. F. MacKenzie

FIRE, MARINE
AND AUTOMOBILE
INSURANCE

Newark Fire Insurance Company

Calgary,

7th September, 1935.

L. Nichols

Resident Inspector

Bank of Toronto Building

G. A. McKinnon, Esq.,
Drumheller, Alberta.

Dear Sir:-

Re Policy #2237-Department of Indian Affairs,
Ottawa, Ontario.

With reference to our conversation yesterday regard-
ing the proposed re-arrangement of the above insurance, we now
enclose, as requested, copy of our Western Branch letter of August
26th addressed to us relative to a reduction in rate on this
policy which can be applied if the cancellation and replacement of
policy could be arranged at some early date.

Enclosure

mentioned did
not accompany
this letter when
received in
Minister's
office.

Minister's Office

You will notice that the new three year rate which
is applied is .85% which would result in a substantial saving
to the Assured for the same amount of insurance if
ten for a further three year term. Cancellation of the
presently in force, could be arranged as from any near date
on a rate basis, and if, for instance, this were made effective
on, say, October 1st of this year a refund of \$174.76 could be
made and applied on the reduced three year premium under the new
Policy.

We trust, as arranged during our conversation, that
you will take this matter up with the Department as soon as possible
and endeavour to make the suggested re-arrangement which would be
advantageous to the Assured, and if you would let us know when you
have done so, and, if possible, let us have a copy of your communication
to them, we would be glad to arrange to have our Ottawa Office follow
up the matter for you.

Yours truly,

[Signature]

RESIDENT INSPECTOR.

Amount of \$80,000.
Old rate .97

M. McKinnon.

LM/MB

Would like to receive copy
of your letter to Dept. as soon as possible
to enable us to follow matter up.

MEMORANDUM

Minister's Office

September 23, 1935

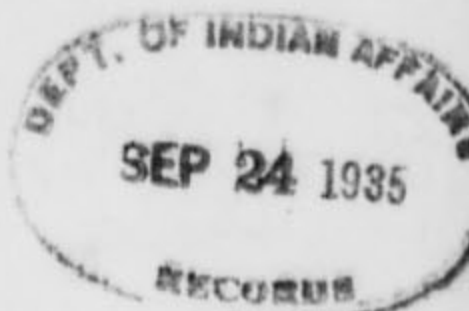

DR. MCGILL

I am sending you, herewith, a letter addressed to Mr. C.A. McKinnon, Representative of the Newark Fire Insurance Company at Drumheller, Alta., with reference to the policy for \$80,000. carried by the Company on the Old Sun's Indian Residential School.

You will observe the Company is prepared to cancel the present policy on a pro rata basis and to issue a new policy for three years at a rate of 85¢ as compared to 92¢, which is the rate at present in force. This arrangement would appear to be quite satisfactory, and I wish you would advise me if the department is prepared to act on Mr. Michols' suggestion.

George Buskard
Private Secretary.

September 24th, 1935.

MEMORANDUM:

THE HONOURABLE THE SUPERINTENDENT GENERAL.

Referring to your memorandum of the 23rd instant, enclosing a letter from the Resident Inspector of the Newark Fire Insurance Company in which he proposes that the present policy No. 2787 for \$80,000.00 carried on the Old Sun's Boarding School Buildings be replaced by a new policy, I would advise that the change is being approved and Mr. C. A. McKinnon of Drumheller, Alberta, who wrote the policy now in force, is being instructed to have the change made.

The present policy will not expire until the 17th of June, 1936, but it carries a rate of .92% and the proposition is to write the new policy at .85%, thus effecting a saving of .07%.

I consider it advisable to make this change as it will effect a saving and the premium is paid from the Black-foot Funds, the policy being carried to protect the band's equity in the property.

ASW

Deputy Superintendent General.

Ottawa, September 24th, 1935.

Dear Sir:-

Your letter of the 7th instant, addressed to Mr. C. A. McKinnon, your Agent at Drumheller, Alberta, has been forwarded here and enclosed please find copy of a letter addressed to Mr. McKinnon.

This conveys full information and will expedite the matter of issuing a new policy to run for three years from the 1st of October at .85% and replaces Policy No. 2287 now in force.

Yours very truly,

Deputy Superintendent General.

L. Nichols, Esq.,

Ottawa, September 24th, 1935.

Dear Sir:-

The letter of Mr. Nichols, Resident Inspector at Calgary of the Newark Fire Insurance Company, of the 7th instant, addressed to you has been received. This letter has reference to Policy No. 2287 carried on the Old Sun's Boarding School Buildings.

I note that the Insurance Company is prepared to re-write this insurance at .85% instead of the rate .92% charged in 1933. Policy No. 2287 for \$80,000.00 does not expire until the 17th of June, 1936. The Insurance Company offers to cancel the present policy on a pro rata basis making a refund of premium for the unexpired portion of the insurance term.

This is acceptable to the Department if the new policy will in every way conform to the conditions under which Policy No. 2287 was written. It will be in order for you to forward a new policy at the rate of .85%, or if it is necessary to forward the old policy before a new one will issue, I shall send it upon request. In making the change, I would suggest that the date of the 1st of October be selected.

A copy of this letter is being sent to Mr.

Nichols.

Yours very truly,

mb

Harold W. McGill, Esq.,
Deputy Superintendent General,
Department of Indian Affairs,
Ottawa, Ontario.

Dear Sir:-

Re Policy #2237 - Department of Indian Affairs

We acknowledge and thank you for your favour of the 24th ultimo enclosing copy of your letter of the same date addressed to our Agent, Mr. C. A. McKinnon at Drumheller, Alberta, and in accordance with your instructions, and at Mr. McKinnon's request, we now have pleasure in enclosing herewith Policy #47365 which, as arranged, has been issued for the same amount of \$80,000. at the reduced rate of .85¢ for a further three-year term as from October the 1st, 1935.

The latter document replaces No. 2237 which has been cancelled on a pro rata basis as from the same date and the refund in this connection to be applied on the new premium amounts to \$174.76. Will you please sign the Surrender Form on the latter document thereafter returning the Cancelled Policy to us, together with the attached application also signed at the places indicated, to complete our records, and oblige.

Our Statement of Account is also enclosed showing the net amount of premium due and for which we would be pleased to receive payment to dispose of the transaction as soon as possible.

Kindly accept our thanks for the consideration you have given this matter which is very much appreciated by Mr. McKinnon and ourselves.

Yours truly,

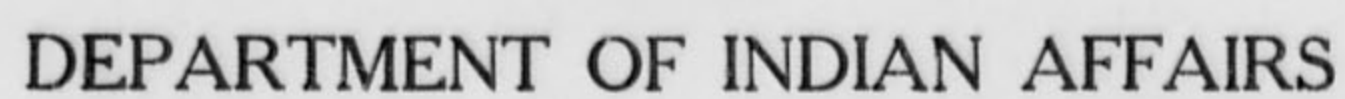

L. Nichols
RESIDENT INSPECTOR.

Dear Sir:-

Your letter of the 1st instant, is acknowledged enclosing a new policy for \$80,000.00 on the Old Sun's Indian Residential School. This policy replaces Policy No. 2287 which is enclosed with the surrender form signed and cancelling it.

I am also enclosing the application form for Policy No. 47365 duly signed and dated. A cheque for \$505.24 for the balance of premium due you will go forward.

It is desired to thank you and your Company for the lower rate allowed on this insurance.

Yours very truly,

Sumner

Deputy Superintendent General.

P. Fetterly, Esq.,
Water Power & Hydr. Bureau,
Public Bldg., Calgary.

Dear Mr. Fetterly,

Having heard from the Rev. J. W. House, Principal of our Society's Indian Residential School on the Blackfoot Reserve, of the splendid help you so freely gave him in planning a system of irrigation which will be a great help when completed, to the School Management as well as to the Indians on the Reserve I desire on behalf of our Indian Residential School Commission to thank you very sincerely for this cooperation, and to let you know how greatly it is appreciated by all concerned Mr. House has stated that without your help, the irrigation project he had in mind could never have been undertaken and knowing as I do, the need of it, I am able to fully appreciate the value of the help you have given.

With kindest regards and the best of good wishes for a Happy Christmas and Prosperous New Year.

Believe me,

Faithfully Yours,

T. B. R. Westgate,

Field Secretary, M. S. C. C.

Sir,-

Enclosed please find two copies of a letter
received from the Missionary Society of the Church of
England in Canada.

Encs.

The letter has reference to a scheme described
in two reports by P.A. Fetterly of this staff, one dated
June 26, 1931, the other Feb. 20, 1932, wherein water is
obtained from Buckley Spillway and used to irrigate the
river flat.

Rev. Mr. House constructed the ditch, as originally
located, in September and October of this year under general
supervision of Mr. Fetterly.

Water will be turned on in the Spring.

Will you be kind enough to send one copy to the
Indian Department.

Your obedient servant,

D. H. Hoover

RE: Voucher #451

Dear Sir:-

The sewer outside the main building at Old Sun School plugged up on the 16th of September and two men dug through the night to enable Michael to clear with water pressure. Authority for this work was given from this office as it was urgent.

The balance of the account was for minor repairs which were necessary and the Principal called on Michael to attend to them.

EX'D.

Ottawa, March 14, 1936.

Dear Sir:

In official letter of April 30th, last, you were authorized to incur an expenditure of \$500 in the erection of a new chicken house at the Old Sun's Indian Residential School. Later it was understood that the total cost of the material for the hen house would be \$650.

The Department does not appear to have received any accounts in connection with the purchase of this material. Please advise me at once if this work was done, and, if so, the accounts should reach the Department before the 31st instant.

Yours truly,

A. F. MacKenzie,
Secretary.

Ottawa, May 11th, 1936.

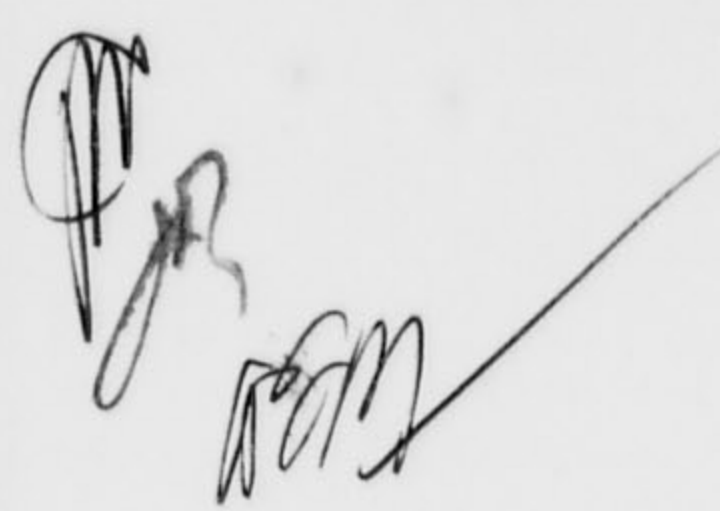

Dear Sir,-

The Department is in receipt of your voucher No. 28, for \$145.00, in favour of Stanley Brock Limited, for overhauling the starting unit at the Old Sun's Indian Residential School.

The account is not itemized and, to comply with present regulations, it will be necessary to attach to the account the letter you received from Stanley Brock Limited, dated April 6th. I would appreciate if you would forward this to the Department.

Yours truly,

A. E. Mackenzie.

Mr. G. H. Gooderham,
Indian Agent,
GLEICHEN, Alberta.

Dear Sir:

We have gone thoroughly into the matter of supplying a starting unit for your 26" Beaver Extractor with our principals, The Canadian Laundry Machinery Co., Toronto, and they advise that the motor being wired for the type of power used, i.e., 220 volt, single phase, 60 cycle, is the wrong type for an extractor of this size, and is bound to give considerable trouble. They are of the opinion that the motor should be re-wound for three phase as this is much better for extractor duty than single phase. However, upon taking this matter up with the Calgary Power Company, they advised that this type of power cannot be supplied to Gleichen so that remedying the situation in that manner is out of the question.

We might tell you that our people in Toronto were in touch with the Lincoln Electric Co. of Toronto who supplied the motor for your Extractor, but they were not in a position to supply a starting unit which they would guarantee to be free from trouble on an extractor of this size in view of the type of power being used.

It would seem, therefore, that the only thing left to do is to have the present starting unit thoroughly overhauled. This would mean having a new set of condenser units installed. We are advised by the Howell Electric Co. of Howell Michigan, who supplied the starting unit, that a new type of condenser unit is now being used to replace the ones with which your starting unit is equipped, and they state that the new type have given much better satisfaction. Since there are only four of the new type compared with eight of the old type, it is reasonable to expect that the new units will give greater satisfaction.

The fact that your starting unit has been moved to a more suitable location should also materially increase the efficiency of the starting unit, and should further add to its length of service.

401-11A.C.E.

PB

June 12th, 1936.

Sir:

I beg to refer you to my report on Old Sun's School at Gleichen, addressed to the Deputy Superintendent general, and to bring to your attention the following requests from the Principal arising out of his estimates sent to the secretary of the I. R. S. Commission in Winnipeg last summer:

Pig House.....	\$ 750.00
Brick Wainscoting.....	300.00
Cement to make walk around school.....	300.00
Paint for interior.....	150.00
Cupboards.....	200.00
Windmill for the barn pump.....	200.00
Shop for manual training.....	3000.00

I wish to point out to the Department that if there is any possible way of furnishing \$750.00 to build a pig pen I would strongly recommend this: We have a make-shift affair which is really not fit for use, and unless a piggery is built we will have to stop raising pigs at this school.

Regarding the brick wainscoting for the boys' play-room, they can do without this for another year. I will admit it should be done: Mr. Orr went over the school in the winter time and he is familiar with what is required. The cement walks around the school are also required and any amount that can be allowed will be appreciated. The paint for the interior is also required. We could cut this down to \$100 or \$125. The cupboards are required, but the school can do without these for the present. The windmill for the barn would, of course, be a saving to the school as they have to pump water there for about 16 hours every day, which uses up a lot of electricity. The work-shop for manual training is not absolutely essential at the present time. I trust that whatever expenditures can be allowed by the Department in connection with the above, will be authorized.

Your obedient servant,
The Secretary,
Department of Indian Affairs,

104-1-5.

EXD.

Ottawa, June 16, 1936.

Dear Sir:

I have your 401-11A C.E. of the 12th instant, regarding the requests from the Principal of the Old Sun Indian Residential School, arising from the estimates submitted by him to the Field Secretary of the I. R. S. Commission, last year.

In this connection I have to say that it was only possible to provide the following items in our Appropriation for this school for the current fiscal year:-

Paint for interior	-	\$150.
Miscellaneous repairs	-	450.
Windmill for barn pump	-	200.

The Department will approve of you arranging for the purchase, from a firm on the approved list, of the paint required for the interior of the school building, not exceeding in cost the amount of \$150. It is noted that it might be possible to cut this down to \$100 or \$125. If any saving in the amount provided can be made, this would leave a further amount for miscellaneous repairs. I would suggest, for the consideration of the Principal and yourself, that the funds provided for miscellaneous repairs be used in the purchase of cement to make walk around school and in supplying and installing cupboards. However, the amount of \$450 may be utilized as decided by the Principal and yourself in carrying out the work considered most urgent, and you may arrange for the purchase of the materials.

There will be no funds this year to erect a pig-house, to complete the brick wainscoting of the boys' playroom or to provide a shop for manual training.

Regarding the windmill for the barn pump, as stated above, the sum of \$200 is available for this purpose, and you may arrange for the purchase, from the best available source of supply.

Please obtain itemized accounts, in triplicate, covering the cost of the above authorized expenditures, which you should certify and forward in the usual manner.

Yours truly,

A. F. MacKenzie,
Secretary.

Aug. 7th. 1936

Mr. H. Gurney Orr,
Dept. Indian Affairs,
Ottawa.

Dear Mr. Orr,

When you were at the school, I shewed you the condition of the plaster in our boys play room. We have just been trying to patch it again and are finding that the metal lath is so loosened and sprung that the plaster will not stay in place. It bulges out as soon as it is finished and begins to break away. I'm afraid it has reached a point where it is about impossible to fix.

I think you said that brick from the floor to the level of the windows would not be satisfactory because of the difficulty of tying it to the wall, and your suggestion was to take the plaster right out and then replaster directly upon the hollow tile wall. I am not sufficiently experienced in the art of building to know what would be best, but I do know that a plastered play room for boys is an impossible proposition from the point of view of upkeep. Could you not help us to get something to take the place of that plaster.

I notice that the plaster is now beginning to separate farther up the wall. The reason for that seems to be that the lower part is so weakened that the weight of that above is gradually pulling it from the ceiling. I'm afraid the whole thing will come down if we leave it much longer.

The length of wall needing repair is 140 feet and the plaster is ruined to a height of 5 feet. That is just the outside wall and a few feet of the inside.

With kindest regards,
Yours very sincerely,

John W. House. Principal.

BLACKFOOT INDIAN AGENCY REPORT FOR MONTH OF JULY 1936.

x x x x

SCHOOLS:

EX'D.

At Old Suns the farmer succeeded in getting up 40 tons of feed and has 15 acres of splendid alfalfa under irrigation. This will make a nice tonnage this year. The chicken house was moved to a new location chosen by the writer, in rear of the school. Some repair and painting jobs were done but most of the work was left until the return of the Principal who was on holiday at the Coast. Garden crops are a failure.

RE: Voucher \$558

Dear Sir:-

Early in the year, the Frigidaire compressor at the Old Sun Residential started to knock and the Principal shut off the power. He phoned to me and explained the situation and said that his instructions were not to tamper with the sealed unit. I suggested he should call Bruce Robinson Company by phone as they had installed the unit.

They advised that this was a minor trouble and would be in the Gleichen District shortly and their service ~~man~~ man would correct the trouble. He found certain parts had worn and required replacement or adjustment.

We now receive this account but no authority was requested as we expected that the total would be less than Ten dollars. The work was done and the unit has worked satisfactorily since. I trust that the account will be paid.

Your obedient servant,

Ottawa, April 12th, 1937.

MEMORANDUM:

The Deputy Minister.

Request has come from Mr. Pratt that he be furnished with a list of properties in the Province of Alberta on which insurance is carried.

Only one policy of fire insurance is carried in the Province of Alberta and that is on the Old Sun Indian Residential School near Oleichen. This policy is for \$80,000.00 and is carried in the Newark Fire Insurance Company through Mr. C. A. McKinnon, Insurance Agent, Drumheller, Alberta. The policy runs for three years and will expire on the 1st October, 1938. The premium is \$680.00.

EX'D.

AGENT'S REPORT ON BLACKFOOT RESERVE FOR MONTH OF APRIL 1937.

SCHOOLS

I made very short visits to the schools this month. Pupils did not have holidays at Easter but got three days when Interest payment was made on the 15th & 16th. All pupils look well. The school farms and gardens are being seeded and work is being done very well. Some handicraft work has been started and Coronation Programmes are being prepared. The Principal at Crowfoot School wants more land, a problem to be considered and one which is not easy because Indian farmers are close neighbours and have valuable buildings on the land which the school desires. However, I believe there is a solution.

The Old Sun school is not so situated; unoccupied land near the school and in the flats where irrigation is possible is now capable of intensive production of feed and garden crops for this institution. This year, I expect that Old Sun's will grow all vegetables and feed required. Formerly this was impossible on dry lands.

G. H. Gooderham.

Old Sun School

Gleichen, Alta.

June 15, 1937

Mr. G. H. Gooderham
Indian Agent,
Blackfoot Reserve.

Dear Mr Gooderham,

In my estimates of requirements from
the Department for 1937 there were two items as follows

Paint \$125.00
Repairs to wall of boys' playroom .. \$300.00

As the summer holiday time is the only period when interior
painting and repairs can be conveniently done, I wish you
would ask the Department if I can have the paint right
away and the playrooms bricked within the next two months.

Our paint requirements are :

Inside white	15 gals
Ivory	10
Russet brown	3
French grey	2
White enamel	3
Outside green	5
French grey cement paint.. ..	2
Shellac	1
Brushes 3 1/2"	2
" 1 1/2"	2

It would be a convenience to us if we could have BAPCO
Satin Glo paint because that is the paint already on the
walls where patching is needed and, unless the same kind is
used, the colours do not match, often necessitating more
extensive painting than is really necessary. We have found
Satin Glo by far the best and most economical paint for
our walls.

For four years I have been asking that the boys playroom
be bricked or cemented and nothing has been done. The ine-
vitable has happened; instead of only having the lower part
of the walls falling to pieces we now have the plaster
to the roof loosening and if something is not done soon
we shall have a complete lining of the whole room to consi-
der. I wish you would bring this matter before the Depart-
ment as a real urgency.

Yours very sincerely

J. W. HOUSE Principal

Re: Old Sun Residential School

Dear Sir:

I attach hereto copies of a letter the Principal of Old Sun Residential School wrote to me as the result of an interview about estimated requirements.

The immediate need is paint. The school was erected in 1930 and during the past five summers, some painting of the plaster walls has been done. You know how dirty the unpainted plaster wall becomes and that the only real remedy is paint. He has also some outside work to do this year. The walls of the boys playroom are in bad shape. I would like you to see them.

I hope you can see your way clear to ask for the paint now. As Mr. House says, painting can only be done when the children are on holiday.

Your obedient servant,
(Sgd.) "G. H. GOODERHAM,"
Indian Agent.

Calgary, June 25th, 1937.

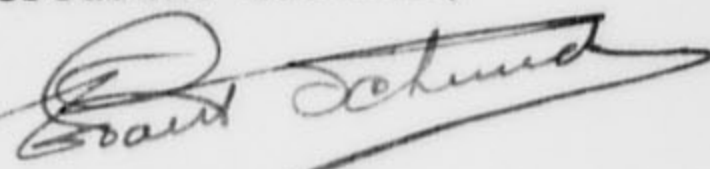

Sir:

I beg to enclose herewith copy of a communication addressed to Mr. G. H. Gooderham, Indian Agent, Blackfoot Agency, by Rev. J. W. House, Principal of the Old Sun Residential School, which speaks for itself.

The matter of brick waincoting in the boys' play-room was placed before the Department by Mr. Inspector M. Christianson last year, but was not allowed due to lack of funds. (Reference Departmental letter No. 104-1-5 dated June 16th, 1936.)

I recommend that the request for paint - \$150.00 be granted, and that Mr. Agent Gooderham be authorized to make the purchase. If funds are available I would also ask that the brick waincoting be authorized.

Your obedient servant,

C. Pant. Schmidt,

Ottawa, June 30th, 1937.

Dear Sir,-

The Department is in receipt of your letter of the 15th instant, addressed to Inspector Schmidt, with reference to certain requirements at the Old Sun's Indian Residential School.

Provision was made in the current year's appropriation for the sum of \$400 for repairs and improvements at the Old Sun's Residential School. You may, therefore, proceed with the painting and the repairs to the wall of the boys' playroom. The total cost must not exceed \$400., as this is the total sum available this year.

SURVEYS AND
ENGINEERING BRANCH

29th June, 1937.

Memorandum:

Mr. MacInnes,
Acting Director of
Indian Affairs.

A report has just been received from Mr. O.H. Hoover, Dominion Water and Power Bureau, Calgary, on the water supply from the well at Old Sun Indian School, Gleichen, Alta.

It appears that this well has been causing trouble for some years and in 1935 it was rehabilitated by changing the pipe and cylinder to a smaller size. This gave satisfactory results for one year but the same trouble - pumping air - again started with the result that the water supply is insufficient, probably due to water filling too slowly into the drilled hole.

As no suggestion has been made for correction of the trouble and as it is imperative that something be done before the opening of the school in September, we are having one of our engineers make a thorough investigation and will advise you as soon as his report is received.

July 23, 1937

Dear Sir:-

The Principal of the Old Sun Residential School reports that the motor which operates the Frigidaire burned out a few days ago owing to the failure of the water supply. The motor is water cooled by being connected to the water system in the school.

The motor was shipped to Bruce Robinson Electric of Calgary, Agents for Frigidaire, and they advise that the repairs to the motor will cost \$35.30 plus transportation and advise the purchase of a new motor instead at a price of \$41.00. They also state that motors burned out as badly as that shipped in are not worth repairing. In order to avoid burning out of the motor in future, they suggest installing a Motor Protector Switch at a cost of \$7.50.

I would recommend the purchase of a new motor and Protector as suggested by Bruce Robinson Ltd and ask for authority to make the purchase, please.

Your obedient servant,

Indian Agent.

104-1-5
SCHOOLS
REPORT ON BLACKFOOT AGENCY FOR MONTH OF JULY 1937.

SCHOOLS

All children were on holidays but a few T.B's. and some older girls who remained at school till after Calgary Stampede. Gardens at both schools are irrigated and are good. Old Sun school has a good fodder crop under irrigation. At Crowfoot grain crops were poor and are out for feed; the Principal augmented this by purchasing between 30 and 40 tons of prairie hay and wheat hay from Indians. We allowed this to co-operate, but God Knows, every ton offered is needed and then it will cost \$10.00 to \$15.00 per ton for extra feed for Indian stock. The well at Old Suns was inspected again by an engineer of our Department. The water level is dropping and an auxillary well is needed, I believe. The basement of this school is being repaired. The Chief's are prepared to supply nurses at the schools for the year 1937-38 on condition that they have T.B. experience, are recommended by the Medical Branch and follow the instructions of the Medical Superintendent; all of which is reasonable, I think. The time is near at hand when this should become a Departmental and not a Band obligation.

G. H. Gooderham.
Indian Agent.

R

Sir:-

Re: Voucher No.234 a word is possibly necessary.

The late Mr Orr saw the terrible condition the walls of the boys playroom had gotten into, when he last visited Old Sun School, and wondered what was the real remedy.

This year I took Mr Reid, local carpenter, with Mr Michael, a tinsmith to see it and they offered a suggestion which seemed good. With authority to repair I secured a tender for the work from Reid to do what he suggested and I accepted it and considered it a very low cost.

Its a splendid job and I'll defy the boys to break open the walls again - thats saying a lot. I may add.

The voucher is submitted for payment, please.

Your obedient servant,

G.H. Gooderham.

Indian Agent.

Banff, Alberta.
August 19th, 1937.

Dear Sir: Re: Water Supply, Old Indian School,
 Gleichen, Alberta.

I beg to acknowledge receipt of yours of the 3rd., instant, and in which you request a further report to supplement the report following the inspection of the water supply at Gleichen by Mr. W.H. Snelson.

Some delay has been experienced in getting out the further report, due to the fact that Mr. W.H. Snelson is now on sick leave and for several weeks has been absent, not only from the Banff office, but from Banff itself. As Mr. Snelson is the only engineer in the Engineering and Construction Service who has had an opportunity of looking into this question, I forwarded a copy of your letter of the 3rd instant to him and asked that - if possible - he should supplement his original report. I am quoting below from Mr. Snelson's reply to the above request, and trust this will convey all the information necessary:

"The well at the school was producing, at the time of the test on July 18th, at the rate of slightly less than 3000 gallons per day, and under more favourable rainfall conditions had been producing between 4,000 and 4,500 gallons per day. A well near the Hospital and Agency office, about three-quarters of a mile distant North from the school, is now supplying 5,000 gallons per day to the hospital, offices and other government buildings. While it is impossible to determine the flow that might be obtained from any new well before drilling, it was assumed that the new well would tap the same water-bearing strata that are supplying the two existing wells, as the log of wells drilled in this locality shows in general that water-bearing strata are pierced at 65, 125, and 175 feet. Therefore, if a well were drilled within approximately 100 yards of the present school well and the work properly done, it should produce at least as much as a mean of the two above wells (4,000) or between 3,000 and 5,000 gallons per day. This amount, when added to the flow of the present well, should total between 6,000 and 8,000 gallons per day. The requirement of the school is at present approximately 6,000 gallons per day."

" A tentative site for a new well was selected near the residence of the farm superintendent, some 500 feet west of the present well."

Faithfully yours,
(Sgd.) C.M. Walker.
Supervising Engineer.

T.S. Mills, Esq.,
Chief Engineer,
Engineering & Construction Service,
Ottawa, Ontario.

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 9)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES

- 2 -

Motor and pump head	\$400.00	installed
Small pipe and fittings	125.00	"
6" well casing	150.00	"
Labour drilling well	300.00	
Small building to cover well..	225.00	

Total \$1200.00

It is not anticipated that any further trouble from air-locks will be experienced when both wells are in operation, as the combined flow from the two wells should be between 7,000 and 8,000 gallons per day, while the maximum daily consumption at the school has been placed at 6,000 gallons per day. The "air-locks" of course occurred when the rate of supply of water to the well fell below the discharge capacity of the pump. The pump then "sucked" air, and built up an air-lock in the discharge system.

However, to prevent and relieve any further air-locks in the present well I would recommend the installation of a "cast iron automatic air bent, 1/2", for a working pressure of 1 to 30 pounds", similar to Cranes No. 984. Estimated cost \$10.00. This valve should be attached to the discharge pipe and placed between the pump head outlet and the first check valve.

Faithfully yours,
(Sgd.) C.M. Walker,
Supervising Engineer.

Memorandum:

Dr. McGill

Re: Well, Old Sun Indian
School, Gleichen, Alta.

As indicated in my memorandum of the 29th June, we have had one of our engineers make a thorough investigation of the water supply at the Gleichen Indian School. We have now received reports from our Engineer, of dates July 22nd and August 19th, copies of which are attached.

R

You will note that the recommendation is that a new well should be drilled at a site some 500 feet west of the present well and near the residence of the Farm Superintendent. The total estimate of cost of such work is \$1,200. It is further recommended that an air valve at an estimated cost of \$10.00 be attached to the present well to prevent and relieve any further air locks.

Kindly advise if you can arrange for this amount to be transferred for the above work.

September 7, 1937

Dear Sir:-

Replying to your wire of the 3rd instant re drilling of well at Old Sun Residential School, I wish to say that I visited the school on the 4th; pupils had been back out three days and the water supply had already failed to meet the added demand, therefore, I see no alternative but to drill another well as soon as possible. The water table is not likely to rise - we must anticipate a fall and if it does, the supply will be inadequate this coming winter unless water is rationed.

I located a driller who will operate for \$1.35 per foot and it is my honest opinion that the Department should spend up to \$500.00 in an attempt to get water. It is possible that it may be brought in at less than 200 feet; if it is dry hole at 200 ft. I do not recommend going much deeper. The Town of Gleichen have been unsuccessful in securing water at a lower depth and this is only one mile from the school. When the Town fathers failed to get water for the Town they looked around for old wells and finally connected up with one which has been flowing for many years. The idea is a good one but in the case of Old Sun's, I would recommend the use of the barn well only as a last resort. This well has not a strong flow, but seems to be steady. On analysis, we found that the water contained considerable animal matter and should not be consumed by humans. However, it might be piped to the school and used for cooking as a last resort.

After a well is brought in it is not a big job to connect with the school when necessary. If water is located under 200 feet it will not cost \$1200.00 to complete the connection. First let us get the well. I may say that Mr Fetterly and Mr Shelson were very conscientious in their inspections of the Old Sun's water situation. I believe the demand for an auxiliary supply is urgently needed.

The Secretary,
Indian Affairs Branch
Ottawa, Ont.

Your obedient servant,

Memorandum:

Mr. Wardle

On receipt of your memorandum of the first instant with reference to the water supply at the Old Sun's Residential School, Gleichen, Alberta, the Department wired our Indian Agent at that point.

I enclose for your information a copy of his reply.

As no special provision was made in the current year's appropriation, it is difficult to find funds for any extensive work at Old Sun's School. However, you may expend an amount not exceeding \$500.00 in an endeavour to secure water. If water is not secured by the time this amount is expended, you should let me know if you consider any further expenditure would be justified.

Payment of accounts to an amount of \$500.00 will be made on receipt of vouchers certified by your Engineer.

Memorandum:

Dr. McGill

Re: Water Supply, Old Sun's
Indian Residential School,
Gleichen, Alberta.

In connection with the water supply for the above mentioned Indian Reserve, we have been advised by our Engineer that this well can be drilled to the required depth and also completely cased with 5-5/8" casing within the amount of \$500.00.

In your memorandum of the 16th ultimo you stated that the sum of \$500.00 was available for this work and I should be pleased if you would take the necessary action to have this amount transferred to the Engineering and Construction Service of this Branch who are carrying out the work.

RE: Old Sun School well

Dear Sir:-

Reverting to correspondence and your wire of September last regarding a new well at Old Sun's School, you no doubt know that the services of a driller were secured in October by Mr C.M.Walker, Engineering Branch, Banff to drill. In this, the writer assisted in finding the driller and the location.

I am pleased to report that a reasonably good well has been brought in at 185 feet and the total cost is, I understand \$505.00. I have conferred with the consulting engineer Mr Snelson, and we strongly recommend that a pumping plant be installed and pipes laid to connect with the existing water system. This well will then become the main source of water supply and the old plant the auxilliary.

The present water supply is inadequate and unreliable. We should not go into the winter depending on it alone. I understand that it will cost about \$600.00 for the plant and the connections and sincerely hope you can find the funds to install it.

The Secretary,
Indian Affairs Branch,
Ottawa, Ont.

Your obedient servant,

Indian Agent.

Ottawa, November 10, 1937.

Dear Sir:-

I am in receipt of your letter of November 5th with reference to the water supply at the Old Sun Indian Residential School.

It is noted from the last paragraph of your letter that you estimate the cost of a new pumping plant and connections at \$600.

In order that we may have the necessary information to place before our Purchasing Agent, please let me have full details regarding the equipment that is required. You should state the capacity of the pump that is necessary and any other information that is required to assist the Department in placing an order.

Yours truly,

R.A. Hoey

Memorandum:

Dr. McGill.

Re - Water supply, Old Sun Indian
Residential School, Gleichen.

A report has just been received from my Supervising Engineer in the West that the work of drilling a new well at the above point has been completed with very satisfactory results. Tests show a water supply of more than 4 gallons per minute has been obtained which, combined with the flow from the old well, will give ample supply for the needs of the school.

Our Supervising Engineer points out, however, that there is no pump or other convenient means of supplying water from the new well to the school. This matter has been discussed with the Superintendent of the School and with the Indian Agent at Gleichen and as a result our Engineer recommends that in order to avoid a shortage of water during the coming winter, the purchase of the following equipment be made:-

Electric motor and pump	\$198.00
Cylinder	17.00
Drop pipe and rods	50.00
Electric wiring switch and drop light	21.00
30-gallon pressure tank	23.25
Cartage and installation	25.00
Labour, digging 350 feet of trench and laying connecting pipe	150.00
Small concrete house for pump	125.00
Connecting pipe, 200 ft. of 1½"	50.00
Incidentals, valves, strainer, etc.	40.75
Total -	<u>\$700.00</u>

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 9)

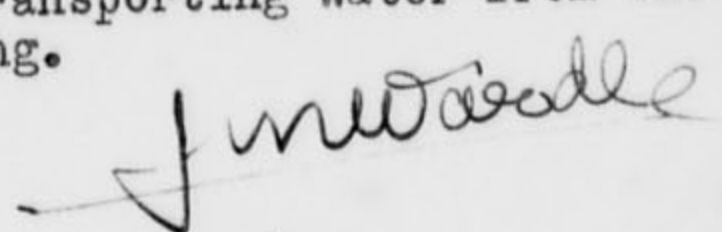

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

- 2 -

You will note that the above estimate of \$700 covers installation. You might kindly advise if funds can be made available to cover this work.

No report as to the cost of drilling the new well has yet been received but it is likely that the greater portion of the \$500 made available has been expended.

If funds for the above equipment are not available, enquiry will be made as to whether or not an ordinary hand-pump fully insulated from frost would be of use. This would involve transporting water from the new well to the school building.

Director.

Dear Sir:-

In answer to yours of the 10th instant re Water supply at the Old Sun's School, I beg to say that I discussed this matter with Mr Snelson today and he advises me that he is writing his Branch Head (Engineering) to give you the details regarding equipment to be purchased.

Mr Snelson was the inspecting engineer on the drilling of the well and he has secured prices on all equipment necessary from firms in Calgary. I recommended a plant similar to that in use at this Agency. It is a Delco. I understand that about 150 feet of 4" pipe is on hand at the school and can be used. I am sure Mr Snelson will give all necessary details. You should get this information immediately.

November 16, 1937.

Dear Sir:-

Prior to the drilling of the well at Old Sun Residential School, the engineering Department from Banff purchased an automatic air vent which was installed on the existing water plant. Frequently, the system became airlocked and the water supply was cut off until the services of a steam fitter and the school crew released the air by raising the pipes. Since the installation, this air locking has ceased.

The Engineering Branch have no funds to pay for this equipment so I agreed to submit this voucher. I recommend payment from the proper funds.

Your obedient servant,

Indian Agent.

Blackfoot Agency, April 1938.

Sir:

I beg to submit herewith the following report
for the month of April 1938.

x

x

x

At Old Suns, the old pumping plant quit, and is not worth repairing as parts are expensive and this type is obsolete and of foreign make. There was a water shortage and on investigation I found that the water cooled engine, operating the refrigerator, took 1000 gallons of water per day to cool it and then the water ran into the sewer. Is it not wonderful economy to dig a well and put in a pumping plant, which supplies little more water than it requires to cool a 3 H.P. engine. It should be replaced of course, by an oil bath engine. To supply the bare necessities, the refrigerator is shut off part time and hose from the water cooled engine and also from the barn well, where a borrowed pressure tank is installed, augment the water supplied from the plant installed in 1937, and gives the institution sufficient for the present. The old well should be cleaned and if there is then a fairly good supply of water, a Delco plant should replace the obsolete one. This will be a summer holiday job. We ploughed some land for this school with an engine outfit, as they are low on horses. Here's hoping the church has a prosperous year and funds to equip themselves.

RE: Old Sun's Refrigerator Plant

Dear Sir:-

At the Old Sun Residential School a water cooled compressor was installed to operate the Frigidaire. This was installed when the School was erected and equipped.

Recently, one of the plants which supply water to this institution gave out and temporary measures were necessary to get sufficient to meet dire needs. Among other things, we looked at the refrigerator compressor where water was used and wasted into a drain. On a test we found that this compressor used between 900 and 1000 gallons every day. That is a terrible lot of water when it is so scarce and when the cost of power to pump it is so high. It is bad business.

I consulted Bruce Robinson Electric Ltd of Calgary Provincial Agents for Frigidaire and am advised that the water cooled compressor can be changed for an air-cooled compressor and installed for about \$65.00. I beg to recommend that the change be made.

Your obedient servant,

Ottawa,
May 17, 1938.

Dear Sir:

I am in receipt of your letter of the 12th instant recommending the installation of a new air-cooled compressor in the frigidaire equipment at the Old Sun's Residential School.

New purchasing regulations require that any articles costing over \$50.00 must be secured through the office of the Purchasing Agent. It will, therefore, be necessary for you to forward me full details regarding the compressor and if possible state the name of the firm by which this is manufactured and the catalogue number. When this is received I will recommend that the Purchasing Agent secure it.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

June 1st. 1938

Dear Sir:-

The Old Sun Residential School has been carrying on with a rationed supply of water since the middle of April. The old well and the plant which has been in use for some years, gave out. The cost of repairing the plant will be considerable and, in our opinion, is not justified. It is of obsolete type.

We believe the well is still good if cleaned out, and it is our recommendation that it be cleaned and if the water supply is satisfactory, that a Delco Plant be installed to replace the old plant which is little more than scrap.

The only reliable driller in these parts is Myers Rasmussen and he is prepared to clean out the well for the sum of Seventy Five Dollars. We think the well has filled in from 30' to 40' with silt and sand, and as there is a small brick building over the well, it will not be an easy job to clean it. Rasmussen's offer is reasonable. Would authority be granted to do this work?

Your obedient servant,

Indian Agent.

104-1-5

EX'D.

Ottawa,
June 7, 1938.

Dear Sir:

With reference to your letter of the 1st instant you may incur an expenditure not exceeding \$75.00 in cleaning the well at the Old Sun's Indian Residential School. In connection with this school I may say that in the current year's appropriation an amount of \$750.00 was provided for repairs, improvements and purchase of new equipment. Owing to the present set up of our appropriation it is practically impossible for us to exceed the amount specifically provided.

Recently we placed an order for an air-cooled compressor for the frigidaire. The approximate cost of this is \$65.00 and this amount, together with the cost of cleaning the well, will have to be deducted from the amount provided. This leaves a balance of \$610.00 which amount is all that we can expend during the current fiscal year at the Old Sun's School for repairs, improvements and new equipment.

You might consult the Principal and if it is necessary to expend this amount you should supply full particulars regarding what you consider is most necessary. In the event of any equipment or material being required full particulars should be given in order that the matter may be placed before our Purchasing Agent.

Yours truly,

G. H. Gooderham, Esq.,
Indian Agent,
Gleichen, Alta.

Dear Sir:-

I have to report that the main chimney on Old Suns School was struck by lightning about midnight on the 18th inst. The damage appears to be slight and confined to coping and some bricks at the top.

The Newark Insurance Company have been advised as this Company has insured the building. It is hoped that the policy covers loss from lightning, and if so, we will see that they make the necessary repairs.

Your obedient servant,

G. H. Gooderham,

OFFICE OF THE
INDIAN AGENT

CANADA
DEPARTMENT
OF
MINES AND RESOURCES
INDIAN AFFAIRS BRANCH

PLEASE QUOTE
FILE

Gleichen, August 6th, 1938.

The Secretary,
Indian Affairs Branch,
Department Mines & Resources,
Ottawa, Ontario.

Dear Sir;- Attention Schools section.

At the Old Suns Residential Boarding School there are three things that should be attended to right away i.e.

1. the installation of a pumping plant in the well which was recently cleaned out.
2. the repair of the hot water boiler which is leaking badly and
3. the rebuilding of the root cellar which has caved in.

In regard to the pumping plant, correspondence with you will indicate the difficulties encountered in securing sufficient water for this institution. We are now satisfied with the water supply and believe which does not pump over 3 gallons per minute will not draw too heavily on this well and will be sufficient, since a similar unit operates in a well drilled in 1937. The total supply for the two wells would be in the neighborhood of 5 gallons per minute and that is a lot of water per day. The local plumber, L. Michael, has kindly assisted us in compiling the bill of material required for this system and same is attached hereto with estimate of labor costs. Mr. Michael is the local agent for Bruce Robinson, Calgary, general agents for General Motors products.

2. Re the upright heating boiler, 50 flues are leaking badly and must be rolled and beaded. Mr. Michael has offered to do this for \$25.00 and I recommend acceptance; he does finished work.

3. A root house was built some years ago from old lumber and fence posts. Most of it rotted and

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 9)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

-2-

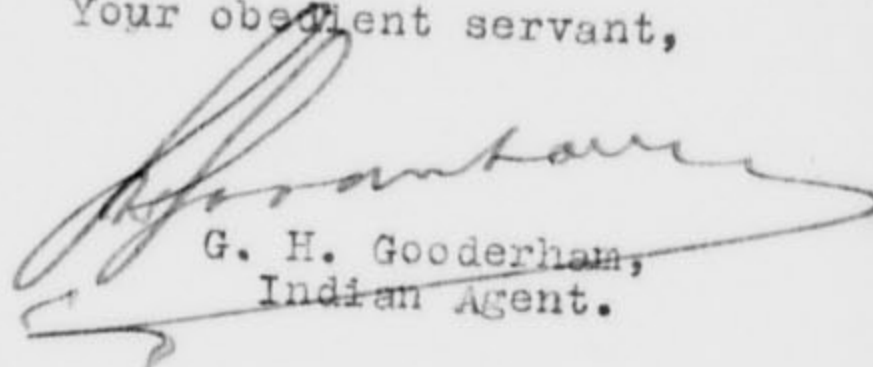

caved in this year. Needless to say a frost proof cellar is needed. The Principal removed the top and will require some new material to rebuild it.

There is only one Lumber yard in this district, the Crown at Gleichen. Attached is a bill of material. The cost if purchased from the Crown Lumber Company will be \$52.45.

The Principal of the School has just returned from holidays and after consulting with him and keeping in mind that the appropriation for this school is limited, we ask that the foregoing be approved.

It is hoped that there will be little delay. The water plant and boiler will be needed when the school opens in September.

Your obedient servant,

G. H. Gooderham,
Indian Agent.

Ottawa,
August 13, 1938.

Dear Sir:

With reference to your letter of the 6th instant you may expend an amount of \$25.00 in rolling and beading the flues in the upright heating boiler at the Old Sun Indian Residential School.

I am requesting the Purchasing Agent to secure the material required for repairing the pumping plant, also the lumber for the repairs to the root house.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

Ottawa, September 14th, 1938.

Sir:-

The Department carries an insurance of \$80,000.00 on the Old Sun Residential School the expiry date of which is October 1st.

I have to ask that you please have a new policy issued through the office of Mr. T. H. Beach of Gleichen, Alta. The policy should be made to read that in the event of loss by fire payment is to be made to: "Indian Affairs Branch, Department of Mines & Resources".

In order that you may be guided thereby I am enclosing the present policy, No.47365, and would ask that you please return it with the new policy. You should also submit Mr. Beach's account for the premium in triplicate under cover of your vouchers completed in the usual manner.

Yours truly,

George Patrick,
for Chief, Trusts & Annuities.

RE: Old Sun School - CHIMNEY

Dear Sir:-

During a thunderstorm in the month of JULY last, the chimney at Old Sun Residential School was damaged by lightning. The Newark Fire Insurance Company of Calgary carry Fire Insurance on the building and the adjusters arranged to repair the damage. (Receipt)

I attach hereto cheque for the sum of \$120.00 payable to the Deputy Superintendent General to cover the cost of the repairs and I also attach Voucher #270 in favour of Cliff. Fleury, Bricklayer, Gleichen, Alta. for the sum of \$120.00 who repaired the chimney. For your attention, please.

Please mail the cheque direct to me.

Dear Sir: Attention: Schools Section

May I be permitted to draw your attention to my letter of August 6th, file 12, in regard to the installation of a pumping plant at the well of the Old Sun Residential School.

School has re-opened, and to date no order has reached here for this new plant. The School must ration water until such time as a plant is placed over this well.

It would be appreciated if this could be rushed.

Your obedient servant,

G. L. Gooderham,
Indian Agent.

1	Deleo pumping unit 1 h.p. motor mfd. by General Motors				\$ 198.00
180	Ft. rod				18.00
180	Ft. galv. pipe 1"				36.00
1	Cylinder 4 leather Vall valve open type closed 2"				16.80
1	Gate valve 2"				7.50
1	Gate valve 1"				1.75
1	Tee 2 x 2 x 1"				1.10
3	Nipples 2"				.60
4	Nipples 1"				.60
1	Bushing 4" to 1"				1.90

Note: The Indian Agent obtained the above prices from the local plumber L. Michael, Gleichen, Alta. who is the local agent for Bruce Robinson, Calgary, general agents for General Motors products. The Agent considers the above quoted prices reasonable and recommends acceptance of Mr. Michael's quotation. Articles listed on this requisition should be purchased immediately in order that the pumping plant will be in condition when the school opens on September 1. While the material should be shipped to the Principal the account should be forwarded to G. H. Gooderham, Indian Agent, Gleichen, Alta.

I hereby certify that I have personal knowledge that all the above articles are required in the Department and for Departmental purposes only. The expenditure required by this requisition is strictly unavoidable and the public interest will suffer if it is not made.

Memorandum:

MR. BAILEY

Re: Our purchase requisition
May 31 and your order No. 5356

You will note that the order specified that the cost of the compressor was not to exceed \$65.00. However, in installing this compressor it was found necessary to incur an additional expenditure and as a result the account amounts to \$68.15.

I should appreciate it if you would issue an amended purchase order in order that we may pay the account which is attached.

Dear Sir:-

Re: Voucher 270 A

In August last Mr. Cliff Fleury repaired the chimney at Old Sun Residential School after it had been damaged by lightning during a storm. Fleury informs me that he has not yet received payment for this work and would like to know when he may expect payment. Would you please check this up?

AUDITOR GENERAL
CANADA

Ottawa, February 4, 1939.

Dear Sir,

Old Sun Residential School
Indian Affairs Branch

Cheque 5176 was issued on October 1, 1938, to T. H. Beach in payment of an insurance premium of \$680.00 on the Old Sun Residential School and was charged to the Blackfoot Band Trust Account No. 138, the school being insured at \$80,000, a portion of its total value.

This building was constructed by the Department of Indian Affairs in the fiscal year 1929-30 at a cost of approximately \$155,000. At the time it was found that the amount set aside in the Parliamentary Appropriations of that year was not sufficient to carry the school to completion, and so under the circumstances the Blackfoot Band agreed to loan the Crown \$80,000 from their Capital Funds under Section 93 of the Indian Act. The loan was approved by Order in Council 207 dated January 29, 1930, and reads in part as follows:-

"The Minister states that it is proposed that this amount should be refunded to the band within the next two fiscal years in conformity with the department's policy that all cost of Indian Education should be defrayed from public funds."

To date the loan has not been repaid and reference has been made to it in various letters relating to the audit of revenue and verification of cash.

I would be pleased, however, to learn why insurance is carried on this apparently government owned building, since the Department considers the \$80,000 a responsibility of the Crown. Also in the event of the destruction of the building by fire would the Band be entitled to the insurance and the repayment of the loan?

Yours truly,

(Sgd) Geo. Gonthier

Auditor General.

Charles Camsel, Esq.,
Deputy Minister,
Dept. of Mines and Resources,
OTTAWA.

EXD.

Ottawa, February 11, 1939.

Dear Sir:

In reply to your letter of February 4th, I wish to advise you that the insurance carried on the Old Sun Residential School, Blackfoot Reserve, was placed in 1933 for the purpose of protecting the equity of the band in the building after the term of the loan had expired without repayment having been made and no immediate prospects of funds being made available to do so.

In the event of the building being destroyed by fire, it is considered that the band would be entitled to receive the insurance or repayment on the loan, but certainly not both.

Yours truly,

Deputy Minister.

Memorandum:

DEPUTY MINISTER:

Re - Old Sun Indian Residential School

You are probably aware that when the Old Sun C. E. Residential School, on the Blackfoot reserve, Alberta, was destroyed by fire in June, 1928, it was impossible, owing to the limited appropriation set apart for the project, to rebuild at that time until the Blackfoot Indians consented to loan to the Crown \$80,000 from their Interest Account to enable the work to proceed. The Department contributed \$40,000 toward the construction of the new building. The present school was constructed by the Department during the fiscal year 1929-30.

The loan secured from the Blackfoot Band was approved by Order in Council 207 dated January 29, 1930, and reads in part as follows:

"The Minister states that it is proposed that this amount should be refunded to the Band within the next two fiscal years in conformity with the Department's policy that all cost of Indian Education should be defrayed from public funds".

To date this loan has not been repaid although the desirability of making repayment has come up for discussion on more than one occasion during the last two or three years. I am anxious therefore that consideration should be given this year to the desirability of providing in the supplementary estimates now under consideration the sum necessary to meet this obligation in full.

EXD.

Dear Sir:-

Re attached Voucher No. 625, in favor of L. Michael, for work done at Old Sun Residential School, this is to advise you that the work and material were necessary to keep the plant operating.

Owing to sand formations which were difficult to counteract in one of the wells supplying water to the school it was necessary to replace a plunger and belting to keep it in operation. It was also necessary to stop steam from leaking from a heating boiler which has been in operation since the school was erected.

This Voucher is submitted because it is felt that this is something that should be paid by the Department.

Your obedient servant,

G. H. Gooderham,
Indian Agent.

Attention: Education Branch

Dear Sir:

Re: Old Sun School

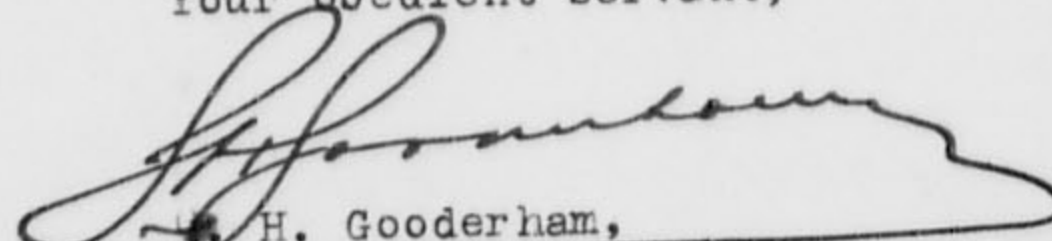

Roof drains on the flat tar and gravel roof of this institution have commenced to leak and will destroy plaster if not attended to immediately. There are three copper roof connections now leaking, which is due to corrosion caused by sewer gas as they are connected with the sewage system.

The cost to replace the copper connections and to repair the flashing which in recent high winds has been loosened and ripped off in places, will, according to Mr. Michael, Gleichen plumber, total \$58.60.

Last year the main chimney of this institution was hit by lightning and the falling brick apparently damaged a space about 20 x 30 of the tar and gravel roof over the chapel. The cost of repairing the chimney was borne by the Insurance Company who carried this risk, but the writer failed to note this particular damage and it must now, therefore, be attended to. To re-tar and gravel will cost about \$34.00.

Would authority be given to incur the foregoing expenditures, which should be attended to immediately to avoid further damage?

Your obedient servant,

H. Gooderham,
Indian Agent.

The Secretary,
Indian Affairs Branch,
Department Mines & Resources,
OTTAWA, Ontario.

Attention: Supt. Welfare and Training

Dear Sir:

W
Attached hereto is a copy of a letter addressed to myself by the Principal of the Old Sun Residential School in which he sets forth in detail the immediate requirements at his institution which include paint and renewals for taps, showers and toilet flush systems.

It is not known here what the authorized expenditure allowance for this school is for the present fiscal year; however, these items represent the immediate requirements which, undoubtedly, will not amount to the funds made available for work at this school.

As considerable of this work must be done before school reopens, it would be appreciated if authority could be rushed.

Your obedient servant,

G. H. Seoderham

C O P Y

Old Sun School, Gleichen,
July 18th, 1939.

Mr. Gooderham,
Indian Agent.

Dear Mr. Gooderham:

At last I have a complete list of the things urgently needed from the Department: They fall into two classes: 1. Paint; 2. Renewals for taps, showers and toilet flush systems.

With regard to No. 1 (Paint) the majority is to be used for retouching playrooms and dormitories and classrooms which have one coat of paint already. That means I must have the same kind as is already on the walls or the whole room will have to be redecorated. No two firms seem to manufacture the same tints so we must have "Bapco" Satin Glo. You can see the force of this when I state that there are over 170,000 Sq. feet of paint surface in this school and the school management cannot possibly hope to do more than renovate the more necessary parts each year. I am stating the amount of paint required with the prices quoted by the B. A. head office in Calgary.

B.A. Satin Glo

Inside white	10 gals.	32.50
Ivory	15 gals.	48.75
White enamel	2 gals.	7.50
Russet Brown	3 gals.	8.70
Outside green	5 gals.	14.50
French grey	2 gals.	6.50
Turpentine	5 gals.	4.50
Linseed Oil	5 gals.	5.00
Long hair paint brushes	2 - 4 in.	.70
Chisel pointed brushes	2 - 1 in.	.70
Containers		2.00
		138.15

With regard to No. 2: Our water has a peculiar corrosive action on all metal work. This is particularly evident in taps and toilets which are continually in use. The seats of practically all our taps in the childrens wash-rooms are now gone beyond repair. We have reseated them so many times that there is now no seat left. The only remedy now is to replace them. The same thing has happened with

Indian Affairs. School Files.
(RG 10, Volume 6360, File 758-5, part 10)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

our closet flush systems and showerbaths. I am asking for parts which will put them in shape again. These have all been in continuous use for ten years without spending money on them so it is time they were thoroughly renovated.

The one toilet bowl has become so rough that it will not flush. The sets of pump belts are necessary for renewals for the pump installed last year. Sand finds its way up from the well and cuts them to pieces. We seem to require two a year. The following is the list of requirements with prices quoted by Mr. L. Michael:

Syphon jet bowl	1	\$ 9.70
Toilet supply pipe 5½ ft.	3	21.54
Toilet supply pipe 2 in.	3	4.50
Ells N. P. 2 x 1½	3	3.90
Slip nuts 1½	6	2.28
Slip nuts 2 "	3	1.92
Open front closet seats	3	14.07
Brackets 12½ high	3	6.25
Pull chain	1	1.05
Elevated ball cock, complete	6	18.84
Ball cocks complete	6	20.10
Double bath cocks, complete	6	23.40
Flush balls and stems	6	3.00
Bath waste & overflow (Crane)	3	11.31
Hose bibs S.N.P.	6	7.14
Hose bibs L.N.P.	4	7.00
Ells ½" galvanized	8	1.20
Tees ½" galvancised	2	.40
Com. Stops N.P.	6	8.25
Assorted nipples	18	1.80
Self closing taps	28	132.44
Reseating machine	1	20.00
<u>For Pump</u>		
Sets of belts	2	18.00
Weather edge washers	6	.90
<u>For boilers</u>		
Asbestos cement	2bags	8.00
Flue brush 2"	1	1.10
Labour for technical parts		25.00
Total		372.09

July 31, 1939.

Dear Sir:

In writing to you on the 27th instant in reply to your letter of the 22nd instant I neglected to state that the amount provided in the current year's appropriation for repairs, improvements and purchase of new equipment at the Old Sun residential school was \$600.00. The expenditures already authorized and the purchases that are now being made by the Purchasing Branch will exhaust the total amount provided. Under these circumstances it will not be possible to consider further requests from this school during the current fiscal year.

Yours truly,

Philip Phelan,
Chief, Training Division.

Memorandum:

Mr. Hoey.

With reference to your requisition of the 27th ultimo, file No. 104-1-5, covering supplies for repairing the Old Sun Indian Residential School at Gleichen, Alberta, kindly request the Indian Agent to secure a quotation from Mr. R. W. Snyder, of Gleichen, in addition to that which he has already secured from Mr. L. Michael, of the same place, and to submit the original copies of the tenders to this office via air mail.

If for any reason Mr. Michael is not in a position to quote, competitive prices should be obtained from some other approved source of supply.

Upon receipt of this information, I shall be pleased to arrange for the prompt placing of the order.

W. M. Bailey.
Departmental Purchasing Agent.

104-1-5-

Attention: Superintendent, Welfare & Training

Dear Sir:

Re: Old Sun Residential Boarding
School; Blackfoot. Your 104-1-5.

Large doors on the hay loft of the school barn have broken away from the trackage and it will be necessary to set them on new trackage, with new trolleys, pullies and cables of a very much stronger type than formerly in use. These doors are very large and heavy and in this country where winds are so high it is always found difficult to keep them in order. The estimated cost for material and labor is \$55.00, of which only \$10.00 is labor. Could immediate authority be given to have these repaired, please?

Referring back to our letter of July 22nd, you will note that there was an item in the list of required materials and repairs submitted by the Principal of the school for repairs to outside door frames on the main building. The writer inspected these the other day and finds that these heavy doors have pulled clear of their frames and in fact one door has been taken off. The cost to replace and fix them in such a manner that they will be reasonably firm is \$15.00. Authority to get these frames fixed as soon as possible is also required. You failed to mention this in your letter of July 27th.

Your obedient servant,

A. H. Gooderham,
Indian Agent.

The Secretary,
Indian Affairs Branch,
Department of Mines & Resources,
O T T A W A, Ontario.

Re: Old Sun Indian Residential School

Dear Sir:

I desire to acknowledge receipt of your letter of the 17th instant, in which you seek authority to expend a sum not exceeding \$55.00 on the repair of the large doors on the hayloft of the barn at the Old Sun School. You are authorized to proceed with the repair of these doors, at a cost not to exceed the figure quoted.

You are also authorized to expend a sum not exceeding \$15.00 on the repair of the doors of the main building.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

G. H. Gooderham, Esq.,

Dear Sir:

File: 104-1-5

Further to our correspondence re paint required at the Old Sun Boarding School and your letter of the 27th of July, the Principal of the school is very anxious to get the paint as soon as possible. It is noted that the Purchasing Agent has been requested to secure this; if there is any way that this can be rushed, or if you could advise us, by wire, where the order has been placed the Reverend Mr. House would immediately get the paint.

He should get a lot of this work done before school opens in September.

Your obedient servant,

G. H. Gooderham,
Indian Agent.

AIR MAIL

Attention: Supt. Welfare & Training

Dear Sir:

Referring to yours of the 26th, 104-1-5, and Departmental Purchasing Agent's memorandum 29260-15-2, Alta., of August 19th, I beg to advise that R. W. Snyder is no longer in Gleichen and has, so far as we know, no place of business. We are informed that he is working for a plumber in the town of Cardston, Alta.

There are no other plumbers or firms selling plumber's supplies, except L. Michael of Gleichen, nearer than Calgary, and on referring to the Calgary list it is noticed that Marshall-Wells and Bell & Morris should be in a position to give us a price and make delivery immediately, as they are wholesale houses.

We will await your further instructions before asking for competitive prices on the plumbing material required at the Old Sun Residential School.

Your obedient servant,

J. H. Gooderham,
Indian Agent.

The Secretary,
Indian Affairs Branch,
Department of Mines & Resources,

Sir:

Reference your No. 104-1-5 of the 31st ultimo, I beg to forward herewith original tenders on the paint required for Old Sun Residential School, Blackfoot Agency.

Mr. Schmidt is at present absent from the office, on holidays, and I hesitate to place the order in view of the remarks contained in the following letter received from the Indian Agent, Mr. G. H. Gooderham:

"B-12

Gleichen, Aug. 30, 1939.

"Dear Sir:

" In confirmation of your instructions, tenders for paint, &c., for Old Sun School, Gleichen, were called from the following firms:

Alberta Paint & Glass Co.
F. G. Stephens & Co.
Sherwin Williams Co.
British American Paint Co.

" The Principal of the school, Mr. House, insists that he will not use anything but Satin-glo paint! However, I advised him that I had to call for the tenders and if the Bapco Company were not the lowest there was nothing more that I could do, as far as I could see.

Your obedient servant,

(Sgd.) "GEO. H. GOODERHAM,"

Indian Agent.

For your information and instructions, please.

Your obedient servant,

The Secretary,
Indian Affairs Branch,
O T T A W A .

C. Pant. Schmidt,
Inspector of Indian Agencies,
Alberta, Inspectorate.

Memorandum:

MR. BAILEY

With reference to your memorandum of August 19 (file 29260-15-3 Alta.) I attach quotations received by the Indian Agent from L. Michael, Bell and Morris and Marshall Wells Limited with reference to supplies required at the Old Sun Indian residential school.

The Indian Agent advises that Mr. R. W. Snyder is no longer located at Gleichen and so far as the Indian Agent knows has no place of business at the present time.

The Indian Agent placed the business with the lowest tenderer, Bell and Morris, and when the account is received I will forward it to you for purchase order.

DEPARTMENT OF MINES AND RESOURCES

● REQUISITION FOR SUPPLIES

19

To The Departmental Purchasing Agent, Ottawa,

PLEASE FURNISH THE FOLLOWING SUPPLIES FOR USE OF

VOTE Allotment

SHIP TO

Purpose for which required

NOTE:—Requisition for non-consumable equipment, state if New Issue or Replacement.
“ consumable equipment and supplies use columns 1 and 2.

Quantity	Page 2	Quantity on hand (1)	Quantity used per month (2)	Unit Price	TOTAL
18	Assorted nipples				
28	Self closing taps				
1	Reseating machine				
Note: Without being requested to do so the Principal secured a quotation of \$319.09 on the above material from Mr. L. Michael, Gleichen, Alta. With regard to the necessity of purchasing the above the Principal writes that the water has a peculiar corrosive action on all metal work. This is particularly evident in taps and toilets which are continually in use. Practically all the taps in the children's wash rooms are now gone beyond repair and the only remedy is to replace them. The parts requested above will put everything in good condition. Those that are worn out have been in continuous use for 10 years. As the installation of the above equipment should be made during the summer holidays while the pupils are absent from the school it would be appreciated if this order were placed immediately.					

I hereby certify that I have personal knowledge that all the above articles are required in the Department and for Departmental purposes only. The expenditure required by this requisition is strictly unavoidable and the public interest will suffer if it is not made.

SCHOOLS

Both schools were inspected and all seemed to be running smoothly. The children were well and happy. Fire protection has been given special consideration. At the Old Sun School all is satisfactory but the escapes at the Crowfoot school are being made more accessible by putting in a fire door where access was formerly gained by windows.
